Mr. Speaker, I reserve the balance of my time.

Mr. ROYCE. Mr. Speaker, I yield 3 minutes to the gentleman from Arizona (Mr. FLAKE).

Mr. FLAKE. Mr. Speaker, I thank the gentleman for yielding time to me.

I want to thank the Committee on International Relations, and particularly the gentleman from California (Mr. ROYCE), for bringing this issue to the fore, Mr. Speaker, and for fighting for its adoption. I want to applaud the committee for improving the document as it went forward into a bill that we can all support.

Mr. Speaker, I had the great privilege in the early 1980s of spending time in Zimbabwe just soon after the transition to independence. There was great hope at that point. The people had hoped that the rule of law and democracy would flourish and take hold.

Twenty years later, that has not been the case. We have a brutal dictator there who simply does not want to give up power. He does not want to assent to the rule and to the will of the people.

That is unfortunate. With this legislation we hope, and the purpose of it is, to help those forces in Zimbabwe who want to bring back democracy and the rule of law.

Mr. Speaker, I want to caution my colleagues, all of us, to avoid the kind of drive-by diplomacy that often characterizes our action in Africa and other third world countries, when we will pay attention when the issue is hot; and then after a successor regime comes in, we forget about the country and move on, sometimes leaving sanctions in place or other items that the successor regime has to work out of.

I hope we do not do that. I am pleased that this bill is not a sanction bill; that it seeks to target individuals, rather than target trade in general.

Mr. Speaker, I look forward one day soon to saying to the people of Zimbabwe, *coda ko tu*, which means in Shona, congratulations; congratulations on a return to free and fair elections and on their return to the rule of law.

Mr. LANTOS. Mr. Speaker, I am delighted to yield such time as he may consume to our distinguished colleague, the gentleman from New Jersey

(Mr. PAYNE), who probably has more experience in this part of the world than any of us, and has been a leader on this issue.

Mr. PAYNE. I thank the gentleman for yielding time to me, Mr. Speaker.

Let me once again commend the gentleman from California (Mr. ROYCE), the chairman of the subcommittee, and the gentleman from Illinois (Mr. HYDE), who brought this before the full committee, and as I indicated, the leadership of the gentleman from California (Mr. LANTOS) on Committee on International Relations, on which he has served for so many years.

Mr. Speaker, Zimbabwe is one of the most important countries in Africa. Many of us remember the people of Zimbabwe's courageous struggle for independence that took many years of fighting with Mr. Nkomo and Mr. Mugabe and others.

As I recently said in a letter to President Mugabe, indeed, post-independence Zimbabwe clearly demonstrates much of the best of Africa and what Africans are capable of doing, despite decades of repressive white rule, as we saw in Rhodesia, by Ian Smith's government.

After independence, white Zimbabweans were embraced, not chased out of the country, nor mistreated, as many cynics predicted would happen. Human rights were largely respected and the rule of law prevailed across the country.

Mr. Speaker, Zimbabwe has long been a model country with a stable government, a good educational system, and a modern economy. But in recent years, conditions have gone from bad to worse, in large part due to poor leadership. The economy is in shambles, human rights abuses are extensive, and there seems to be little respect for the rule of law. The once vibrant independent press is under intense pressure, and the independence of the judiciary has been compromised due to intrusive government actions.

The United States is not the only government concerned about the deteriorating situation in Zimbabwe. According to an article in today's New York Times, several neighboring countries, including South Africa and Botswana, have expressed their frustrations with the government of Zimbabwe's obstructionist behavior.

The Zimbabwe Democracy and Economic Recovery Act is a small effort on our part to help bring much needed stability to Zimbabwe. Why this legislation now and why Zimbabwe? Simple: Zimbabwe is too important to ignore, and the legislation offers a credible policy option to deal with the challenges that face Zimbabwe today.

Unfortunately, the situation in Zimbabwe is deteriorating by the day. Dozens of people have been killed, the rule of law is nonexistent, and authoritarian tendencies have reached a very dangerous level.

I strongly believe it is in our interests and in the interests of Zimbabwe and Africa not to allow another African country to go down this way.

□ 1515

Instability in Zimbabwe threatens the entire sub-region of southern Africa. We cannot afford to have another Somalia in southern Africa.

Mr. Speaker, some people have deliberately portrayed this legislation as punitive, and sanction legislation. They are dead wrong. What are the key objectives? Simply put, Zimbabwe Democracy and Economic Recovery Act has three key objectives. One, a just and equitable land reform, consistent with the rule of law. Two, a conducive environment for free and fair elections. And, three, the respect for human rights and the rule of law.

Mr. Speaker, if the above conditions are met by the Government of Zimbabwe, the legislation, one, authorizes \$20 million for land reform, and an additional \$6 million to promote democracy. Two, it will assist in debt relief. Three, it will support lifting of restrictions by the IMF and the World Bank. Fourth, we would urge our country to have AGOA, the Africa Growth and Opportunity Act, introduced in Zimbabwe.

So this is a bill to say let us have transparent elections. Let us allow the rule of law. Let us let the independent parties have their platform told. And by doing that we will embrace and we will move Zimbabwe back.

Mr. Speaker, this is a good bill that will go a long way in strengthening our ties with the people of Zimbabwe who truly deserve our support. We must be steadfast in our commitment to the people of Zimbabwe. We should not and must not turn a blind eye to abuses in Zimbabwe, and therefore I urge all of my colleagues to support this legislation.

Mr. ROYCE. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana (Mr. COOKSEY).

Mr. COOKSEY. Mr. Speaker, I would like to echo the remarks of my friend, the gentleman from New Jersey (Mr. PAYNE). I feel that he knows more and has done more than probably most anyone else in this body for the people of Africa. He has been there many times. He knows it well and he has worked hard.

The chairman of the subcommittee, the gentleman from California (Mr. ROYCE) has worked equally hard and, I feel, been equally effective.

What does this bill call for? This bill calls for support of democratic institutions. It calls for a free press and independent media. And yes, it calls for the rule of law, including private property rights. These seem like simple expectations, but yet they would be major, major advances for the people of Zimbabwe.

What does this bill offer? What does it threaten? First, there are no sanctions involved. There is the offer of debt relief and there is the offer of aid for land reform if the people of Zimbabwe, if the Government of Zimbabwe is able to carry out these changes.

Land reform seems to be the major issue. I appreciate those calling for land reform and I agree that land reform is the key to Zimbabwe's future. But why has land reform not worked in Zimbabwe? Basically Mugabe has essentially stolen the money that he had that had been given to this country to carry out land reform. He distributes the land that has already been purchased, purchased with international money in many cases, a major portion of it from the U.K., and there were countries lined up in 1998 to give a major amount of money to this country. But Zimbabwe under the leadership of Mugabe has given this land, the money, to his political cronies, to the fat cats, to the generals, to his political supporters. He distributes the land that has already been purchased to his allies and not to the people of Zimbabwe who need it. Even Mugabe's fellow African leaders recognize that Mugabe's policies are the reason that land reform has not worked.

Mugabe was an important leader but he stayed too long. He now cares solely for his own power, not for the welfare of his people. But he is resorting to violence to hold onto his own power. The time for such dictators has passed.

There are neighboring countries, Botswana, South Africa, Malawi, all of whom have democratic institutions, free press and the rule of law.

Mr. LANTOS. Mr. Speaker, I yield back the balance of my time.

Mr. ROYCE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in closing, what a depressing contrast between Zimbabwe's Robert Mugabe and South Africa's Nelson Mandela. President Mandela prized democracy. He prized the rule of law. He stepped down from power when people were telling him he was a king. He brought races together. And we contrast that with the situation where President Mugabe threatens his political opponents with death.

What we have in Zimbabwe is a man who sends his operatives to terrorize teachers, to terrorize teachers because they are the poll guards basically, they are the individuals who do the monitoring of the elections; to terrorize the doctors, and to terrorize others working for a better future.

A recent Zimbabwe Catholic Bishops' Conference Pastoral letter noted, "Violence, intimidation, and threats are the tools of failed politicians." They are the dastardly tools of the men now ruling Zimbabwe.

The political opposition in Zimbabwe deserves credit for remaining peaceful

in the face of violence. For years now, its members have been beaten, they have been tortured, they have been killed; and they have resisted going on an offensive throughout this. Their discipline will be further tested in the coming months as the Mugabe regime provokes unrest to legitimize canceling the elections.

I hope that the political opposition remain steadfastly committed to non-violence. I have great confidence in the brave Zimbabweans who are struggling against tyranny so that their country can begin to reach its potential.

The legislation we are considering today lays a foundation for the U.S. to contribute to that future, and I ask that my colleagues support Senate bill 494.

Mr. BEREUTER. Mr. Speaker, this Member rises in strong support of S. 494, the Zimbabwe Democracy and Economic Recovery Act of 2001. This Member would like to thank the Chairman of the House International Relations Committee, the distinguished gentleman from Illinois (Mr. HYDE), for bringing this measure to the Floor expeditiously after the Committee's consideration of it. In addition, this Member would like to thank the Chairman of the House Financial Services Committee, the distinguished gentleman from Ohio (Mr. OXLEY) for his supportive role in this legislation. This Member also appreciates the Chairman of the International Relations Subcommittee on Africa, the distinguished gentleman from California (Mr. ROYCE), for his longstanding dedication to following U.S. foreign policy toward Africa. Indeed, there are few Members in this Body who can have so convincingly outlined the horrific atrocities which Zimbabwe's President Robert Mugabe has committed against the people of Zimbabwe.

The Zimbabwe Democracy and Economic Recovery Act of 2001 sets up a Presidential certification process for Zimbabwe which is contingent upon the following: restoration of the rule of law; certain electoral and land ownership reforms; fulfillment of agreement ending war in the Democratic Republic of Congo; and military and national police subordination to the civilian government in Zimbabwe. Until this Presidential certification is made, and except as may be required to meet basic human needs or for good governance, this legislation would require the Secretary of the Treasury to instruct the United States Executive Director to each international financial institution (IFI) to oppose and vote against both of the following: (1) any extension by the respective institution of any loan, credit, or guarantee to the Government of Zimbabwe; or (2) any cancellation or reduction of indebtedness owed by the Government of Zimbabwe to the United States or any international financial institution. This Member is pleased that it is currently the Administration's policy for U.S. representatives to the IFIs to oppose and vote against loans and debt restructuring for Zimbabwe.

It is important to note that, in September 1999, the International Monetary Fund suspended its "Stand By Arrangement," which had been approved the prior month, for economic adjustment and reform in Zimbabwe. In

addition, the International Development Association, which is the concessional window of the World Bank, suspended all structural adjustment loans, credits, and guarantee to the Government of Zimbabwe in October of 1999.

Furthermore, during the International Relations Committee's consideration of S. 494, this Member offered an amendment which struck from the legislation a provision which would have created a Southern Africa Finance Center to be located in Zimbabwe. The center was to have included regional offices for the Overseas Private Investment Corporation (OPIC), the Export-Import Bank (Ex-Im), and the Trade and Development Agency (TDA).

While it is important for the U.S. to offer incentives to Zimbabwe to encourage political and economic reform, it is critical that those carrots be appropriate for the conditions. Even with significant changes in Zimbabwe's political climate, the country simply will not have the infrastructure in the near future to support such a center for the entire region. Additionally, this center would be a completely new endeavor for two of the U.S. agencies—namely OPIC and the Ex-Im Bank—neither of which currently have offices outside of the U.S.

However, that is not to say that the agencies cannot or should not play a critical role in stabilizing the region's economic health. Indeed, this Member would like to commend the Ex-Im Bank for developing a Sub-Saharan Africa Advisory Committee which has facilitated a dramatic increase in Ex-Im's investment in Africa. As the Chairman of the House Financial Services Subcommittee on International Monetary Policy and Trade, this Member introduced H.R. 2871, the Export-Import Bank Reauthorization Act of 2001, which, among other things, would reauthorize this Sub-Saharan Africa Advisory Committee for four years until FY2005. This legislation, which passed the House Financial Services Committee on October 31, 2001, would also create an Office on Africa to further enhance the Ex-Im Bank's emphasis on Africa.

Additionally, this Member is very pleased that in lieu of the Southern Africa Finance Center originally included in S. 494, the Bush administration has announced the creation of an Africa Regional Trade and Development Office which will be located in Johannesburg, South Africa, and will serve all of Sub-Saharan Africa. This announcement was made after the Senate considered and passed S. 494.

Through this office, the TDA, which will serve as the lead agency at the center, can more closely coordinate its trade development and promotion activities in the region with local governments and with U.S. representatives already on the ground. Perhaps some day Zimbabwe might serve as an appropriate location for a branch office of the Africa Regional Trade and Development Office. Until then, the Administration's proposal appears to be the most viable option to provide Sub-Saharan Africa with the access to economic development and trade promotion tools which the region desperately needs to build economic stability.

Mr. Speaker, this Member encourages his colleagues to vote for S. 494.

Mr. RANGEL. Mr. Speaker, I rise today in support of important legislation, S. 494, the Zimbabwe Democracy and Recovery Act. First

and foremost, I want to thank Mr. ROYCE and Mr. PAYNE, for bringing this important piece of legislation to the floor. Unlike previous bills that sought to penalize the people of Zimbabwe, this bill offers incentives to help guide their nation on a path of political and economic reform with United States assistance.

I have watched the Zimbabwe crisis unfold over the past several years and am deeply concerned about the increasing repression and violence which has created deepening concern over the manner in which the upcoming elections will be conducted. Our hope in the Congress is that Zimbabwe will become a model for other democracies around the world by ensuring that the upcoming elections are executed in a free and fair manner which assures full participation by all its citizens and manifests the will of the people.

The challenges that the nation of Zimbabwe faces are great. Zimbabwe is plagued with a horrific economic crisis that is characterized by extreme poverty, food shortages, and widespread loss of jobs and negative economic growth. These problems must be seriously addressed and dealt with in this nation's recovery efforts, but they cannot be unless political stability is achieved.

It is of the utmost importance that stability and economic viability are restored to the people of Zimbabwe. I believe that this bill, the Zimbabwe Democracy and Recovery Act of 2001, is the first step in achieving this end goal. Through the passage of this bill, not only will Zimbabwe benefit, but the entire southern region of Africa that has been impacted by this crisis will also stand to benefit from the passage of this legislation.

The Zimbabwe Democracy and Recovery Act of 2001 provides that when imperative political conditions are met, such as, restoring the rule of law, conducting fair political elections, and providing for equitable and legal land reform, that the U.S. will initiate an economic recovery policy. It also provides financial incentives, which include bilateral debt relief and U.S. support for similar action with the International Financial Institutions.

This bill offers an opportunity for the U.S. and Zimbabwe to re-engage on the road to democracy and economic recovery. It recognizes the need for land reform and for the first time provides tangible U.S. support for its achievement. It authorizes \$20m for land reform efforts and \$6m for democracy and governance.

This piece of legislation is very important to the friends of Africa who are dedicated to stopping civil conflict which impedes development and who continue to work on increasing trade opportunities and promoting economic growth for African nations.

I stand today in support of this bill and urge all of my colleagues to also show their support for a democratic and prosperous future in Zimbabwe and the southern region of Africa.

Mr. GILMAN. Mr. Speaker, I rise to voice my support for S. 494, which declares that it is U.S. policy to support the Zimbabwean people in their struggles to effect peaceful, democratic change, achieve broad-based and equitable economic growth, and to restore the rule of law to that troubled country. Furthermore, I

fully support the bill's authorization of additional funding to non-governmental organizations working with the people of Zimbabwe to promote good governance and the rule of law.

Today, Zimbabwe continues to face difficult social, economic and political problems. The goal of U.S. policy toward Zimbabwe must be to assist its development into a stable, free-market democracy, both as a goal in itself and as a bulwark against regional instability and conflict. However, this cannot be achieved until the government of Zimbabwe undertakes comprehensive reforms to enfranchise its people politically and economically.

The essential foundations of freedom and democracy are free and fair elections, a free and open press, and the development of democratic institutions based on the rule of law. However, all evidence points to the conclusion that these institutions do not currently exist in Zimbabwe, and that respect for the rule of law is seriously lacking. I regret that a sense of Congress is necessary to express our view that sanctions must be necessary to bring about the necessary reforms and democracy to Zimbabwe. Let me be clear: our goal is not to harm the people of Zimbabwe but rather to send a clear signal to its government that an expeditious transition to democracy is imperative. The people of Zimbabwe have waited much too long and endured far too many hardships, and clearly deserve better.

I also want to voice my concern with regards to Libya's attempts to establish military ties with the government of Zimbabwe. I hope that the Zimbabwe government sees its future in an alignment with Western democracies and not with state-sponsors of terrorism such as Libya.

We truly hope the government of Zimbabwe takes advantage of the opportunities presented by this legislation, and will seek to build better relations with the United States. Should the government of Zimbabwe choose to improve its democratic record, and establish good governance and the rule of law, its success will serve as a model for other countries in the region.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise in support of this legislation, which renews our commitment to the stabilization of the Zimbabwean democracy and reaffirms our commitment to the establishment of democratic principles throughout the African subcontinent.

This legislation sends a strong message to the rest of the world regarding our intentions toward Zimbabwe with its opening language: "It is the policy of the United States to support the people of Zimbabwe in their struggle to effect peaceful, democratic change, achieve broad-based and equitable economic growth, and restore the rule of law."

The need for such a forthright statement from this nation has been pressing for some time. International news agencies have chronicled the descent into political anarchy within Zimbabwe over the last year, as armed bands of "veterans" attacked homesteads and other economic and farming interests with the support of the Mugabe regime. These interests claim an unfair distribution of resources in the nation, and highlight the need for positive action by the United States.

Mr. Speaker, Zimbabwe is a nation of many needs. HIV/AIDS is ravaging the population at a rate of 25%, and the current average life expectancy of her citizens is only 37 years. The nation had a protracted role in the war in the Democratic Republic of Congo, and this action and other budgetary mismanagement issues have resulted in Zimbabwe being ineligible for IMF and International Bank for Reconstruction and Development programs, further stressing the people of this nation.

Mr. Speaker, this legislation allows the U.S. to acknowledge both the dire economic and social needs of the Zimbabweans while seeking a positive resolution of the political crisis that animates this struggle. This legislation directs the U.S. government to restructure or forgive loans contributing to the sovereign debt of Zimbabwe by any agency of the U.S. government. This act also creates a Southern Africa Finance Center to be located within Zimbabwe that will coordinate the regional offices of OPIC, Eximbank, and TDA in order to help with the economic stabilization of Zimbabwe.

Thus, Mr. Speaker, Congress has provided good incentives for the political leaders in Zimbabwe to work towards reestablishing the rule of law for their people. These benefits will only accrue to Zimbabwe if the President certifies that the rule of law and respect for ownership, property, and freedom of speech has been restored; that the next Zimbabwean election is a free and fair contest; that transparent land reform procedures are enacted; that Zimbabwe contributes a good faith effort to the Lusaka Accords ending the war in the Democratic Republic of Congo; and that the military and national police in the nation are "responsible to and serve the elected civilian government. These requirements can be waived, however, if the President deems it in the national interest to do so.

Fulfillment of these requirements will be a hard task, and thus this legislation includes monies for the land reform and democracy and governance programs in Zimbabwe.

Mr. Speaker, in these times of global uncertainty, the ever present goal of the U.S. is the widespread development of democratic principle that place the benefits of good governance in the hands of citizens and not politicians. This legislation demonstrates to the rest of the world that we stand for the principles of freedom and democracy above all.

Mr. ROYCE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PETRI). The question is on the motion offered by the gentleman from California (Mr. ROYCE) that the House suspend the rules and pass the Senate bill, S. 494, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further

proceedings on this motion will be postponed.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment to the Senate to the bill (H.R. 2299) "An Act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes."

KNOW YOUR CALLER ACT OF 2001

Mr. TAUZIN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 90) to amend the Communications Act of 1934 to prohibit telemarketers from interfering with the caller identification service of any person to whom a telephone solicitation is made, and for other purposes, as amended.

The Clerk read as follows:

H.R. 90

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Know Your Caller Act of 2001".

SEC. 2. PROHIBITION OF INTERFERENCE WITH CALLER IDENTIFICATION SERVICES.

Section 227 of the Communications Act of 1934 (47 U.S.C. 227) is amended—

(1) by redesignating subsections (e) and (f) as subsections (f) and (g), respectively; and

(2) by inserting after subsection (d) the following new subsection:

"(e) PROHIBITION ON INTERFERENCE WITH CALLER IDENTIFICATION SERVICES.—

"(1) IN GENERAL.—It shall be unlawful for any person within the United States, in making any telephone solicitation—

"(A) to interfere with or circumvent the capability of a caller identification service to access or provide to the recipient of the telephone call involved in the solicitation any information regarding the call that such service is capable of providing; and

"(B) to fail to provide caller identification information in a manner that is accessible by a caller identification service, if such person has capability to provide such information in such a manner.

For purposes of this section, the use of a telecommunications service or equipment that is incapable of transmitting caller identification information shall not, of itself, constitute interference with or circumvention of the capability of a caller identification service to access or provide such information.

"(2) REGULATIONS.—Not later than 6 months after the enactment of the Know Your Caller Act of 2001, the Commission shall prescribe regulations to implement this subsection, which shall—

"(A) specify that the information regarding a call that the prohibition under paragraph (1) applies to includes—

"(i) the name of the person or entity who makes the telephone call involved in the solicitation;

“(ii) the name of the person or entity on whose behalf the solicitation is made; and

“(iii) a valid and working telephone number at which the person or entity on whose behalf the telephone solicitation is made may be reached during regular business hours for the purpose of requesting that the recipient of the solicitation be placed on the do-not-call list required under section 64.1200 of the Commission’s regulations (47 CFR 64.1200) to be maintained by such person or entity; and

“(B) provide that a person or entity may not use such a do-not-call list for any purpose (including transfer or sale to any other person or entity for marketing use) other than enforcement of such list.

“(3) PRIVATE RIGHT OF ACTION.—A person or entity may, if otherwise permitted by the laws or rules of court of a State, bring in an appropriate court of that State—

“(A) an action based on a violation of this subsection or the regulations prescribed under this subsection to enjoin such violation;

“(B) an action to recover for actual monetary loss from such a violation, or to receive \$500 in damages for each such violation, whichever is greater; or

“(C) both such actions.

If the court finds that the defendant willfully or knowingly violated this subsection or the regulations prescribed under this subsection, the court may, in its discretion, increase the amount of the award to an amount equal to not more than 3 times the amount available under subparagraph (B) of this paragraph.

“(4) DEFINITIONS.—For purposes of this subsection:

“(A) CALLER IDENTIFICATION SERVICE.—The term ‘caller identification service’ means any service or device designed to provide the user of the service or device with the telephone number of an incoming telephone call.

“(B) TELEPHONE CALL.—The term ‘telephone call’ means any telephone call or other transmission which is made to or received at a telephone number of any type of telephone service and includes telephone calls made using the Internet (irrespective of the type of customer premises equipment used in connection with such services). Such term also includes calls made by an automatic telephone dialing system, an integrated services digital network, and a commercial mobile radio source.”.

SEC. 3. EFFECT ON STATE LAW AND STATE ACTIONS.

(a) EFFECT ON STATE LAW.—Subsection (f)(1) of section 227 of the Communications Act of 1934 (47 U.S.C. 227(f)(1)), as so redesignated by section 2(1) of this Act, is further amended by inserting after “subsection (d)” the following: “and the prohibition under paragraphs (1) and (2) of subsection (e).”.

(b) ACTIONS BY STATES.—The first sentence of subsection (g)(1) of section 227 of the Communications Act of 1934 (47 U.S.C. 227(g)(1)), as so redesignated by section 2(1) of this Act, is further amended by striking “telephone calls” and inserting “telephone solicitations, telephone calls.”.

SEC. 4. STUDY REGARDING TRANSMISSION OF CALLER IDENTIFICATION INFORMATION.

The Federal Communications Commission shall conduct a study to determine—

(1) the extent of the capability of the public switched network to transmit the information that can be accessed by caller identification services;

(2) the types of telecommunications equipment being used in the telemarketing indus-

try, the extent of such use, and the capabilities of such types of equipment to transmit the information that can be accessed by caller identification services; and

(3) the changes to the public switched network and to the types of telecommunications equipment commonly being used in the telemarketing industry that would be necessary to provide for the public switched network to be able to transmit caller identification information on all telephone calls, and the costs (including costs to the telemarketing industry) to implement such changes.

The Commission shall complete the study and submit a report to the Congress on the results of the study, not later than one year after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Louisiana (Mr. TAUZIN) and the gentleman from Texas (Mr. GREEN) each will control 20 minutes.

The Chair recognizes the gentleman from Louisiana (Mr. TAUZIN).

GENERAL LEAVE

Mr. TAUZIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and insert extraneous material on this legislation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 90, the Know Your Caller Act, by my good friend the gentleman from New Jersey (Mr. FRELINGHUYSEN), deals with the controversial business practice of telemarketing.

There are thousands of reputable telemarketing companies and they provide a benefit to the public by offering a broad range of consumer products and business opportunities. These companies employ hundreds of thousands of citizens across this country and they fuel this economy with literally billions of dollars.

Increasingly, however, telemarketers are the cause of complaints. Consumers are concerned that telemarketers are intruding into their homes, and we continue to hear stories about telemarketing schemes that separate consumers from their hard-earned money.

In fact, telemarketing complaints lodged with the Federal Trade Commission seem to support these consumer concerns. In 1997, for example, there were 2,260 complaints. In 2000, there were 36,804 complaints, a significant increase.

H.R. 90 takes these consumer complaints seriously. With the excellent work of the author, the gentleman from New Jersey (Mr. FRELINGHUYSEN), we can remove the cloak of secrecy that fraudulent telemarketers use to swindle their victims. No longer will telemarketers be able to hide behind the anonymous telephone call.

H.R. 90 prohibits telemarketers from blocking the transmission of caller ID

information. In addition, this bill requires telemarketers to send caller ID information if their equipment is capable to do so. What this means is that the flashing signals on caller ID boxes, “caller unknown,” or “out of area” will no longer protect the scam artist.

The transmission of caller identification information is so important to consumers, not only for safety and privacy reasons, but also because it provides the consumer with a telephone number that can be used to place the consumer on what is known as a telemarketer’s “do-not-call” list. You see, if you know who is calling you and you do not want them to call him again, under the law, you can put a call in and say do not call me anymore; I do not want to be bothered anymore. By being placed on a do-not-call list, the telemarketer is prohibited from calling back for the next 10 years. That will protect you for a while.

Additionally, the bill takes steps to prevent the sale of do-not-call lists, which is currently allowed under the law.

I have worked with the gentleman from Michigan (Mr. DINGELL) on bipartisan amendment efforts to clarify this point. To remedy this loophole, H.R. 90 prohibits telemarketers from selling, leasing or receiving anything of value for these do-not-call lists. Few things are more offensive than being asked to be placed on a do-not-call list, only to have your name sold to another direct mail company.

This amendment respects and protects the privacy requests of the consumer and should prevent an increase in unwanted telephone solicitations.

I believe this bill strikes a good balance between the consumers’ right to privacy and safety and the telemarketers’ legitimate business interests. It protects consumers as well as the very thriving commercial industry and, indeed, protects the good players from the bad consequences of bad actors.

I support this bill and urge support from the House as well.

Mr. Speaker, I reserve the balance of my time.

Mr. GREEN of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to begin by complimenting the gentleman from New Jersey (Mr. FRELINGHUYSEN), the sponsor of H.R. 90, who did excellent work here in crafting this legislation.

Consumers who want to exercise their right to be placed on a do-not-call list, or to take a telemarketer to small claims court after being called, are often frustrated when they cannot get the caller ID information from the telemarketer to identify them.

This legislation prohibits telemarketers from interfering with or circumventing the capability of caller ID services. Telemarketers who solicit the

public in their homes for commercial gains should not be permitted to evade the purpose and function of caller ID services. This bill will prevent the telemarketers from doing so, while further empowering consumers to control the communications going to and from their home.

Mr. Speaker, the bottom line is the telecommunications revolution gives enormous opportunities for telemarketers, but it also gives opportunities for consumer power. These powers should include the ability, by using caller ID, to prevent information from going to their family which they deem and believe is inappropriate.

I think this information strikes a good balance between the rights of consumers to protect their privacy and the rights of telemarketers to practice their trade. This bill allows consumers to use the best available technology to protect their privacy but does not allow telemarketers to start a de facto race to outsmart this technology.

I congratulate the gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. Speaker, I reserve the balance of my time.

□ 1530

Mr. TAUZIN. Mr. Speaker, I am pleased to yield as much time as he may consume to the gentleman from New Jersey (Mr. FRELINGHUYSEN), the author of the legislation.

Mr. FRELINGHUYSEN. Mr. Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN) for yielding me the time, and I want to commend him and the gentleman from Michigan (Mr. DINGELL), the ranking member, and all Members for their assistance in getting this bill to the floor, particularly the gentleman from Louisiana (Mr. TAUZIN), who has been very helpful. He has been very supportive, and he has been personally very interested in this bill. H.R. 90 would not be here without his support and the way that he has helped me along the way.

Mr. Speaker, the Know Your Caller Act will provide a simple but important consumer protection. Many consumers purchase and pay for caller ID service and caller ID equipment for several reasons: In the first instance, to protect their privacy; secondly, they provide for their personal security by identifying incoming calls and allow them the opportunity to decide before picking up the receiver, whether or not to answer the call.

Guess what, some of the most frequent calls, those from telemarketers, not all telemarketers but many, appear with a message Out of the Area or Caller Unknown. Mr. Speaker, telemarketing is a commercial enterprise. As such, what would be the reason for not disclosing a business telephone number? There simply is no reason.

I believe that all commercial enterprises that use the telephone to adver-

tise or sell their services to encourage the purchase of property or goods or for any other good commercial purposes should be required to have the name of their business and their business telephone number disclosed on caller ID boxes. Some telemarketing enterprises purposely block out caller ID devices; yet these same companies know a person's name, address, and telephone number. Is it not only fair that they share their company name and their telephone number so a person can make sure that they are a legitimate company, that they are who they say they are?

Also, if my colleagues are like me and politely ask to have their name removed from their list, I think we should also be able to track the name and number of these telemarketing callers to ensure that they do not call back again. My legislation will simply require any person making a telephone solicitation to clearly identify themselves on these devices.

Mr. Speaker, this legislation will help separate legitimate telemarketers from fraudulent ones. While the majority of telemarketers are legitimate business people attempting to sell a product or service, there are some unscrupulous individuals and companies violating existing telemarketing rules and scamming many customers.

Consumers pay a monthly service fee to subscribe to the caller ID service because they want to protect their personal privacy and their pocketbooks, but they have little recourse to protest intrusions on their privacy because most telemarketers intentionally block their identity from being transmitted to caller ID devices.

Mr. Speaker, we already require telemarketers to identify themselves over the telephone and via telephone fax transmission. This bill simply extends the protection to consumers with caller ID devices.

Mr. Speaker, I express my thanks for this opportunity. This bill passed unanimously in the last session; and again, I thank the gentleman from Louisiana (Mr. TAUZIN) for his support of it.

Mr. GREEN of Texas. Mr. Speaker, I yield myself such time as I may consume.

I say in closing that this is a good bill. I especially appreciate the ability of individuals and the private cause of action that is in the legislation.

Mr. Speaker, I yield back the balance of my time.

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume.

Again, I want to thank the gentleman from New Jersey (Mr. FRELINGHUYSEN) for his absolute perseverance in seeing to it that this bill is passed again this year. Hopefully, it will become law and consumers will be much better off for it and he will be a hero. A lot of Americans have been troubled

by this, and I commend this bill to the House.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PETRI). The question is on the motion offered by the gentleman from Louisiana (Mr. TAUZIN) that the House suspend the rules and pass the bill, H.R. 90, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

RECOGNIZING IMPORTANT CONTRIBUTIONS OF HISPANIC CHAMBER OF COMMERCE

Mr. TAUZIN. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 277) recognizing the important contributions of the Hispanic Chamber of Commerce.

The Clerk read as follows:

H. CON. RES. 277

Whereas the Hispanic Chamber of Commerce of the United States has had a significant impact among Hispanic businesses, and in the business community in general;

Whereas the Hispanic Chamber of Commerce has served in a key support role, not merely as a business group but also as a civic organization working in the Hispanic-American community; and

Whereas the Hispanic Chamber of Commerce has helped to bring entrepreneurship to the Hispanic community as well as helping to pool the resources and talents of Hispanic American entrepreneurs: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that it is important to the promotion of the free market process of the United States, to the future success of Hispanic Americans, and to society at large that the special role of the Hispanic Chamber of Commerce of the United States be recognized and further cultivated to the benefit of all Americans.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Louisiana (Mr. TAUZIN) and the gentleman from New York (Mr. TOWNS) each will control 20 minutes.

The Chair recognizes the gentleman from Louisiana (Mr. TAUZIN).

GENERAL LEAVE

Mr. TAUZIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H. Con. Res. 277.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of House Concurrent Resolution 277, recognizing the important contributions of the United States Hispanic Chamber of Commerce.

The Hispanic community is booming in this country. In fact, it has become the fastest-growing segment of our Nation's population; and by the year 2010, Hispanics will become the largest minority group in the United States and by 2050 will comprise nearly 25 percent of the entire U.S. population.

One sector within the Hispanic community that has been experiencing especially rapid growth over the past few years is the small business community. At present, it is estimated that there are over 1.5 million Hispanic-owned small businesses in the country.

Created in 1979 by a handful of dedicated Hispanic leaders, the U.S. Hispanic Chamber of Commerce has helped to realize the enormous potential of the Hispanic business community in these United States, and the U.S. Hispanic Chamber of Commerce has worked tirelessly to bring the issues of the Nation's Hispanic-owned businesses to the national economic agenda and drives the engine of economic growth.

Today, we thank them for increasing their contribution to the strength of this country.

It is a good resolution. My mother, Ms. Enola Martinez Tauzin, appreciates it personally; and I urge the House to adopt it.

Mr. Speaker, I reserve the balance of my time.

Mr. TOWNS. Mr. Speaker, I yield myself such time as I may consume.

I rise in strong support of this resolution, H. Con. Res. 277, which recognizes the important contributions of the Hispanic Chamber of Commerce. The chamber's mission, to actively promote the economic growth and development of Hispanic entrepreneurs, is important to the free market process and the success of Hispanic Americans. Especially during these times of economic hardship, I fully expect that the Hispanic business community will be an engine for growth and recovery benefiting our whole economy.

In the 5-year period from 1992 to 1997, Hispanic businesses across the Nation grew about 82 percent. The programs, services and support that the chamber continues to offer the more than 200 local chambers across this Nation have been integral to the success and vitality of these Hispanic businesses.

I have seen the effects of the chamber's initiatives in my own 10th Congressional District in Brooklyn. The Hispanic community has produced some of the most exciting entrepreneurial initiatives, enriching Brooklyn for all of its residents. From small stores and bodegas to supermarkets like Compare Market and ABC Beverages to large construction companies like Park Avenue Building and Roofing Supplies, Hispanic-owned businesses employ hundreds of residents as well as adding to the economic viability of our neighborhoods.

Since its formation in 1979, the Hispanic Chamber of Commerce has rep-

resented the interests of more than 1.2 million Hispanic-owned businesses in the United States and Puerto Rico. In addition to its annual convention featuring hundreds of domestic and international exhibitors, the chamber also supports Hispanic businesses with legislative and governmental affairs services, business development and marketing services, and active promotion of international trade by networking with Latin American governments.

Through its Empowerment Through Entrepreneurship Initiative, the chamber has also established a \$20 million venture capital fund and, in partnership with the Ford Motor Company, has formed a bilingual National Director of Hispanic Businesses. It has also sewn the seeds of entrepreneurship by sponsoring programs for Hispanic youth such as Bizfest and funding Hispanic scholarship programs.

The chamber's contributions to the Hispanic business community have and will continue to enrich all of our lives. I urge my colleagues to join me in giving the Hispanic Chamber of Commerce the recognition that it deserves.

Mr. TOWNS. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. HINOJOSA).

Mr. HINOJOSA. Mr. Speaker, I rise in support of House Concurrent Resolution 277. I am very pleased to see that we are recognizing the important contributions of the Hispanic Chamber of Commerce. As a former businessman from the lower Rio Grande Valley in south Texas, I can personally attest to the invaluable assistance that the Hispanic Chamber of Commerce provides for the Hispanic business community.

The rapid growth of the Latino population has made our community a more crucial part of the American economy than ever before. The Hispanic Chamber of Commerce has provided the vision and the leadership to promote a spirit of entrepreneurship and an ethic of competitiveness in the Hispanic business community. It has also served as an effective advocate by communicating the community's concerns in the greater business and political arena.

I want to thank the Hispanic Chamber for all of the hard work it has put into achieving economic progress for our community, and I urge my colleagues to join me in supporting this resolution. In south Texas, we are members of the Texas Association of Hispanic Chambers of Commerce, and we have had lots of meetings and we have had lots of successful gatherings, and so that is why I am here to show our support for this group.

Mrs. WILSON. Mr. Speaker, I rise today in support of H. Con. Res. 277, recognizing the important contributions of the Hispanic Chamber of Commerce.

From top-level corporate positions, to Mom and Pop corner stores, Hispanics in America make tremendous contributions to the nation.

Minority owned businesses are growing and creating jobs faster than other companies.

In 1979, realizing the enormous potential of the Hispanic business community in the United States and the need for a national organization to represent its interests, the United States Hispanic Chamber of Commerce (USHCC) was incorporated in my home state of New Mexico, creating a structured organization aimed at developing a business network that would provide the Hispanic community with cohesion and strength. Since its inception, the USHCC has worked towards bringing the issues and concerns of the nation's more than 1.2 million Hispanic-owned businesses to the forefront.

Throughout the years, the Albuquerque Hispano Chamber of Commerce has improved the quality of life in the Middle Rio Grande corridor by promoting economic and education activities, with an emphasis on small business.

This has also been a great year for the Albuquerque Hispano Chamber of Commerce. The Chamber officially opened the doors to their Barelaz Job Opportunity Center. This center houses a state-of-the-art technology lab and will focus on work force development and entrepreneur opportunities. The facility is also home to the U.S. Small Business Administration Business Information Center and the Senior Corp of Retired Executives. This Center is a hub for consultations on how to grow a business, start a business, manage a business or capitalize a business.

Over the past 26 years the Albuquerque Hispano Chamber of Commerce has experienced change and growth that would rival any successful business. I am grateful to the Albuquerque Hispano Chamber of Commerce for helping to make Albuquerque a better place and improving the quality of life in New Mexico.

Mr. PAUL. Mr. Speaker, I want today to address my resolution, H. Con. Res. 277 to recognize the important contributions of the Hispanic Chamber of Commerce. Mr. Speaker, the United States Hispanic Chamber of Commerce was founded in New Mexico in 1979. Headquartered in Washington, DC the Hispanic Chamber of Commerce currently has a network of more than 200 chapters in the United States and its territories. One of those active chapters is in my district, in fact the San Marcos Hispanic Chamber of Commerce just held its successful Turkey Trot Golf Tournament during our Thanksgiving break.

The importance of this national organization cannot be overstated, Hispanics have an annual purchasing power of approximately \$500 billion and the Chamber effectively represents the more than 1 million Hispanic-owned businesses. The organization's recent growth has shown its influence in communities not traditionally considered centers for Latino development, locations such as Richmond, Virginia; Charlotte, North Carolina and Minnesota's Twin Cities area.

The Hispanic Chamber of Commerce provides important recognition to its members and supporters through an annual awards program. Moreover, the organization furnishes its membership with a host of critical services, ably guided by the leadership of its President and CEO George Herrera, Chair Ms. Elizabeth Lisboa-Farrow, who also chairs the DC Chamber of Commerce; and Vice Chairman J.R.

Gonzales, President of a communications firm in Austin, Texas.

Importantly, the Chamber has maintained international trade as one of its top long term priorities, even maintaining an office in Mexico City. The Hispanic Chamber of Commerce provides and promotes the kind of private sector trade initiatives and assistance that I believe all of us can support.

Mr. Speaker, I am gratified to be able to bring to the Floor today this resolution to recognize the important contributions of the United States Hispanic Chamber of Commerce and ask for the support of members in passing this item.

Mr. TOWNS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. TAUZIN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Louisiana (Mr. TAUZIN) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 277.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

EXPRESSING SENSE OF CONGRESS REGARDING TUBEROUS SCLEROSIS

Mr. BILIRAKIS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 25) expressing the sense of the Congress regarding tuberous sclerosis, as amended.

The Clerk read as follows:

H. CON. RES. 25

Whereas at least two children born each day will be affected with tuberous sclerosis;

Whereas nearly one million people worldwide are known to have tuberous sclerosis;

Whereas tuberous sclerosis affects all races and ethnic groups equally;

Whereas tuberous sclerosis is caused by either an inherited autosomal disorder or by a spontaneous genetic mutation;

Whereas when tuberous sclerosis is genetically transmitted as an autosomal dominant disorder, a child with a parent with the gene will have a 50-percent chance of inheriting the disease;

Whereas two-thirds of the cases of tuberous sclerosis are believed to be a result of spontaneous mutation, although the cause of such mutations is a mystery;

Whereas diagnosis takes an average of 90 days with consultation of at least three specialists;

Whereas tuberous sclerosis frequently goes undiagnosed because of the obscurity of the disease and the mild form the symptoms may take; and

Whereas the Congress as an institution, and Members of Congress as individuals, are in unique positions to help raise public awareness about the need for increased funding for research, detection, and treatment of tuberous sclerosis and to support the fight against tuberous sclerosis: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) all Americans should take an active role in the fight against tuberous sclerosis

by all means available to them, including early and complete clinical testing and investigating family histories;

(2) the role played by national and community organizations and health care providers in promoting awareness of the importance of early diagnosis, testing, and ongoing screening should be recognized and applauded;

(3) the Federal Government has a responsibility to—

(A) endeavor to raise awareness about the importance of the early detection of, and proper treatment for, tuberous sclerosis;

(B) increase funding for research so that the causes of, and improved treatment for, tuberous sclerosis may be discovered; and

(C) continue to consider ways to improve access to, and the quality of, health care services for detecting and treating tuberous sclerosis; and

(4) the Director of the National Institutes of Health should take a leadership role in the fight against tuberous sclerosis by acting with appropriate offices within the National Institutes of Health to provide to the Congress a five-year research plan for tuberous sclerosis.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Ohio (Mr. BROWN) each will control 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. BILIRAKIS).

GENERAL LEAVE

Mr. BILIRAKIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H. Con. Res. 25.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BILIRAKIS. Mr. Speaker, I yield myself such time as I may consume.

I rise today to support this concurrent resolution increasing awareness of tuberous sclerosis and supporting programs for greater research.

Though few Americans have ever heard of tuberous sclerosis, it is a disease that affects 50,000 here at home and nearly 1 million people worldwide. It is a genetic disorder that causes seizures and tumor growth in vital organs such as the brain, heart, kidneys, lungs, and skin. Though these tumors are benign, they often compromise the proper functioning of essential organs. For example, many of those afflicted have some type of learning disability or behavioral problem caused by the combination of the brain tumors and seizures.

Individuals with tuberous sclerosis and their families face significant financial, emotional and social hardships. More than 60 percent of those living with the disease will never live independently. This means a dramatically reduced quality of life for both those afflicted and their families.

We can make a difference by raising awareness about the importance of early detection and proper treatment for tuberous sclerosis. The resources of

the Federal Government's health and resource institutes can help advance the understanding of the biological factors causing this disease. Working in partnership with other research initiatives, we can help reduce the long-term impact of this problem.

H. Con. Res. 25 takes an important step in the fight against tuberous sclerosis, and I urge my colleagues to support it.

Mr. Speaker, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself as much time as I may consume.

I would like to thank the gentlewoman from New York (Mrs. KELLY) for her dedication to the issue of tuberous sclerosis. H. Con. Res. 25 expresses our support in the fight against tuberous sclerosis, a rare genetic disorder that affects the central nervous system.

Tuberous sclerosis affects one in 6,000 babies in our country and does not discriminate by race or by gender. At least two babies born today will be touched in this country by this disorder. It can cause kidney problems, brain tumors, skin abnormalities, seizures, and various degrees of mental disability. Tuberous sclerosis is frequently unrecognized and frequently misdiagnosed.

There is no cure for this disease, yet. The NINDS, one of the institutes of health, is studying this disorder, trying to find new treatments, trying to find new methods of prevention, and trying ultimately, of course, to find a cure.

Congress must continue to improve access to quality health care services for detecting and treating tuberous sclerosis.

This resolution encourages the director of NIH to take a leadership role in the fight to eradicate tuberous sclerosis.

□ 1545

As Members of Ohio are in unique positions to raise awareness about disorders that simply do not garner the attention that they deserve, the bill of the gentlewoman from New York (Mrs. KELLY) will help bring focus to the fight against tuberous sclerosis. I urge Congress to pass this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. BILIRAKIS. Mr. Speaker, I yield 5 minutes to the gentlewoman from New York (Mrs. KELLY), who we are all indebted to for bringing the issue of tuberous sclerosis to our attention.

Mrs. KELLY. Mr. Speaker, I rise today in strong support of the concurrent resolution, H. Con. Res. 25, expressing the sense of Congress regarding tuberous sclerosis. I commend the gentleman from Louisiana (Mr. TAUZIN), the distinguished chairman of the Committee on Commerce, and the chairman of the Subcommittee on

Health, the gentleman from Florida (Mr. BILIRAKIS), for acting so quickly to report this important legislation.

H. Con. Res. 25 represents the opportunity Congress has to educate Americans about the little known genetic disease tuberous sclerosis. It is estimated that at least two children born each day will have tuberous sclerosis. There are approximately 1 million people worldwide who are affected. TS is a disorder that can be inherited or result from genetic mutation. The disease is characterized by seizures and tumors which form in vital organs such as brain, heart, skin, kidneys and lungs. Though not malignant, these tumors can cause debilitating and sometimes life-threatening problems.

Diagnosis of TS is very difficult, and all too often it goes undetected or is misdiagnosed because its symptoms are similar to those of more common conditions like epilepsy or autism. It is often first recognized following a series of epileptic seizures or varying degrees of developmental delay. An average TS diagnosis takes 90 days and involves up to three specialists and numerous tests.

Preliminary research has found specific genes associated with tuberous sclerosis, but to date there is no widely used genetic test, leaving diagnosis to be based on clinical findings. Increased awareness of TS among health care providers and the general population is the key to early diagnosis.

As is the case with many diseases, early detection often determines TS patients' successes in managing the disease. With the variety of treatments currently available to ease symptoms and improve the quality of life for people with tuberous sclerosis, funding to promote awareness in the medical community as well as research to increase early diagnosis really are imperative.

For instance, early intervention has the potential to reduce developmental delay experienced by young patients. Likewise, surgery to remove tumors can help preserve organ function. TS is a permanent medical condition, and those affected and their families must cope with the illness for their entire lives. In some cases, TS does not preclude those who have it from living a relatively normal life. However, in most cases, it is much more intrusive. In addition to the difficulty of diagnosis, there are other post-diagnostic issues with which families must contend, such as obtaining adequate health insurance and, later in life, arranging for independent living solutions.

H. Con. Res. 25 highlights the severity of tuberous sclerosis and affirms the Federal Government's responsibility to facilitate research in this area. We must build on the foundation of knowledge of tuberous sclerosis that has already been built, largely through the organization and resources of friends and families of TS patients.

This bill instructs the director of the National Institutes of Health to work with the appropriate offices within NIH to bring awareness to this disease and to devise a 5-year plan for outlining research initiatives for TS. Congress must act to foster increased research on tuberous sclerosis. We must use our excellent scientific and medical resources to better understand this very complicated disease.

I urge my colleagues to support this worthwhile and necessary legislation.

Mr. BILIRAKIS. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. TAUZIN), the chairman of the full committee.

Mr. TAUZIN. Mr. Speaker, I thank the chairman for yielding me this time and commend him for moving so expeditiously on this resolution, and also I want to commend the gentlewoman from New York (Mrs. KELLY) for her incredible work in this area and other areas. I understand she is also very similar, in moving a similar resolution on Crohn's Disease.

Yesterday, in the Nation's capital, we had an amazing function of families across America gathering for the Cancer Research Family Awareness Luncheon. Sam Donaldson was here, himself a cancer survivor. The whole idea behind the luncheon was to honor those who have worked tirelessly to make people aware of what early detection can do to cure it.

My mother is a three-time cancer survivor. In each case, because she caught it early, she was cured with operation rather than chemo or radiation, sort of a miracle. It started in 1960 with breast cancer; in 1980, then lung cancer; and, just recently, with uterine cancer.

The fact that we make people aware of these diseases so that their doctors and moms and dads can spot them when we see them and treat them sooner makes immeasurable difference not only in the care and treatment of these diseases, but very often in life itself. Many cancer survivors were there to tell their stories yesterday about how, because someone took the trouble to talk about these diseases on television, on the radio, on the floor of the House today, somebody paid attention, somebody caught it early, and somebody was better off for it.

Yesterday, for example, a young woman who is an anchor of a San Antonio, Texas television station was honored for the work she did. She discovered she had breast cancer. Instead of hiding the fact, she went on the air with it and actually did a documentary of how she went through treatment, and how they operated on the cancer and how she went through the incredible ordeal of the chemotherapy, losing her hair. She even did an anchor one night, bald, just to show that you can get through these things and you can

live and you can survive if you are willing to be brave enough to face these diseases head-on and treat them early and deal with them.

Here, in this case, the gentlewoman from New York (Mrs. KELLY) has brought to us a concern of so many families, 50,000 families in America which have someone in their family with tuberous sclerosis. And here is another genetic disease that, if we pay enough attention to it, put a little research money on it, we will find a way to cure it and save an uncounted number of lives not only in America but around the world, and certainly make life much more comfortable and bearable for those who suffer with that disease today.

Again, I want to congratulate my colleague from New York for her fine work, and the chairman of the Subcommittee on Health (Mr. BILIRAKIS), and the ranking member, the gentleman from Ohio (Mr. BROWN), for their excellent cooperation in moving this and similar resolutions forward.

Mr. BEREUTER. Mr. Speaker, as a cosponsor of the concurrent resolution, this Member wishes to add his strong support for H. Con. Res. 25, which expresses the sense of Congress that the Federal Government has a responsibility to raise public awareness of tuberous sclerosis and educate all Americans about the importance of the early detection of, and proper treatment for the disease.

This Member would like to commend the distinguished gentleman from Louisiana [Mr. TAUZIN], the Chairman of the House Committee on Energy and Commerce, and the distinguished gentleman from Michigan [Mr. DINGELL], the ranking member of the House Committee on Energy and Commerce, for bringing this important resolution to the House Floor today. This Member would also like to commend the gentlelady from New York [Mrs. KELLY] for sponsoring H. Con. Res. 25 and for her personal interest in tuberous sclerosis.

Tuberous sclerosis complex (TSC) is a genetic disorder characterized by seizures and tumor growth in vital organs such as the brain, heart, kidneys, lungs and skin. Individuals with tuberous sclerosis commonly begin having seizures during the first year of life, and conventional epilepsy therapies often do not control the seizure activity in infants, children or adults. Seizures, as well as brain tumors, contribute to cognitive impairment. As a result, a majority of those afflicted with tuberous sclerosis experience some form of learning disability or behavioral problem, such as attention deficit hyperactivity disorder, autism or mental retardation.

This Member recently received a letter from his constituents, Mr. and Mrs. Lorenz Niemeyer. The Niemeyer's are the proud grandparents of a 23-month old granddaughter, who was diagnosed with tuberous sclerosis at four weeks of age, having tumors on the brain. The Niemeyer's fear that their granddaughter is severely disabled, both mentally and developmentally.

The toll on the family of a person with tuberous sclerosis is enormous. Care for a tuberous sclerosis patient often requires on-going

treatment that involves multiple medical specialists, speech, occupational and other therapists, as well as those skilled in the proper care and educational and emotional development of a medically and mentally disabled individual.

House Concurrent Resolution 25 expresses the sense of the Congress that the Federal Government has a responsibility to raise public awareness of tuberous sclerosis and educate all Americans about the importance of the early detection of, and proper treatment for, tuberous sclerosis. In addition, the resolution urges an increase in funding for research on tuberous sclerosis. Finally, H. Con. Res. 25 urges the National Institutes of Health to take a leadership role and to provide a five-year research plan in the fight against tuberous sclerosis.

Mr. Speaker, in closing, this Member urges his colleagues to support H. Con. Res. 25.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in support of H. Con. Res. 25, which expresses the sense of Congress regarding tuberous sclerosis. This measure urges increased federal aid for research and calls on the Director of the National Institutes of Health to help develop a five-year research plan for tuberous sclerosis. H. Con. Res. 25 also declares that all Americans should take an active role in the fight against this genetic disorder.

At least two children born each day will be affected with tuberous sclerosis (TS). Nearly one million people worldwide are known to have TS. TS does not discriminate against any race or ethnic group.

According to a report released by the Tuberous Sclerosis Association, preschool children with TS develop intellectual and behavioral problems. The intellectual development varies greatly. Approximately 40% will not have global (affecting all areas of intelligence) intellectual impairments. The remaining may have mild, moderate, or severe mental retardation.

It appears that children under the age of five years with moderate to severe mental retardation will remain mentally retarded to this degree into adulthood.

Problems with behavior are some of the most common difficulties experienced by children with TS. Poor expressive language, poor development of social skills, motor impairments, and hyperactivity or inattention are a few examples.

As this bill prescribes, early intervention is most effective. It has been found that during the first five years of life, developmentally disabled children tend to fall farther and farther behind children their own age who do not have developmental difficulties. These declines in the rate of intellectual development of disabled children and reduce with early intervention.

Mr. Speaker, let us work together to raise awareness of tuberous sclerosis and help children with this disorder to live a normal life. I urge my colleagues to support H. Con. Res. 25.

Mr. BROWN of Ohio. Mr. Speaker, I yield back the balance of my time.

Mr. BILIRAKIS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PETRI). The question is on the motion

offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 25, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

NATIONAL HANSEN'S DISEASE PROGRAMS CENTER

Mr. BILIRAKIS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2441) to amend the Public Health Service Act to redesignate a facility as the National Hansen's Disease Programs Center, and for other purposes.

The Clerk read as follows:

H.R. 2441

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF NATIONAL HANSEN'S DISEASE PROGRAMS CENTER.

(a) REFERENCES IN PUBLIC HEALTH SERVICE ACT.—Section 320(a)(1) of the Public Health Service Act (42 U.S.C. 247e(a)(1)) is amended by striking "Gillis W. Long Hansen's Disease Center" and inserting "National Hansen's Disease Programs Center".

(b) PUBLIC LAW 105-78.—References in section 211 of Public Law 105-78, and in deeds, agreements, or other documents under such section, to the Gillis W. Long Hansen's Disease Center shall be deemed to be references to the National Hansen's Disease Programs Center.

(c) OTHER REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the Gillis W. Long Hansen's Disease Center shall be deemed to be a reference to the National Hansen's Disease Programs Center.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Ohio (Mr. BROWN) each will control 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. BILIRAKIS).

GENERAL LEAVE

Mr. BILIRAKIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on H.R. 2441.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BILIRAKIS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2441, changing the name of the Gillis W. Long Hansen's Disease Center housing the National Hansen's Disease Program to The National Hansen's Disease Programs Center.

This change is necessary to avoid further confusion in mail delivery between the former location of the NHDP and its current location. Mail is often

misdirected, delaying important research and legal documents. Name confusion has also delayed critical patient medical information.

NHDP continues to treat some 6,000 people in the United States with Hansen's disease. Receiving patient medical records is critical to that treatment. I urge my colleagues to support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

The National Hansen's Disease Programs in Baton Rouge, Louisiana is the only institution in the U.S. exclusively devoted to the complex infectious disease known as Hansen's disease. Hansen's disease can cause nerve damage, resulting in the loss of muscle control and the crippling of the hands and feet.

Fortunately, considerable progress has been made over the last 40 years to treat successfully the majority of Hansen's disease cases. There are roughly 6,500 cases of this disease in the United States.

In the 105th Congress, the National Hansen's Disease Programs, located in the Gillis Long Disease Center in Carville, Louisiana was relocated to Baton Rouge. Although the programs moved from Carville to Baton Rouge, they still bear the name Gillis Long Hansen's Disease Center. Likewise, the Louisiana National Guard in Carville is named the Gillis Long Center.

As a result of these two facilities sharing a name, the National Hansen's Disease Program has suffered from unnecessary postal delays. This bill clears up confusion and reinforces the unique function of the Baton Rouge facility by renaming it the National Hansen's Disease Programs Center.

H.R. 2441 is straightforward legislation. It is located in the State of the chairman of the committee, the gentleman from Louisiana (Mr. TAUZIN), and I urge my colleagues to vote in favor of it.

Mr. Speaker, I yield back the balance of my time.

Mr. BILIRAKIS. Mr. Speaker, I yield such time as he may consume to the chairman of the full committee, the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Speaker, again my thanks to the chairman for yielding me this time.

I rise in strong support of H.R. 2441, sponsored by my friend and colleague, the gentleman from the great State of Louisiana (Mr. BAKER).

The National Hansen's Disease Programs has a long history of excellence, beginning with the humane treatment rather than detention of those with leprosy in the late 1800s, the development of the treatment for leprosy in the 1940s, and the current extension of research to tuberculosis and diabetes.

It has been an important part of Louisiana's great history and this Nation's great history. Countless lives were changed in what many called the "Miracle of Carville."

In the 105th Congress, we passed a bill transferring ownership of the Gillis W. Long Hansen's Disease Center in Carville, Louisiana from the Department of Health and Human Services to the State of Louisiana and moving it to Baton Rouge. The NHDP has continued its fine work in Baton Rouge instead of Carville, but the Carville facility has retained the name the Gillis W. Long Hansen's Disease Center. As required by law, the new facility in Baton Rouge is also called the Gillis W. Long Hansen's Disease Center.

You can imagine the confusion. The bill simply straightens out the confusion, to make sure the mail goes to the proper party, and changes the name of the NHDP to the National Hansen's Programs Center to eliminate that confusion. It has the support, by the way, of our good friend, former Congresswoman Long, who is Gillis' widow, and a dear friend of ours, and I urge the adoption of this resolution.

Mr. BILIRAKIS. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. BAKER), who is responsible for this legislation.

Mr. BAKER. Mr. Speaker, I thank the gentleman for yielding me this time and wish to express my appreciation to both gentlemen for their courtesies in facilitating such prompt consideration of this important matter.

For those not familiar with the fine institution in Louisiana, in Carville, known as the Gillis W. Long Hansen's Disease Center, it is in fact a very historic facility which has provided immeasurable service to many people throughout its longstanding history.

It is important that the Congress favorably act on this important name change today, for a very simple but important administrative reason. The National Hansen's Disease Programs have been relocated from the Carville facility to a new institution at the Summit Hospital within Baton Rouge. However, under the current regulatory provisions, that secondary site must also be designated as the Gillis W. Long Center, therein creating problems for the patients of the new Hansen's Disease Programs in Baton Rouge.

Even simple matters such as delivery of mail now is necessitated to go through the Carville Academy site, as opposed to going directly to the National Hansen's Disease Center Programs.

□ 1600

This name change facilitates that. However, it in no way diminishes the importance of the Gillis W. Long Center, where there has been an extraordinary change over the past several years in the scope and direction of that valuable property.

For well over 100 years, it was the target for treatment and research for Hansen's disease. But in an act passed by this Congress a few years ago, ownership of the facility was transferred to the State of Louisiana and a youth at-risk education program has been created there. In this brief time since the program's initiation, the Youth Challenge Program has seen 3,582 students graduate from this new programmatic activity. What is remarkable is the likelihood of these individuals completing their high school education was seriously in question.

After exposure to this fine program, 3,500 students have successfully completed the educational curricula. Twenty-four percent of our graduates have gone on to engage in military service, while another 50 percent have been employed or are in some job training program, while the remaining 20 percent have gone on to higher education pursuits. Some 13 percent have gone on to college.

It is a remarkable program which carries on in the random tradition of Congressman Gillis Long, a tireless servant of the American public, and his spouse, a former Member as well, Cathy Long, who is well aware of this name change.

This programmatic activity is in the highest of American principles. We give nothing away except a chance; and young people from across our great State who are unlikely to be successful in any other endeavor, come here to find renewed hope and opportunity through discipline, education, and job training. It, in fact, is carrying on the mission of the Sisters of Charity who served countless numbers of hopeless social outcasts for many years at the Hansen's Disease Center. They too have signed on to the program at Carville Academy, seeing the hope and vision that this opportunity creates for the innumerable graduates of this fine program.

To both chairmen, I ask that the House do concur in this recommendation.

Mr. BILIRAKIS. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the bill, H.R. 2441.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

HONORING MAUREEN REAGAN ON THE OCCASION OF HER DEATH AND EXPRESSING CONDOLENCES TO HER FAMILY

Mr. BILIRAKIS. Mr. Speaker, I move to suspend the rules and pass the joint

resolution (H.J. Res. 60) honoring Maureen Reagan on the occasion of her death and expressing condolences to her family, including her husband Dennis Revell and her daughter Rita Revell, as amended.

The Clerk read as follows:

H.J. RES. 60

Whereas the Congress is greatly saddened by the tragic death of Maureen Reagan on August 8, 2001;

Whereas Maureen Reagan's love of life and countless contributions to family and the Nation serve as an inspiration to millions;

Whereas Maureen Reagan was a remarkable advocate for a number of causes and had many passions, the greatest being her dedication to addressing the scourge of Alzheimer's disease;

Whereas in 1994 when former President Ronald Reagan announced that he had been diagnosed with Alzheimer's disease, Maureen Reagan joined her father and Nancy Reagan in the fight against Alzheimer's disease and became a national spokesperson for the Alzheimer's Association;

Whereas Maureen Reagan served as a tireless advocate to raise public awareness about Alzheimer's disease, support care givers, and substantially increase the Nation's commitment to research on Alzheimer's disease;

Whereas Maureen Reagan helped inspire the Congress to increase Federal research funding for Alzheimer's disease by amounts proportionate to increases in research funding for other major diseases;

Whereas Maureen Reagan went far beyond merely lending her name to the work of the Alzheimer's Association: she was a hands-on activist on the association's board of directors, a masterful fund-raiser, a forceful advocate, and a selfless and constant traveler to anywhere and everywhere Alzheimer's advocates needed help;

Whereas at every stop she made and every event she attended in her efforts to eradicate Alzheimer's disease through research, Maureen Reagan emphasized that researchers are in a "race against time before Alzheimer's reaches epidemic levels" with the aging of the Baby Boomers;

Whereas Maureen Reagan stated before the Congress in 2000 that "14 million Baby Boomers are living with a death sentence of Alzheimer's today";

Whereas despite her declining health, Maureen Reagan never decreased her efforts in her battle to eliminate Alzheimer's disease;

Whereas during the last six months of her life, from her hospital bed and home, Maureen Reagan urged the Congress to increase funding for Alzheimer's disease research at the National Institutes of Health;

Whereas Maureen Reagan said, "The best scientific minds have been brought into the race against Alzheimer's, a solid infrastructure is in place, and the path for further investigations is clear. What's missing is the money, especially the Federal investment, to keep up the pace."; and

Whereas Maureen Reagan's remarkable advocacy for the millions affected and afflicted by Alzheimer's disease will forever serve as an inspiration to continue and ultimately win the battle against the illness: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress, on the occasion of the tragic and untimely death of Maureen Reagan—

(1) recognizes Maureen Reagan as one of the Nation's most beloved and forceful champions for action to cure Alzheimer's disease and treat those suffering from the illness; and

(2) expresses deep and heartfelt condolences to the family of Maureen Reagan, including her husband Dennis Revell and her daughter Rita Revell.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Ohio (Mr. BROWN) each will control 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. BILIRAKIS).

GENERAL LEAVE

Mr. BILIRAKIS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the joint resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BILIRAKIS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I rise in support of H.J. Res. 60 honoring Maureen Reagan. I would like to thank the gentleman from Massachusetts (Mr. MARKEY) for sponsoring this resolution. Maureen Reagan was once described by one of her critics as one who was "not schooled in the ways of holding her tongue." Thank goodness she was not because we are all better off as a result of her powerful words.

Her desire to contribute to our Nation started at a young age when in 1952 she knocked on doors for Dwight Eisenhower. That early enthusiasm stretched into her adult life. She promoted American businesses abroad in the early 1980s, represented the United States at the U.N. Decade for Women Conference in 1985, and chaired the Republican National Committee as well as the Republican Women's Political Action League.

More than all of this impressive and important work, however, what stands out most as an inspiration to millions of Americans is her tireless dedication to addressing the plague of Alzheimer's disease. The chairman of the Alzheimer's Association board of directors called her the Joan of Arc of Alzheimer's. Anyone whose life has been touched or will be touched by the disease owes her a debt of gratitude. Even at the end of her life she disregarded her own failing health in order to educate people about Alzheimer's and speak in favor of increased funding for research. As Ms. Reagan said, "We are in a race against time before Alzheimer's reaches epidemic levels."

Today, 4 million people are living with Alzheimer's; and this number will grow as the baby boomer population ages. Research is essential to a cure for Alzheimer's, and funding is essential to

research. The experts are gaining ground, and the course for future science is clear. Before this disease puts an incredible strain on our Nation's public health system, we must take the initiative, Maureen Reagan's initiative, and confront this scourge with a commitment to finding a remedy.

Mr. Speaker, the Secret Service agents who guarded Maureen Reagan in life and who carried her casket at her funeral had given her the code name "Radiant." I believe there is not a more fitting description of her life, her work and her memory. Mr. Speaker, I hope all of my colleagues will join me in supporting H.J. Res. 60 in honoring Maureen Reagan, her work and her courageous spirit.

Mr. Speaker, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MARKEY), for his work on this resolution, H.J. Res. 60, recognizing Maureen Reagan as one of the country's most effective advocates on behalf of Alzheimer's disease and expresses the House condolences to her family.

Maureen Reagan is the daughter of former President Ronald Reagan and his first wife, actress Jane Wyman. She died in August of this year after a courageous 5-year battle with malignant melanoma. She was 60 at the time. Since her father's diagnosis of Alzheimer's in 1994, Maureen Reagan was committed to raising awareness about Alzheimer's and the importance of family caregivers.

She was elected a member of the Alzheimer's Association's national board 3 years ago. She testified on numerous occasions before this Congress and State legislatures in support of more funding for Alzheimer's research and caregivers' support.

A year ago she received the Alzheimer's Association Distinguished Service Award for outstanding service to the national board and for helping to advance the mission of this organization. She was also active in raising awareness about melanoma, the deadliest form of skin cancer. In 1998, she received the president's Gold Triangle Award from the American Academy of Dermatology for her work in raising awareness of melanoma and for promoting the importance of skin examination. For that we recognize her.

Mr. Speaker, I yield 4 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, I thank my colleagues for helping to make this resolution possible. The gentleman from New Jersey (Mr. SMITH) and I introduced this resolution as a way of honoring this great woman. She died on August 8. She passed away after

having waged a courageous 5-year battle with cancer. With her passing, this country has lost a true leader in the fight against Alzheimer's disease. She was an extraordinary woman, a talented spokesperson, a tireless advocate.

As a member of the Alzheimer's Association's national board of directors, she worked with Members of Congress to increase funding for Alzheimer's research. She provided compelling testimony before Congress warning that Alzheimer's was on the road to becoming the epidemic of the 21st century unless science could find a way to prevent millions of baby boomers from getting the disease.

Just prior to her untimely death, she called on Congress to double the funding for Alzheimer's research at the NIH to \$1 billion by 2003. As co-chair with the gentleman from New Jersey (Mr. SMITH) of the Congressional Task Force on Alzheimer's Disease, I always valued Maureen's sage advice on task force goals and legislative initiatives.

In March 2000 when Maureen came to lobby Congress for increased Alzheimer's research funding, in between a busy schedule of press interviews and visits with congressional leaders, she spent several hours meeting with members of the Alzheimer's Task Force, including the gentleman from New Jersey (Mr. SMITH) and myself. In that meeting, Maureen expertly outlined the research breakthroughs of the 1990s and reiterated that scientists were in a race against time to find the answers to Alzheimer's disease.

With grace and warmth and delightful wit, Maureen convinced lawmakers to pay attention to the scourge plaguing one in 10 Americans over the age of 65, and 50 percent of the seniors over the age of 85. She took the tragedy of her own father's illness and chose to fight not only for him, but also for the 4 million Americans who currently have Alzheimer's disease and for the 15 million Americans who are predicted to have this disease by the time all of the baby boomers have retired, a staggering number of Americans.

Mr. Speaker, it takes tremendous courage to take on Alzheimer's disease in such a public way when a parent is still at home in a deteriorating condition from that same disease. She knew that there was no time to waste, and so she took on the challenge despite a heavy emotional burden. Even as her own health declined, she refused to let up in her advocacy role, continuing her fight for more Federal research dollars from her hospital bed, and later while recovering from cancer treatments at home in California.

Mr. Speaker, I can think of no better way to pay tribute to Maureen's legacy than to continue her fight to create a world without Alzheimer's disease. Although we have lost her voice, Maureen's passion and energy live on

and continue to inspire us as we work to improve the quality of life for those affected by Alzheimer's disease.

Mr. Speaker, I am deeply saddened by the loss of Maureen and miss her dearly. My thoughts and prayers are with her husband, Dennis, her daughter, Rita, and the entire Reagan family. May she rest in peace.

Mr. BILIRAKIS. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Speaker, I rise in support of House Joint Resolution 60 honoring Maureen Reagan, and I recognize the gentleman from Massachusetts (Mr. MARKEY) for his extraordinary thoughtfulness and consideration in offering this resolution. This resolution speaks as well of Maureen Reagan as it does of its author, the gentleman from Massachusetts (Mr. MARKEY), for his fine work as co-chair of the Alzheimer's task force and for the great work the gentleman has done for bringing attention to this issue.

Maureen Reagan was a vivacious woman with a passion for life and family and country. She had a contagious enthusiasm, an unshakeable will for all of the interests that she pursued. She actively campaigned for her father, former President Ronald Reagan, and spent much energy in the 1980s fundraising for Republican women who were seeking office.

Although she was nationally recognized for her political activities and her commentary, it was her work for victims of Alzheimer's that brought the most attention to her life and perhaps her greatest contribution. When the disease silenced the great communicator, Maureen Reagan, who shared her father's knack for public speaking, became the national spokeswoman for the Alzheimer's Association, and her advocacy raised awareness of not only her father's condition, but also the 4 million Americans currently living with Alzheimer's.

□ 1615

In the final years of her life she traveled the Nation nearly nonstop, ignoring her own failing health, to gather support for Alzheimer's patients and their caregivers.

She was unwavering in her enthusiasm and optimism that a cure was close at hand and she made several appearances here before Congress, calling for increased Federal spending. Although Ms. Reagan did not live to see a cure for Alzheimer's, the national recognition of the disease and the resulting progress and research have much to do with her efforts. Just last week a report was issued that a single ibuprofen tablet taken each day can literally limit the onset and, in fact, diminish and decrease the onset of Alzheimer's disease. That kind of research is possible today, those breakthroughs,

because of much of the work that she did. Her tireless commitment and campaign against Alzheimer's will serve as an inspiration for those who continue to fight this ghastly disease.

Again, I want to thank the gentleman from Massachusetts (Mr. MARKEY), my dear friend, for his thoughtfulness and consideration in bringing this resolution forward, and I urge its adoption.

Mr. BROWN of Ohio. Mr. Speaker, I have no further speakers, and I yield back the balance of my time.

Mr. BILIRAKIS. Mr. Speaker, I yield such time as he may consume to the gentleman from Nevada (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I would like to thank the gentleman from Florida (Mr. BILIRAKIS), my colleague and good friend. I am happy to be here today to come to the floor of the House to join with my colleagues in the House to commemorate the life and work of a dear friend, the strong and vibrant Maureen Reagan.

Mr. Speaker, many things have been said on this House Floor today about Maureen Reagan, all of which I share, and I would like to join in and add my voice to the same great comments that have been made about Maureen Reagan and her life and her dedication to what she did. The numerous contributions that Maureen made to the causes and charities that she pursued would remind all of us of the person, the courage, and the passion and the leadership qualities that she shared with her father.

Mr. Speaker, many times I have met with Maureen and her family, either at her home in California or mine in Nevada, and never once did Maureen, even though she was afflicted with cancer, ever complain about her status, her health, or the fact that she did have a terrible disease called cancer. She was always vibrant, she was always outspoken, always talking positively and passionately about the future and where she was going with her work in dealing with these charitable organizations and issues that she did deal with.

In putting these great qualities to work, Maureen would go on to leave many of her own footsteps across this Nation for many to follow. She never once needed her name to prove both her effectiveness or her charm. Maureen's deep commitment to raising the awareness of Alzheimer's disease and the importance of research confirmed her status as a selfless, dedicated benefactor for millions of Americans. I extend my heartfelt prayers and deepest condolences to Maureen's husband, Dennis, and her lovely daughter, Rita. Indeed, the sense of loss that our Nation has felt is in no comparison to that, I am sure, of Maureen's own family.

Mr. Speaker, I would like to thank the gentleman from Massachusetts (Mr. MARKEY), as well as the gentleman

from New Jersey (Mr. SMITH) for bringing H.J. Res. 60 to the floor, and I urge my colleagues to join me in honoring this courageous and amazing woman. Maureen's contributions to her family and Nation will certainly never be forgotten.

Mr. BILIRAKIS. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I thank the gentleman for yielding me this time.

First of all, I want to thank, as did the gentleman from Louisiana (Mr. TAUZIN) a few moments ago, our very distinguished colleague from Massachusetts (Mr. MARKEY) for his kindness in sponsoring this legislation. I think it shows a real sensitivity for Maureen Reagan who was a very courageous woman, wife and mother, and a tireless advocate, a champion, for research and medical assistance for Alzheimer's patients and, equally important, for their caregivers.

As we all know, one of those victims includes her own father, President Ronald Reagan. Ronald Reagan was a fighter since his early days growing up during the Great Depression, but he turned his disclosure that he suffered from Alzheimer's Disease into a battle for more research money and more assistance for his fellow patients. When Ronald Reagan was unable to continue this fight because of his own deteriorating condition, his daughter, Maureen Reagan, stepped up to the plate and became one of the most tenacious advocates for Alzheimer's research and for trying to find a cure for this horrific disease. Her untimely death to cancer this past summer caused the Alzheimer's community to lose one of its best.

Significantly, even while battling cancer during 5 tough years, Maureen never rested in her quest to try to procure more research money and to help more patients and their loved ones with this terrible disease. Not long before she died, as the gentleman from Massachusetts pointed out earlier, she called on Congress to double to \$1 billion the amount of money allocated for Alzheimer's research by the National Institutes of Health.

As was also pointed out, this disease afflicts so many of our families. Half of those over age 85 suffer to some degree from Alzheimer's, and 1 of every 10 Americans over the age of 65 also is in some stage of Alzheimer's disease. The current number of affected—4 million—will grow to 14 million people if we do not take prompt action and do all that is humanly possible to mitigate and hopefully eradicate this terrible disease.

Maureen Reagan was a great champion. She will be sorely missed in this battle. And we want to just, and I know this will be a unanimous vote on both

sides of the aisle, say to her loved ones, to her husband and to her daughter and to the entire family, how much we deeply care for them and how we miss Maureen Reagan.

Mr. THOMAS. Mr. Speaker, I rise today to support H.J. Res. 60 and to pay tribute to my friend Maureen Reagan, a loving wife and mother, a dedicated member of the Republican Party, and a crusader for Alzheimer's Disease sufferers. I also extend my deepest condolences to her husband, my friend and former constituent, Dennis Revell, and their daughter Rita.

I had the privilege of knowing Maureen for over two decades. In 1980, she was a tireless volunteer in her father's campaign for the White House. Following his election, she became a vigorous activist for female Republicans, raising funds for over 100 candidates. She also served in an appointed position in the California Republican Party, and later ran to be a Member of this House.

After President Reagan poignantly shared with the world his Alzheimer's diagnosis, Maureen continued to dedicate her life to another worthy cause: educating the American public about this debilitating and degenerative disease. Even as Maureen was personally battling cancer, her resolve in making Americans more aware of Alzheimer's disease was remarkable; her passion unyielding. Testifying in front of congressional committees, Ms. Reagan added her voice in promoting the worthy work of our federal medical research agencies. Until the very end, Maureen continually reminded all of us how public advocacy can be vibrant and how public service can be courageous.

She will be missed by her family and friends, by the Alzheimer's patients for whom she worked so tirelessly, by the Republican party, and indeed by all Americans.

Ms. HARMAN. Mr. Speaker, one of the best parts of seeking my seat in Congress was meeting Maureen Reagan in 1992, when she ran in the primary for her party's nomination. It was my good fortune that, after Maureen lost, her supporters became mine and she and I became great friends.

Maureen brought an intelligence and vibrancy to the campaign and although she did not win her party's nomination, she continued to influence many policy debates, particularly in health care after her father revealed he was suffering from Alzheimer's disease.

I am deeply saddened to lose a friend. California and the nation have lost a strong and active voice.

I join my colleagues in honoring the life of Maureen Reagan.

Mr. BILIRAKIS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentleman from Florida (Mr. BILIRAKIS) that the House suspend the rules and pass the joint resolution, H. J. Res. 60, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution, as amended, was passed.

A motion to reconsider was laid on the table.

ADMINISTRATIVE SIMPLIFICATION COMPLIANCE ACT

Mr. TAUZIN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3323) to ensure that covered entities comply with the standards for electronic health care transactions and code sets adopted under part C of title XI of the Social Security Act, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3323

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Administrative Simplification Compliance Act".

SEC. 2. EXTENSION OF DEADLINE FOR COVERED ENTITIES SUBMITTING COMPLIANCE PLANS.

(a) IN GENERAL.—

(1) EXTENSION.—Subject to paragraph (2), notwithstanding section 1175(b)(1)(A) of the Social Security Act (42 U.S.C. 1320d-4(b)(1)(A)) and section 162.900 of title 45, Code of Federal Regulations, a health care provider, health plan (other than a small health plan), or a health care clearinghouse shall not be considered to be in noncompliance with the applicable requirements of subparts I through R of part 162 of title 45, Code of Federal Regulations, before October 16, 2003.

(2) CONDITION.—Paragraph (1) shall apply to a person described in such paragraph only if, before October 16, 2002, the person submits to the Secretary of Health and Human Services a plan of how the person will come into compliance with the requirements described in such paragraph not later than October 16, 2003. Such plan shall be a summary of the following:

(A) An analysis reflecting the extent to which, and the reasons why, the person is not in compliance.

(B) A budget, schedule, work plan, and implementation strategy for achieving compliance.

(C) Whether the person plans to use or might use a contractor or other vendor to assist the person in achieving compliance.

(D) A timeframe for testing that begins not later than April 16, 2003.

(3) ELECTRONIC SUBMISSION.—Plans described in paragraph (2) may be submitted electronically.

(4) MODEL FORM.—Not later than March 31, 2002, the Secretary of Health and Human Services shall promulgate a model form that persons may use in drafting a plan described in paragraph (2). The promulgation of such form shall be made without regard to chapter 35 of title 44, United States Code (commonly known as the "Paperwork Reduction Act").

(5) ANALYSIS OF PLANS; REPORTS ON SOLUTIONS.—

(A) ANALYSIS OF PLANS.—

(i) FURNISHING OF PLANS.—Subject to subparagraph (D), the Secretary of Health and Human Services shall furnish the National Committee on Vital and Health Statistics with a sample of the plans submitted under paragraph (2) for analysis by such Committee.

(ii) ANALYSIS.—The National Committee on Vital and Health Statistics shall analyze the sample of the plans furnished under clause (i).

(B) REPORTS ON SOLUTIONS.—The National Committee on Vital and Health Statistics shall regularly publish, and widely disseminate

to the public, reports containing effective solutions to compliance problems identified in the plans analyzed under subparagraph (A). Such reports shall not relate specifically to any one plan but shall be written for the purpose of assisting the maximum number of persons to come into compliance by addressing the most common or challenging problems encountered by persons submitting such plans.

(C) CONSULTATION.—In carrying out this paragraph, the National Committee on Vital and Health Statistics shall consult with each organization—

(i) described in section 1172(c)(3)(B) of the Social Security Act (42 U.S.C. 1320d-1(c)(3)(B)); or

(ii) designated by the Secretary of Health and Human Services under section 162.910(a) of title 45, Code of Federal Regulations.

(D) PROTECTION OF CONFIDENTIAL INFORMATION.—

(i) IN GENERAL.—The Secretary of Health and Human Services shall ensure that any material provided under subparagraph (A) to the National Committee on Vital and Health Statistics or any organization described in subparagraph (C) is redacted so as to prevent the disclosure of any—

(I) trade secrets;

(II) commercial or financial information that is privileged or confidential; and

(III) other information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

(ii) CONSTRUCTION.—Nothing in clause (i) shall be construed to affect the application of section 552 of title 5, United States Code (commonly known as the "Freedom of Information Act"), including the exceptions from disclosure provided under subsection (b) of such section.

(6) ENFORCEMENT THROUGH EXCLUSION FROM PARTICIPATION IN MEDICARE.—

(A) IN GENERAL.—In the case of a person described in paragraph (1) who fails to submit a plan in accordance with paragraph (2), and who is not in compliance with the applicable requirements of subparts I through R of part 162 of title 45, Code of Federal Regulations, on or after October 16, 2002, the person may be excluded at the discretion of the Secretary of Health and Human Services from participation (including under part C or as a contractor under sections 1816, 1842, and 1893) in title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.).

(B) PROCEDURE.—The provisions of section 1128A of the Social Security Act (42 U.S.C. 1320a-7a) (other than the first and second sentences of subsection (a) and subsection (b)) shall apply to an exclusion under this paragraph in the same manner as such provisions apply with respect to an exclusion or proceeding under section 1128A(a) of such Act.

(C) CONSTRUCTION.—The availability of an exclusion under this paragraph shall not be construed to affect the imposition of penalties under section 1176 of the Social Security Act (42 U.S.C. 1320d-5).

(D) NONAPPLICABILITY TO COMPLYING PERSONS.—The exclusion under subparagraph (A) shall not apply to a person who—

(i) submits a plan in accordance with paragraph (2); or

(ii) who is in compliance with the applicable requirements of subparts I through R of part 162 of title 45, Code of Federal Regulations, on or before October 16, 2002.

(b) SPECIAL RULES.—

(1) RULES OF CONSTRUCTION.—Nothing in this section shall be construed—

(A) as modifying the October 16, 2003, deadline for a small health plan to comply with

the requirements of subparts I through R of part 162 of title 45, Code of Federal Regulations; or

(B) as modifying—

(i) the April 14, 2003, deadline for a health care provider, a health plan (other than a small health plan), or a health care clearinghouse to comply with the requirements of subpart E of part 164 of title 45, Code of Federal Regulations; or

(ii) the April 14, 2004, deadline for a small health plan to comply with the requirements of such subpart.

(2) **APPLICABILITY OF PRIVACY STANDARDS BEFORE COMPLIANCE DEADLINE FOR INFORMATION TRANSACTION STANDARDS.**—

(A) **IN GENERAL.**—Notwithstanding any other provision of law, during the period that begins on April 14, 2003, and ends on October 16, 2003, a health care provider or, subject to subparagraph (B), a health care clearinghouse, that transmits any health information in electronic form in connection with a transaction described in subparagraph (C) shall comply with the requirements of subpart E of part 164 of title 45, Code of Federal Regulations, without regard to whether the transmission meets the standards required by part 162 of such title.

(B) **APPLICATION TO HEALTH CARE CLEARINGHOUSES.**—For purposes of this paragraph, during the period described in subparagraph (A), an entity that processes or facilitates the processing of information in connection with a transaction described in subparagraph (C) and that otherwise would be treated as a health care clearinghouse shall be treated as a health care clearinghouse without regard to whether the processing or facilitation produces (or is required to produce) standard data elements or a standard transaction as required by part 162 of title 45, Code of Federal Regulations.

(C) **TRANSACTIONS DESCRIBED.**—The transactions described in this subparagraph are the following:

(i) A health care claims or equivalent encounter information transaction.

(ii) A health care payment and remittance advice transaction.

(iii) A coordination of benefits transaction.

(iv) A health care claim status transaction.

(v) An enrollment and disenrollment in a health plan transaction.

(vi) An eligibility for a health plan transaction.

(vii) A health plan premium payments transaction.

(viii) A referral certification and authorization transaction.

(c) **DEFINITIONS.**—In this section—

(1) the terms “health care provider”, “health plan”, and “health care clearinghouse” have the meaning given those terms in section 1171 of the Social Security Act (42 U.S.C. 1320d) and section 160.103 of title 45, Code of Federal Regulations;

(2) the terms “small health plan” and “transaction” have the meaning given those terms in section 160.103 of title 45, Code of Federal Regulations; and

(3) the terms “health care claims or equivalent encounter information transaction”, “health care payment and remittance advice transaction”, “coordination of benefits transaction”, “health care claim status transaction”, “enrollment and disenrollment in a health plan transaction”, “eligibility for a health plan transaction”, “health plan premium payments transaction”, and “referral certification and authorization transaction” have the meanings given those terms in sections 162.1101, 162.1601, 162.1801, 162.1401, 162.1501, 162.1201, 162.1701, and 162.1301 of title

45, Code of Federal Regulations, respectively.

SEC. 3. REQUIRING ELECTRONIC SUBMISSION OF MEDICARE CLAIMS.

(a) **IN GENERAL.**—Section 1862 of the Social Security Act (42 U.S.C. 1395y) is amended—

(1) in subsection (a)—

(A) by striking “or” at the end of paragraph (20);

(B) by striking the period at the end of paragraph (21) and inserting “; or”; and

(C) by inserting after paragraph (21) the following new paragraph:

“(22) subject to subsection (h), for which a claim is submitted other than in an electronic form specified by the Secretary.”; and

(2) by inserting after subsection (g) the following new subsection:

“(h)(1) The Secretary—

“(A) shall waive the application of subsection (a)(22) in cases in which—

“(i) there is no method available for the submission of claims in an electronic form; or

“(ii) the entity submitting the claim is a small provider of services or supplier; and

“(B) may waive the application of such subsection in such unusual cases as the Secretary finds appropriate.

“(2) For purposes of this subsection, the term ‘small provider of services or supplier’ means—

“(A) a provider of services with fewer than 25 full-time equivalent employees; or

“(B) a physician, practitioner, facility, or supplier (other than provider of services) with fewer than 10 full-time equivalent employees.”.

(b) **EFFECTIVE DATE.**—The amendments made by subsection (a) shall apply to claims submitted on or after October 16, 2003.

SEC. 4. CLARIFICATION WITH RESPECT TO APPLICABILITY OF ADMINISTRATIVE SIMPLIFICATION REQUIREMENTS TO MEDICARE+CHOICE ORGANIZATIONS.

Section 1171(5)(D) of the Social Security Act (42 U.S.C. 1320d(5)(D)) is amended by striking “Part A or part B” and inserting “Parts A, B, or C”.

SEC. 5. AUTHORIZATION OF APPROPRIATIONS FOR IMPLEMENTATION OF REGULATIONS.

(a) **IN GENERAL.**—Subject to subsection (b), and in addition to any other amounts that may be authorized to be appropriated, there are authorized to be appropriated a total of \$44,200,000, for—

(1) technical assistance, education and outreach, and enforcement activities related to subparts I through R of part 162 of title 45, Code of Federal Regulations; and

(2) adopting the standards required to be adopted under section 1173 of the Social Security Act (42 U.S.C. 1320d-2).

(b) **REDUCTIONS.**—

(1) **MODEL FORM 14 DAYS LATE.**—If the Secretary fails to promulgate the model form described in section 1(a)(4) by the date that is 14 days after the deadline described in such section, the amount referred to in subsection (a) shall be reduced by 25 percent.

(2) **MODEL FORM 30 DAYS LATE.**—If the Secretary fails to promulgate the model form described in section 1(a)(4) by the date that is 30 days after the deadline described in such section, the amount referred to in subsection (a) shall be reduced by 50 percent.

(3) **MODEL FORM 45 DAYS LATE.**—If the Secretary fails to promulgate the model form described in section 1(a)(4) by the date that is 45 days after the deadline described in such section, the amount referred to in subsection (a) shall be reduced by 75 percent.

(4) **MODEL FORM 60 DAYS LATE.**—If the Secretary fails to promulgate the model form

described in section 1(a)(4) by the date that is 60 days after the deadline described in such section, the amount referred to in subsection (a) shall be reduced by 100 percent.

The **SPEAKER** pro tempore. Pursuant to the rule, the gentleman from Louisiana (Mr. **TAUZIN**) and the gentleman from Ohio (Mr. **BROWN**) each will control 20 minutes.

Mr. **BROWN** of Ohio. Mr. Speaker, I ask unanimous consent that the gentleman from California (Mr. **STARK**) be permitted to control 10 minutes of the time on this side.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. **TAUZIN**. Mr. Speaker, I ask unanimous consent that the gentleman from Connecticut (Mrs. **JOHNSON**) on behalf of the gentleman from California (Mr. **THOMAS**) be permitted to control 10 minutes of time on this side.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

GENERAL LEAVE

Mr. **TAUZIN**. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and insert extraneous material on this legislation now being considered.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. **TAUZIN**. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3323, the Administrative Simplification Compliance Act introduced by the gentleman from Ohio (Mr. **HOBSON**).

A little over 5 years ago, Congress passed the Health Insurance Portability and Accountability Act, or HIPAA, a far-reaching law that imposed significant new requirements on health care plans and providers and created basic consumer protections in a number of areas. One of the most important provisions of the act, although infrequently discussed in Congress, relates to administrative simplification. This provision implements common standards for electronic health care transactions. It was designed to increase the health care system's efficiency and effectiveness, to improve law enforcement's ability to prevent fraud and abuse, and generally to reduce administrative burdens for plans and providers.

We in Congress strongly support the goals of administrative simplification. The provision's implementation will eliminate the confusing patchwork of electronic and paper standards that exist in the health care marketplace. However, as plans and providers move toward common electronic standards,

we must also recognize that their efforts will require a significant amount of time and money, and that perhaps the time frames Congress originally set forth in statute to comply with these rules should be modified.

On August 17, 2000, the Department of Health and Human Services published its final rule implementing the standards for electronic health care transactions. The rule required all plans and providers to come into compliance with administrative simplification standards by October 16, 2002. From speaking with many people in the health care system during the past year, we have concluded that this deadline is much too ambitious.

That is why we are here today. The Hobson legislation will provide plans and providers with one additional year to come into compliance with the administrative simplification standards. His legislation, which is a compromise product negotiated between the bill's sponsors, the gentleman from Arizona (Mr. SHADEGG), the Committee on Energy and Commerce, and the Committee on Ways and Means allows covered entities the extra time they need to ensure that they will continue taking steps to come into compliance.

I would like to point out that one important change to the legislation is now in the bill in its reintroduced version. In its original form, H.R. 3323 imposed a \$1 user fee on every paper claim submitted to the Medicare program. This provision has been replaced with a requirement that health care entities, with the exception of small providers, submit their claims to the Medicare program in electronic format. This requirement refinement significantly improves the bill and eliminates a tremendous burden for providers and the government.

Mr. Speaker, this legislation has been vetted extensively with the stakeholders in the health care system. It deserves everyone's vote and we should all be grateful for the fine work of the gentleman from Ohio (Mr. HOBSON) in the area.

Mr. Speaker, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, in 1996 Congress passed landmark legislation, and most of us know it as Kennedy/Kassebaum or HIPAA, that answered several difficult questions: How do we minimize coverage disruptions and barriers in the private health insurance market? How do we improve the efficiency of health care financing and delivery in the United States?

The gentlemen from my home State of Ohio (Mr. SAWYER) and (Mr. HOBSON) took on the second question. They championed commonsense provisions in HIPAA that ensure the transition to fully electronic transfers between health plans and providers. Electronic

claiming is far superior to the old-fashioned paper version. It saves money, it saves trees, and it typically saves patients from paying out-of-pocket for services ultimately covered by insurance.

The deadline for implementing phase 1 of this transition is October 2002, but the reality is some sectors of the health industry and State governments need extra time to make the technical and the procedural changes necessary to achieve compliance. Delaying the compliance deadlines for administrative simplification is not an action any Member of Congress, Mr. Speaker, should take lightly.

CMS has estimated that the electronic claims processing can save \$30 billion over 10 years. Any delay in implementation reduces, obviously, those associated savings. Health plans and providers throughout the country have invested time and money to gear up for this transition. To the extent that their new operations sit idle, they are losing money too. That said, it would be inappropriate to fault both public and private sector entities that work in good faith against a deadline they did not create and found they simply could not meet.

Mr. Speaker, H.R. 3323 accommodates the concerns of those on both sides of this issue. Under this legislation, health plans and providers must either meet the current compliance deadline or demonstrate their plans for achieving compliance by October 2003. This one-time 1-year extension creates a cushion for organizations bumping up against the current deadline without permitting an undue or indefinite delay.

Mr. Speaker, I am pleased to support this reasonable compromise. I again thank the gentlemen from Ohio (Mr. SAWYER) and (Mr. HOBSON) for their good work.

□ 1630

Mr. TAUZIN. Mr. Speaker, I am very pleased to yield 3 minutes to the distinguished gentleman from Florida (Mr. BILIRAKIS), the chairman of the Subcommittee on Health of the Committee on Energy and Commerce.

Mr. BILIRAKIS. Mr. Speaker, I appreciate the gentleman yielding time to me.

Mr. Speaker, I rise in support of H.R. 3323, a bill that would ensure that stakeholders in America's health care system are able to comply with regulations to standardize electronic health care transactions.

This legislation extends by 1 year the deadline for compliance with administrative simplification provisions created as part of the Health Insurance Portability and Accountability Act of 1996, which we fondly pronounce as HIPAA.

The legislation also implements an orderly transition process that will en-

sure that covered entities will be in a position to implement the new regulations by October of 2003.

In 1996, Congress passed HIPAA to improve efficiency and effectiveness in the health care system, to make it easier to detect fraud and abuse, facilitate access to health and medical information by researchers, and to reduce administrative costs.

When we passed HIPAA in 1996, it was the largest government action in health care since the creation of Medicare. Administrative simplification and standardization of the way medical data is transmitted electronically is vital to improving the quality of medical care. The American health care system currently has more than 12 million providers, plans, suppliers, and other participants that require access to medical data.

Today, there is no single standard by which this data can be exchanged electronically. Therefore, the full benefit of the technological revolution has yet to be implemented by the health care industry. Standardization of electronic data has the potential to simplify administrative functions, increase processing of medical claims, and improve the quality of care while substantially reducing health care costs.

However, flawed implementation of this process will prevent the full benefit of standardization from being realized. This bill alleviates this problem by requiring that each stakeholder seeking an extension submit a report to the Secretary of Health and Human Services on how they plan to implement electronic standardization. This will allow the Secretary to have access to the best transition plans that are proposed, allowing for an exchange of information that will benefit stakeholders less prepared to implement this process.

H.R. 3323 is a thoughtful and logical approach to ensuring that health care beneficiaries are able to take the fullest advantage of the coming revolution in medical care. I thank the gentleman from Arizona (Mr. SHADEGG) for taking the lead on this issue for the Committee on Energy and Commerce and the gentleman from Ohio (Mr. HOBSON) for introducing the support legislation.

I urge my colleagues to join me in supporting H.R. 3323.

Mr. TAUZIN. Mr. Speaker, I yield the balance of my time to the gentleman from Ohio (Mr. HOBSON), the author of the legislation.

The SPEAKER pro tempore (Mr. CULBERSON). The gentleman from Ohio (Mr. HOBSON) is recognized for 4 minutes.

Mr. HOBSON. Mr. Speaker, we have before us today a reasonable and balanced bill that provides the final push for an idea that my colleague, the gentleman from Ohio (Mr. SAWYER), and myself have been working on for 7 years: The simplification of paperwork

associated with paying health care costs.

In 1993, my colleague, the gentleman from Ohio, began to develop legislation that would create a standard framework for electronic filing of health care claims. Today, we all recognize electronic health care filing represents significant advantages over paper filings for every level of health care, from providers to insurance.

However, the patchwork of different computer systems needed to electronically file claims with different health care payers made the process a complicated, expensive, and unwieldy situation.

In 1996, our work culminated in the administrative simplification provisions included in the Health Insurance Portability and Accountability Act of 1996, which required a common format for electronic health care claims. This would have the effect of simplifying the administrative burden associated with health care transactions, and would, according to the Health Care Financing Administration at the time, produce \$9.9 billion in savings for the health care community.

By reducing administrative overhead, we also help improve the quality of health care by freeing up resources now devoted to paperwork and administration. However, for a variety of reasons, the regulations implementing the administrative simplification provisions enacted in 1996 were delayed.

Now, 5 years later, two final rules are set to take effect shortly. The first, regarding medical privacy, is left untouched by the legislation before this body today, and will take effect as scheduled in April of 2003. The second, establishing code sets in transactions, is set to take effect October 16, 2002.

However, the current state of readiness in the health care community is inconsistent, and significant sectors have argued for additional time to undertake systems changes necessary to reach compliance. At the same time, some entities clearly will be ready for the first set of standards.

Mr. Speaker, the gentleman from Ohio (Mr. SAWYER) and I recognize the need for additional time for some entities to come into compliance. At the same time, we must ensure that this time is fully utilized by all the parties and that those entities that want to move forward can do so without penalty.

Our legislation provides a solution to the current status by establishing two tracks for entities covered by the original statute. For those plans and providers who will be ready to go by October, 2002, they can proceed under the original timetable. These entities can be sending and receiving electronic transactions under the new standardized format in October of next year.

However, our legislation also recognizes some entities may have under-

estimated what was needed to be operationally compliant with the standards of 2002. That is why our bill includes a provision which allows these plans and providers to file a plan with the Secretary of the Department of Health and Human Services explaining the steps they will take to reach compliance.

One other important fact. This bill also ensures that the additional time provided is fully utilized, from the government's perspective. Our bill includes an authorization for \$44.2 million for the Department of Health and Human Services which will allow the Department to adequately prepare for the transition.

This authorization will support activities at the Department associated with finishing the remaining work on the original standards providing technical assistance and educational outreach and enforcement activities.

Finally, our bill requires the filing of electronic claims with Medicare by extending the deadline to October 16, 2003, with the exception for small providers and those physically unable to file electronically. This will help prevent backsliding to paper transactions and will help focus all entities on reaching the cost-saving goals of the original statute.

In conclusion, this statute represents a balanced package of measures that does not simply delay the administrative simplification provisions, but rather, provides a clear plan and one-time extension to reach compliance in the marketplace.

I urge my colleagues to support this legislation; and I would like to thank the staffs of both committees, my staff, Michael Beer, the staff of the gentleman from Ohio (Mr. SAWYER), and the staff of the Committee on Commerce.

I would like to thank the leadership and the staff of the Committee on Ways and Means, and particularly the leadership of the gentleman from Texas (Mr. ARMEY) and the Speaker, who encouraged us to bring this bill forward. We think we have done something good here.

Mr. STARK. Mr. Speaker, will the gentleman yield?

Mr. HOBSON. I yield to the gentleman from California.

Mr. STARK. Mr. Speaker, I appreciate the gentleman's leadership in this.

I heard the gentleman's statement about the authorization for I think the \$44.2 million for CMS for the Department of Health and Human Services to carry out their work.

I know, as a distinguished member of the Committee on Appropriations, that that will come to the gentleman in another form.

I often feel that we have added many chores to the Department of Health and Human Services without being so concerned as to how they will perform

the activities. I want to commend the gentleman for thinking ahead and asking for the support for the Department of Health and Human Services to see that they have the resources to carry out this work. I would like to join with him to see that we get the appropriated funds.

Mr. BROWN of Ohio. Mr. Speaker, I yield 4 minutes to my colleague, the gentleman from Summit and Portage Counties, Ohio (Mr. SAWYER).

Mr. SAWYER. Mr. Speaker, I thank my friend, the gentleman from Lorain County, Ohio, for yielding time to me. I particularly want to thank my colleague, the gentleman from Ohio (Mr. HOBSON), for his leadership, his persistence, and his hard work, and in the last year, his attention to detail with regard to the administration of this.

I would also like to thank the chairman and ranking members of the Committee on Energy and Commerce and the Committee on Ways and Means, and particularly, their counterparts in the leadership of the subcommittees having to do with health care of both bodies.

Mr. Speaker, I want to thank them for their assistance on this legislation, for bringing it to the floor. This measure is a bipartisan compromise which keeps administrative simplification on track and should be passed by the House. The gentleman from Ohio (Mr. HOBSON) and I first started working on this back in the early 1990s. We met with a broad spectrum of industry groups on how to streamline the processes of administrative information and financial transactions.

By standardizing these efforts for electronic transmission, we, along with the industry, strongly believed that this would reduce paperwork, limit fraud and abuse where it may or may not exist, and help contain health care costs.

Every time we stand up here and talk about limiting waste, fraud and abuse, we do it too often by simply cutting money with the hopes that under that rubric, dollars lost can somehow go unreplaced. This goes a great deal further. It outlines a practical, hard-headed way to achieve the kinds of savings that we are talking about, and have been in this legislation for the last 5 years.

Back in September of 1993, the gentleman from Ohio (Mr. HOBSON) and I introduced this legislation for the first time. After 3 years of extensive and detailed consultation, the bill was included in HIPAA. According to HHS, as we have heard, it is expected to save about \$30 billion.

Now, 5 years after enactment of the legislation, the first of a series of regulations are due to take effect next year. While an awful lot of health plans, hospital, and stakeholders have invested millions of dollars to be

ready, some plans and some State Medicaid systems simply will not be in compliance in time.

That concern that this would disrupt transmission of health and financial information and cause any number of problems for the health care consumer is what motivates this legislation today. This bipartisan effort will prevent that from happening while still ensuring that the regulations are implemented in a timely manner.

For those who will not be ready, the bill holds them accountable by requiring them to file a plan documenting how they will reach compliance. If they fail to do so, they may not be able to participate in Medicare.

The document must include a budget, a work plan, and an implementation strategy for reaching compliance. This will ensure that at the end of the deadline all providers, plans, and other health care groups are ready. The plan must also outline a time frame for electronic testing, which means that consumers can be assured that there will be no disruptions in delivery, although the bill does provide additional time to reach compliance.

Everyone involved in this should know that this is a one-time deal. We hope Members will not come back again asking for any further delays. The answer the next time will be, I am certain, a clear and inarguable no.

This legislation will facilitate a smooth transition to processing electronic transactions and medical information by authorizing funds for HHS to issue the next set of regulations, and perhaps, even more importantly, to provide outreach, education, and technical assistance to those who seek to comply.

Many doctors' offices will need that kind of help in reaching compliance. This bill gives HHS the ability to help them.

Almost 10 years ago, we set out to make the health care system more efficient by encouraging the responsible electronic transfer of data. This legislation will help us meet that goal. I urge its passage.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of the Hobson bill. It is instructive that we passed this directive in 1996. That is 5 years ago. This was going to save the system \$30 billion through greater efficiency, so it was with great conviction that many of us resisted, including the gentleman from California (Chairman THOMAS) of the Committee on Ways and Means, resisted a delay, and particularly an open-ended delay, of the implementation of these administrative simplification provisions of the Health Insurance Portability and Accountability Act.

However, in recent weeks it has become very clear that a number of pro-

viders and plans, as well as the State governments, have some legitimate reasons why they will have a hard time complying by the October 2002 deadline and have asked for a year's extension.

The gentlemen from Ohio (Mr. HOBSON and Mr. SAWYER) have developed a very responsible compromise which the Committee on Ways and Means supports, the Committee on Energy and Commerce supports, and really is a good example of how rational thinking can guide the Nation effectively.

This bill just creates a smoother glide path to compliance for all entities. It is not open-ended; it does require everybody who is going to be responsible to comply to think about what it is going to take to come into compliance with this very important provision, but one that is complicated, particularly for small providers or very, very large providers in this era of rapid change.

It forces those responsible to comply to think about what budget it will take, what work plan will accomplish the goal, what needs to be tested, what strategy needs to be adopted to impact and accomplish compliance with the HIPAA requirements. That is good. That means it will happen more surely and with better or greater effectiveness.

It not only requires that kind of planning, but it does not discourage those who can comply sooner.

□ 1645

I am particularly pleased that the Department of Health and Human Services under this legislation would be required to issue model guidance plans. So a lot of small providers can just take this plan, fill in the blanks and know exactly what they need to do and how they need to do it.

In addition, I am pleased that the bill requires the Secretary to disseminate reports from evaluating these plans that provide solutions to some of the problems that are identified through reviewing the compliance plans. This creates, in fact, a new partnership between government and the private sector as we near the compliance date for the HIPAA requirements, and I think that is going to mean a better quality of compliance as well as surer compliance with a new date a year from 2002, March 31.

I am also pleased that the bill does actually require all Medicare claims to be submitted electronically with the following exceptions: If there is no method to submit an electronic claim; or if one is a very small provider, a facility with fewer than 25 full-time employees; or a physician practice with fewer than 10 full-time employees; or in unusual circumstances as determined by the Secretary. I also believe that many of those small providers are going to use electronic means of submission because they are going to find

it much faster, much more efficient, they will get paid more rapidly, and it will be more accurate.

But this bill does recognize that small compliers and certain other situations may require an exception. So I commend my colleagues, the gentleman from Ohio (Mr. Hobson) and the gentleman from Ohio (Mr. Sawyer) for moving with and through both the Committee on Ways and Means and the Committee on Energy and Commerce to bring this to the floor. It was really their knowledge of this issue, their insight, their determination that helped us find this very constructive solution.

Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I add my congratulations to the gentleman from Ohio (Mr. HOBSON) and the gentleman from Ohio (Mr. SAWYER) for working to push this bill to fruition.

Mr. Speaker, I rise in support of H.R. 3323. I remind my colleagues that the standards that we are talking about today for electronic claims and referrals are being passed because the health care industry asked for our help.

Unlike the banking industry or the securities industry and others, the health care providers could not agree amongst themselves on how to talk to each other electronically. They asked us to step in and help establish standards, and now many of the sectors of the health industry have realized the wisdom of the saying, "Be careful what you wish for, you might get it."

They support the goals of the administrative simplification, but they now say they underestimated the effort it will take for them to comply, and they say they need more time. I think some of the sectors, particularly hospitals, are ready to go and would like to participate in what they think might be up to \$30 billion in savings. And I agree. I want these simplification plans to be adopted as soon as possible and with as little delay as we can allow them and still let them officially go ahead and put these rules into effect.

I would like to make one thing quite clear for the record, and that is that this bill does not delay the HIPAA privacy regulation, not for health plans, not for health care providers, not for health care clearinghouses. There has been some concern that extending the transaction and codes sets compliance deadline would effectively exempt some health care providers and health care clearinghouses from the privacy rule.

This bill should remove any and all ambiguity on that point. Any health care provider or health care clearinghouse that would be subject to the privacy rule before we pass this bill will still be subject to the privacy rule after we pass this bill, and they will need to

comply by April of 2003. The bill does not delay the privacy compliance deadline or negatively impact the privacy regulation. It is that simple.

Having said that, again, all the people who have worked so diligently to bring this compromise and this bill to the floor, indeed, are to be congratulated. I hope it will save money, help the beneficiaries get their information more quickly and more efficiently, and help the providers provide good medical care to more people for less money over the years to come.

Mr. Speaker, I yield back the balance of my time.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 1 minute to the gentlewoman from Washington (Ms. DUNN), a member of the Subcommittee on Health of the Committee on Ways and Means. She is a hardworking member.

Ms. DUNN. Mr. Speaker, I rise in support of H.R. 3323. That is a bill to delay the administrative simplification rules for 1 year. I want to thank the gentleman from California (Chairman THOMAS), the chairwoman of the Subcommittee on Health, the gentlewoman from Connecticut (Mrs. JOHNSON), and particularly my colleague, the gentleman from Ohio (Mr. HOBSON) for working very, very hard to put a compromise together that we could live with. They worked diligently and provided a 1-year delay without implementing a user fee.

I would like to thank the gentleman from Arizona (Mr. SHADEGG) for working with me earlier this year when we introduced legislation to provide for a 2-year delay.

While I would have preferred our bill, I recognize that the compromise we have today balances the need of maintaining oversight and encouraging all providers to comply with the regulations.

I am very pleased that the user fees were removed from this legislation. Like many of my colleagues, I was concerned about requiring some physician to pay a user fee when they will experience a reduction in Medicare payments next year. This delay is vital to help those struggling to meet the challenges of compliance. The people I represent, the doctors, the hospitals and the health plans, support a delay.

I ask my colleagues to support this legislation. It is good legislation. Let us get it to the President's desk before the end of the year.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. HOBSON).

Mr. HOBSON. Mr. Speaker, I want to thank my colleague, the gentleman from Ohio (Mr. BROWN) as well as the gentleman from Ohio (Mr. SAWYER) again, and all the people who worked on this.

I want to explain to people this is a very complicated situation. This is not

easy to do. It is not easy to understand what we are doing. This is a massive change in how we do things. But when we get done it will be more cost effective. We will have less fraud. We will have less abuse because we will have standardized coding. And we will have electronic transfer. And the frustrations that people have in doctors' offices about the huge stacks of bills that they are trying to collect should go away. That is a real step forward.

We hope to save more than the \$29.9 billion that we are talking about in this bill with this type of activity.

The most important thing I want people to understand is sometimes we get all wrapped up in fights amongst ourselves. We did not in this legislation. The committees came together, the Members came together, and we worked out a situation that I think in the long run is maybe a better bill than we wrote, is a better bill than other people wrote. The finest solution to this is one that is good for this country, gives people time but moves the system forward to the final completion that we all want.

I want to particularly thank everybody, all the staffs, all the Members who worked so hard to make this work.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I thank the gentleman from Ohio (Mr. HOBSON) for his really outstanding and consistent leadership on this issue.

Mr. MARKEY. Mr. Speaker, I rise in support of the language in the Administrative Simplification Compliance Act, H.R. 3323 which exempts from delay the compliance date for the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule.

In 1996 Congress made a promise to the American people that by February 2001 medical privacy protections would be in place. Despite the efforts of privacy opponents who lobbied this Administration heavily to postpone the effective date of these protections, the final privacy rule went forward in April 2001—a victory for patients, doctors and the quality of our nation's health care. But we're not quite out of the woods yet—the Administration has indicated that certain sections of this rule are to be opened for public comment early next year. It is my hope that this plan will not serve to undermine the strong privacy protections already in place and that the compliance date for these protections will not be postponed.

The date of compliance for these first time, fundamental medical privacy protections is April 2003. While we can all agree that these protections don't go far enough in providing comprehensive privacy for medical records they are a good first step.

I praise Representative HOBSON, the author of H.R. 3323, for including language to preserve the compliance date for the HIPAA privacy protections. Americans have waited far too long for medical privacy and they deserve it as soon possible.

Mr. SHADEGG. Mr. Speaker, I rise to support H.R. 3323, the Administrative Simplification Compliance Act. Mr. Speaker, earlier this year, I introduced legislation, H.R. 1975, that

would have greatly assisted health care providers, physicians, health plans, and the states in coming into compliance with the Administrative Simplification provisions that were passed as part of the Health Insurance Portability and Accountability Act (HIPAA). My bill recognized the difficulty that health plans, providers, and states face in updating their computer systems by delaying the HIPAA compliance date to the later of October 16, 2004, or two years after the Secretary finalized all of the Administrative Simplification regulations. Unfortunately, however, there was skepticism as to the merit of any extension.

While the intention of the Administrative Simplification requirements is meritorious—moving from a slothly paper-based health care transaction system to an efficient electronic-based one—it is clear that health plans and providers will not be able to meet the deadlines set forth in regulations that were late in their release. According to a recent survey conducted by Phoenix Health Systems, "industry-wide readiness for the October 16, 2002 transactions deadline is questionable—even unlikely."

Further evidence of the difficulty of meeting the October 16, 2002 deadline for transactions and code sets found in an October 11, 2001 letter signed by the National Governors Association, National Conference of State Legislatures, Council of State Governments, National Association of Counties, National League of Cities, and the U.S. Conference of Mayors which stated "State and local governments will be unable to meet the requirements of HIPAA under the current implementation schedule. Regardless of whether other covered entities—such as hospitals, health plans, providers, and clearinghouse—except to be compliant with HIPAA under the current system, if state and local governments are not ready, HIPAA will not work."

The bill on the floor today represents a compromise. The bill does not contain all of the provisions I would like. It is, however, an improvement over its original form, which contained an onerous user fee on Medicare providers, an idea that has been rejected by the House of Representatives time and time again. In addition, the compliance plans that covered entities will have to submit—something that will get entities to focus on how to come into compliance—will be less burdensome under the new amended bill. I still have concerns about the bill's effect on small providers, but believe that the exceptions we have included are sufficient to not punish small physician practices.

Mr. Speaker, I want to thank Mr. HOBSON, Mr. SAWYER, Chairman TAUZIN, and Chairman THOMAS for their work on this issue.

Mr. DINGELL. Mr. Speaker, H.R. 3323, the "Administrative Simplification Compliance Act" is a responsible compromise. Congressman HOBSON and SAWYER have addressed the concerns of the health care industry while maintaining the integrity of the administrative simplification requirements. H.R. 3323 also reflects the bipartisan input of the committees of jurisdiction, the Committee on Energy and Commerce and the Committee on Ways and Means.

H.R. 3323 delays the implementation of the administrative simplification requirements in

the Health Insurance Portability and Accountability Act of 1996 (HIPAA) by one year. It ensures, however, that those sectors of the health care industry that take advantage of this delay are using the extra year to ready themselves for compliance.

Most importantly, the bill ensures that the one-year delay of administrative simplification does not touch the implementation of the health information privacy requirements in HIPAA, which will go into effect as scheduled.

H.R. 3323 also requires that Medicare claims be submitted electronically, with reasonable exceptions. The Medicare program has paved the way in moving from paper-based claims processing to electronic processing, and this requirement will help Medicare run more smoothly.

Ultimately, the administration simplification requirements in HIPAA will make our health system more efficient. These requirements will result in billions of dollars in savings, thus freeing up more funds to focus on expanding health care coverage and promoting higher quality care. H.R. 3323 reaffirms the importance of these requirements while giving additional time to prepare for their implementation. I ask my colleagues to join me in support of this bill.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentleman from Louisiana (Mr. TAUZIN) that the House suspend the rules and pass the bill, H.R. 3323, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mrs. JOHNSON of Connecticut. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

MEDICARE REGULATORY AND CONTRACTING REFORM ACT OF 2001

Mrs. JOHNSON of Connecticut. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3391) to amend title XVIII of the Social Security Act to provide regulatory relief and contracting flexibility under the Medicare Program.

The Clerk read as follows:

H.R. 3391

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENTS TO SOCIAL SECURITY ACT; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the “Medicare Regulatory and Contracting Reform Act of 2001”.

(b) AMENDMENTS TO SOCIAL SECURITY ACT.—Except as otherwise specifically provided, whenever in this Act an amendment is expressed in terms of an amendment to or repeal of a section or other provision, the reference shall be considered to be made to that section or other provision of the Social Security Act.

(c) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

Sec. 1. Short title; amendments to Social Security Act; table of contents.

Sec. 2. Findings and construction.

Sec. 3. Definitions.

TITLE I—REGULATORY REFORM

Sec. 101. Issuance of regulations.

Sec. 102. Compliance with changes in regulations and policies.

Sec. 103. Reports and studies relating to regulatory reform.

TITLE II—CONTRACTING REFORM

Sec. 201. Increased flexibility in medicare administration.

Sec. 202. Requirements for information security for medicare administrative contractors.

TITLE III—EDUCATION AND OUTREACH

Sec. 301. Provider education and technical assistance.

Sec. 302. Small provider technical assistance demonstration program.

Sec. 303. Medicare Provider Ombudsman; Medicare Beneficiary Ombudsman.

Sec. 304. Beneficiary outreach demonstration program.

TITLE IV—APPEALS AND RECOVERY

Sec. 401. Transfer of responsibility for medicare appeals.

Sec. 402. Process for expedited access to review.

Sec. 403. Revisions to medicare appeals process.

Sec. 404. Prepayment review.

Sec. 405. Recovery of overpayments.

Sec. 406. Provider enrollment process; right of appeal.

Sec. 407. Process for correction of minor errors and omissions on claims without pursuing appeals process.

Sec. 408. Prior determination process for certain items and services; advance beneficiary notices.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Policy development regarding evaluation and management (E & M) documentation guidelines.

Sec. 502. Improvement in oversight of technology and coverage.

Sec. 503. Treatment of hospitals for certain services under medicare secondary payor (MSP) provisions.

Sec. 504. EMTALA improvements.

Sec. 505. Emergency Medical Treatment and Active Labor Act (EMTALA) Technical Advisory Group.

Sec. 506. Authorizing use of arrangements with other hospice programs to provide core hospice services in certain circumstances.

Sec. 507. Application of OSHA bloodborne pathogens standard to certain hospitals.

Sec. 508. One-year delay in lock in procedures for Medicare+Choice plans; change in Medicare+Choice reporting deadlines and annual, coordinated election period for 2002.

Sec. 509. BIPA-related technical amendments and corrections.

Sec. 510. Conforming authority to waive a program exclusion.

Sec. 511. Treatment of certain dental claims.

Sec. 512. Miscellaneous reports, studies, and publication requirements.

SEC. 2. FINDINGS AND CONSTRUCTION.

(a) FINDINGS.—Congress finds the following:

(1) The overwhelming majority of providers of services and suppliers in the United States are law-abiding persons who provide important health care services to patients each day.

(2) The Secretary of Health and Human Services should work to streamline paperwork requirements under the medicare program and communicate clearer instructions to providers of services and suppliers so that they may spend more time caring for patients.

(b) CONSTRUCTION.—Nothing in this Act shall be construed—

(1) to compromise or affect existing legal remedies for addressing fraud or abuse, whether it be criminal prosecution, civil enforcement, or administrative remedies, including under sections 3729 through 3733 of title 31, United States Code (known as the False Claims Act); or

(2) to prevent or impede the Department of Health and Human Services in any way from its ongoing efforts to eliminate waste, fraud, and abuse in the medicare program. Furthermore, the consolidation of medicare administrative contracting set forth in this Act does not constitute consolidation of the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund or reflect any position on that issue.

SEC. 3. DEFINITIONS.

(a) USE OF TERM SUPPLIER IN MEDICARE.—Section 1861 (42 U.S.C. 1395x) is amended by inserting after subsection (c) the following new subsection:

“Supplier

“(d) The term ‘supplier’ means, unless the context otherwise requires, a physician or other practitioner, a facility, or other entity (other than a provider of services) that furnishes items or services under this title.”.

(b) OTHER TERMS USED IN ACT.—In this Act:

(1) BIPA.—The term “BIPA” means the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000, as enacted into law by section 1(a)(6) of Public Law 106-554.

(2) SECRETARY.—The term “Secretary” means the Secretary of Health and Human Services.

TITLE I—REGULATORY REFORM

SEC. 101. ISSUANCE OF REGULATIONS.

(a) CONSOLIDATION OF PROMULGATION TO ONCE A MONTH.—

(1) IN GENERAL.—Section 1871 (42 U.S.C. 1395hh) is amended by adding at the end the following new subsection:

“(d)(1) Subject to paragraph (2), the Secretary shall issue proposed or final (including interim final) regulations to carry out this title only on one business day of every month.

“(2) The Secretary may issue a proposed or final regulation described in paragraph (1) on

any other day than the day described in paragraph (1) if the Secretary—

“(A) finds that issuance of such regulation on another day is necessary to comply with requirements under law; or

“(B) finds that with respect to that regulation the limitation of issuance on the date described in paragraph (1) is contrary to the public interest.

If the Secretary makes a finding under this paragraph, the Secretary shall include such finding, and brief statement of the reasons for such finding, in the issuance of such regulation.

“(3) The Secretary shall coordinate issuance of new regulations described in paragraph (1) relating to a category of provider of services or suppliers based on an analysis of the collective impact of regulatory changes on that category of providers or suppliers.”.

(2) GAO REPORT ON PUBLICATION OF REGULATIONS ON A QUARTERLY BASIS.—Not later than 3 years after the date of the enactment of this Act, the Comptroller General of the United States shall submit to Congress a report on the feasibility of requiring that regulations described in section 1871(d) of the Social Security Act be promulgated on a quarterly basis rather than on a monthly basis.

(3) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to regulations promulgated on or after the date that is 30 days after the date of the enactment of this Act.

(b) REGULAR TIMELINE FOR PUBLICATION OF FINAL RULES.—

(1) IN GENERAL.—Section 1871(a) (42 U.S.C. 1395hh(a)) is amended by adding at the end the following new paragraph:

“(3)(A) The Secretary, in consultation with the Director of the Office of Management and Budget, shall establish and publish a regular timeline for the publication of final regulations based on the previous publication of a proposed regulation or an interim final regulation.

“(B) Such timeline may vary among different regulations based on differences in the complexity of the regulation, the number and scope of comments received, and other relevant factors, but shall not be longer than 3 years except under exceptional circumstances. If the Secretary intends to vary such timeline with respect to the publication of a final regulation, the Secretary shall cause to have published in the Federal Register notice of the different timeline by not later than the timeline previously established with respect to such regulation. Such notice shall include a brief explanation of the justification for such variation.

“(C) In the case of interim final regulations, upon the expiration of the regular timeline established under this paragraph for the publication of a final regulation after opportunity for public comment, the interim final regulation shall not continue in effect unless the Secretary publishes (at the end of the regular timeline and, if applicable, at the end of each succeeding 1-year period) a notice of continuation of the regulation that includes an explanation of why the regular timeline (and any subsequent 1-year extension) was not complied with. If such a notice is published, the regular timeline (or such timeline as previously extended under this paragraph) for publication of the final regulation shall be treated as having been extended for 1 additional year.

“(D) The Secretary shall annually submit to Congress a report that describes the instances in which the Secretary failed to publish a final regulation within the applicable

regular timeline under this paragraph and that provides an explanation for such failures.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on the date of the enactment of this Act. The Secretary shall provide for an appropriate transition to take into account the backlog of previously published interim final regulations.

(c) LIMITATIONS ON NEW MATTER IN FINAL REGULATIONS.—

(1) IN GENERAL.—Section 1871(a) (42 U.S.C. 1395hh(a)), as amended by subsection (b), is further amended by adding at the end the following new paragraph:

“(4) If the Secretary publishes notice of proposed rulemaking relating to a regulation (including an interim final regulation), insofar as such final regulation includes a provision that is not a logical outgrowth of such notice of proposed rulemaking, that provision shall be treated as a proposed regulation and shall not take effect until there is the further opportunity for public comment and a publication of the provision again as a final regulation.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to final regulations published on or after the date of the enactment of this Act.

SEC. 102. COMPLIANCE WITH CHANGES IN REGULATIONS AND POLICIES.

(a) NO RETROACTIVE APPLICATION OF SUBSTANTIVE CHANGES.—

(1) IN GENERAL.—Section 1871 (42 U.S.C. 1395hh), as amended by section 101(a), is amended by adding at the end the following new subsection:

“(e)(1)(A) A substantive change in regulations, manual instructions, interpretative rules, statements of policy, or guidelines of general applicability under this title shall not be applied (by extrapolation or otherwise) retroactively to items and services furnished before the effective date of the change, unless the Secretary determines that—

“(i) such retroactive application is necessary to comply with statutory requirements; or

“(ii) failure to apply the change retroactively would be contrary to the public interest.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to substantive changes issued on or after the date of the enactment of this Act.

(b) TIMELINE FOR COMPLIANCE WITH SUBSTANTIVE CHANGES AFTER NOTICE.—

(1) IN GENERAL.—Section 1871(e)(1), as added by subsection (a), is amended by adding at the end the following:

“(B)(i) Except as provided in clause (ii), a substantive change referred to in subparagraph (A) shall not become effective before the end of the 30-day period that begins on the date that the Secretary has issued or published, as the case may be, the substantive change.

“(ii) The Secretary may provide for such a substantive change to take effect on a date that precedes the end of the 30-day period under clause (i) if the Secretary finds that waiver of such 30-day period is necessary to comply with statutory requirements or that the application of such 30-day period is contrary to the public interest. If the Secretary provides for an earlier effective date pursuant to this clause, the Secretary shall include in the issuance or publication of the substantive change a finding described in the first sentence, and a brief statement of the reasons for such finding.

“(C) No action shall be taken against a provider of services or supplier with respect to noncompliance with such a substantive change for items and services furnished before the effective date of such a change.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to compliance actions undertaken on or after the date of the enactment of this Act.

(c) RELIANCE ON GUIDANCE.—

(1) IN GENERAL.—Section 1871(e), as added by subsection (a), is further amended by adding at the end the following new paragraph:

“(2)(A) If—

“(i) a provider of services or supplier follows the written guidance (which may be transmitted electronically) provided by the Secretary or by a medicare contractor (as defined in section 1889(g)) acting within the scope of the contractor's contract authority, with respect to the furnishing of items or services and submission of a claim for benefits for such items or services with respect to such provider or supplier;

“(ii) the Secretary determines that the provider of services or supplier has accurately presented the circumstances relating to such items, services, and claim to the contractor in writing; and

“(iii) the guidance was in error; the provider of services or supplier shall not be subject to any sanction (including any penalty or requirement for repayment of any amount) if the provider of services or supplier reasonably relied on such guidance.

“(B) Subparagraph (A) shall not be construed as preventing the recoupment or repayment (without any additional penalty) relating to an overpayment insofar as the overpayment was solely the result of a clerical or technical operational error.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on the date of the enactment of this Act but shall not apply to any sanction for which notice was provided on or before the date of the enactment of this Act.

SEC. 103. REPORTS AND STUDIES RELATING TO REGULATORY REFORM.

(a) GAO STUDY ON ADVISORY OPINION AUTHORITY.—

(1) STUDY.—The Comptroller General of the United States shall conduct a study to determine the feasibility and appropriateness of establishing in the Secretary authority to provide legally binding advisory opinions on appropriate interpretation and application of regulations to carry out the medicare program under title XVIII of the Social Security Act. Such study shall examine the appropriate timeframe for issuing such advisory opinions, as well as the need for additional staff and funding to provide such opinions.

(2) REPORT.—The Comptroller General shall submit to Congress a report on the study conducted under paragraph (1) by not later than January 1, 2003.

(b) REPORT ON LEGAL AND REGULATORY INCONSISTENCIES.—Section 1871 (42 U.S.C. 1395hh), as amended by section 2(a), is amended by adding at the end the following new subsection:

“(f)(1) Not later than 2 years after the date of the enactment of this subsection, and every 2 years thereafter, the Secretary shall submit to Congress a report with respect to the administration of this title and areas of inconsistency or conflict among the various provisions under law and regulation.

“(2) In preparing a report under paragraph (1), the Secretary shall collect—

“(A) information from individuals entitled to benefits under part A or enrolled under

part B, or both, providers of services, and suppliers and from the Medicare Beneficiary Ombudsman and the Medicare Provider Ombudsman with respect to such areas of inconsistency and conflict; and

“(B) information from medicare contractors that tracks the nature of written and telephone inquiries.

“(3) A report under paragraph (1) shall include a description of efforts by the Secretary to reduce such inconsistency or conflicts, and recommendations for legislation or administrative action that the Secretary determines appropriate to further reduce such inconsistency or conflicts.”.

TITLE II—CONTRACTING REFORM

SEC. 201. INCREASED FLEXIBILITY IN MEDICARE ADMINISTRATION.

(a) CONSOLIDATION AND FLEXIBILITY IN MEDICARE ADMINISTRATION.—

(1) IN GENERAL.—Title XVIII is amended by inserting after section 1874 the following new section:

“CONTRACTS WITH MEDICARE ADMINISTRATIVE CONTRACTORS

“SEC. 1874A. (a) AUTHORITY.—

“(1) AUTHORITY TO ENTER INTO CONTRACTS.—The Secretary may enter into contracts with any eligible entity to serve as a medicare administrative contractor with respect to the performance of any or all of the functions described in paragraph (4) or parts of those functions (or, to the extent provided in a contract, to secure performance thereof by other entities).

“(2) ELIGIBILITY OF ENTITIES.—An entity is eligible to enter into a contract with respect to the performance of a particular function described in paragraph (4) only if—

“(A) the entity has demonstrated capability to carry out such function;

“(B) the entity complies with such conflict of interest standards as are generally applicable to Federal acquisition and procurement;

“(C) the entity has sufficient assets to financially support the performance of such function; and

“(D) the entity meets such other requirements as the Secretary may impose.

“(3) MEDICARE ADMINISTRATIVE CONTRACTOR DEFINED.—For purposes of this title and title XI—

“(A) IN GENERAL.—The term ‘medicare administrative contractor’ means an agency, organization, or other person with a contract under this section.

“(B) APPROPRIATE MEDICARE ADMINISTRATIVE CONTRACTOR.—With respect to the performance of a particular function in relation to an individual entitled to benefits under part A or enrolled under part B, or both, a specific provider of services or supplier (or class of such providers of services or suppliers), the ‘appropriate’ medicare administrative contractor is the medicare administrative contractor that has a contract under this section with respect to the performance of that function in relation to that individual, provider of services or supplier or class of provider of services or supplier.

“(4) FUNCTIONS DESCRIBED.—The functions referred to in paragraphs (1) and (2) are payment functions, provider services functions, and functions relating to services furnished to individuals entitled to benefits under part A or enrolled under part B, or both, as follows:

“(A) DETERMINATION OF PAYMENT AMOUNTS.—Determining (subject to the provisions of section 1878 and to such review by the Secretary as may be provided for by the contracts) the amount of the payments re-

quired pursuant to this title to be made to providers of services, suppliers and individuals.

“(B) MAKING PAYMENTS.—Making payments described in subparagraph (A) (including receipt, disbursement, and accounting for funds in making such payments).

“(C) BENEFICIARY EDUCATION AND ASSISTANCE.—Providing education and outreach to individuals entitled to benefits under part A or enrolled under part B, or both, and providing assistance to those individuals with specific issues, concerns or problems.

“(D) PROVIDER CONSULTATIVE SERVICES.—Providing consultative services to institutions, agencies, and other persons to enable them to establish and maintain fiscal records necessary for purposes of this title and otherwise to qualify as providers of services or suppliers.

“(E) COMMUNICATION WITH PROVIDERS.—Communicating to providers of services and suppliers any information or instructions furnished to the medicare administrative contractor by the Secretary, and facilitating communication between such providers and suppliers and the Secretary.

“(F) PROVIDER EDUCATION AND TECHNICAL ASSISTANCE.—Performing the functions relating to provider education, training, and technical assistance.

“(G) ADDITIONAL FUNCTIONS.—Performing such other functions as are necessary to carry out the purposes of this title.

“(5) RELATIONSHIP TO MIP CONTRACTS.—

“(A) NONDUPLICATION OF DUTIES.—In entering into contracts under this section, the Secretary shall assure that functions of medicare administrative contractors in carrying out activities under parts A and B do not duplicate activities carried out under the Medicare Integrity Program under section 1893. The previous sentence shall not apply with respect to the activity described in section 1893(b)(5) (relating to prior authorization of certain items of durable medical equipment under section 1834(a)(15)).

“(B) CONSTRUCTION.—An entity shall not be treated as a medicare administrative contractor merely by reason of having entered into a contract with the Secretary under section 1893.

“(6) APPLICATION OF FEDERAL ACQUISITION REGULATION.—Except to the extent inconsistent with a specific requirement of this title, the Federal Acquisition Regulation applies to contracts under this title.

“(b) CONTRACTING REQUIREMENTS.—

“(1) USE OF COMPETITIVE PROCEDURES.—

“(A) IN GENERAL.—Except as provided in laws with general applicability to Federal acquisition and procurement or in subparagraph (B), the Secretary shall use competitive procedures when entering into contracts with medicare administrative contractors under this section, taking into account performance quality as well as price and other factors.

“(B) RENEWAL OF CONTRACTS.—The Secretary may renew a contract with a medicare administrative contractor under this section from term to term without regard to section 5 of title 41, United States Code, or any other provision of law requiring competition, if the medicare administrative contractor has met or exceeded the performance requirements applicable with respect to the contract and contractor, except that the Secretary shall provide for the application of competitive procedures under such a contract not less frequently than once every five years.

“(C) TRANSFER OF FUNCTIONS.—The Secretary may transfer functions among medi-

care administrative contractors consistent with the provisions of this paragraph. The Secretary shall ensure that performance quality is considered in such transfers. The Secretary shall provide public notice (whether in the Federal Register or otherwise) of any such transfer (including a description of the functions so transferred, a description of the providers of services and suppliers affected by such transfer, and contact information for the contractors involved).

“(D) INCENTIVES FOR QUALITY.—The Secretary shall provide incentives for medicare administrative contractors to provide quality service and to promote efficiency.

“(2) COMPLIANCE WITH REQUIREMENTS.—No contract under this section shall be entered into with any medicare administrative contractor unless the Secretary finds that such medicare administrative contractor will perform its obligations under the contract efficiently and effectively and will meet such requirements as to financial responsibility, legal authority, quality of services provided, and other matters as the Secretary finds pertinent.

“(3) PERFORMANCE REQUIREMENTS.—

“(A) DEVELOPMENT OF SPECIFIC PERFORMANCE REQUIREMENTS.—In developing contract performance requirements, the Secretary shall develop performance requirements applicable to functions described in subsection (a)(4).

“(B) CONSULTATION.—In developing such requirements, the Secretary may consult with providers of services and suppliers, organizations representing individuals entitled to benefits under part A or enrolled under part B, or both, and organizations and agencies performing functions necessary to carry out the purposes of this section with respect to such performance requirements.

“(C) INCLUSION IN CONTRACTS.—All contractor performance requirements shall be set forth in the contract between the Secretary and the appropriate medicare administrative contractor. Such performance requirements—

“(i) shall reflect the performance requirements developed under subparagraph (A), but may include additional performance requirements;

“(ii) shall be used for evaluating contractor performance under the contract; and

“(iii) shall be consistent with the written statement of work provided under the contract.

“(4) INFORMATION REQUIREMENTS.—The Secretary shall not enter into a contract with a medicare administrative contractor under this section unless the contractor agrees—

“(A) to furnish to the Secretary such timely information and reports as the Secretary may find necessary in performing his functions under this title; and

“(B) to maintain such records and afford such access thereto as the Secretary finds necessary to assure the correctness and verification of the information and reports under subparagraph (A) and otherwise to carry out the purposes of this title.

“(5) SURETY BOND.—A contract with a medicare administrative contractor under this section may require the medicare administrative contractor, and any of its officers or employees certifying payments or disbursing funds pursuant to the contract, or otherwise participating in carrying out the contract, to give surety bond to the United States in such amount as the Secretary may deem appropriate.

“(c) TERMS AND CONDITIONS.—

“(1) IN GENERAL.—A contract with any medicare administrative contractor under

this section may contain such terms and conditions as the Secretary finds necessary or appropriate and may provide for advances of funds to the medicare administrative contractor for the making of payments by it under subsection (a)(4)(B).

“(2) PROHIBITION ON MANDATES FOR CERTAIN DATA COLLECTION.—The Secretary may not require, as a condition of entering into, or renewing, a contract under this section, that the medicare administrative contractor match data obtained other than in its activities under this title with data used in the administration of this title for purposes of identifying situations in which the provisions of section 1862(b) may apply.

“(d) LIMITATION ON LIABILITY OF MEDICARE ADMINISTRATIVE CONTRACTORS AND CERTAIN OFFICERS.—

“(1) CERTIFYING OFFICER.—No individual designated pursuant to a contract under this section as a certifying officer shall, in the absence of gross negligence or intent to defraud the United States, be liable with respect to any payments certified by the individual under this section.

“(2) DISBURSING OFFICER.—No disbursing officer shall, in the absence of gross negligence or intent to defraud the United States, be liable with respect to any payment by such officer under this section if it was based upon an authorization (which meets the applicable requirements for such internal controls established by the Comptroller General) of a certifying officer designated as provided in paragraph (1) of this subsection.

“(3) LIABILITY OF MEDICARE ADMINISTRATIVE CONTRACTOR.—No medicare administrative contractor shall be liable to the United States for a payment by a certifying or disbursing officer unless in connection with such payment or in the supervision of or selection of such officer the medicare administrative contractor acted with gross negligence.

“(4) INDEMNIFICATION BY SECRETARY.—

“(A) IN GENERAL.—Subject to subparagraphs (B) and (D), in the case of a medicare administrative contractor (or a person who is a director, officer, or employee of such a contractor or who is engaged by the contractor to participate directly in the claims administration process) who is made a party to any judicial or administrative proceeding arising from or relating directly to the claims administration process under this title, the Secretary may, to the extent the Secretary determines to be appropriate and as specified in the contract with the contractor, indemnify the contractor and such persons.

“(B) CONDITIONS.—The Secretary may not provide indemnification under subparagraph (A) insofar as the liability for such costs arises directly from conduct that is determined by the judicial proceeding or by the Secretary to be criminal in nature, fraudulent, or grossly negligent. If indemnification is provided by the Secretary with respect to a contractor before a determination that such costs arose directly from such conduct, the contractor shall reimburse the Secretary for costs of indemnification.

“(C) SCOPE OF INDEMNIFICATION.—Indemnification by the Secretary under subparagraph (A) may include payment of judgments, settlements (subject to subparagraph (D)), awards, and costs (including reasonable legal expenses).

“(D) WRITTEN APPROVAL FOR SETTLEMENTS.—A contractor or other person described in subparagraph (A) may not propose to negotiate a settlement or compromise of a

proceeding described in such subparagraph without the prior written approval of the Secretary to negotiate such settlement or compromise. Any indemnification under subparagraph (A) with respect to amounts paid under a settlement or compromise of a proceeding described in such subparagraph are conditioned upon prior written approval by the Secretary of the final settlement or compromise.

“(E) CONSTRUCTION.—Nothing in this paragraph shall be construed—

“(i) to change any common law immunity that may be available to a medicare administrative contractor or person described in subparagraph (A); or

“(ii) to permit the payment of costs not otherwise allowable, reasonable, or allocable under the Federal Acquisition Regulations.”.

(2) CONSIDERATION OF INCORPORATION OF CURRENT LAW STANDARDS.—In developing contract performance requirements under section 1874A(b) of the Social Security Act, as inserted by paragraph (1), the Secretary shall consider inclusion of the performance standards described in sections 1816(f)(2) of such Act (relating to timely processing of reconsiderations and applications for exemptions) and section 1842(b)(2)(B) of such Act (relating to timely review of determinations and fair hearing requests), as such sections were in effect before the date of the enactment of this Act.

(b) CONFORMING AMENDMENTS TO SECTION 1816 (RELATING TO FISCAL INTERMEDIARIES).—Section 1816 (42 U.S.C. 1395h) is amended as follows:

(1) The heading is amended to read as follows:

“PROVISIONS RELATING TO THE ADMINISTRATION OF PART A”.

(2) Subsection (a) is amended to read as follows:

“(a) The administration of this part shall be conducted through contracts with medicare administrative contractors under section 1874A.”.

(3) Subsection (b) is repealed.

(4) Subsection (c) is amended—

(A) by striking paragraph (1); and

(B) in each of paragraphs (2)(A) and (3)(A), by striking “agreement under this section” and inserting “contract under section 1874A that provides for making payments under this part”.

(5) Subsections (d) through (i) are repealed.

(6) Subsections (j) and (k) are each amended—

(A) by striking “An agreement with an agency or organization under this section” and inserting “A contract with a medicare administrative contractor under section 1874A with respect to the administration of this part”; and

(B) by striking “such agency or organization” and inserting “such medicare administrative contractor” each place it appears.

(7) Subsection (l) is repealed.

(c) CONFORMING AMENDMENTS TO SECTION 1842 (RELATING TO CARRIERS).—Section 1842 (42 U.S.C. 1395u) is amended as follows:

(1) The heading is amended to read as follows:

“PROVISIONS RELATING TO THE ADMINISTRATION OF PART B”.

(2) Subsection (a) is amended to read as follows:

“(a) The administration of this part shall be conducted through contracts with medicare administrative contractors under section 1874A.”.

(3) Subsection (b) is amended—

(A) by striking paragraph (1);

(B) in paragraph (2)—

(i) by striking subparagraphs (A) and (B);

(ii) in subparagraph (C), by striking “carriers” and inserting “medicare administrative contractors”; and

(iii) by striking subparagraphs (D) and (E);

(C) in paragraph (3)—

(i) in the matter before subparagraph (A), by striking “Each such contract shall provide that the carrier” and inserting “The Secretary”;

(ii) by striking “will” the first place it appears in each of subparagraphs (A), (B), (F), (G), (H), and (L) and inserting “shall”;

(iii) in subparagraph (B), in the matter before clause (i), by striking “to the policyholders and subscribers of the carrier” and inserting “to the policyholders and subscribers of the medicare administrative contractor”;

(iv) by striking subparagraphs (C), (D), and (E);

(v) in subparagraph (H)—

(I) by striking “if it makes determinations or payments with respect to physicians’ services,”; and

(II) by striking “carrier” and inserting “medicare administrative contractor”;

(vi) by striking subparagraph (I);

(vii) in subparagraph (L), by striking the semicolon and inserting a period;

(viii) in the first sentence, after subparagraph (L), by striking “and shall contain” and all that follows through the period; and

(ix) in the seventh sentence, by inserting “medicare administrative contractor,” after “carrier,”; and

(D) by striking paragraph (5);

(E) in paragraph (6)(D)(iv), by striking “carrier” and inserting “medicare administrative contractor”; and

(F) in paragraph (7), by striking “the carrier” and inserting “the Secretary” each place it appears.

(4) Subsection (c) is amended—

(A) by striking paragraph (1);

(B) in paragraph (2), by striking “contract under this section which provides for the disbursement of funds, as described in subsection (a)(1)(B),” and inserting “contract under section 1874A that provides for making payments under this part”;

(C) in paragraph (3)(A), by striking “subsection (a)(1)(B)” and inserting “section 1874A(a)(3)(B)”;

(D) in paragraph (4), by striking “carrier” and inserting “medicare administrative contractor”; and

(E) by striking paragraphs (5) and (6).

(5) Subsections (d), (e), and (f) are repealed.

(6) Subsection (g) is amended by striking “carrier or carriers” and inserting “medicare administrative contractor or contractors”.

(7) Subsection (h) is amended—

(A) in paragraph (2)—

(i) by striking “Each carrier having an agreement with the Secretary under subsection (a)” and inserting “The Secretary”; and

(ii) by striking “Each such carrier” and inserting “The Secretary”;

(B) in paragraph (3)(A)—

(i) by striking “a carrier having an agreement with the Secretary under subsection (a)” and inserting “medicare administrative contractor having a contract under section 1874A that provides for making payments under this part”; and

(ii) by striking “such carrier” and inserting “such contractor”;

(C) in paragraph (3)(B)—

(i) by striking “a carrier” and inserting “a medicare administrative contractor” each place it appears; and

(ii) by striking “the carrier” and inserting “the contractor” each place it appears; and

(D) in paragraphs (5)(A) and (5)(B)(iii), by striking “carriers” and inserting “medicare administrative contractors” each place it appears.

(8) Subsection (1) is amended—

(A) in paragraph (1)(A)(iii), by striking “carrier” and inserting “medicare administrative contractor”; and

(B) in paragraph (2), by striking “carrier” and inserting “medicare administrative contractor”.

(9) Subsection (p)(3)(A) is amended by striking “carrier” and inserting “medicare administrative contractor”.

(10) Subsection (q)(1)(A) is amended by striking “carrier”.

(d) EFFECTIVE DATE; TRANSITION RULE.—

(1) EFFECTIVE DATE.—

(A) IN GENERAL.—Except as otherwise provided in this subsection, the amendments made by this section shall take effect on October 1, 2003, and the Secretary is authorized to take such steps before such date as may be necessary to implement such amendments on a timely basis.

(B) CONSTRUCTION FOR CURRENT CONTRACTS.—Such amendments shall not apply to contracts in effect before the date specified under subparagraph (A) that continue to retain the terms and conditions in effect on such date (except as otherwise provided under this Act, other than under this section) until such date as the contract is let out for competitive bidding under such amendments.

(C) DEADLINE FOR COMPETITIVE BIDDING.—The Secretary shall provide for the letting by competitive bidding of all contracts for functions of medicare administrative contractors for annual contract periods that begin on or after October 1, 2008.

(D) WAIVER OF PROVIDER NOMINATION PROVISIONS DURING TRANSITION.—During the period beginning on the date of the enactment of this Act and before the date specified under subparagraph (A), the Secretary may enter into new agreements under section 1816 of the Social Security Act (42 U.S.C. 1395h) without regard to any of the provider nomination provisions of such section.

(2) GENERAL TRANSITION RULES.—The Secretary shall take such steps, consistent with paragraph (1)(B) and (1)(C), as are necessary to provide for an appropriate transition from contracts under section 1816 and section 1842 of the Social Security Act (42 U.S.C. 1395h, 1395u) to contracts under section 1874A, as added by subsection (a)(1).

(3) AUTHORIZING CONTINUATION OF MIP FUNCTIONS UNDER CURRENT CONTRACTS AND AGREEMENTS AND UNDER ROLLOVER CONTRACTS.—The provisions contained in the exception in section 1893(d)(2) of the Social Security Act (42 U.S.C. 1395ddd(d)(2)) shall continue to apply notwithstanding the amendments made by this section, and any reference in such provisions to an agreement or contract shall be deemed to include a contract under section 1874A of such Act, as inserted by subsection (a)(1), that continues the activities referred to in such provisions.

(e) REFERENCES.—On and after the effective date provided under subsection (d)(1), any reference to a fiscal intermediary or carrier under title XI or XVIII of the Social Security Act (or any regulation, manual instruction, interpretative rule, statement of policy, or guideline issued to carry out such titles) shall be deemed a reference to an appropriate medicare administrative contractor (as provided under section 1874A of the Social Security Act).

(f) REPORTS ON IMPLEMENTATION.—

(1) PLAN FOR IMPLEMENTATION.—By not later than October 1, 2002, the Secretary shall submit a report to Congress and the Comptroller General of the United States that describes the plan for implementation of the amendments made by this section. The Comptroller General shall conduct an evaluation of such plan and shall submit to Congress, not later than 6 months after the date the report is received, a report on such evaluation and shall include in such report such recommendations as the Comptroller General deems appropriate.

(2) STATUS OF IMPLEMENTATION.—The Secretary shall submit a report to Congress not later than October 1, 2006, that describes the status of implementation of such amendments and that includes a description of the following:

(A) The number of contracts that have been competitively bid as of such date.

(B) The distribution of functions among contracts and contractors.

(C) A timeline for complete transition to full competition.

(D) A detailed description of how the Secretary has modified oversight and management of medicare contractors to adapt to full competition.

SEC. 202. REQUIREMENTS FOR INFORMATION SECURITY FOR MEDICARE ADMINISTRATIVE CONTRACTORS.

(a) IN GENERAL.—Section 1874A, as added by section 201(a)(1), is amended by adding at the end the following new subsection:

“(e) REQUIREMENTS FOR INFORMATION SECURITY.—

“(1) DEVELOPMENT OF INFORMATION SECURITY PROGRAM.—A medicare administrative contractor that performs the functions referred to in subparagraphs (A) and (B) of subsection (a)(4) (relating to determining and making payments) shall implement a contractor-wide information security program to provide information security for the operation and assets of the contractor with respect to such functions under this title. An information security program under this paragraph shall meet the requirements for information security programs imposed on Federal agencies under section 3534(b)(2) of title 44, United States Code (other than requirements under subparagraphs (B)(ii), (F)(iii), and (F)(iv) of such section).

“(2) INDEPENDENT AUDITS.—

“(A) PERFORMANCE OF ANNUAL EVALUATIONS.—Each year a medicare administrative contractor that performs the functions referred to in subparagraphs (A) and (B) of subsection (a)(4) (relating to determining and making payments) shall undergo an evaluation of the information security of the contractor with respect to such functions under this title. The evaluation shall—

“(i) be performed by an entity that meets such requirements for independence as the Inspector General of the Department of Health and Human Services may establish; and

“(ii) test the effectiveness of information security control techniques for an appropriate subset of the contractor’s information systems (as defined in section 3502(8) of title 44, United States Code) relating to such functions under this title and an assessment of compliance with the requirements of this subsection and related information security policies, procedures, standards and guidelines.

“(B) DEADLINE FOR INITIAL EVALUATION.—

“(i) NEW CONTRACTORS.—In the case of a medicare administrative contractor covered by this subsection that has not previously

performed the functions referred to in subparagraphs (A) and (B) of subsection (a)(4) (relating to determining and making payments) as a fiscal intermediary or carrier under section 1816 or 1842, the first independent evaluation conducted pursuant to subparagraph (A) shall be completed prior to commencing such functions.

“(ii) OTHER CONTRACTORS.—In the case of a medicare administrative contractor covered by this subsection that is not described in clause (i), the first independent evaluation conducted pursuant to subparagraph (A) shall be completed within 1 year after the date the contractor commences functions referred to in clause (i) under this section.

“(C) REPORTS ON EVALUATIONS.—

“(i) TO THE INSPECTOR GENERAL.—The results of independent evaluations under subparagraph (A) shall be submitted promptly to the Inspector General of the Department of Health and Human Services.

“(ii) TO CONGRESS.—The Inspector General of Department of Health and Human Services shall submit to Congress annual reports on the results of such evaluations.”

(b) APPLICATION OF REQUIREMENTS TO FISCAL INTERMEDIARIES AND CARRIERS.—

(1) IN GENERAL.—The provisions of section 1874A(e)(2) of the Social Security Act (other than subparagraph (B)), as added by subsection (a), shall apply to each fiscal intermediary under section 1816 of the Social Security Act (42 U.S.C. 1395h) and each carrier under section 1842 of such Act (42 U.S.C. 1395u) in the same manner as they apply to medicare administrative contractors under such provisions.

(2) DEADLINE FOR INITIAL EVALUATION.—In the case of such a fiscal intermediary or carrier with an agreement or contract under such respective section in effect as of the date of the enactment of this Act, the first evaluation under section 1874A(e)(2)(A) of the Social Security Act (as added by subsection (a)), pursuant to paragraph (1), shall be completed (and a report on the evaluation submitted to the Secretary) by not later than 1 year after such date.

TITLE III—EDUCATION AND OUTREACH

SEC. 301. PROVIDER EDUCATION AND TECHNICAL ASSISTANCE.

(a) COORDINATION OF EDUCATION FUNDING.—

(1) IN GENERAL.—The Social Security Act is amended by inserting after section 1888 the following new section:

“PROVIDER EDUCATION AND TECHNICAL ASSISTANCE

“SEC. 1889. (a) COORDINATION OF EDUCATION FUNDING.—The Secretary shall coordinate the educational activities provided through medicare contractors (as defined in subsection (g), including under section 1893) in order to maximize the effectiveness of Federal education efforts for providers of services and suppliers.”

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on the date of the enactment of this Act.

(3) REPORT.—Not later than October 1, 2002, the Secretary shall submit to Congress a report that includes a description and evaluation of the steps taken to coordinate the funding of provider education under section 1889(a) of the Social Security Act, as added by paragraph (1).

(b) INCENTIVES TO IMPROVE CONTRACTOR PERFORMANCE.—

(1) IN GENERAL.—Section 1874A, as added by section 201(a)(1) and as amended by section 202(a), is amended by adding at the end the following new subsection:

“(f) INCENTIVES TO IMPROVE CONTRACTOR PERFORMANCE IN PROVIDER EDUCATION AND

OUTREACH.—In order to give medicare administrative contractors an incentive to implement effective education and outreach programs for providers of services and suppliers, the Secretary shall develop and implement a methodology to measure the specific claims payment error rates of such contractors in the processing or reviewing of medicare claims.”.

(2) **APPLICATION TO FISCAL INTERMEDIARIES AND CARRIERS.**—The provisions of section 1874A(f) of the Social Security Act, as added by paragraph (1), shall apply to each fiscal intermediary under section 1816 of the Social Security Act (42 U.S.C. 1395h) and each carrier under section 1842 of such Act (42 U.S.C. 1395u) in the same manner as they apply to medicare administrative contractors under such provisions.

(3) **GAO REPORT ON ADEQUACY OF METHODOLOGY.**—Not later than October 1, 2002, the Comptroller General of the United States shall submit to Congress and to the Secretary a report on the adequacy of the methodology under section 1874A(f)(1) of the Social Security Act, as added by paragraph (1), and shall include in the report such recommendations as the Comptroller General determines appropriate with respect to the methodology.

(4) **REPORT ON USE OF METHODOLOGY IN ASSESSING CONTRACTOR PERFORMANCE.**—Not later than October 1, 2002, the Secretary shall submit to Congress a report that describes how the Secretary intends to use such methodology in assessing medicare contractor performance in implementing effective education and outreach programs, including whether to use such methodology as a basis for performance bonuses. The report shall include an analysis of the sources of identified errors and potential changes in systems of contractors and rules of the Secretary that could reduce claims error rates.

(c) **PROVISION OF ACCESS TO AND PROMPT RESPONSES FROM MEDICARE ADMINISTRATIVE CONTRACTORS.**—

(1) **IN GENERAL.**—Section 1874A, as added by section 201(a)(1) and as amended by section 202(a) and subsection (b), is further amended by adding at the end the following new subsection:

“(g) **COMMUNICATIONS WITH BENEFICIARIES, PROVIDERS OF SERVICES AND SUPPLIERS.**—

“(1) **COMMUNICATION STRATEGY.**—The Secretary shall develop a strategy for communications with individuals entitled to benefits under part A or enrolled under part B, or both, and with providers of services and suppliers under this title.

“(2) **RESPONSE TO WRITTEN INQUIRIES.**—Each medicare administrative contractor shall, for those providers of services and suppliers which submit claims to the contractor for claims processing and for those individuals entitled to benefits under part A or enrolled under part B, or both, with respect to whom claims are submitted for claims processing, provide general written responses (which may be through electronic transmission) in a clear, concise, and accurate manner to inquiries of providers of services, suppliers and individuals entitled to benefits under part A or enrolled under part B, or both, concerning the programs under this title within 45 business days of the date of receipt of such inquiries.

“(3) **RESPONSE TO TOLL-FREE LINES.**—The Secretary shall ensure that each medicare administrative contractor shall provide, for those providers of services and suppliers which submit claims to the contractor for claims processing and for those individuals entitled to benefits under part A or enrolled

under part B, or both, with respect to whom claims are submitted for claims processing, a toll-free telephone number at which such individuals, providers of services and suppliers may obtain information regarding billing, coding, claims, coverage, and other appropriate information under this title.

“(4) **MONITORING OF CONTRACTOR RESPONSES.**—

“(A) **IN GENERAL.**—Each medicare administrative contractor shall, consistent with standards developed by the Secretary under subparagraph (B)—

“(i) maintain a system for identifying who provides the information referred to in paragraphs (2) and (3); and

“(ii) monitor the accuracy, consistency, and timeliness of the information so provided.

“(B) **DEVELOPMENT OF STANDARDS.**—

“(1) **IN GENERAL.**—The Secretary shall establish and make public standards to monitor the accuracy, consistency, and timeliness of the information provided in response to written and telephone inquiries under this subsection. Such standards shall be consistent with the performance requirements established under subsection (b)(3).

“(ii) **EVALUATION.**—In conducting evaluations of individual medicare administrative contractors, the Secretary shall take into account the results of the monitoring conducted under subparagraph (A) taking into account as performance requirements the standards established under clause (i). The Secretary shall, in consultation with organizations representing providers of services, suppliers, and individuals entitled to benefits under part A or enrolled under part B, or both, establish standards relating to the accuracy, consistency, and timeliness of the information so provided.”.

“(C) **DIRECT MONITORING.**—Nothing in this paragraph shall be construed as preventing the Secretary from directly monitoring the accuracy, consistency, and timeliness of the information so provided.”.

(2) **EFFECTIVE DATE.**—The amendment made by paragraph (1) shall take effect October 1, 2002.

(3) **APPLICATION TO FISCAL INTERMEDIARIES AND CARRIERS.**—The provisions of section 1874A(g) of the Social Security Act, as added by paragraph (1), shall apply to each fiscal intermediary under section 1816 of the Social Security Act (42 U.S.C. 1395h) and each carrier under section 1842 of such Act (42 U.S.C. 1395u) in the same manner as they apply to medicare administrative contractors under such provisions.

(d) **IMPROVED PROVIDER EDUCATION AND TRAINING.**—

(1) **IN GENERAL.**—Section 1889, as added by subsection (a), is amended by adding at the end the following new subsections:

“(b) **ENHANCED EDUCATION AND TRAINING.**—

“(1) **ADDITIONAL RESOURCES.**—There are authorized to be appropriated to the Secretary (in appropriate part from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund) \$25,000,000 for each of fiscal years 2003 and 2004 and such sums as may be necessary for succeeding fiscal years.

“(2) **USE.**—The funds made available under paragraph (1) shall be used to increase the conduct by medicare contractors of education and training of providers of services and suppliers regarding billing, coding, and other appropriate items and may also be used to improve the accuracy, consistency, and timeliness of contractor responses.

“(c) **TAILORING EDUCATION AND TRAINING ACTIVITIES FOR SMALL PROVIDERS OR SUPPLIERS.**—

“(1) **IN GENERAL.**—Insofar as a medicare contractor conducts education and training activities, it shall tailor such activities to meet the special needs of small providers of services or suppliers (as defined in paragraph (2)).

“(2) **SMALL PROVIDER OF SERVICES OR SUPPLIER.**—In this subsection, the term ‘small provider of services or supplier’ means—

“(A) a provider of services with fewer than 25 full-time-equivalent employees; or

“(B) a supplier with fewer than 10 full-time-equivalent employees.”.

(2) **EFFECTIVE DATE.**—The amendment made by paragraph (1) shall take effect on October 1, 2002.

(e) **REQUIREMENT TO MAINTAIN INTERNET SITES.**—

(1) **IN GENERAL.**—Section 1889, as added by subsection (a) and as amended by subsection (d), is further amended by adding at the end the following new subsection:

“(d) **INTERNET SITES; FAQs.**—The Secretary, and each medicare contractor insofar as it provides services (including claims processing) for providers of services or suppliers, shall maintain an Internet site which—

“(1) provides answers in an easily accessible format to frequently asked questions, and

“(2) includes other published materials of the contractor, that relate to providers of services and suppliers under the programs under this title (and title XI insofar as it relates to such programs).”.

(2) **EFFECTIVE DATE.**—The amendment made by paragraph (1) shall take effect on October 1, 2002.

(f) **ADDITIONAL PROVIDER EDUCATION PROVISIONS.**—

(1) **IN GENERAL.**—Section 1889, as added by subsection (a) and as amended by subsections (d) and (e), is further amended by adding at the end the following new subsections:

“(e) **ENCOURAGEMENT OF PARTICIPATION IN EDUCATION PROGRAM ACTIVITIES.**—A medicare contractor may not use a record of attendance at (or failure to attend) educational activities or other information gathered during an educational program conducted under this section or otherwise by the Secretary to select or track providers of services or suppliers for the purpose of conducting any type of audit or prepayment review.

“(f) **CONSTRUCTION.**—Nothing in this section or section 1893(g) shall be construed as providing for disclosure by a medicare contractor of information that would compromise pending law enforcement activities or reveal findings of law enforcement-related audits.

“(g) **DEFINITIONS.**—For purposes of this section, the term ‘medicare contractor’ includes the following:

“(1) A medicare administrative contractor with a contract under section 1874A, including a fiscal intermediary with a contract under section 1816 and a carrier with a contract under section 1842.

“(2) An eligible entity with a contract under section 1893.

Such term does not include, with respect to activities of a specific provider of services or supplier an entity that has no authority under this title or title IX with respect to such activities and such provider of services or supplier.”.

(2) **EFFECTIVE DATE.**—The amendment made by paragraph (1) shall take effect on the date of the enactment of this Act.

SEC. 302. SMALL PROVIDER TECHNICAL ASSISTANCE DEMONSTRATION PROGRAM.

(a) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—The Secretary shall establish a demonstration program (in this section referred to as the “demonstration program”) under which technical assistance described in paragraph (2) is made available, upon request and on a voluntary basis, to small providers of services or suppliers in order to improve compliance with the applicable requirements of the programs under medicare program under title XVIII of the Social Security Act (including provisions of title XI of such Act insofar as they relate to such title and are not administered by the Office of the Inspector General of the Department of Health and Human Services).

(2) **FORMS OF TECHNICAL ASSISTANCE.**—The technical assistance described in this paragraph is—

(A) evaluation and recommendations regarding billing and related systems; and

(B) information and assistance regarding policies and procedures under the medicare program, including coding and reimbursement.

(3) **SMALL PROVIDERS OF SERVICES OR SUPPLIERS.**—In this section, the term “small providers of services or suppliers” means—

(A) a provider of services with fewer than 25 full-time-equivalent employees; or

(B) a supplier with fewer than 10 full-time-equivalent employees.

(b) **QUALIFICATION OF CONTRACTORS.**—In conducting the demonstration program, the Secretary shall enter into contracts with qualified organizations (such as peer review organizations or entities described in section 1889(g)(2) of the Social Security Act, as inserted by section 5(f)(1) with appropriate expertise with billing systems of the full range of providers of services and suppliers to provide the technical assistance. In awarding such contracts, the Secretary shall consider any prior investigations of the entity’s work by the Inspector General of Department of Health and Human Services or the Comptroller General of the United States.

(c) **DESCRIPTION OF TECHNICAL ASSISTANCE.**—The technical assistance provided under the demonstration program shall include a direct and in-person examination of billing systems and internal controls of small providers of services or suppliers to determine program compliance and to suggest more efficient or effective means of achieving such compliance.

(d) **AVOIDANCE OF RECOVERY ACTIONS FOR PROBLEMS IDENTIFIED AS CORRECTED.**—The Secretary shall provide that, absent evidence of fraud and notwithstanding any other provision of law, any errors found in a compliance review for a small provider of services or supplier that participates in the demonstration program shall not be subject to recovery action if the technical assistance personnel under the program determine that—

(1) the problem that is the subject of the compliance review has been corrected to their satisfaction within 30 days of the date of the visit by such personnel to the small provider of services or supplier; and

(2) such problem remains corrected for such period as is appropriate.

The previous sentence applies only to claims filed as part of the demonstration program and lasts only for the duration of such program and only as long as the small provider of services or supplier is a participant in such program.

(e) **GAO EVALUATION.**—Not later than 2 years after the date of the date the demonstration program is first implemented, the Comptroller General, in consultation with the Inspector General of the Department of

Health and Human Services, shall conduct an evaluation of the demonstration program. The evaluation shall include a determination of whether claims error rates are reduced for small providers of services or suppliers who participated in the program and the extent of improper payments made as a result of the demonstration program. The Comptroller General shall submit a report to the Secretary and the Congress on such evaluation and shall include in such report recommendations regarding the continuation or extension of the demonstration program.

(f) **FINANCIAL PARTICIPATION BY PROVIDERS.**—The provision of technical assistance to a small provider of services or supplier under the demonstration program is conditioned upon the small provider of services or supplier paying an amount estimated (and disclosed in advance of a provider’s or supplier’s participation in the program) to be equal to 25 percent of the cost of the technical assistance.

(g) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary (in appropriate part from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund) to carry out the demonstration program—

(1) for fiscal year 2003, \$1,000,000, and

(2) for fiscal year 2004, \$6,000,000.

SEC. 303. MEDICARE PROVIDER OMBUDSMAN; MEDICARE BENEFICIARY OMBUDSMAN.

(a) **MEDICARE PROVIDER OMBUDSMAN.**—Section 1868 (42 U.S.C. 1395ee) is amended—

(1) by adding at the end of the heading the following: “; MEDICARE PROVIDER OMBUDSMAN”;

(2) by inserting “PRACTICING PHYSICIANS ADVISORY COUNCIL.—(1)” after “(a)”;

(3) in paragraph (1), as so redesignated under paragraph (2), by striking “in this section” and inserting “in this subsection”;

(4) by redesignating subsections (b) and (c) as paragraphs (2) and (3), respectively; and

(5) by adding at the end the following new subsection:

“(b) **MEDICARE PROVIDER OMBUDSMAN.**—The Secretary shall appoint within the Department of Health and Human Services a Medicare Provider Ombudsman. The Ombudsman shall—

“(1) provide assistance, on a confidential basis, to providers of services and suppliers with respect to complaints, grievances, and requests for information concerning the programs under this title (including provisions of title XI insofar as they relate to this title and are not administered by the Office of the Inspector General of the Department of Health and Human Services) and in the resolution of unclear or conflicting guidance given by the Secretary and medicare contractors to such providers of services and suppliers regarding such programs and provisions and requirements under this title and such provisions; and

“(2) submit recommendations to the Secretary for improvement in the administration of this title and such provisions, including—

“(A) recommendations to respond to recurring patterns of confusion in this title and such provisions (including recommendations regarding suspending imposition of sanctions where there is widespread confusion in program administration), and

“(B) recommendations to provide for an appropriate and consistent response (including not providing for audits) in cases of self-identified overpayments by providers of services and suppliers.

The Ombudsman shall not serve as an advocate for any increases in payments or new coverage of services, but may identify issues and problems in payment or coverage policies.”

(b) **MEDICARE BENEFICIARY OMBUDSMAN.**—Title XVIII is amended by inserting after section 1806 the following new section:

“MEDICARE BENEFICIARY OMBUDSMAN

“SEC. 1807. (a) **IN GENERAL.**—The Secretary shall appoint within the Department of Health and Human Services a Medicare Beneficiary Ombudsman who shall have expertise and experience in the fields of health care and education of (and assistance to) individuals entitled to benefits under this title.

“(b) **DUTIES.**—The Medicare Beneficiary Ombudsman shall—

“(1) receive complaints, grievances, and requests for information submitted by individuals entitled to benefits under part A or enrolled under part B, or both, with respect to any aspect of the medicare program;

“(2) provide assistance with respect to complaints, grievances, and requests referred to in paragraph (1), including—

“(A) assistance in collecting relevant information for such individuals, to seek an appeal of a decision or determination made by a fiscal intermediary, carrier, Medicare+Choice organization, or the Secretary; and

“(B) assistance to such individuals with any problems arising from disenrollment from a Medicare+Choice plan under part C; and

“(3) submit annual reports to Congress and the Secretary that describe the activities of the Office and that include such recommendations for improvement in the administration of this title as the Ombudsman determines appropriate.

The Ombudsman shall not serve as an advocate for any increases in payments or new coverage of services, but may identify issues and problems in payment or coverage policies.

“(c) **WORKING WITH HEALTH INSURANCE COUNSELING PROGRAMS.**—To the extent possible, the Ombudsman shall work with health insurance counseling programs (receiving funding under section 4360 of Omnibus Budget Reconciliation Act of 1990) to facilitate the provision of information to individuals entitled to benefits under part A or enrolled under part B, or both regarding Medicare+Choice plans and changes to those plans. Nothing in this subsection shall preclude further collaboration between the Ombudsman and such programs.”

(c) **DEADLINE FOR APPOINTMENT.**—The Secretary shall appoint the Medicare Provider Ombudsman and the Medicare Beneficiary Ombudsman, under the amendments made by subsections (a) and (b), respectively, by not later than 1 year after the date of the enactment of this Act.

(d) **FUNDING.**—There are authorized to be appropriated to the Secretary (in appropriate part from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund) to carry out the provisions of subsection (b) of section 1868 of the Social Security Act (relating to the Medicare Provider Ombudsman), as added by subsection (a)(5) and section 1807 of such Act (relating to the Medicare Beneficiary Ombudsman), as added by subsection (b), such sums as are necessary for fiscal year 2002 and each succeeding fiscal year.

(e) **USE OF CENTRAL, TOLL-FREE NUMBER (1-800-MEDICARE).**—

(1) **PHONE TRIAGE SYSTEM; LISTING IN MEDICARE HANDBOOK INSTEAD OF OTHER TOLL-FREE**

NUMBERS.—Section 1804(b) (42 U.S.C. 1395b-2(b)) is amended by adding at the end the following: “The Secretary shall provide, through the toll-free number 1-800-MEDICARE, for a means by which individuals seeking information about, or assistance with, such programs who phone such toll-free number are transferred (without charge) to appropriate entities for the provision of such information or assistance. Such toll-free number shall be the toll-free number listed for general information and assistance in the annual notice under subsection (a) instead of the listing of numbers of individual contractors.”.

(2) MONITORING ACCURACY.—

(A) STUDY.—The Comptroller General of the United States shall conduct a study to monitor the accuracy and consistency of information provided to individuals entitled to benefits under part A or enrolled under part B, or both, through the toll-free number 1-800-MEDICARE, including an assessment of whether the information provided is sufficient to answer questions of such individuals. In conducting the study, the Comptroller General shall examine the education and training of the individuals providing information through such number.

(B) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Comptroller General shall submit to Congress a report on the study conducted under subparagraph (A).

SEC. 304. BENEFICIARY OUTREACH DEMONSTRATION PROGRAM.

(a) IN GENERAL.—The Secretary shall establish a demonstration program (in this section referred to as the “demonstration program”) under which medicare specialists employed by the Department of Health and Human Services provide advice and assistance to individuals entitled to benefits under part A of title XVIII of the Social Security Act, or enrolled under part B of such title, or both, regarding the medicare program at the location of existing local offices of the Social Security Administration.

(b) LOCATIONS.—

(1) IN GENERAL.—The demonstration program shall be conducted in at least 6 offices or areas. Subject to paragraph (2), in selecting such offices and areas, the Secretary shall provide preference for offices with a high volume of visits by individuals referred to in subsection (a).

(2) ASSISTANCE FOR RURAL BENEFICIARIES.—The Secretary shall provide for the selection of at least 2 rural areas to participate in the demonstration program. In conducting the demonstration program in such rural areas, the Secretary shall provide for medicare specialists to travel among local offices in a rural area on a scheduled basis.

(c) DURATION.—The demonstration program shall be conducted over a 3-year period.

(d) EVALUATION AND REPORT.—

(1) EVALUATION.—The Secretary shall provide for an evaluation of the demonstration program. Such evaluation shall include an analysis of—

(A) utilization of, and satisfaction of those individuals referred to in subsection (a) with, the assistance provided under the program; and

(B) the cost-effectiveness of providing beneficiary assistance through out-stationing medicare specialists at local offices of the Social Security Administration.

(2) REPORT.—The Secretary shall submit to Congress a report on such evaluation and shall include in such report recommendations regarding the feasibility of permanently out-stationing medicare specialists at

local offices of the Social Security Administration.

TITLE IV—APPEALS AND RECOVERY

SEC. 401. TRANSFER OF RESPONSIBILITY FOR MEDICARE APPEALS.

(a) TRANSITION PLAN.—

(1) IN GENERAL.—Not later than October 1, 2002, the Commissioner of Social Security and the Secretary shall develop and transmit to Congress and the Comptroller General of the United States a plan under which the functions of administrative law judges responsible for hearing cases under title XVIII of the Social Security Act (and related provisions in title XI of such Act) are transferred from the responsibility of the Commissioner and the Social Security Administration to the Secretary and the Department of Health and Human Services.

(2) GAO EVALUATION.—The Comptroller General of the United States shall evaluate the plan and, not later than April 1, 2003, shall submit to Congress a report on such evaluation.

(b) TRANSFER OF ADJUDICATION AUTHORITY.—

(1) IN GENERAL.—Not earlier than July 1, 2003, and not later than October 1, 2003, the Commissioner of Social Security and the Secretary shall implement the transition plan under subsection (a) and transfer the administrative law judge functions described in such subsection from the Social Security Administration to the Secretary.

(2) ASSURING INDEPENDENCE OF JUDGES.—The Secretary shall assure the independence of administrative law judges performing the administrative law judge functions transferred under paragraph (1) from the Centers for Medicare & Medicaid Services and its contractors.

(3) GEOGRAPHIC DISTRIBUTION.—The Secretary shall provide for an appropriate geographic distribution of administrative law judges performing the administrative law judge functions transferred under paragraph (1) throughout the United States to ensure timely access to such judges.

(4) HIRING AUTHORITY.—Subject to the amounts provided in advance in appropriations Act, the Secretary shall have authority to hire administrative law judges to hear such cases, giving priority to those judges with prior experience in handling medicare appeals and in a manner consistent with paragraph (3), and to hire support staff for such judges.

(5) FINANCING.—Amounts payable under law to the Commissioner for administrative law judges performing the administrative law judge functions transferred under paragraph (1) from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund shall become payable to the Secretary for the functions so transferred.

(6) SHARED RESOURCES.—The Secretary shall enter into such arrangements with the Commissioner as may be appropriate with respect to transferred functions of administrative law judges to share office space, support staff, and other resources, with appropriate reimbursement from the Trust Funds described in paragraph (5).

(c) INCREASED FINANCIAL SUPPORT.—In addition to any amounts otherwise appropriated, to ensure timely action on appeals before administrative law judges and the Departmental Appeals Board consistent with section 1869 of the Social Security Act (as amended by section 521 of BIPA, 114 Stat. 2763A-534), there are authorized to be appropriated (in appropriate part from the Federal Hospital Insurance Trust Fund and the Fed-

eral Supplementary Medical Insurance Trust Fund) to the Secretary such sums as are necessary for fiscal year 2003 and each subsequent fiscal year to—

(1) increase the number of administrative law judges (and their staffs) under subsection (b)(4);

(2) improve education and training opportunities for administrative law judges (and their staffs); and

(3) increase the staff of the Departmental Appeals Board.

(d) CONFORMING AMENDMENT.—Section 1869(f)(2)(A)(i) (42 U.S.C. 1395ff(f)(2)(A)(i)), as added by section 522(a) of BIPA (114 Stat. 2763A-543), is amended by striking “of the Social Security Administration”.

SEC. 402. PROCESS FOR EXPEDITED ACCESS TO REVIEW.

(a) EXPEDITED ACCESS TO JUDICIAL REVIEW.—Section 1869(b) (42 U.S.C. 1395ff(b)) as amended by BIPA, is amended—

(1) in paragraph (1)(A), by inserting “, subject to paragraph (2),” before “to judicial review of the Secretary’s final decision”;

(2) in paragraph (1)(F)—

(A) by striking clause (ii);

(B) by striking “PROCEEDING” and all that follows through “DETERMINATION” and inserting “DETERMINATIONS AND RECONSIDERATIONS”;

(C) by redesignating subclauses (I) and (II) as clauses (i) and (ii) and by moving the indentation of such subclauses (and the matter that follows) 2 ems to the left; and

(3) by adding at the end the following new paragraph:

“(2) EXPEDITED ACCESS TO JUDICIAL REVIEW.—

“(A) IN GENERAL.—The Secretary shall establish a process under which a provider of services or supplier that furnishes an item or service or an individual entitled to benefits under part A or enrolled under part B, or both, who has filed an appeal under paragraph (1) may obtain access to judicial review when a review panel (described in subparagraph (D)), on its own motion or at the request of the appellant, determines that no entity in the administrative appeals process has the authority to decide the question of law or regulation relevant to the matters in controversy and that there is no material issue of fact in dispute. The appellant may make such request only once with respect to a question of law or regulation in a case of an appeal.

“(B) PROMPT DETERMINATIONS.—If, after or coincident with appropriately filing a request for an administrative hearing, the appellant requests a determination by the appropriate review panel that no review panel has the authority to decide the question of law or regulations relevant to the matters in controversy and that there is no material issue of fact in dispute and if such request is accompanied by the documents and materials as the appropriate review panel shall require for purposes of making such determination, such review panel shall make a determination on the request in writing within 60 days after the date such review panel receives the request and such accompanying documents and materials. Such a determination by such review panel shall be considered a final decision and not subject to review by the Secretary.

“(C) ACCESS TO JUDICIAL REVIEW.—

“(i) IN GENERAL.—If the appropriate review panel—

“(I) determines that there are no material issues of fact in dispute and that the only issue is one of law or regulation that no review panel has the authority to decide; or

“(II) fails to make such determination within the period provided under subparagraph (B); then the appellant may bring a civil action as described in this subparagraph.

“(ii) DEADLINE FOR FILING.—Such action shall be filed, in the case described in—

“(I) clause (i)(I), within 60 days of date of the determination described in such subparagraph; or

“(II) clause (i)(II), within 60 days of the end of the period provided under subparagraph (B) for the determination.

“(iii) VENUE.—Such action shall be brought in the district court of the United States for the judicial district in which the appellant is located (or, in the case of an action brought jointly by more than one applicant, the judicial district in which the greatest number of applicants are located) or in the district court for the District of Columbia.

“(iv) INTEREST ON AMOUNTS IN CONTROVERSY.—Where a provider of services or supplier seeks judicial review pursuant to this paragraph, the amount in controversy shall be subject to annual interest beginning on the first day of the first month beginning after the 60-day period as determined pursuant to clause (i) and equal to the rate of interest on obligations issued for purchase by the Federal Hospital Insurance Trust Fund and by the Federal Supplementary Medical Insurance Trust Fund for the month in which the civil action authorized under this paragraph is commenced, to be awarded by the reviewing court in favor of the prevailing party. No interest awarded pursuant to the preceding sentence shall be deemed income or cost for the purposes of determining reimbursement due providers of services or suppliers under this Act.

“(D) REVIEW PANELS.—For purposes of this subsection, a ‘review panel’ is a panel consisting of 3 members (who shall be administrative law judges, members of the Departmental Appeals Board, or qualified individuals associated with a qualified independent contractor (as defined in subsection (c)(2)) or with another independent entity) designated by the Secretary for purposes of making determinations under this paragraph.”.

(b) APPLICATION TO PROVIDER AGREEMENT DETERMINATIONS.—Section 1866(h)(1) (42 U.S.C. 1395cc(h)(1)) is amended—

(1) by inserting “(A)” after “(h)(1)”; and

(2) by adding at the end the following new subparagraph:

“(B) An institution or agency described in subparagraph (A) that has filed for a hearing under subparagraph (A) shall have expedited access to judicial review under this subparagraph in the same manner as providers of services, suppliers, and individuals entitled to benefits under part A or enrolled under part B, or both, may obtain expedited access to judicial review under the process established under section 1869(b)(2). Nothing in this subparagraph shall be construed to affect the application of any remedy imposed under section 1819 during the pendency of an appeal under this subparagraph.”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to appeals filed on or after October 1, 2002.

(d) EXPEDITED REVIEW OF CERTAIN PROVIDER AGREEMENT DETERMINATIONS.—

(1) TERMINATION AND CERTAIN OTHER IMMEDIATE REMEDIES.—The Secretary shall develop and implement a process to expedite proceedings under sections 1866(h) of the Social Security Act (42 U.S.C. 1395cc(h)) in which the remedy of termination of participation, or a remedy described in clause (i) or (iii) of section 1819(h)(2)(B) of such Act (42

U.S.C. 1395i-3(h)(2)(B)) which is applied on an immediate basis, has been imposed. Under such process priority shall be provided in cases of termination.

(2) INCREASED FINANCIAL SUPPORT.—In addition to any amounts otherwise appropriated, to reduce by 50 percent the average time for administrative determinations on appeals under section 1866(h) of the Social Security Act (42 U.S.C. 1395cc(h)), there are authorized to be appropriated (in appropriate part from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund) to the Secretary such additional sums for fiscal year 2003 and each subsequent fiscal year as may be necessary. The purposes for which such amounts are available include increasing the number of administrative law judges (and their staffs) and the appellate level staff at the Departmental Appeals Board of the Department of Health and Human Services and educating such judges and staffs on long-term care issues.

SEC. 403. REVISIONS TO MEDICARE APPEALS PROCESS.

(a) REQUIRING FULL AND EARLY PRESENTATION OF EVIDENCE.—

(1) IN GENERAL.—Section 1869(b) (42 U.S.C. 1395ff(b)), as amended by BIPA and as amended by section 402(a), is further amended by adding at the end the following new paragraph:

“(3) REQUIRING FULL AND EARLY PRESENTATION OF EVIDENCE BY PROVIDERS.—A provider of services or supplier may not introduce evidence in any appeal under this section that was not presented at the reconsideration conducted by the qualified independent contractor under subsection (c), unless there is good cause which precluded the introduction of such evidence at or before that reconsideration.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on October 1, 2002.

(b) USE OF PATIENTS’ MEDICAL RECORDS.—Section 1869(c)(3)(B)(i) (42 U.S.C. 1395ff(c)(3)(B)(i)), as amended by BIPA, is amended by inserting “(including the medical records of the individual involved)” after “clinical experience”.

(c) NOTICE REQUIREMENTS FOR MEDICARE APPEALS.—

(1) INITIAL DETERMINATIONS AND REDETERMINATIONS.—Section 1869(a) (42 U.S.C. 1395ff(a)), as amended by BIPA, is amended by adding at the end the following new paragraph:

“(4) REQUIREMENTS OF NOTICE OF DETERMINATIONS AND REDETERMINATIONS.—A written notice of a determination on an initial determination or on a redetermination, insofar as such determination or redetermination results in a denial of a claim for benefits, shall include—

“(A) the specific reasons for the determination, including—

“(i) upon request, the provision of the policy, manual, or regulation used in making the determination; and

“(ii) as appropriate in the case of a redetermination, a summary of the clinical or scientific evidence used in making the determination;

“(B) the procedures for obtaining additional information concerning the determination or redetermination; and

“(C) notification of the right to seek a redetermination or otherwise appeal the determination and instructions on how to initiate such a redetermination or appeal under this section.

The written notice on a redetermination shall be provided in printed form and written

in a manner calculated to be understood by the individual entitled to benefits under part A or enrolled under part B, or both.”.

(2) RECONSIDERATIONS.—Section 1869(c)(3)(E) (42 U.S.C. 1395ff(c)(3)(E)), as amended by BIPA, is amended—

(A) by inserting “be written in a manner calculated to be understood by the individual entitled to benefits under part A or enrolled under part B, or both, and shall include (to the extent appropriate)” after “in writing,”; and

(B) by inserting “and a notification of the right to appeal such determination and instructions on how to initiate such appeal under this section” after “such decision,”.

(3) APPEALS.—Section 1869(d) (42 U.S.C. 1395ff(d)), as amended by BIPA, is amended—

(A) in the heading, by inserting “; NOTICE” after “SECRETARY”; and

(B) by adding at the end the following new paragraph:

“(4) NOTICE.—Notice of the decision of an administrative law judge shall be in writing in a manner calculated to be understood by the individual entitled to benefits under part A or enrolled under part B, or both, and shall include—

“(A) the specific reasons for the determination (including, to the extent appropriate, a summary of the clinical or scientific evidence used in making the determination);

“(B) the procedures for obtaining additional information concerning the decision; and

“(C) notification of the right to appeal the decision and instructions on how to initiate such an appeal under this section.”.

(4) SUBMISSION OF RECORD FOR APPEAL.—Section 1869(c)(3)(J)(i) (42 U.S.C. 1395ff(c)(3)(J)(i)) by striking “prepare” and inserting “submit” and by striking “with respect to” and all that follows through “and relevant policies”.

(d) QUALIFIED INDEPENDENT CONTRACTORS.—

(1) ELIGIBILITY REQUIREMENTS OF QUALIFIED INDEPENDENT CONTRACTORS.—Section 1869(c)(3) (42 U.S.C. 1395ff(c)(3)), as amended by BIPA, is amended—

(A) in subparagraph (A), by striking “sufficient training and expertise in medical science and legal matters” and inserting “sufficient medical, legal, and other expertise (including knowledge of the program under this title) and sufficient staffing”; and

(B) by adding at the end the following new subparagraph:

“(K) INDEPENDENCE REQUIREMENTS.—

“(i) IN GENERAL.—Subject to clause (ii), a qualified independent contractor shall not conduct any activities in a case unless the entity—

“(I) is not a related party (as defined in subsection (g)(5));

“(II) does not have a material familial, financial, or professional relationship with such a party in relation to such case; and

“(III) does not otherwise have a conflict of interest with such a party.

“(ii) EXCEPTION FOR REASONABLE COMPENSATION.—Nothing in clause (i) shall be construed to prohibit receipt by a qualified independent contractor of compensation from the Secretary for the conduct of activities under this section if the compensation is provided consistent with clause (iii).

“(iii) LIMITATIONS ON ENTITY COMPENSATION.—Compensation provided by the Secretary to a qualified independent contractor in connection with reviews under this section shall not be contingent on any decision rendered by the contractor or by any reviewing professional.”.

(2) ELIGIBILITY REQUIREMENTS FOR REVIEWERS.—Section 1869 (42 U.S.C. 1395ff), as amended by BIPA, is amended—

(A) by amending subsection (c)(3)(D) to read as follows:

“(D) QUALIFICATIONS FOR REVIEWERS.—The requirements of subsection (g) shall be met (relating to qualifications of reviewing professionals).”; and

(B) by adding at the end the following new subsection:

“(g) QUALIFICATIONS OF REVIEWERS.—

“(1) IN GENERAL.—In reviewing determinations under this section, a qualified independent contractor shall assure that—

“(A) each individual conducting a review shall meet the qualifications of paragraph (2);

“(B) compensation provided by the contractor to each such reviewer is consistent with paragraph (3); and

“(C) in the case of a review by a panel described in subsection (c)(3)(B) composed of physicians or other health care professionals (each in this subsection referred to as a ‘reviewing professional’), each reviewing professional meets the qualifications described in paragraph (4) and, where a claim is regarding the furnishing of treatment by a physician (allopathic or osteopathic) or the provision of items or services by a physician (allopathic or osteopathic), each reviewing professional shall be a physician (allopathic or osteopathic).

“(2) INDEPENDENCE.—

“(A) IN GENERAL.—Subject to subparagraph (B), each individual conducting a review in a case shall—

“(i) not be a related party (as defined in paragraph (5));

“(ii) not have a material familial, financial, or professional relationship with such a party in the case under review; and

“(iii) not otherwise have a conflict of interest with such a party.

“(B) EXCEPTION.—Nothing in subparagraph (A) shall be construed to—

“(i) prohibit an individual, solely on the basis of a participation agreement with a fiscal intermediary, carrier, or other contractor, from serving as a reviewing professional if—

“(I) the individual is not involved in the provision of items or services in the case under review;

“(II) the fact of such an agreement is disclosed to the Secretary and the individual entitled to benefits under part A or enrolled under part B, or both, (or authorized representative) and neither party objects; and

“(III) the individual is not an employee of the intermediary, carrier, or contractor and does not provide services exclusively or primarily to or on behalf of such intermediary, carrier, or contractor;

“(ii) prohibit an individual who has staff privileges at the institution where the treatment involved takes place from serving as a reviewer merely on the basis of having such staff privileges if the existence of such privileges is disclosed to the Secretary and such individual (or authorized representative), and neither party objects; or

“(iii) prohibit receipt of compensation by a reviewing professional from a contractor if the compensation is provided consistent with paragraph (3).

For purposes of this paragraph, the term ‘participation agreement’ means an agreement relating to the provision of health care services by the individual and does not include the provision of services as a reviewer under this subsection.

“(3) LIMITATIONS ON REVIEWER COMPENSATION.—Compensation provided by a qualified

independent contractor to a reviewer in connection with a review under this section shall not be contingent on the decision rendered by the reviewer.

“(4) LICENSURE AND EXPERTISE.—Each reviewing professional shall be—

“(A) a physician (allopathic or osteopathic) who is appropriately credentialed or licensed in one or more States to deliver health care services and has medical expertise in the field of practice that is appropriate for the items or services at issue; or

“(B) a health care professional who is legally authorized in one or more States (in accordance with State law or the State regulatory mechanism provided by State law) to furnish the health care items or services at issue and has medical expertise in the field of practice that is appropriate for such items or services.

“(5) RELATED PARTY DEFINED.—For purposes of this section, the term ‘related party’ means, with respect to a case under this title involving a specific individual entitled to benefits under part A or enrolled under part B, or both, any of the following:

“(A) The Secretary, the medicare administrative contractor involved, or any fiduciary, officer, director, or employee of the Department of Health and Human Services, or of such contractor.

“(B) The individual (or authorized representative).

“(C) The health care professional that provides the items or services involved in the case.

“(D) The institution at which the items or services (or treatment) involved in the case are provided.

“(E) The manufacturer of any drug or other item that is included in the items or services involved in the case.

“(F) Any other party determined under any regulations to have a substantial interest in the case involved.”.

(3) EFFECTIVE DATE.—The amendments made by paragraphs (1) and (2) shall be effective as if included in the enactment of the respective provisions of subtitle C of title V of BIPA, (114 Stat. 2763A–534).

(4) TRANSITION.—In applying section 1869(g) of the Social Security Act (as added by paragraph (2)), any reference to a medicare administrative contractor shall be deemed to include a reference to a fiscal intermediary under section 1816 of the Social Security Act (42 U.S.C. 1395h) and a carrier under section 1842 of such Act (42 U.S.C. 1395u).

SEC. 404. PREPAYMENT REVIEW.

(a) IN GENERAL.—Section 1874A, as added by section 201(a)(1) and as amended by sections 202(b), 301(b)(1), and 301(c)(1), is further amended by adding at the end the following new subsection:

“(h) CONDUCT OF PREPAYMENT REVIEW.—

“(1) CONDUCT OF RANDOM PREPAYMENT REVIEW.—

“(A) IN GENERAL.—A medicare administrative contractor may conduct random prepayment review only to develop a contractor-wide or program-wide claims payment error rates or under such additional circumstances as may be provided under regulations, developed in consultation with providers of services and suppliers.

“(B) USE OF STANDARD PROTOCOLS WHEN CONDUCTING PREPAYMENT REVIEWS.—When a medicare administrative contractor conducts a random prepayment review, the contractor may conduct such review only in accordance with a standard protocol for random prepayment audits developed by the Secretary.

“(C) CONSTRUCTION.—Nothing in this paragraph shall be construed as preventing the

denial of payments for claims actually reviewed under a random prepayment review.

“(D) RANDOM PREPAYMENT REVIEW.—For purposes of this subsection, the term ‘random prepayment review’ means a demand for the production of records or documentation absent cause with respect to a claim.

“(2) LIMITATIONS ON NON-RANDOM PREPAYMENT REVIEW.—

“(A) LIMITATIONS ON INITIATION OF NON-RANDOM PREPAYMENT REVIEW.—A medicare administrative contractor may not initiate non-random prepayment review of a provider of services or supplier based on the initial identification by that provider of services or supplier of an improper billing practice unless there is a likelihood of sustained or high level of payment error (as defined in subsection (i)(3)(A)).

“(B) TERMINATION OF NON-RANDOM PREPAYMENT REVIEW.—The Secretary shall issue regulations relating to the termination, including termination dates, of non-random prepayment review. Such regulations may vary such a termination date based upon the differences in the circumstances triggering prepayment review.”.

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in this subsection, the amendment made by subsection (a) shall take effect 1 year after the date of the enactment of this Act.

(2) DEADLINE FOR PROMULGATION OF CERTAIN REGULATIONS.—The Secretary shall first issue regulations under section 1874A(h) of the Social Security Act, as added by subsection (a), by not later than 1 year after the date of the enactment of this Act.

(3) APPLICATION OF STANDARD PROTOCOLS FOR RANDOM PREPAYMENT REVIEW.—Section 1874A(h)(1)(B) of the Social Security Act, as added by subsection (a), shall apply to random prepayment reviews conducted on or after such date (not later than 1 year after the date of the enactment of this Act) as the Secretary shall specify.

(c) APPLICATION TO FISCAL INTERMEDIARIES AND CARRIERS.—The provisions of section 1874A(h) of the Social Security Act, as added by subsection (a), shall apply to each fiscal intermediary under section 1816 of the Social Security Act (42 U.S.C. 1395h) and each carrier under section 1842 of such Act (42 U.S.C. 1395u) in the same manner as they apply to medicare administrative contractors under such provisions.

SEC. 405. RECOVERY OF OVERPAYMENTS.

(a) IN GENERAL.—Section 1893 (42 U.S.C. 1395ddd) is amended by adding at the end the following new subsection:

“(f) RECOVERY OF OVERPAYMENTS.—

“(1) USE OF REPAYMENT PLANS.—

“(A) IN GENERAL.—If the repayment, within 30 days by a provider of services or supplier, of an overpayment under this title would constitute a hardship (as defined in subparagraph (B)), subject to subparagraph (C), upon request of the provider of services or supplier the Secretary shall enter into a plan with the provider of services or supplier for the repayment (through offset or otherwise) of such overpayment over a period of at least 6 months but not longer than 3 years (or not longer than 5 years in the case of extreme hardship, as determined by the Secretary). Interest shall accrue on the balance through the period of repayment. Such plan shall meet terms and conditions determined to be appropriate by the Secretary.

“(B) HARDSHIP.—

“(i) IN GENERAL.—For purposes of subparagraph (A), the repayment of an overpayment (or overpayments) within 30 days is deemed to constitute a hardship if—

“(I) in the case of a provider of services that files cost reports, the aggregate amount of the overpayments exceeds 10 percent of the amount paid under this title to the provider of services for the cost reporting period covered by the most recently submitted cost report; or

“(II) in the case of another provider of services or supplier, the aggregate amount of the overpayments exceeds 10 percent of the amount paid under this title to the provider of services or supplier for the previous calendar year.

“(ii) **RULE OF APPLICATION.**—The Secretary shall establish rules for the application of this subparagraph in the case of a provider of services or supplier that was not paid under this title during the previous year or was paid under this title only during a portion of that year.

“(iii) **TREATMENT OF PREVIOUS OVERPAYMENTS.**—If a provider of services or supplier has entered into a repayment plan under subparagraph (A) with respect to a specific overpayment amount, such payment amount under the repayment plan shall not be taken into account under clause (i) with respect to subsequent overpayment amounts.

“(C) **EXCEPTIONS.**—Subparagraph (A) shall not apply if—

“(i) the Secretary has reason to suspect that the provider of services or supplier may file for bankruptcy or otherwise cease to do business or discontinue participation in the program under this title; or

“(ii) there is an indication of fraud or abuse committed against the program.

“(D) **IMMEDIATE COLLECTION IF VIOLATION OF REPAYMENT PLAN.**—If a provider of services or supplier fails to make a payment in accordance with a repayment plan under this paragraph, the Secretary may immediately seek to offset or otherwise recover the total balance outstanding (including applicable interest) under the repayment plan.

“(E) **RELATION TO NO FAULT PROVISION.**—Nothing in this paragraph shall be construed as affecting the application of section 1870(c) (relating to no adjustment in the cases of certain overpayments).

“(2) **LIMITATION ON RECOUPMENT.**—

“(A) **IN GENERAL.**—In the case of a provider of services or supplier that is determined to have received an overpayment under this title and that seeks a reconsideration by a qualified independent contractor on such determination under section 1869(b)(1), the Secretary may not take any action (or authorize any other person, including any medicare contractor, as defined in subparagraph (C) to recoup the overpayment until the date the decision on the reconsideration has been rendered. If the provisions of section 1869(b)(1) (providing for such a reconsideration by a qualified independent contractor) are not in effect, in applying the previous sentence any reference to such a reconsideration shall be treated as a reference to a redetermination by the fiscal intermediary or carrier involved.

“(B) **COLLECTION WITH INTEREST.**—Insofar as the determination on such appeal is against the provider of services or supplier, interest on the overpayment shall accrue on and after the date of the original notice of overpayment. Insofar as such determination against the provider of services or supplier is later reversed, the Secretary shall provide for repayment of the amount recouped plus interest at the same rate as would apply under the previous sentence for the period in which the amount was recouped.

“(C) **MEDICARE CONTRACTOR DEFINED.**—For purposes of this subsection, the term ‘medi-

care contractor’ has the meaning given such term in section 1889(g).

“(3) **LIMITATION ON USE OF EXTRAPOLATION.**—A medicare contractor may not use extrapolation to determine overpayment amounts to be recovered by recoupment, offset, or otherwise unless—

“(A) there is a sustained or high level of payment error (as defined by the Secretary by regulation); or

“(B) documented educational intervention has failed to correct the payment error (as determined by the Secretary).

“(4) **PROVISION OF SUPPORTING DOCUMENTATION.**—In the case of a provider of services or supplier with respect to which amounts were previously overpaid, a medicare contractor may request the periodic production of records or supporting documentation for a limited sample of submitted claims to ensure that the previous practice is not continuing.

“(5) **CONSENT SETTLEMENT REFORMS.**—

“(A) **IN GENERAL.**—The Secretary may use a consent settlement (as defined in subparagraph (D)) to settle a projected overpayment.

“(B) **OPPORTUNITY TO SUBMIT ADDITIONAL INFORMATION BEFORE CONSENT SETTLEMENT OFFER.**—Before offering a provider of services or supplier a consent settlement, the Secretary shall—

“(i) communicate to the provider of services or supplier—

“(I) that, based on a review of the medical records requested by the Secretary, a preliminary evaluation of those records indicates that there would be an overpayment;

“(II) the nature of the problems identified in such evaluation; and

“(III) the steps that the provider of services or supplier should take to address the problems; and

“(ii) provide for a 45-day period during which the provider of services or supplier may furnish additional information concerning the medical records for the claims that had been reviewed.

“(C) **CONSENT SETTLEMENT OFFER.**—The Secretary shall review any additional information furnished by the provider of services or supplier under subparagraph (B)(ii). Taking into consideration such information, the Secretary shall determine if there still appears to be an overpayment. If so, the Secretary—

“(i) shall provide notice of such determination to the provider of services or supplier, including an explanation of the reason for such determination; and

“(ii) in order to resolve the overpayment, may offer the provider of services or supplier—

“(I) the opportunity for a statistically valid random sample; or

“(II) a consent settlement.

The opportunity provided under clause (ii)(I) does not waive any appeal rights with respect to the alleged overpayment involved.

“(D) **CONSENT SETTLEMENT DEFINED.**—For purposes of this paragraph, the term ‘consent settlement’ means an agreement between the Secretary and a provider of services or supplier whereby both parties agree to settle a projected overpayment based on less than a statistically valid sample of claims and the provider of services or supplier agrees not to appeal the claims involved.

“(6) **NOTICE OF OVER-UTILIZATION OF CODES.**—The Secretary shall establish, in consultation with organizations representing the classes of providers of services and suppliers, a process under which the Secretary provides for notice to classes of providers of services and suppliers served by the con-

tractor in cases in which the contractor has identified that particular billing codes may be overutilized by that class of providers of services or suppliers under the programs under this title (or provisions of title XI insofar as they relate to such programs).

“(7) **PAYMENT AUDITS.**—

“(A) **WRITTEN NOTICE FOR POST-PAYMENT AUDITS.**—Subject to subparagraph (C), if a medicare contractor decides to conduct a post-payment audit of a provider of services or supplier under this title, the contractor shall provide the provider of services or supplier with written notice (which may be in electronic form) of the intent to conduct such an audit.

“(B) **EXPLANATION OF FINDINGS FOR ALL AUDITS.**—Subject to subparagraph (C), if a medicare contractor audits a provider of services or supplier under this title, the contractor shall—

“(i) give the provider of services or supplier a full review and explanation of the findings of the audit in a manner that is understandable to the provider of services or supplier and permits the development of an appropriate corrective action plan;

“(ii) inform the provider of services or supplier of the appeal rights under this title as well as consent settlement options (which are at the discretion of the Secretary);

“(iii) give the provider of services or supplier an opportunity to provide additional information to the contractor; and

“(iv) take into account information provided, on a timely basis, by the provider of services or supplier under clause (iii).

“(C) **EXCEPTION.**—Subparagraphs (A) and (B) shall not apply if the provision of notice or findings would compromise pending law enforcement activities, whether civil or criminal, or reveal findings of law enforcement-related audits.

“(8) **STANDARD METHODOLOGY FOR PROBE SAMPLING.**—The Secretary shall establish a standard methodology for medicare contractors to use in selecting a sample of claims for review in the case of an abnormal billing pattern.”.

(b) **EFFECTIVE DATES AND DEADLINES.**—

(1) **USE OF REPAYMENT PLANS.**—Section 1893(f)(1) of the Social Security Act, as added by subsection (a), shall apply to requests for repayment plans made after the date of the enactment of this Act.

(2) **LIMITATION ON RECOUPMENT.**—Section 1893(f)(2) of the Social Security Act, as added by subsection (a), shall apply to actions taken after the date of the enactment of this Act.

(3) **USE OF EXTRAPOLATION.**—Section 1893(f)(3) of the Social Security Act, as added by subsection (a), shall apply to statistically valid random samples initiated after the date that is 1 year after the date of the enactment of this Act.

(4) **PROVISION OF SUPPORTING DOCUMENTATION.**—Section 1893(f)(4) of the Social Security Act, as added by subsection (a), shall take effect on the date of the enactment of this Act.

(5) **CONSENT SETTLEMENT.**—Section 1893(f)(5) of the Social Security Act, as added by subsection (a), shall apply to consent settlements entered into after the date of the enactment of this Act.

(6) **NOTICE OF OVERUTILIZATION.**—Not later than 1 year after the date of the enactment of this Act, the Secretary shall first establish the process for notice of overutilization of billing codes under section 1893A(f)(6) of the Social Security Act, as added by subsection (a).

(7) PAYMENT AUDITS.—Section 1893A(f)(7) of the Social Security Act, as added by subsection (a), shall apply to audits initiated after the date of the enactment of this Act.

(8) STANDARD FOR ABNORMAL BILLING PATTERNS.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall first establish a standard methodology for selection of sample claims for abnormal billing patterns under section 1893(f)(8) of the Social Security Act, as added by subsection (a).

SEC. 406. PROVIDER ENROLLMENT PROCESS; RIGHT OF APPEAL.

(a) IN GENERAL.—Section 1866 (42 U.S.C. 1395cc) is amended—

(1) by adding at the end of the heading the following: “; ENROLLMENT PROCESSES”; and

(2) by adding at the end the following new subsection:

“(j) ENROLLMENT PROCESS FOR PROVIDERS OF SERVICES AND SUPPLIERS.—

“(1) ENROLLMENT PROCESS.—

“(A) IN GENERAL.—The Secretary shall establish by regulation a process for the enrollment of providers of services and suppliers under this title.

“(B) DEADLINES.—The Secretary shall establish by regulation procedures under which there are deadlines for actions on applications for enrollment (and, if applicable, renewal of enrollment). The Secretary shall monitor the performance of medicare administrative contractors in meeting the deadlines established under this subparagraph.

“(C) CONSULTATION BEFORE CHANGING PROVIDER ENROLLMENT FORMS.—The Secretary shall consult with providers of services and suppliers before making changes in the provider enrollment forms required of such providers and suppliers to be eligible to submit claims for which payment may be made under this title.

“(2) HEARING RIGHTS IN CASES OF DENIAL OR NON-RENEWAL.—A provider of services or supplier whose application to enroll (or, if applicable, to renew enrollment) under this title is denied may have a hearing and judicial review of such denial under the procedures that apply under subsection (h)(1)(A) to a provider of services that is dissatisfied with a determination by the Secretary.”.

(b) EFFECTIVE DATES.—

(1) ENROLLMENT PROCESS.—The Secretary shall provide for the establishment of the enrollment process under section 1866(j)(1) of the Social Security Act, as added by subsection (a)(2), within 6 months after the date of the enactment of this Act.

(2) CONSULTATION.—Section 1866(j)(1)(C) of the Social Security Act, as added by subsection (a)(2), shall apply with respect to changes in provider enrollment forms made on or after January 1, 2002.

(3) HEARING RIGHTS.—Section 1866(j)(2) of the Social Security Act, as added by subsection (a)(2), shall apply to denials occurring on or after such date (not later than 1 year after the date of the enactment of this Act) as the Secretary specifies.

SEC. 407. PROCESS FOR CORRECTION OF MINOR ERRORS AND OMISSIONS ON CLAIMS WITHOUT PURSUING APPEALS PROCESS.

The Secretary shall develop, in consultation with appropriate medicare contractors (as defined in section 1889(g) of the Social Security Act, as inserted by section 301(a)(1)) and representatives of providers of services and suppliers, a process whereby, in the case of minor errors or omissions (as defined by the Secretary) that are detected in the submission of claims under the programs under title XVIII of such Act, a provider of services

or supplier is given an opportunity to correct such an error or omission without the need to initiate an appeal. Such process shall include the ability to resubmit corrected claims.

SEC. 408. PRIOR DETERMINATION PROCESS FOR CERTAIN ITEMS AND SERVICES; ADVANCE BENEFICIARY NOTICES.

(a) IN GENERAL.—Section 1869 (42 U.S.C. 1395ff(b)), as amended by sections 521 and 522 of BIPA and section 403(d)(2)(B), is further amended by adding at the end the following new subsection:

“(h) PRIOR DETERMINATION PROCESS FOR CERTAIN ITEMS AND SERVICES.—

“(1) ESTABLISHMENT OF PROCESS.—

“(A) IN GENERAL.—With respect to a medicare administrative contractor that has a contract under section 1874A that provides for making payments under this title with respect to eligible items and services described in subparagraph (C), the Secretary shall establish a prior determination process that meets the requirements of this subsection and that shall be applied by such contractor in the case of eligible requesters.

“(B) ELIGIBLE REQUESTER.—For purposes of this subsection, each of the following shall be an eligible requester:

“(i) A physician, but only with respect to eligible items and services for which the physician may be paid directly.

“(ii) An individual entitled to benefits under this title, but only with respect to an item or service for which the individual receives, from the physician who may be paid directly for the item or service, an advance beneficiary notice under section 1879(a) that payment may not be made (or may no longer be made) for the item or service under this title.

“(C) ELIGIBLE ITEMS AND SERVICES.—For purposes of this subsection and subject to paragraph (2), eligible items and services are items and services which are physicians’ services (as defined in paragraph (4)(A) of section 1848(f) for purposes of calculating the sustainable growth rate under such section).

“(2) SECRETARIAL FLEXIBILITY.—The Secretary shall establish by regulation reasonable limits on the categories of eligible items and services for which a prior determination of coverage may be requested under this subsection. In establishing such limits, the Secretary may consider the dollar amount involved with respect to the item or service, administrative costs and burdens, and other relevant factors.

“(3) REQUEST FOR PRIOR DETERMINATION.—

“(A) IN GENERAL.—Subject to paragraph (2), under the process established under this subsection an eligible requester may submit to the contractor a request for a determination, before the furnishing of an eligible item or service involved as to whether the item or service is covered under this title consistent with the applicable requirements of section 1862(a)(1)(A) (relating to medical necessity).

“(B) ACCOMPANYING DOCUMENTATION.—The Secretary may require that the request be accompanied by a description of the item or service, supporting documentation relating to the medical necessity for the item or service, and any other appropriate documentation. In the case of a request submitted by an eligible requester who is described in paragraph (1)(B)(ii), the Secretary may require that the request also be accompanied by a copy of the advance beneficiary notice involved.

“(4) RESPONSE TO REQUEST.—

“(A) IN GENERAL.—Under such process, the contractor shall provide the eligible requester with written notice of a determination as to whether—

“(i) the item or service is so covered;

“(ii) the item or service is not so covered; or

“(iii) the contractor lacks sufficient information to make a coverage determination. If the contractor makes the determination described in clause (iii), the contractor shall include in the notice a description of the additional information required to make the coverage determination.

“(B) DEADLINE TO RESPOND.—Such notice shall be provided within the same time period as the time period applicable to the contractor providing notice of initial determinations on a claim for benefits under subsection (a)(2)(A).

“(C) INFORMING BENEFICIARY IN CASE OF PHYSICIAN REQUEST.—In the case of a request in which an eligible requester is not the individual described in paragraph (1)(B)(ii), the process shall provide that the individual to whom the item or service is proposed to be furnished shall be informed of any determination described in clause (ii) (relating to a determination of non-coverage) and the right (referred to in paragraph (6)(B)) to obtain the item or service and have a claim submitted for the item or service.

“(5) EFFECT OF DETERMINATIONS.—

“(A) BINDING NATURE OF POSITIVE DETERMINATION.—If the contractor makes the determination described in paragraph (4)(A)(i), such determination shall be binding on the contractor in the absence of fraud or evidence of misrepresentation of facts presented to the contractor.

“(B) NOTICE AND RIGHT TO REDETERMINATION IN CASE OF A DENIAL.—

“(i) IN GENERAL.—If the contractor makes the determination described in paragraph (4)(A)(ii)—

“(I) the eligible requester has the right to a redetermination by the contractor on the determination that the item or service is not so covered; and

“(II) the contractor shall include in notice under paragraph (4)(A) a brief explanation of the basis for the determination, including on what national or local coverage or noncoverage determination (if any) the determination is based, and the right to such a redetermination.

“(ii) DEADLINE FOR REDETERMINATIONS.—The contractor shall complete and provide notice of such redetermination within the same time period as the time period applicable to the contractor providing notice of redeterminations relating to a claim for benefits under subsection (a)(3)(C)(ii).

“(6) LIMITATION ON FURTHER REVIEW.—

“(A) IN GENERAL.—Contractor determinations described in paragraph (4)(A)(ii) or (4)(A)(iii) (and redeterminations made under paragraph (5)(B)), relating to pre-service claims are not subject to further administrative appeal or judicial review under this section or otherwise.

“(B) DECISION NOT TO SEEK PRIOR DETERMINATION OR NEGATIVE DETERMINATION DOES NOT IMPACT RIGHT TO OBTAIN SERVICES, SEEK REIMBURSEMENT, OR APPEAL RIGHTS.—Nothing in this subsection shall be construed as affecting the right of an individual who—

“(i) decides not to seek a prior determination under this subsection with respect to items or services; or

“(ii) seeks such a determination and has received a determination described in paragraph (4)(A)(ii), from receiving (and submitting a claim for) such items services and from obtaining administrative or judicial review respecting such claim under the other applicable provisions of this section. Failure to seek a prior determination under this subsection with respect to items and services

shall not be taken into account in such administrative or judicial review.

“(C) NO PRIOR DETERMINATION AFTER RECEIPT OF SERVICES.—Once an individual is provided items and services, there shall be no prior determination under this subsection with respect to such items or services.”.

(b) EFFECTIVE DATE; TRANSITION.—

(1) EFFECTIVE DATE.—The Secretary shall establish the prior determination process under the amendment made by subsection (a) in such a manner as to provide for the acceptance of requests for determinations under such process filed not later than 18 months after the date of the enactment of this Act.

(2) TRANSITION.—During the period in which the amendment made by subsection (a) has become effective but contracts are not provided under section 1874A of the Social Security Act with medicare administrative contractors, any reference in section 1869(g) of such Act (as added by such amendment) to such a contractor is deemed a reference to a fiscal intermediary or carrier with an agreement under section 1816, or contract under section 1842, respectively, of such Act.

(3) LIMITATION ON APPLICATION TO SGR.—For purposes of applying section 1848(f)(2)(D) of the Social Security Act (42 U.S.C. 1395w-4(f)(2)(D)), the amendment made by subsection (a) shall not be considered to be a change in law or regulation.

(c) PROVISIONS RELATING TO ADVANCE BENEFICIARY NOTICES; REPORT ON PRIOR DETERMINATION PROCESS.—

(1) DATA COLLECTION.—The Secretary shall establish a process for the collection of information on the instances in which an advance beneficiary notice (as defined in paragraph (4)) has been provided and on instances in which a beneficiary indicates on such a notice that the beneficiary does not intend to seek to have the item or service that is the subject of the notice furnished.

(2) OUTREACH AND EDUCATION.—The Secretary shall establish a program of outreach and education for beneficiaries and providers of services and other persons on the appropriate use of advance beneficiary notices and coverage policies under the medicare program.

(3) GAO REPORT REPORT ON USE OF ADVANCE BENEFICIARY NOTICES.—Not later than 18 months after the date on which section 1869(g) of the Social Security Act (as added by subsection (a)) takes effect, the Comptroller General of the United States shall submit to Congress a report on the use of advance beneficiary notices under title XVIII of such Act. Such report shall include information concerning the providers of services and other persons that have provided such notices and the response of beneficiaries to such notices.

(4) GAO REPORT ON USE OF PRIOR DETERMINATION PROCESS.—Not later than 18 months after the date on which section 1869(g) of the Social Security Act (as added by subsection (a)) takes effect, the Comptroller General of the United States shall submit to Congress a report on the use of the prior determination process under such section. Such report shall include—

(A) information concerning the types of procedures for which a prior determination has been sought, determinations made under the process, and changes in receipt of services resulting from the application of such process; and

(B) an evaluation of whether the process was useful for physicians (and other suppliers) and beneficiaries, whether it was

timely, and whether the amount of information required was burdensome to physicians and beneficiaries.

(5) ADVANCE BENEFICIARY NOTICE DEFINED.—In this subsection, the term “advance beneficiary notice” means a written notice provided under section 1879(a) of the Social Security Act (42 U.S.C. 1395pp(a)) to an individual entitled to benefits under part A or B of title XVIII of such Act before items or services are furnished under such part in cases where a provider of services or other person that would furnish the item or service believes that payment will not be made for some or all of such items or services under such title.

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. POLICY DEVELOPMENT REGARDING EVALUATION AND MANAGEMENT (E & M) DOCUMENTATION GUIDELINES.

(a) IN GENERAL.—The Secretary may not implement any new documentation guidelines for evaluation and management physician services under the title XVIII of the Social Security Act on or after the date of the enactment of this Act unless the Secretary—

(1) has developed the guidelines in collaboration with practicing physicians (including both generalists and specialists) and provided for an assessment of the proposed guidelines by the physician community;

(2) has established a plan that contains specific goals, including a schedule, for improving the use of such guidelines;

(3) has conducted appropriate and representative pilot projects under subsection (b) to test modifications to the evaluation and management documentation guidelines;

(4) finds that the objectives described in subsection (c) will be met in the implementation of such guidelines; and

(5) has established, and is implementing, a program to educate physicians on the use of such guidelines and that includes appropriate outreach.

The Secretary shall make changes to the manner in which existing evaluation and management documentation guidelines are implemented to reduce paperwork burdens on physicians.

(b) PILOT PROJECTS TO TEST EVALUATION AND MANAGEMENT DOCUMENTATION GUIDELINES.—

(1) IN GENERAL.—The Secretary shall conduct under this subsection appropriate and representative pilot projects to test new evaluation and management documentation guidelines referred to in subsection (a).

(2) LENGTH AND CONSULTATION.—Each pilot project under this subsection shall—

(A) be voluntary;

(B) be of sufficient length as determined by the Secretary to allow for preparatory physician and medicare contractor education, analysis, and use and assessment of potential evaluation and management guidelines; and

(C) be conducted, in development and throughout the planning and operational stages of the project, in consultation with practicing physicians (including both generalists and specialists).

(3) RANGE OF PILOT PROJECTS.—Of the pilot projects conducted under this subsection—

(A) at least one shall focus on a peer review method by physicians (not employed by a medicare contractor) which evaluates medical record information for claims submitted by physicians identified as statistical outliers relative to definitions published in the Current Procedures Terminology (CPT) code book of the American Medical Association;

(B) at least one shall focus on an alternative method to detailed guidelines based

on physician documentation of face to face encounter time with a patient;

(C) at least one shall be conducted for services furnished in a rural area and at least one for services furnished outside such an area; and

(D) at least one shall be conducted in a setting where physicians bill under physicians' services in teaching settings and at least one shall be conducted in a setting other than a teaching setting.

(4) BANNING OF TARGETING OF PILOT PROJECT PARTICIPANTS.—Data collected under this subsection shall not be used as the basis for overpayment demands or post-payment audits. Such limitation applies only to claims filed as part of the pilot project and lasts only for the duration of the pilot project and only as long as the provider is a participant in the pilot project.

(5) STUDY OF IMPACT.—Each pilot project shall examine the effect of the new evaluation and management documentation guidelines on—

(A) different types of physician practices, including those with fewer than 10 full-time-equivalent employees (including physicians); and

(B) the costs of physician compliance, including education, implementation, auditing, and monitoring.

(6) PERIODIC REPORTS.—The Secretary shall submit to Congress periodic reports on the pilot projects under this subsection.

(c) OBJECTIVES FOR EVALUATION AND MANAGEMENT GUIDELINES.—The objectives for modified evaluation and management documentation guidelines developed by the Secretary shall be to—

(1) identify clinically relevant documentation needed to code accurately and assess coding levels accurately;

(2) decrease the level of non-clinically pertinent and burdensome documentation time and content in the physician's medical record;

(3) increase accuracy by reviewers; and

(4) educate both physicians and reviewers.

(d) STUDY OF SIMPLER, ALTERNATIVE SYSTEMS OF DOCUMENTATION FOR PHYSICIAN CLAIMS.—

(1) STUDY.—The Secretary shall carry out a study of the matters described in paragraph (2).

(2) MATTERS DESCRIBED.—The matters referred to in paragraph (1) are—

(A) the development of a simpler, alternative system of requirements for documentation accompanying claims for evaluation and management physician services for which payment is made under title XVIII of the Social Security Act; and

(B) consideration of systems other than current coding and documentation requirements for payment for such physician services.

(3) CONSULTATION WITH PRACTICING PHYSICIANS.—In designing and carrying out the study under paragraph (1), the Secretary shall consult with practicing physicians, including physicians who are part of group practices and including both generalists and specialists.

(4) APPLICATION OF HIPAA UNIFORM CODING REQUIREMENTS.—In developing an alternative system under paragraph (2), the Secretary shall consider requirements of administrative simplification under part C of title XI of the Social Security Act.

(5) REPORT TO CONGRESS.—(A) Not later than October 1, 2003, the Secretary shall submit to Congress a report on the results of the study conducted under paragraph (1).

(B) The Medicare Payment Advisory Commission shall conduct an analysis of the results of the study included in the report under subparagraph (A) and shall submit a report on such analysis to Congress.

(e) **STUDY ON APPROPRIATE CODING OF CERTAIN EXTENDED OFFICE VISITS.**—The Secretary shall conduct a study of the appropriateness of coding in cases of extended office visits in which there is no diagnosis made. Not later than October 1, 2003, the Secretary shall submit a report to Congress on such study and shall include recommendations on how to code appropriately for such visits in a manner that takes into account the amount of time the physician spent with the patient.

(f) **DEFINITIONS.**—In this section—

(1) the term “rural area” has the meaning given that term in section 1886(d)(2)(D) of the Social Security Act, 42 U.S.C. 1395ww(d)(2)(D); and

(2) the term “teaching settings” are those settings described in section 415.150 of title 42, Code of Federal Regulations.

SEC. 502. IMPROVEMENT IN OVERSIGHT OF TECHNOLOGY AND COVERAGE.

(a) **IMPROVED COORDINATION BETWEEN FDA AND CMS ON COVERAGE OF BREAKTHROUGH MEDICAL DEVICES.**—

(1) **IN GENERAL.**—Upon request by an applicant and to the extent feasible (as determined by the Secretary), the Secretary shall, in the case of a class III medical device that is subject to premarket approval under section 515 of the Federal Food, Drug, and Cosmetic Act, ensure the sharing of appropriate information from the review for application for premarket approval conducted by the Food and Drug Administration for coverage decisions under title XVIII of the Social Security Act.

(2) **PUBLICATION OF PLAN.**—Not later than 6 months after the date of the enactment of this Act, the Secretary shall submit to appropriate Committees of Congress a report that contains the plan for improving such coordination and for shortening the time lag between the premarket approval by the Food and Drug Administration and coding and coverage decisions by the Centers for Medicare & Medicaid Services.

(3) **CONSTRUCTION.**—Nothing in this subsection shall be construed as changing the criteria for coverage of a medical device under title XVIII of the Social Security Act nor premarket approval by the Food and Drug Administration and nothing in this subsection shall be construed to increase premarket approval application requirements under the Federal Food, Drug, and Cosmetic Act.

(b) **COUNCIL FOR TECHNOLOGY AND INNOVATION.**—Section 1868 (42 U.S.C. 1395ee), as amended by section 301(a), is amended by adding at the end the following new subsection:

“(c) **COUNCIL FOR TECHNOLOGY AND INNOVATION.**—

“(1) **ESTABLISHMENT.**—The Secretary shall establish a Council for Technology and Innovation within the Centers for Medicare & Medicaid Services (in this section referred to as ‘CMS’).

“(2) **COMPOSITION.**—The Council shall be composed of senior CMS staff and clinicians and shall be chaired by the Executive Coordinator for Technology and Innovation (appointed or designated under paragraph (4)).

“(3) **DUTIES.**—The Council shall coordinate the activities of coverage, coding, and payment processes under this title with respect to new technologies and procedures, including new drug therapies, and shall coordinate

the exchange of information on new technologies between CMS and other entities that make similar decisions.

“(4) **EXECUTIVE COORDINATOR FOR TECHNOLOGY AND INNOVATION.**—The Secretary shall appoint (or designate) a noncareer appointee (as defined in section 3132(a)(7) of title 5, United States Code) who shall serve as the Executive Coordinator for Technology and Innovation. Such executive coordinator shall report to the Administrator of CMS, shall chair the Council, shall oversee the execution of its duties, and shall serve as a single point of contact for outside groups and entities regarding the coverage, coding, and payment processes under this title.”.

(c) **GAO STUDY ON IMPROVEMENTS IN EXTERNAL DATA COLLECTION FOR USE IN THE MEDICARE INPATIENT PAYMENT SYSTEM.**—

(1) **STUDY.**—The Comptroller General of the United States shall conduct a study that analyzes which external data can be collected in a shorter time frame by the Centers for Medicare & Medicaid Services for use in computing payments for inpatient hospital services. The study may include an evaluation of the feasibility and appropriateness of using of quarterly samples or special surveys or any other methods. The study shall include an analysis of whether other executive agencies, such as the Bureau of Labor Statistics in the Department of Commerce, are best suited to collect this information.

(2) **REPORT.**—By not later than October 1, 2002, the Comptroller General shall submit a report to Congress on the study under paragraph (1).

(d) **IOM STUDY ON LOCAL COVERAGE DETERMINATIONS.**—

(1) **STUDY.**—The Secretary shall enter into an arrangement with the Institute of Medicine of the National Academy of Sciences under which the Institute shall conduct a study on local coverage determinations (including the application of local medical review policies) under the Medicare program under title XVIII of the Social Security Act. Such study shall examine—

(A) the consistency of the definitions used in such determinations;

(B) the types of evidence on which such determinations are based, including medical and scientific evidence;

(C) the advantages and disadvantages of local coverage decisionmaking, including the flexibility it offers for ensuring timely patient access to new medical technology for which data are still be collected;

(D) the manner in which the local coverage determination process is used to develop data needed for a national coverage determination, including the need for collection of such data within a protocol and informed consent by individuals entitled to benefits under part A of title XVIII of the Social Security Act, or enrolled under part B of such title, or both; and

(E) the advantages and disadvantages of maintaining local Medicare contractor advisory committees that can advise on local coverage decisions based on an open, collaborative public process.

(2) **REPORT.**—Such arrangement shall provide that the Institute shall submit to the Secretary a report on such study by not later than 3 years after the date of the enactment of this Act. The Secretary shall promptly transmit a copy of such report to Congress.

(e) **METHODS FOR DETERMINING PAYMENT BASIS FOR NEW LAB TESTS.**—Section 1833(h) (42 U.S.C. 1395l(h)) is amended by adding at the end the following:

“(8)(A) The Secretary shall establish by regulation procedures for determining the

basis for, and amount of, payment under this subsection for any clinical diagnostic laboratory test with respect to which a new or substantially revised HCPCS code is assigned on or after January 1, 2003 (in this paragraph referred to as ‘new tests’).

“(B) Determinations under subparagraph (A) shall be made only after the Secretary—

“(i) makes available to the public (through an Internet site and other appropriate mechanisms) a list that includes any such test for which establishment of a payment amount under this subsection is being considered for a year;

“(ii) on the same day such list is made available, causes to have published in the Federal Register notice of a meeting to receive comments and recommendations (and data on which recommendations are based) from the public on the appropriate basis under this subsection for establishing payment amounts for the tests on such list;

“(iii) not less than 30 days after publication of such notice convenes a meeting, that includes representatives of officials of the Centers for Medicare & Medicaid Services involved in determining payment amounts, to receive such comments and recommendations (and data on which the recommendations are based);

“(iv) taking into account the comments and recommendations (and accompanying data) received at such meeting, develops and makes available to the public (through an Internet site and other appropriate mechanisms) a list of proposed determinations with respect to the appropriate basis for establishing a payment amount under this subsection for each such code, together with an explanation of the reasons for each such determination, the data on which the determinations are based, and a request for public written comments on the proposed determination; and

“(v) taking into account the comments received during the public comment period, develops and makes available to the public (through an Internet site and other appropriate mechanisms) a list of final determinations of the payment amounts for such tests under this subsection, together with the rationale for each such determination, the data on which the determinations are based, and responses to comments and suggestions received from the public.

“(C) Under the procedures established pursuant to subparagraph (A), the Secretary shall—

“(i) set forth the criteria for making determinations under subparagraph (A); and

“(ii) make available to the public the data (other than proprietary data) considered in making such determinations.

“(D) The Secretary may convene such further public meetings to receive public comments on payment amounts for new tests under this subsection as the Secretary deems appropriate.

“(E) For purposes of this paragraph:

“(i) The term ‘HCPCS’ refers to the Health Care Procedure Coding System.

“(ii) A code shall be considered to be ‘substantially revised’ if there is a substantive change to the definition of the test or procedure to which the code applies (such as a new analyte or a new methodology for measuring an existing analyte-specific test).”.

SEC. 503. TREATMENT OF HOSPITALS FOR CERTAIN SERVICES UNDER MEDICARE SECONDARY PAYOR (MSP) PROVISIONS.

(a) **IN GENERAL.**—The Secretary shall not require a hospital (including a critical access

hospital) to ask questions (or obtain information) relating to the application of section 1862(b) of the Social Security Act (relating to medicare secondary payor provisions) in the case of reference laboratory services described in subsection (b), if the Secretary does not impose such requirement in the case of such services furnished by an independent laboratory.

(b) REFERENCE LABORATORY SERVICES DESCRIBED.—Reference laboratory services described in this subsection are clinical laboratory diagnostic tests (or the interpretation of such tests, or both) furnished without a face-to-face encounter between the individual entitled to benefits under part A or enrolled under part B, or both, and the hospital involved and in which the hospital submits a claim only for such test or interpretation.

SEC. 504. EMTALA IMPROVEMENTS.

(a) PAYMENT FOR EMTALA-MANDATED SCREENING AND STABILIZATION SERVICES.—

(1) IN GENERAL.—Section 1862 (42 U.S.C. 1395y) is amended by inserting after subsection (c) the following new subsection:

“(d) For purposes of subsection (a)(1)(A), in the case of any item or service that is required to be provided pursuant to section 1867 to an individual who is entitled to benefits under this title, determinations as to whether the item or service is reasonable and necessary shall be made on the basis of the information available to the treating physician or practitioner (including the patient’s presenting symptoms or complaint) at the time the item or service was ordered or furnished by the physician or practitioner (and not on the patient’s principal diagnosis). When making such determinations with respect to such an item or service, the Secretary shall not consider the frequency with which the item or service was provided to the patient before or after the time of the admission or visit.”.

(2) EFFECTIVE DATE.—The amendment made by paragraph (1) shall apply to items and services furnished on or after January 1, 2002.

(b) NOTIFICATION OF PROVIDERS WHEN EMTALA INVESTIGATION CLOSED.—Section 1867(d) (42 U.S.C. 1395dd(d)) is amended by adding at the end the following new paragraph:

“(4) NOTICE UPON CLOSING AN INVESTIGATION.—The Secretary shall establish a procedure to notify hospitals and physicians when an investigation under this section is closed.”.

(c) PRIOR REVIEW BY PEER REVIEW ORGANIZATIONS IN EMTALA CASES INVOLVING TERMINATION OF PARTICIPATION.—

(1) IN GENERAL.—Section 1867(d)(3) (42 U.S.C. 1395dd(d)(3)) is amended—

(A) in the first sentence, by inserting “or in terminating a hospital’s participation under this title” after “in imposing sanctions under paragraph (1)”; and

(B) by adding at the end the following new sentences: “Except in the case in which a delay would jeopardize the health or safety of individuals, the Secretary shall also request such a review before making a compliance determination as part of the process of terminating a hospital’s participation under this title for violations related to the appropriateness of a medical screening examination, stabilizing treatment, or an appropriate transfer as required by this section, and shall provide a period of 5 days for such review. The Secretary shall provide a copy of the report on the organization’s report to the hospital or physician consistent with confidentiality requirements imposed on the organization under such part B.”.

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall apply to terminations of participation initiated on or after the date of the enactment of this Act.

SEC. 505. EMERGENCY MEDICAL TREATMENT AND ACTIVE LABOR ACT (EMTALA) TECHNICAL ADVISORY GROUP.

(a) ESTABLISHMENT.—The Secretary shall establish a Technical Advisory Group (in this section referred to as the “Advisory Group”) to review issues related to the Emergency Medical Treatment and Active Labor Act (EMTALA) and its implementation. In this section, the term “EMTALA” refers to the provisions of section 1867 of the Social Security Act (42 U.S.C. 1395dd).

(b) MEMBERSHIP.—The Advisory Group shall be composed of 19 members, including the Administrator of the Centers for Medicare & Medicaid Services and the Inspector General of the Department of Health and Human Services and of which—

(1) 4 shall be representatives of hospitals, including at least one public hospital, that have experience with the application of EMTALA and at least 2 of which have not been cited for EMTALA violations;

(2) 7 shall be practicing physicians drawn from the fields of emergency medicine, cardiology or cardiothoracic surgery, orthopedic surgery, neurosurgery, pediatrics or a pediatric subspecialty, obstetrics-gynecology, and psychiatry, with not more than one physician from any particular field;

(3) 2 shall represent patients;

(4) 2 shall be staff involved in EMTALA investigations from different regional offices of the Centers for Medicare & Medicaid Services; and

(5) 1 shall be from a State survey office involved in EMTALA investigations and 1 shall be from a peer review organization, both of whom shall be from areas other than the regions represented under paragraph (4).

In selecting members described in paragraphs (1) through (3), the Secretary shall consider qualified individuals nominated by organizations representing providers and patients.

(c) GENERAL RESPONSIBILITIES.—The Advisory Group—

(1) shall review EMTALA regulations;

(2) may provide advice and recommendations to the Secretary with respect to those regulations and their application to hospitals and physicians;

(3) shall solicit comments and recommendations from hospitals, physicians, and the public regarding the implementation of such regulations; and

(4) may disseminate information on the application of such regulations to hospitals, physicians, and the public.

(d) ADMINISTRATIVE MATTERS.—

(1) CHAIRPERSON.—The members of the Advisory Group shall elect a member to serve as chairperson of the Advisory Group for the life of the Advisory Group.

(2) MEETINGS.—The Advisory Group shall first meet at the direction of the Secretary. The Advisory Group shall then meet twice per year and at such other times as the Advisory Group may provide.

(e) TERMINATION.—The Advisory Group shall terminate 30 months after the date of its first meeting.

(f) WAIVER OF ADMINISTRATIVE LIMITATION.—The Secretary shall establish the Advisory Group notwithstanding any limitation that may apply to the number of advisory committees that may be established (within the Department of Health and Human Services or otherwise).

SEC. 506. AUTHORIZING USE OF ARRANGEMENTS WITH OTHER HOSPICE PROGRAMS TO PROVIDE CORE HOSPICE SERVICES IN CERTAIN CIRCUMSTANCES.

(a) IN GENERAL.—Section 1861(dd)(5) (42 U.S.C. 1395x(dd)(5)) is amended by adding at the end the following new subparagraph:

“(D) In extraordinary, exigent, or other non-routine circumstances, such as unanticipated periods of high patient loads, staffing shortages due to illness or other events, or temporary travel of a patient outside a hospice program’s service area, a hospice program may enter into arrangements with another hospice program for the provision by that other program of services described in paragraph (2)(A)(ii)(I). The provisions of paragraph (2)(A)(ii)(II) shall apply with respect to the services provided under such arrangements.”.

(b) CONFORMING PAYMENT PROVISION.—Section 1814(i) (42 U.S.C. 1395f(i)) is amended by adding at the end the following new paragraph:

“(4) In the case of hospice care provided by a hospice program under arrangements under section 1861(dd)(5)(D) made by another hospice program, the hospice program that made the arrangements shall bill and be paid for the hospice care.”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to hospice care provided on or after the date of the enactment of this Act.

SEC. 507. APPLICATION OF OSHA BLOODBORNE PATHOGENS STANDARD TO CERTAIN HOSPITALS.

(a) IN GENERAL.—Section 1866 (42 U.S.C. 1395cc) is amended—

(1) in subsection (a)(1)—

(A) in subparagraph (R), by striking “and” at the end;

(B) in subparagraph (S), by striking the period at the end and inserting “, and”; and

(C) by inserting after subparagraph (S) the following new subparagraph:

“(T) In the case of hospitals that are not otherwise subject to the Occupational Safety and Health Act of 1970, to comply with the Bloodborne Pathogens standard under section 1910.1030 of title 29 of the Code of Federal Regulations (or as subsequently redesignated).”; and

(B) by adding at the end of subsection (b) the following new paragraph:

“(4)(A) A hospital that fails to comply with the requirement of subsection (a)(1)(T) (relating to the Bloodborne Pathogens standard) is subject to a civil money penalty in an amount described in subparagraph (B), but is not subject to termination of an agreement under this section.

“(B) The amount referred to in subparagraph (A) is an amount that is similar to the amount of civil penalties that may be imposed under section 17 of the Occupational Safety and Health Act of 1970 for a violation of the Bloodborne Pathogens standard referred to in subsection (a)(1)(T) by a hospital that is subject to the provisions of such Act.

“(C) A civil money penalty under this paragraph shall be imposed and collected in the same manner as civil money penalties under subsection (a) of section 1128A are imposed and collected under that section.”.

(b) EFFECTIVE DATE.—The amendments made by this subsection (a) shall apply to hospitals as of July 1, 2002.

SEC. 508. ONE-YEAR DELAY IN LOCK IN PROCEDURES FOR MEDICARE+CHOICE PLANS; CHANGE IN MEDICARE+CHOICE REPORTING DEADLINES AND ANNUAL, COORDINATED ELECTION PERIOD FOR 2002.

(a) LOCK-IN DELAY.—Section 1851(e) (42 U.S.C. 1395w-21(e)) is amended—

(1) in paragraph (2)(A), by striking "THROUGH 2001" and "and 2001" and inserting "THROUGH 2002" and "2001, and 2002", respectively;

(2) in paragraph (2)(B), by striking "DURING 2002" and inserting "DURING 2003";

(3) in paragraphs (2)(B)(i) and (2)(C)(i), by striking "2002" and inserting "2003" each place it appears;

(4) in paragraph (2)(D), by striking "2001" and inserting "2002"; and

(5) in paragraph (4), by striking "2002" and inserting "2003" each place it appears.

(b) CHANGE IN DEADLINES AND ELECTION PERIOD.—

(1) IN GENERAL.—Notwithstanding any other provision of law—

(A) the deadline for submittal of information under section 1854(a)(1) of the Social Security Act (42 U.S.C. 1395w-24(a)(1)) for 2002 is changed from July 1, 2002, to the third Monday in September of 2002; and

(B) the annual, coordinated election period under section 1851(e)(3)(B) of such Act (42 U.S.C. 1395w-21(e)(3)(B)) with respect to 2003 shall be the period beginning on November 15, 2002, and ending on December 31, 2002.

(2) GAO STUDY ON IMPACT OF CHANGE ON BENEFICIARIES AND PLANS.—The Comptroller General of the United States shall conduct a review of the Medicare+Choice open enrollment process that occurred during 2001, including the offering of Medicare+Choice plans for 2002. By not later than May 31, 2002, the Comptroller General shall submit a report to Congress and the Secretary on such review. Such report shall include the following:

(A) An analysis of the effect of allowing additional time for the submittal of adjusted community rates and other data on the extent of participation of Medicare+Choice organizations and on the benefits offered under Medicare+Choice plans.

(B) An evaluation of the plan-specific information provided to beneficiaries, the timeliness of the receipt of such information, the adequacy of the duration of the open enrollment period, and relevant operational issues that arise as a result of the timing and duration of the open enrollment period, including any problems related to the provision services immediately following enrollment.

(C) The results of surveys of beneficiaries and Medicare+Choice organizations.

(D) Such recommendations regarding the appropriateness of the changes provided under paragraph (1) as the Comptroller General finds appropriate.

SEC. 509. BIPA-RELATED TECHNICAL AMENDMENTS AND CORRECTIONS.

(a) TECHNICAL AMENDMENTS RELATING TO ADVISORY COMMITTEE UNDER BIPA SECTION 522.—(1) Subsection (i) of section 1114 (42 U.S.C. 1314)—

(A) is transferred to section 1862 and added at the end of such section; and

(B) is redesignated as subsection (j).

(2) Section 1862 (42 U.S.C. 1395y) is amended—

(A) in the last sentence of subsection (a), by striking "established under section 1114(f)"; and

(B) in subsection (j), as so transferred and redesignated—

(i) by striking "under subsection (f)"; and

(ii) by striking "section 1862(a)(1)" and inserting "subsection (a)(1)".

(b) TERMINOLOGY CORRECTIONS.—(1) Section 1869(c)(3)(I)(ii) (42 U.S.C. 1395ff(c)(3)(I)(ii)), as amended by section 521 of BIPA, is amended—

(A) in subclause (III), by striking "policy" and inserting "determination"; and

(B) in subclause (IV), by striking "medical review —policies" and inserting "coverage determinations".

(2) Section 1852(a)(2)(C) (42 U.S.C. 1395w-22(a)(2)(C)) is amended by striking "policy" and "POLICY" and inserting "determination" each place it appears and "DETERMINATION", respectively.

(c) REFERENCE CORRECTIONS.—Section 1869(f)(4) (42 U.S.C. 1395ff(f)(4)), as added by section 522 of BIPA, is amended—

(1) in subparagraph (A)(iv), by striking "subclause (I), (II), or (III)" and inserting "clause (i), (ii), or (iii)";

(2) in subparagraph (B), by striking "clause (i)(IV)" and "clause (i)(III)" and inserting "subparagraph (A)(iv)" and "subparagraph (A)(iii)", respectively; and

(3) in subparagraph (C), by striking "clause (i)", "subclause (IV)" and "subparagraph (A)" and inserting "subparagraph (A)", "clause (iv)" and "paragraph (1)(A)", respectively each place it appears.

(d) OTHER CORRECTIONS.—Effective as if included in the enactment of section 521(c) of BIPA, section 1154(e) (42 U.S.C. 1320c-3(e)) is amended by striking paragraph (5).

(e) EFFECTIVE DATE.—Except as otherwise provided, the amendments made by this section shall be effective as if included in the enactment of BIPA.

SEC. 510. CONFORMING AUTHORITY TO WAIVE A PROGRAM EXCLUSION.

The first sentence of section 1128(c)(3)(B) (42 U.S.C. 1320a-7(c)(3)(B)) is amended to read as follows: "Subject to subparagraph (G), in the case of an exclusion under subsection (a), the minimum period of exclusion shall be not less than five years, except that, upon the request of the administrator of a Federal health care program (as defined in section 1128B(f)) who determines that the exclusion would impose a hardship on individuals entitled to benefits under part A of title XVIII or enrolled under part B of such title, or both, the Secretary may waive the exclusion under subsection (a)(1), (a)(3), or (a)(4) with respect to that program in the case of an individual or entity that is the sole community physician or sole source of essential specialized services in a community.".

SEC. 511. TREATMENT OF CERTAIN DENTAL CLAIMS.

(a) IN GENERAL.—Section 1862 (42 U.S.C. 1395y) is amended by inserting after subsection (c) the following new subsection:

"(d)(1) Subject to paragraph (2), a group health plan (as defined in subsection (a)(1)(A)(v)) providing supplemental or secondary coverage to individuals also entitled to services under this title shall not require a medicare claims determination under this title for dental benefits specifically excluded under subsection (a)(12) as a condition of making a claims determination for such benefits under the group health plan.

"(2) A group health plan may require a claims determination under this title in cases involving or appearing to involve inpatient dental hospital services or dental services expressly covered under this title pursuant to actions taken by the Secretary."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date that is 60 days after the date of the enactment of this Act.

SEC. 512. MISCELLANEOUS REPORTS, STUDIES, AND PUBLICATION REQUIREMENTS.

(a) GAO REPORTS ON THE PHYSICIAN COMPENSATION.—

(1) SUSTAINABLE GROWTH RATE AND UPDATES.—Not later than 6 months after the date of the enactment of this Act, the Comptroller General of the United States shall

submit to Congress a report on the appropriateness of the updates in the conversion factor under subsection (d)(3) of section 1848 of the Social Security Act (42 U.S.C. 1395w-4), including the appropriateness of the sustainable growth rate formula under subsection (f) of such section for 2002 and succeeding years. Such report shall examine the stability and predictability of such updates and rate and alternatives for the use of such rate in the updates.

(2) PHYSICIAN COMPENSATION GENERALLY.—Not later than 12 months after the date of the enactment of this Act, the Comptroller General shall submit to Congress a report on all aspects of physician compensation for services furnished under title XVIII of the Social Security Act, and how those aspects interact and the effect on appropriate compensation for physician services. Such report shall review alternatives for the physician fee schedule under section 1848 of such title (42 U.S.C. 1395w-4).

(b) PROMPT SUBMISSION OF OVERDUE REPORTS ON PAYMENT AND UTILIZATION OF OUTPATIENT THERAPY SERVICES.—The Secretary shall submit to Congress as expeditiously as practicable the reports required under section 4541(d)(2) of the Balanced Budget Act of 1997 (relating to alternatives to a single annual dollar cap on outpatient therapy) and under section 221(d) of the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (relating to utilization patterns for outpatient therapy).

(c) ANNUAL PUBLICATION OF LIST OF NATIONAL COVERAGE DETERMINATIONS.—The Secretary shall provide, in an appropriate annual publication available to the public, a list of national coverage determinations made under title XVIII of the Social Security Act in the previous year and information on how to get more information with respect to such determinations.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Connecticut (Mrs. JOHNSON) and the gentleman from California (Mr. STARK) each will control 20 minutes.

The Chair recognizes the gentlewoman from Connecticut (Mrs. JOHNSON).

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield 10 minutes to the gentleman from Louisiana (Mr. TAUZIN), and I ask unanimous consent that he be allowed to control that time.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Connecticut?

There was no objection.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Secretary Thompson said about Medicare, "Complexity is over the system, criminalizing honest mistakes, and driving doctors, nurses, and other health care professionals out of the program."

I agree.

Medicare and Medicaid are governed by 132,000 pages of regulations. That is 3 times the IRS Code and its regulations and the result is exactly as the Secretary described.

Memorial Hospital in Gonzales, Texas has 33 beds and 20 billing staff. Northwestern Memorial Hospital in

Chicago just hired 26 new full-time employees to meet new regulatory requirements.

At a time when we need Medicare dollars for more nursing care, prescription drugs, annual physicals, and new systems to help seniors manage multiple chronic illnesses, we cannot in good conscience ignore the costly administrative burdens and the multitude of injustices being heaped on Medicare doctors, hospitals, home health care providers, nursing homes, and other providers by a literal explosion of complex law, regulation directives, and paperwork.

To address what I consider to be a crisis endangering the ability of small providers and many doctors to continue to serve our Nation's seniors, last January my subcommittee began taking a hard look at provider complaints. Today we bring to you a bipartisan bill to address the severe problems that have developed in Medicare.

The bill before us does many radical things. It disciplines the regulatory process so regulations will be issued through a predictable and timely process, with provider input before proposed regulations are made public.

Another radical thing it does, it stops, it prohibits government from imposing regulations retroactively. There will be no more changing the rules of the game and then punishing providers for noncompliance. It prohibits, read that "stops," government from imposing sanctions and demanding repayment if they provided care to seniors in compliance with written guidance from the government. It speeds up the process Medicare uses to set payments for new diagnostic and treatment technologies by creating a Council of Technology and Innovation. It requires a simple process to correct technical error, relieving our caregivers of all the paperwork and severe cash flow problems that result from the laborious appeals process, a killer of small providers.

Radically, we require through this bill that the people who process payments for Medicare services answer questions accurately. GAO found that these contractors answered only 15 percent of routine questions accurately, and, worse yet, 32 percent of provider questions were answered completely inaccurately.

By setting performance standards in competitive contracting, Medicare can assure better-quality provider support services.

Under this bill, doctors get fairer treatment when audited for billing inaccuracy. They will get explanations, the right to discuss coding differences, and written explanations when differences remain. This should stop the arbitrary decisions that result in tens of thousands of dollars of unjust fines.

When a physician who is responsible for running the Medicare program tells

me she cannot tell the difference between a comprehensive physical and a detailed physical, two entirely different levels of care for billing purposes, should we be surprised that doctors who make coding errors are frustrated and angered by Medicare's arbitrary, confrontational audits by non-medical people and its complex, irrational documentation requirements?

□ 1700

I am proud that this is a bipartisan bill. It has been developed with the study and input of every member of the Ways and Means Subcommittee on Health, and then the follow-on input of the Committee on Energy and Commerce, Republicans and Democrats, as well as the administration and the Inspector General.

I want to especially thank John McManus, Jennifer Baxendell, Deborah Williams, Joel White, Cybele Bjorklund and Carl Taylor, our Republican and Democratic staff members of the Committee on Ways and Means, because this has been an incredibly time-consuming, work-intensive bill. Without their endless attention to detail and thoughtful, sound judgments, it would not be before us today.

Please support H.R. 3391. It is a giant step toward a stronger Medicare program.

THANK YOUS ON H.R. 3391

Mr. Speaker, I reserve the balance of my time.

Mr. STARK. Mr. Speaker, I ask unanimous consent that at the conclusion of 10 minutes of my time that 10 minutes be yielded to the gentleman from Ohio (Mr. BROWN) for the purposes of control.

The SPEAKER pro tempore (Mr. CULBERSON). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. STARK. Mr. Speaker, I yield myself such time as I may consume.

The bill we are moving today embodies basically the way Congress used

to work, with the majority and minority working together to enact improvements to the Medicare program. On this bill, the Medicare Regulatory and Contracting Reform Act, both sides have worked closely with the administration, with providers, consumers groups and others. It has been a bipartisan, consultative process as it should be.

In addition, Mr. Speaker, I think it is important to acknowledge the outstanding leadership and hard work of the gentlewoman from Nevada (Ms. BERKLEY). She brought this matter to the attention of Congress and has shepherded it along the way and has been an invaluable help in seeing this legislation be completed.

The legislation contains important beneficiary provisions which I think are important to emphasize. We have established a beneficiary ombudsman program that will provide a voice for beneficiaries within the Centers for Medicare and Medicaid Services, now CMS, I still want to call it HCFA, but will enable that agency to better respond to and anticipate beneficiary needs. As every Member knows, Members must now help Medicare beneficiaries with their casework because no office really exists within CMS to help the beneficiaries.

We have also established a single national toll free telephone number, 1-800-MEDICARE, I hope it answers, for the beneficiaries to call with their questions; and this single telephone number will replace the many pages of telephone numbers that beneficiaries now must sort through in the Medicare handbook to find the correct place to call with their questions.

I am particularly pleased that a demonstration program will place Medicare staff in Social Security field offices to answer beneficiary questions and provide assistance on Medicare issues. Beneficiaries are accustomed to going to Social Security offices, as indeed are the caseworkers in our local offices, for help and assistance in these programs. This will help by having Medicare assistance for them in these same offices.

I would also like to suggest accolades for the gentleman from Pennsylvania (Mr. ENGLISH), who has worked with me on a bill to protect nurses and other health care workers from needle stick injuries by requiring the use of safe needle technology in public hospitals, as well as has been required by those hospitals under OSHA supervision. We have been working on this issue for years, and we have made significant progress; and this legislation completes those efforts, and this provision in the bill will save lives. It is an important component of the bill.

Importantly, this bill delays for a year the requirement in law that would begin in 2002 to lock beneficiaries into the Medicare+Choice plans, and under this legislation beneficiaries would

continue to be able to enroll in and disenroll from these plans throughout the year. I would strongly prefer to repeal the lock-in altogether, but I believe a 1-year delay is a good start.

Finally, the bill takes long overdue steps to fundamentally reform Medicare's contracting system. We have worked on this for years. I am confident under this new system we can get a better deal for our government and still maintain quality service and performance goals for the beneficiary.

This will place additional administrative burdens on CMS; and as we discussed earlier today with the gentleman from Ohio (Mr. HOBSON) and others, we will continue to see that Labor HHS appropriation bills provide modest increases in administrative resources for CMS to complete this work.

I guess that said, Mr. Speaker, I have to add that I think it is somewhat disgraceful that this ends up being our really only Medicare legislation this year. We started the 107th Congress with a record budget surplus and the ability to easily enact and pay for comprehensive, affordable prescription drug coverage and other significant improvements through all Medicare beneficiaries, in addition to funding other key national priorities in education and other social areas.

The surplus, instead, was squandered on excessive tax breaks for the wealthy, and it is now clear that the Bush recession that began last spring and the Republican tax package have sealed the deal. Our legislative record at the end of the first session of the 107th Congress is a tribute to misplaced priorities.

I look forward to changing that and working with my colleagues as we have on this bill on the Subcommittee on Health to see if in the next session of Congress we can reverse this course and improve the Medicare system as it has long been set aside from doing.

Mr. Speaker, I reserve the balance of my time.

Mrs. JOHNSON of Connecticut. Mr. Speaker, it is my privilege to yield 1½ minutes to the gentlewoman from Washington (Ms. DUNN), a hardworking member of our subcommittee.

Ms. DUNN. Mr. Speaker, I rise in support of this bill to provide regulatory relief to doctors throughout the Nation. I want to thank the gentleman from California (Mr. THOMAS) for being involved in developing this legislation; but I want to give special kudos to the gentlewoman from Connecticut (Mrs. JOHNSON), the subcommittee chairman, and the gentleman from California (Mr. STARK), her ranking member, because they worked together. This is bipartisan and we are very pleased with the result of our work. It will cost nothing, but it does true regulatory reform.

I also want to thank my colleagues, the gentleman from Maryland (Mr. EHRLICH) and the gentleman from

Washington (Mr. McDERMOTT), for working with me to ensure that in this bill our seniors have access to the latest clinical laboratory tests.

I am very pleased that this regulatory relief bill creates a transparent, timely and public process at CMS to evaluate and to incorporate new technologies into the Medicare program. This is a critical step in ensuring that doctors have every tool available to assist our seniors.

Medical innovations are moving too fast to wait for Medicare's coverage and payments. This is especially true for new laboratory tests, a field that has been rapidly advancing in innovations exponentially.

The quality of our health care system here in the United States depends on our ability to prevent, diagnose, and treat illnesses and diseases. Support this legislation so that our Nation's seniors will be able to access breakthrough tests that can help save their lives.

Mr. STARK. Mr. Speaker, I am pleased to yield 2 minutes to the gentlewoman from Nevada (Ms. BERKLEY), who is one of the originators of this legislation.

Ms. BERKLEY. Mr. Speaker, I rise today in strong support of H.R. 3391, to provide long-awaited Medicare regulatory relief to health care providers. I would like to particularly thank my colleagues who have worked so hard to make this piece of legislation a reality, the gentlewoman from Connecticut (Mrs. JOHNSON); the gentleman from California (Mr. STARK), especially for his very generous praise, I appreciate that; the gentleman from Ohio (Mr. BROWN); the gentleman from Florida (Mr. BILIRAKIS); the gentleman from New York (Mr. RANGEL); the gentleman from California (Mr. THOMAS); the gentleman from Louisiana (Mr. TAUZIN); and the gentleman from Michigan (Mr. DINGELL) for their hard work on this legislation. I would especially like to thank the gentleman from Pennsylvania (Mr. TOOMEY) for his leadership on this issue.

I became involved with this legislation when doctor after doctor in the Las Vegas area came to me with horror stories of how they had been treated by HCFA and how it had inhibited their ability to care for their patients. The cornerstone of health care in this country is the doctor-patient relationship, and many of us have fought consistently to maintain the integrity of this fundamental and very personal relationship.

Over the years, excessive paperwork and overburdensome government regulation have interfered with that relationship. This legislation will help cut red tape and bureaucratic excesses so doctors can spend more time with their patients and less time on paperwork.

Reform is important to the doctors, important to our seniors, and vital to

the health of Medicare. While this bill, as the gentleman from California (Mr. STARK) says, does not include everything I had hoped for, it is a very significant step in the right direction. I am proud that my name is associated with this bill, and I urge all of my colleagues to support it.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself such time as I may consume.

I would like to thank the gentlewoman from Nevada (Ms. BERKLEY) and the gentleman from Pennsylvania (Mr. TOOMEY), who is going to speak later, for their hard work on behalf of physicians, most of which is reflected in this legislation.

Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Mr. Speaker, I am pleased to rise in support of H.R. 3391. This legislation makes extensive changes and modifications in the regulatory and contracting systems within Medicare, and I commend the gentlewoman from Connecticut (Mrs. JOHNSON) and the gentleman from California (Mr. STARK) for their work on this measure.

Along with many of our colleagues, I have heard in recent years that increasing drumbeat of criticism, from health care providers and patients in my own district, over a cumbersome Medicare system that was slow to adapt to rapid changes in health care, cumbersome in its management of existing benefits, and required far too much time spent in processing paperwork for claims reimbursements.

Moreover, there is also a widespread perception that the Centers for Medicare and Medicaid Services, formerly known as HCFA, has in the past issued new regulations in an arbitrary and capricious manner, with little regard for the interests and situations of those health care providers who would be impacted by a regulatory change. The fact that many of these changes came without sufficient accompanying explanations further exacerbated problems for providers and patients who often have difficulty divining the arcane and often confusing world of Medicare regulations.

There is also the issue of the Medicare contracting program which, in this age of open government, remains a closed system. This has fostered inefficiency and prevented the Medicare contracting program from keeping up with rapid developments in the delivery of health care in the private sector.

H.R. 3391 is a bipartisan solution to address these problems and to serve as the first step in modernizing overhaul of the Medicare system, which streamlines the regulatory process, reforms the contracting system to make it more open and accountable, expanding outreach and education to better inform both providers and patients of

their rights and responsibilities, and makes important improvements to the appeals and recovery process.

Mr. Speaker, Medicare, along with the Social Security system, represents the most popular and successful program for seniors ever enacted. This bill will ensure the continued success of the system by making it easier for Medicare health care providers to operate within the system, as well as to offer relief through the reduction of paperwork burdens.

This measure will both reform the Medicare system and improve confidence in its future on the part of both providers and patients. Accordingly, I urge my colleagues to fully join in supporting this measure.

Mr. STARK. Mr. Speaker, I am pleased to yield 2½ minutes to the gentlewoman from Florida (Mrs. THURMAN), who has worked diligently on this legislation in behalf of all the seniors, most of whom I think reside in her district in Florida, but for all of the rest of us seniors who do not.

Mrs. THURMAN. Mr. Speaker, I want to thank the gentleman from California (Mr. STARK) for yielding me this time and those nice remarks, but I also want to thank the gentlewoman from Connecticut (Mrs. JOHNSON) and the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Ohio (Mr. BROWN). Without their diligence and all of the committees working together, this piece of legislation would not have been brought forward to this floor.

People sometimes do not realize how complicated Medicare can be at times; and when one is trying to balance beneficiaries and the doctors and the contractors, sometimes we have to work through some very difficult situations.

I will tell my colleagues that in talking with my doctors in the fifth district, one of the things that I heard over and over again was the sheer volume and complexity of the Medicare regulations and what it has meant to them. Most of what it means to them is they do not have the time to spend with their patients because they are spending so much time on the complexities.

Another issue that I think is very important about this is that these doctors also tell me, in talking with their staffs and their offices, that their administrative expenses can represent as much as 25 percent of their cost. That means, again, the cost to Medicare and the dollars that we have available is not being spent on the patient, but on administrative costs. So hiring an extra person, doing something more for the patient can sometimes cause a problem.

In seeing that in this piece of legislation, one of the things that we fought very hard for and I think is going to be a wonderful opportunity for us to look at in the future is the demonstration

program that we provided to on-site technical assistance for doctors to help with the complexity of Medicare coding.

□ 1715

We heard an awful lot about that. So this was an issue we thought put them on site, they get the opportunity to really sit down with folks and figure out where their problems might be.

Then I also want to thank the gentleman from Minnesota (Mr. RAMSTAD) for his leadership on a piece of legislation that he and I introduced for a couple of years in a row dealing with technology. And so what we have done in this bill is we have actually set up a Council for Technology and Innovation within CMS. This council will have an executive coordinator who acts as a single point of contact between CMS and outside entities to help explain coverage, coding, and payment questions about new and innovative technologies.

We are all very proud of what happens in this country with innovation. So I would just like to take this opportunity to thank all, and our staffs, that were involved in this, and ask for my colleagues' support for this bill.

Mr. STARK. Mr. Speaker, I yield back the balance of my time.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I conclude by thanking the gentleman from California for his cooperation throughout this long process, and our joint efforts, and also his staff, as I did earlier. They have worked very, very long hours on this.

And I would like to say that this bill is only the beginning of strengthening Medicare. The administration is organizing task forces with real-world providers on them to rethink the most time consuming forms that health care providers have to fill out. If we can collect only the data we need, streamline and simplify billing systems and administrative processes, we can literally free millions of hours of caregiver time for the benefit of our seniors. It will take the leadership of Secretary Thompson and Administrator Scully, and it will take long hearings and attention to detail next year and the year after, working together, our committee and the Committee on Energy and Commerce.

Together, we can make Medicare a model of smart, responsive government and reverse the belief expressed by so many in our hearings, but summed up by a doctor who said, "Medicare has lost a sense of fairness, due process and common sense." We intend to restore those qualities to the most beloved and important program in our Nation not just for seniors but for their children and grandchildren as well.

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume,

and I rise today in strong support of H.R. 3391, the Medicare Regulatory Contracting Reform Act of 2001.

The bill captures the best of two bills. The legislation reported out of the Committee on Ways and Means, and H.R. 3046, the Medicare RACER Act, which was reported from the Committee on Energy and Commerce. It represents the diligent work of the many Members of Congress to make the Medicare program more flexible and less bureaucratic. It is also a shining example of what can be achieved when we have true bipartisan cooperation.

Earlier this year, the Committee on Energy and Commerce began a project we called "patients first." The idea was indeed to try to see if we could not reform the regulations and the burdens at CMS to indeed put patients first; to make sure that physicians and health care providers, who are forced to spend too much time filling out forms and trying to learn the rules of the road and the changing rules of the road, might in fact get some relief.

Our committee held a number of hearings and we disseminated surveys to elicit input from beneficiaries and health care providers about the complexities of the Medicare program and its rules. We also brought together beneficiary groups, provider associations, and government officials to talk about regulatory relief.

Because of the leadership particularly of the gentleman from Pennsylvania (Mr. TOOMEY) and the gentlewoman from Nevada (Ms. BERKLEY), we are standing here today with an opportunity to vote on legislation that will enable doctors to spend more of their time caring for patients, putting patients first, and putting in less time completing paperwork for the government and bureaucrats.

The Toomey-Berkley Medicare RACER Act was successfully reported from the Subcommittee on Health, thanks to the dedication and commitment of the chairman, the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Georgia (Mr. NORWOOD). It was also successfully reported out of the full Committee on Energy and Commerce. It requires contractors to provide general written responses to written inquiries from beneficiaries and health care providers within 45 business days, and it requires Medicare contractors to notify health care providers of problems that have been identified in a probe sample, and to alert providers as to the steps they should take to resolve the problems.

Each of these improvements is significant and each of them has been included in the bill we are about to vote on today. And I wish to thank my colleagues from the Committee on Ways and Means for working so well with the gentleman from Florida (Mr. BILIRAKIS), the gentleman from Ohio (Mr.

BROWN), the gentleman from Michigan (Mr. DINGELL), and myself to consolidate the work of our two committees. Lord knows, we need to thank the staff who put in hours and hours and hours, late nights and weekends, to bring all this together.

We worked to strike an appropriate balance between the need for regulatory relief and the government's obligation to protect taxpayer funds from waste, fraud, and abuse. This captures the hard work of both committees. It has broad support with the beneficiary groups, the health care community and, by the way, the administration.

I urge my colleagues to join us in full support of the legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

I am pleased to join my colleagues both on the Committee on Ways and Means and the Committee on Energy and Commerce in support of H.R. 3391. I want to thank my colleagues, the gentleman from Pennsylvania (Mr. TOOMEY) and the gentlewoman from Nevada (Ms. BERKLEY) for taking on this daunting task. In a resource-limited environment, they were determined to identify reforms in Medicare operations that serve the best interests of beneficiaries and respond to a host of legitimate issues raised by providers, while making sure to in no way compromise the program's efforts to fight fraud, waste and abuse. It is a tall order and the gentleman from Pennsylvania and the gentlewoman from Nevada did an excellent job.

This bipartisan legislation was a collective effort, to say the least. It was written and rewritten and rewritten with the input of the health care community, consumer advocates, the committees of jurisdiction, and the administration. It took months, it took difficult compromises, but the final product will make a tangible, positive difference for beneficiaries and providers alike.

Key provisions of the bill bolster communications between and among the Medicare program and its beneficiaries and providers, improve the Medicare appeals process, and establish new performance standards for Medicare contractors.

No one is well served when providers either cannot get the information they need or coverage policies are unclear, or anti-fraud and abuse measures elicit such mistrust that providers second-guess every treatment decision. This legislation takes those issues seriously and does something about them. Importantly, the bill also provides and improves Medicare responsiveness to its 39 million beneficiaries.

I want to thank my colleagues, the gentleman from Louisiana (Mr. TAUZIN), the gentleman from Florida (Mr.

BILIRAKIS), and the gentleman from Michigan (Mr. DINGELL) especially, and staff members Bridgett Taylor, Karen Folk, Amy Hall, and on my staff, Katie Porter and Ellie Dehoney for fighting tooth and nail to ensure this legislation, in effect, keeps our eye on the ball. They made sure the bill contains provisions that relate directly to Medicare's fundamental mission, to make sure seniors and disabled individuals receive the care that they need.

Thanks largely to their resolve and hard work, this legislation ensures that seniors know definitively and up front whether Medicare covers the health care their doctor recommends. Especially for low-income seniors, that is a crucial and overdue change in Medicare rules, and I appreciate the negotiated work that we all could do on that issue.

The Medicare fee-for-service program is the largest insurance program in the United States, serving 36 million Americans, contracting with almost 1 million providers. Recent surveys document what most of us know from speaking with our constituents; that is, an overwhelming majority of Medicare beneficiaries trust in and are very satisfied with their coverage under fee-for-service Medicare.

Americans overwhelmingly oppose Republican efforts to privatize this system, Americans overwhelmingly reject Republican efforts to allow more insurance company intrusion into fee-for-service Medicare, and Americans overwhelmingly want prescription drug coverage, an area where this Congress and the Bush administration have so far failed miserably to achieve. But since that level of trust and satisfaction the people in this country have for Medicare is a fundamental measure of this program's success, changing the Medicare rules was a high-stakes exercise that we, bipartisanship, were able to achieve.

I am confident that the changes encompassed in this bill are in the best interest of beneficiaries, most importantly; also to providers and taxpayers, and I encourage my colleagues to support it.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Florida (Mr. BILIRAKIS), the distinguished chairman of the Subcommittee on Health of the Committee on Energy and Commerce.

Mr. BILIRAKIS. Mr. Speaker, I too rise today in support of patients. The legislation before us is good for patients. By reducing regulatory burdens and easing paperwork requirements, this legislation allows doctors to spend more of their time providing health care and less of their time wading through pages over rules and regulations.

At the beginning of this session, the Committee on Energy and Commerce launched an ambitious bipartisan ini-

tiative to reform the Centers for Medicare and Medicaid Services and to put patients first. This initiative became known as the "patients first" project. Much of the legislation before us today stems from the committee's work on this project, which was led by my colleague, the gentleman from Georgia (Mr. NORWOOD). Foundational to this work was the prior work of the gentleman from Pennsylvania (Mr. TOOMEY) and the gentlewoman from Nevada (Ms. BERKLEY).

The bill we will vote on today includes many of the provisions of the Medicare RACER Act, which was favorably reported out of my Subcommittee on Health as well as the full Committee on Energy and Commerce last month. It includes improvements focused on the Emergency Medical Treatment and Labor Act. Also included in the legislation is important language regarding advanced beneficiary notices. This language allows physicians to find out whether a specific physician service they are providing will be covered by Medicare before delivering the care.

Mr. Speaker, I would like to thank all of the staff who put so much time into this legislation, especially Erin Kuhls, Julie Corcoran, Nandan Kenkeremath, Pat Morriset, Anne Esposito, Steve Tilton, Karen Folk, Amy Hall, and, of course, last but not least, Karen Taylor.

H.R. 3391 is good for patients and providers alike, and I encourage my fellow colleagues to vote in favor of this legislation today.

Mr. BROWN of Ohio. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. DINGELL), the ranking Democrat on the Committee on Energy and Commerce that was here and presided over this House when Medicare was passed in 1965.

Mr. DINGELL. Mr. Speaker, I thank my good friend for yielding me this time, and I rise today to speak in favor of H.R. 3391, the Medicare Regulatory and Contracting Reform Act of 2001. I rise also to praise my colleagues on the committee, the distinguished chairman of the committee, the distinguished chairman of the subcommittee, and my good friend, the gentleman from Ohio, Mr. BROWN and others, including the very fine staffs on both sides of the aisle that worked so hard.

The legislation is a product of bipartisan collaboration between two great committees, the Committee on Energy and Commerce and the Committee on Ways and Means, and also with seniors' groups, providers, and others. This is a bill which is fair. It strikes a balance between addressing the program administration concerns of beneficiaries and providers and ensuring integrity of the program itself.

This legislation makes a number of wise improvements in the Medicare

program. It gives the Centers for Medicare and Medicaid Services, CMS, additional flexibility with claims processors. It also strengthens the independent standards for appeals. It entitles the beneficiaries and the reviewers to ensure independent appeals are really independent, are fair, and in fact take place.

I do wish again to commend my friend, the gentleman from Louisiana (Mr. TAUZIN), the gentleman from Florida (Mr. BILIRAKIS), the staff at CMS, as well as my good friend the gentleman from Ohio, for their work on this, and also our friends on the Committee on Ways and Means and the majority and minority staff of both committees for the work they have done.

In addition to strengthening the requirements for organizations that will be reviewing appeals, we have improved upon notices that beneficiaries receive when a service is denied, making this situation more user friendly and understandable to beneficiaries who are most often in their later years. More importantly, we have developed a process where seniors can learn whether or not a particular item and service is covered under Medicare before they are financially committed to that service, something which is not presently the case and which creates immense hardship either by denying benefits or imposing unanticipated costs on senior citizens on fixed and limited incomes.

Currently the only way a senior can find out if Medicare covers an item or a service is to potentially risk thousands of his or her dollars by getting the service and then pray Medicare will pay the claim. Obviously, this is unfair, and many seniors choose not to get a service rather than take a chance that Medicare will not cover it. This legislation fixes this, a situation which is clearly unjust. And while the provision as it stands now is limited only to physician service in order to meet scoring requirements, I hope, and I intend that in the future we will give the beneficiaries this right for all Medicare services.

□ 1730

Mr. Speaker, I urge my colleagues to support the bill. Medicare is the most socially successful and valuable program of this day. The program works for beneficiaries and providers alike, but we must ensure that it continues to be a success. The Medicare Regulatory and Contracting Reform Act will do just that.

More remains to be done, and I look forward to working with the same fine colleagues that I did to bring this about. The Medicare legislation that we have before us ensures that Medicare fee for services will continue to serve beneficiaries, and it will cause further approval and satisfaction with one of our great legislative accomplishments, Medicare.

Mr. TAUZIN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. TOOMEY), the author of this legislation, who, together with the gentlewoman from Nevada (Ms. BERKLEY), put together 240 co-sponsors.

Mr. TOOMEY. Mr. Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN) for yielding me the time and also thank the gentleman for recognizing my efforts in the area of Medicare regulatory reform and for inviting me to join in with the Committee on Energy and Commerce in developing this terrific compromise legislation.

Since my first term in Congress, I have been working on Medicare regulatory reform to help alleviate some of the burdens that the health care providers carry when dealing with Medicare's bureaucracy. We need to give health care providers due process rights so they are not treated like criminals when they make honest mistakes. We need to make billing procedures easier for providers to understand and comply with and reduce the huge volume of paperwork that staff have to contend with.

This is important so health care providers can spend more time caring for their patients and less time dealing with bureaucracy. This bill addresses these problems. It is a step in the right direction, but it is a modest step. We need to do more. For instance, we need profound Medicare reform. As long as we have a Medicare bureaucracy that enumerates, regulates, and prices every conceivable medical procedure, we will continue to have enormous costs and inefficiencies in complying with these staggering regulations. But we cannot wait until we fully overhaul Medicare to provide the significant regulatory relief of this bill.

Mr. Speaker, I thank my colleagues who made this bill possible: the gentlewoman from Nevada (Ms. BERKLEY), the gentlewoman from Connecticut (Mrs. JOHNSON), the gentleman from California (Mr. STARK), the gentleman from California (Chairman THOMAS), the gentleman from New York (Mr. RANGEL), the gentleman from Michigan (Mr. DINGELL), the gentleman from Florida (Mr. BILIRAKIS), and the gentleman from Ohio (Mr. BROWN).

I also thank some staff members, Gary Blank, formerly of my staff, Kelly Weiss, currently with my staff, and Pat Morrissey of the commerce staff, in particular.

Mr. Speaker, we take a big step forward today. I hope the same combination of the bipartisan group that worked on this bill can come back next year and do more work for health care providers and for their patients; but in the meantime, I urge my colleagues to pass H.R. 3391 and give the health care community some of the regulatory relief that they need and deserve.

Mr. BROWN of Ohio. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. GREEN).

Mr. GREEN of Texas. Mr. Speaker, I rise today in support of the Medicare Regulatory and Contracting Reform Act. The legislation makes a number of important changes to the way that Medicare does business, and it comes not a second too late.

For years we have been hearing from doctors and providers who complain that they are spending more time dealing with Medicare paperwork than they are treating patients. They express frustration where simple mistakes escalated into full-fledged investigations, where well-intentioned providers were penalized and accused of defrauding the system, and insufficient appeals process made it difficult for providers to make their case. Many are ready to stop treating Medicare patients altogether.

The Committee on Energy and Commerce passed legislation earlier this year that addresses many of these issues and would have made improvements in the Medicare system. Working with the Committee on Ways and Means, we were able to come up with a consensus bill that addressed the problem and makes the Medicare program more navigable for our Medicare providers. This legislation streamlines key Medicare processes so that providers are not trapped in a maze of confusing regulations.

It improves provider information and education so that doctors know who to call and what to do when they have trouble with a claim. The legislation also reforms the contracting system by giving the Secretary greater flexibility in selecting contractors, assigning contractor functions, and permitting competitive contracting.

There are many significant changes in the bill that will improve the Medicare system for providers and beneficiaries alike, and I support the legislation. I urge my colleagues to support this legislation.

Mr. TAUZIN. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. NORWOOD).

Mr. NORWOOD. Mr. Speaker, I rise today in strong support of H.R. 3391. I commend it to all Members of this body, and I hope every Member will vote for this bill. No doubt the outcome of this vote will be noted by the body across the way, and it is important that we vote for something that is needed so badly.

Mr. Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN) and the gentleman from Florida (Mr. BILIRAKIS) and the gentleman from Michigan (Mr. DINGELL) and the gentleman from Ohio (Mr. BROWN). And a great deal of credit and thanks should go to the Committee on Ways and Means, especially to the gentlewoman from Connecticut (Mrs. JOHNSON). On the commerce staff, I thank Pat Morrissey. He put up with a lot to get us here, and Erin Kuhls, Julie Corcoran, and

Bridgett Taylor. They worked so hard to get us to where we are today.

Many Members have mentioned the good things that are in this bill. There are a lot of good things. I particularly would like to highlight the benefit that will be made available to patients for them to actually know if Medicare will cover a benefit that is a covered benefit. That is called preauthorization or predetermination, and probably in the end there is not much more in this bill that will be more important to the quality of care for Medicare patients to actually get treated.

But I note, as the gentlewoman from Connecticut (Mrs. JOHNSON) has said, that this is a first step. I hope we will all recognize that, and I would like to have a colloquy with the gentlewoman from Connecticut (Mrs. JOHNSON) and the gentleman from Florida (Mr. BILIRAKIS); and I will ask both the question at the same time.

Although many good things have been done in this bill, this is a first step and I want to be part of working these two committees together next year and I would like to hear from both Members. Can we plan to move forward next year?

Mrs. JOHNSON of Connecticut. Mr. Speaker, will the gentleman yield?

Mr. NORWOOD. I yield to the gentleman from Connecticut.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I can guarantee the gentleman that we will work together next year. We learned a lot this year. We solved some problems that we can understand. We laid aside what we could not understand. There is lots more work to be done to make Medicare a smart and efficient program.

Mr. BILIRAKIS. Mr. Speaker, will the gentleman yield?

Mr. NORWOOD. I yield to the gentleman from Florida.

Mr. BILIRAKIS. Mr. Speaker, as the gentleman knows because he was in the room last week, I put my life on the line in terms of a question that was asked, and the gentleman from Louisiana (Chairman TAUZIN) did, too; not the chairman's life, my life, on the line.

I will not go quite that far this time around, but I feel very strongly that this is a first step. There is a tremendous amount of work to be done.

Mr. BROWN of Ohio. Mr. Speaker, I reserve the balance of my time.

Mr. TAUZIN. Mr. Speaker, I yield 1 minute to the gentleman from Iowa (Mr. GANSKE).

Mr. GANSKE. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, there is a provision that many have spoken of already that actually was something that I brought up and proved to be one of the more difficult things to work out between the two committees and that was on the predetermination of benefits.

As a physician in the earlier 1990s when I was taking care of Medicare patients, sometimes we would do a procedure where it might or might not be considered medically necessary by Medicare. All that we wanted was to know whether Medicare would cover this or not. So at that time the data could be gathered together, send in the physical exam and tests, and Medicare would give their opinion. Then they stopped doing that. I think it scared a lot of patients from not having medically necessary procedures.

Mr. Speaker, that has been worked out in this bill. I thank the members of both committees and both parties for working on this. I think this will be a big improvement for patients.

Mr. TAUZIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Speaker, I rise in support of the Medicare Regulatory and Contracting Reform Act. I would like to express my appreciation to the gentleman from Louisiana (Mr. TAUZIN), the gentleman from Florida (Mr. BILIRAKIS), the gentlewoman from Connecticut (Mrs. JOHNSON), the gentleman from Michigan (Mr. DINGELL), and the gentleman from Ohio (Mr. BROWN) for their assistance in working on the concern of dentists who often file Medicare claims even though the dental services are not covered by Medicare.

The provision in the bill seeks to help reduce the paperwork burden on dentists and expedite payment for services from appropriate sources of that payment. In addition, I am grateful that language can be worked out that will assist the medical device manufacturing community, enhancing the communications and cooperation between the Food and Drug Administration and the Centers for Medicare and Medicaid Services. This is an excellent bill, and I urge its passage.

Mr. CRANE. Mr. Speaker, I rise today in support of the Medicare Regulatory and Contracting Reform Act of 2001. This bipartisan legislation is the product of months of negotiations with the Center for Medicare and Medicaid Services (CMS), Medicare providers, beneficiaries, and the House Committees on Ways and Means and Energy and Commerce.

This legislation is a first step in ensuring that the Medicare program delivers quality care to Medicare beneficiaries. Today, the Medicare program has more than 110,000 pages of regulations governing it. This bill begins to finally address how to hold CMS accountable for its regulations and the costs they impose.

The Medicare Regulatory and Contracting Reform Act creates a more collaborative, less confrontational relationship between providers and CMS. It takes steps to decrease the amount of complex and technical paperwork that is currently required so that providers will be able to spend more time delivering care to patients rather than filling out and filing federal forms. Finally, H.R. 3391 streamlines the regu-

latory process, enhances education and technical assistance for Medicare providers.

I was also pleased to see inclusion of a provision to prohibit group health plans from requiring a Medicare claims determination for dental benefits that are specifically excluded from Medicare coverage as a condition of making a determination for coverage under the group health plan. This requirement to me does not serve any purpose other than the filing of needless paperwork and further delay payment to the dental provider. This provision ensures that dentists do not have to submit claims to the Medicare program (and thus enroll in the Medicare program) when the services they are providing are clearly those that are categorically excluded from coverage.

I urge my colleagues to join me in support of this legislation.

Mrs. CHRISTENSEN. Mr. Speaker, I rise in support of H.R. 3391, the Medicare Regulatory and Contracting Reform Act. As a physician in private practice for more than 20 years, I wholeheartedly applaud the work of the Ways and Means Committee and the Energy and Commerce Committee in moving legislation which lifts many of the burdens placed on physicians by the Medicare program and allow us to put our patients first.

Mr. Speaker, I can't tell you the number of times over the four and a half years that I have been a member of this body that I have heard horror stories from providers in my district regarding the cumbersome and burdensome Medicare billing process. They only serve to remind me of my personal experience in over 21 years of practice. Whether it is undue delays in receiving payments or repeatedly questioning information that was already provided, the current Medicare system treats physicians as suspects and requires that we spend nearly half of our time on needless paper work. It further makes hard working providers the first targets for fee reductions, repudiating their long years of training and hard work.

I applaud the authors of this legislation, Congresswoman NANCY JOHNSON and PETE STARK of the Ways and Means Committee, as well as Representatives BILIRAKIS, SHERROD BROWN, BILLY TAUZIN and my friend JOHN DINGELL for their support of doctors and the patients that they serve. Indeed, Mr. Speaker, no less than the General Accounting Office documented the statements that I can personally attest to regarding the difficulties of dealing with the Medicare program, pointing out that Medicare is a complicated program requiring endless directives and long explanations and articles which are necessary to explain facet after facet.

I urge my colleagues to support this badly needed bill which is but a first step in addressing what are myriad problems with this important health insurance program.

Mr. SHADEGG. Mr. Speaker, I rise today to support the Medicare Regulatory and Contracting Reform Act. Since I have been in Congress, I have constantly heard from hospitals and physicians about the guessing game they must play in order to be compliant with Medicare regulations. The paperwork that providers must complete both for private insurance and for Medicare is overwhelming them. Where twenty years ago, it was uncommon to

have more than one administrative person working in a physician's office, today it seems to be the norm to have multiple employees handling claims. Like a punch-drunk fighter, our nation's health care providers are dizzy from the barrage of notices, guidance, and issuances from Medicare describing ever-changing policies and regulations. Worse yet, many of these providers approach the billing process with trepidation. Fearful that they may be audited or have payments withheld, many physicians downcode so as to reduce their potential exposure even though they legitimately deserve reimbursement for a higher code. Moreover, a simple, honest mistake, providers fear, will result in harsh penalties and send them into a regulatory spiral, thus taking them away from their patients. This is one of the reasons I was a cosponsor of the Medicare Education and Regulatory Fairness Act and support the bill on the floor today. H.R. 3391 provides important reforms of the Medicare system to streamline Medicare's regulatory process, ease paperwork burdens, and improve Medicare's responsiveness to beneficiaries and health care providers.

I am particularly pleased that H.R. 3391 includes provisions aimed at improving the functioning of the Emergency Medical Treatment and Active Labor Act, better known as EMTALA. While a well-intended provision to ensure that patients coming to hospital emergency departments are not shipped from hospital to hospital or "dumped," EMTALA is now serving as an impediment to hospital emergency department access, the exact opposite of what the original legislation was intended to do. The provisions I included at the Full Committee markup include recreating the EMTALA task force, something suggested not only in the January 2001 Inspector General's report, but also in the June 2001 GAO report. Physicians and providers are crying out for clarification and guidance on how to comply with the myriad, confusing EMTALA regulations and this task force will be charged to work synergistically to make the regulations manageable. In addition, the bill on the floor today implements another suggestion from the Inspector General, mandatory peer review organization. Under current law, a peer review organization must review any EMTALA deficiency or violation involving medical treatment before a civil monetary penalty can be levied, but the same does not apply to those providers facing removal from the Medicare program. The Medicare Regulatory and Contracting Reform Act will restore equity by requiring PRO review in the Medicare conditions of participation. Last, the bill will require the Centers for Medicare and Medicaid Services to notify providers directly when an EMTALA investigation is closed.

Mr. Speaker, these are important provisions to address a complex situation—emergency department overcrowding—and I thank Chairman TAUZIN for working with me in Committee as well as members of the Ways and Means Committee as we merged the two committee bills.

Mr. UPTON. Mr. Speaker, on behalf of all of the physicians and other health professionals in my District who provide care to Medicare beneficiaries and on behalf of the beneficiaries themselves, I rise to express my strong sup-

port for H.R. 3391, the Medicare Regulatory and Contracting Reform Act of 2001. I am honored to be an original cosponsor of this bipartisan, common-sense bill that will provide much-needed regulatory relief and greater program fairness, clarity, and transparency.

From what I have been hearing for years now in my meetings with Medicare beneficiaries and health care providers across my District, the current program is simply not working well. Beneficiaries and health professionals often don't know if services will be covered, leading some beneficiaries to forgo needed care. It can take months—and mounds of paperwork—just to get paid for health care services. I've seen the inch-thick paperwork that can be required just to document one claim.

Doctors and other health professionals feel that they are practicing with a sword over their heads. The rules and regulations are so complex that the Medicare intermediaries and carriers all too often give conflicting advice and guidance. Regulations and guidance change so frequently that it is difficult to know what the rules are at any one time, and what they will be tomorrow. Making a simple mistake in coding or misunderstanding a program requirement, health professionals fear, could well open to a fraud charge. If a claim is denied, it can take several years to go through the current process for appealing that denial. Doctors are so frustrated with the program that they are retiring early, and some beneficiaries are having a hard time finding doctors willing to take them as patients once they turn 65.

The Medicare Regulatory and Contracting Reform Act will give the Centers for Medicare and Medicaid Services the direction and flexibility needed to streamline the regulatory and contracting processes. It will provide strong incentives for intermediaries and carriers to be responsive to beneficiaries and health professionals. It will provide additional resources for provider education. One provision that could be particularly helpful for both beneficiaries and providers will test the effectiveness of placing Medicare experts in local Social Security offices so that questions and concerns can be addressed in a timely, accurate way. And when disputes do arise, Administrative Law Judges specifically trained in Medicare law and regulation will hear the cases.

These are just a few of the reforms in this comprehensive, much-needed bill.

Mr. BENTSEN. Mr. Speaker, I rise today in strong support of the Medicare Regulatory and Contracting Reform Act (H.R. 3391), legislation which would reform our Medicare regulatory and contracting system. For too long, Medicare providers have encountered problems in resolving claims under the Medicare program. Today, many Medicare providers submit claims to their Medicare contractor who do not provide timely resolution for these claims. In addition, many Medicare providers face lengthy appeals which result in delayed reimbursements. This legislation would not only provide necessary regulatory relief to Medicare providers, but it would also ensure that Medicare contracts are competitively bid so that taxpayers are paying the lowest price for these services.

In order to help with better compliance by Medicare providers, this legislation would re-

quire that Medicare regulations should be promulgated only once a month. This bill requires the Department of Health and Human Services (HHS) to develop time lines for Center for Medicare and Medicaid Services (CMS) rules. As a result, Medicare providers would know when to expect changes in the Medicare system and would be able to plan for such changes. This measure prohibits regulations from being applied retroactively and requires that any substantive change in regulations from being applied retroactively and requires that any substantive change in regulations should not become effective until 30 days after the change has been announced. The bill also protects providers by ensuring that they cannot be sanctioned if they followed written guidance provided by HHS or by a contractor. Providers would also be eligible to call a new Medicare Ombudsman to assist Medicare providers with advice about Medicare regulations and rules.

To ensure that contractors are more accountable to Medicare providers, this bill encourages HHS to competitively bid contracts for Medicare claims. This new procedure would eliminate the current system where health care providers can nominate entities to become Medicare contractors. We should eliminate this conflict of interest and would ensure that taxpayers receive the best value for this program.

This bill allows providers to seek a hardship designation if they have received overpayments. Under this program, Medicare providers and suppliers could request to make repayments over a period of six months to three years if their obligation exceeds 10 percent of their annual payments from Medicare. In extreme circumstances, Medicare providers could apply for a five-year repayment schedule. Many medical small businesses which depend on Medicare for payments have requested this flexibility so that they continue to provide services to Medicare beneficiaries.

This measure also includes several provisions related to physician payment fees. Under current law, these Medicare physician fees will be reduced by 5.9 percent effective January 1, 2001. For many physicians, this significant drop in Medicare payments will impose a financial burden and may result in fewer physicians being willing to participate in this program. This bill requires the General Accounting Office (GAO) to report to Congress on the conversion factor used to calculate physician payments and to make recommendations on how to reform it within 12 months. This GAO report would also examine whether the current sustainable growth formula for physician fees should be reformed. I have been contacted by many physicians in my district who would be adversely impacted by this new fee schedule and I am committed to working to change these payments in a timely manner so that Medicare payments more accurately reflect the true cost of providing care for Medicare patients.

As the representative for the Texas Medical Center, where many Medicare providers work, I urge my colleagues to support H.R. 3391 that will reform the Medicare program.

Mr. CARDIN. Mr. Speaker, I rise today in strong support of the Medicare Regulatory and Contracting Reform Act of 2001. This bill is

the result of months of collaborative efforts between Democrats and Republicans, between the ways and means and the Energy and Commerce Committees. In other words, it was developed the way that responsible Medicare legislation should be—in a bipartisan and deliberative manner.

For too long, Congress has ignored the valid concerns of one of Medicare's most important assets—its health care providers. By easing regulatory burdens on physicians and allied health professionals, and by modifying the provider appeals process, this legislation speaks to some of the foremost concerns that have been brought to Congress by the dedicated health care professionals who participate in the Medicare program.

This bill also provides important patient protections for beneficiaries—it guarantees them access to a truly independent external review process; it improves the advance beneficiary notice (ABN) process so that seniors may know in advance of receiving care whether the services will be reimbursed by Medicare; and it establishes a Beneficiary Ombudsman to assist seniors in navigating the Medicare program.

As the Medicare+Choice program enters its fifth year, and enrollees across the country are witnessing their benefits reduced and their premiums increased, this bill contains an important beneficiary protection. It delays by one year the implementation of the enrollee "lock-in" period, which will enable many seniors to move between HMOs as efforts are made to stabilize this program.

The 1997 Balanced Budget Act imposed \$1500 caps on physical, speech-language, and occupational therapy. I have long supported replacing these caps with a rational payment mechanism. Congress has acted each year to delay these caps, which discriminate against the most frail beneficiaries. However, it is a waste of energy and resources for providers to return to Congress annually to seek a one-year moratorium on these caps. Medicare should implement a rational payment system that provides seniors with the level of care they need. We passed a law requiring the Secretary of Health and Human Services to establish a mechanism for assuring appropriate use of services and to study use of these services by last June. This bill directs the Secretary to produce these overdue reports so that Congress can enact sound reimbursement policy for outpatient therapy.

Mr. Speaker, H.R. 3391 is a shining example of how Congress can act to greatly improve the Medicare program for beneficiaries and providers. I am pleased to be an original cosponsor of this legislation and I urge my colleagues to support it this evening.

Mr. ENGLISH. Mr. Speaker, I rise in strong support of H.R. 3391, The Medicare Regulatory Reform Act of 2001. I urge my colleagues to vote in favor of this important legislation.

The Occupational Safety and Health Administration (OSHA) estimates that each year 5.6 million workers in the health care industry are exposed to blood-borne diseases because of needles. OSHA studies have shown that nurses sustain the majority of these injuries and that as many as one-third of all sharps injuries have been reported to be related to the disposal process.

In addition, the Centers for Disease Control estimates that 62 to 88 percent of sharps injuries can potentially be prevented by the use of safer medical devices. However, needlestick injuries and other sharps-related injuries, that result in occupational blood-borne pathogens exposure, continue to be an important public health concern.

H.R. 3391, The Medicare Regulatory Reform Act of 2001, includes a provision that will reduce needlestick injuries. This provision requires public hospitals, not otherwise covered by the OSHA rules, to meet the administration's standards which require employers to implement the use of safety-designed needles and sharps. The requirements will be established under Medicare statute and enforced through monetary fines similar to fines under OSHA. Violations would not cause hospitals to lose Medicare their eligibility.

I also would like to take this opportunity to thank Subcommittee Chairwoman NANCY JOHNSON for not only including this provision to reduce needlestick injuries in the Medicare regulatory reform bill, but also for her many years of hard work on this issue. She has long been a champion of requiring public hospitals to use safety-designed needles and sharps. I was pleased to join her and Mr. STARK in this important effort.

We have the technology to provide better protections for our healthcare workers. A vote in favor of this legislation ensures that hospitals are using state-of-the-art equipment while significantly reducing the risk to healthcare workers.

Mr. KLECZKA. Mr. Speaker, I am pleased that the House of Representatives is considering the Medicare Regulatory and Contractor Reform Act of 2001 (H.R. 3391) on the suspension calendar today.

This important, bipartisan legislation will address the very real and practical regulatory concerns health care providers, contractors, and beneficiaries are currently facing with the Medicare program. H.R. 3391 helps providers and beneficiaries better understand the complexities of Medicare, while at the same time protecting the Federal Claims Act and maintaining strong efforts to eliminate waste, fraud and abuse. It is my hope that this legislation will allow providers to focus their attention on patients, and not bureaucracy.

Of particular importance to me was the inclusion of language I offered during the Ways and Means Health Subcommittee markup that would establish a new Medicare Beneficiary Ombudsman. H.R. 2768, as originally introduced by the Ways and Means Committee, had included language requiring the U.S. Department of Health and Human Services (HHS) Secretary to appoint a Medicare Provider Ombudsman to provide confidential assistance to physicians and practitioners regarding complaints and grievances. I believed this point-of-contact should be extended to Medicare beneficiaries, who also have complex questions and receive conflicting guidance. I am pleased that my suggestion to create a comparable Beneficiary Ombudsman to serve as a voice for beneficiaries within the Centers of Medicare and Medicaid Services (CMS) was included. This provision should enable the Agency to better anticipate and address beneficiary needs.

Furthermore, I requested language in Title II of the Act that would eliminate the provider nomination provisions for contracting purposes. This provision effectively waives the prime contracts that the Centers of Medicare and Medicaid Services (CMS) currently has with national organizations and permits CMS to contract directly with entities during the transition period prior to the October 1, 2003 effective date without regard to competitive bidding procedures.

I would like to express my sincere appreciation to both Ways and Means Health Subcommittee Chairwoman JOHNSON and Ranking Member STARK, and their respective staffs, for being so accommodating and working together to create responsible, well-targeted regulatory legislation.

I urge my colleagues to support H.R. 3391, and I hope the Senate will work quickly to pass this legislation prior to the end of this Congressional Session.

Mr. BROWN of Ohio. Mr. Speaker, I yield back the balance of my time.

Mr. TAUZIN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CULBERSON). The question is on the motion offered by the gentlewoman from Connecticut (Mrs. JOHNSON) that the House suspend the rules and pass the bill, H.R. 3391.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. TAUZIN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

AMENDING INTERNAL REVENUE CODE TO SIMPLIFY REPORTING REQUIREMENTS

Mr. HULSHOF. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3346) to amend the Internal Revenue Code of 1986 to simplify the reporting requirements relating to higher education tuition and related expenses.

The Clerk read as follows:

H.R. 3346

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SIMPLIFICATION OF REPORTING REQUIREMENTS RELATING TO HIGHER EDUCATION TUITION AND RELATED EXPENSES.

(a) AMENDMENT RELATING TO PERSONS REQUIRED TO MAKE RETURN.—Paragraph (1) of section 6050S(a) of the Internal Revenue Code of 1986 (relating to returns relating to higher education tuition and related expenses) is amended to read as follows:

“(1) which is an eligible educational institution which enrolls any individual for any academic period;”.

(b) AMENDMENTS RELATING TO FORM AND MANNER OF RETURNS.—Subsection (b) of section 6050S of such Code is amended as follows:

(1) Paragraph (1) is amended by inserting "and" after the comma at the end.

(2) Subparagraph (A) of paragraph (2) is amended to read as follows:

"(A) the name, address, and TIN of any individual—

"(i) who is or has been enrolled at the institution and with respect to whom transactions described in subparagraph (B) are made during the calendar year, or

"(ii) with respect to whom payments described in subsection (a)(2) or (a)(3) were made or received."

(3) Paragraph (2) of section 6050S(b) of such Code is amended by striking subparagraph (B) and redesignating subparagraphs (C) and (D) as subparagraphs (B) and (C), respectively.

(4) Subparagraph (B) of section 6050S(b)(2) of such Code, as redesignated by paragraph (3), is amended to read as follows:

"(B) the—

"(i) aggregate amount of payments received or the aggregate amount billed for qualified tuition and related expenses with respect to the individual described in subparagraph (A) during the calendar year,

"(ii) aggregate amount of grants received by such individual for payment of costs of attendance that are administered and processed by the institution during such calendar year,

"(iii) amount of any adjustments to the aggregate amounts reported by the institution pursuant to clause (i) or (ii) with respect to such individual for a prior calendar year,

"(iv) aggregate amount of reimbursements or refunds (or similar amounts) paid to such individual during the calendar year by a person engaged in a trade or business described in subsection (a)(2), and

"(v) aggregate amount of interest received for the calendar year from such individual, and"

(c) CONFORMING AMENDMENTS.—Subsection (d) of section 6050S of such Code is amended—

(1) by striking "or (B)", and

(2) in paragraph (2), by striking "subparagraph (C)" and inserting "subparagraph (B)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to expenses paid or assessed after December 31, 2002 (in taxable years ending after such date), for education furnished in academic periods beginning after such date.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Missouri (Mr. HULSHOF) and the gentleman from Maryland (Mr. CARDIN) each will control 20 minutes.

The Chair recognizes the gentleman from Missouri (Mr. HULSHOF).

GENERAL LEAVE

Mr. HULSHOF. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 3346.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. HULSHOF. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, education is the great equalizer, and getting a college education remains a part of the American dream. Yet affording that education at an institution of higher learning can be

a nightmare for a prospective student or that student's family.

According to a 1997 GAO report, since the early 1980s college tuition has increased by 234 percent, which of course far outpaces the cost of living or any rise in family income. Some students balance their class work with part-time jobs, others rely on financial aid packages or scholarships. This body, Mr. Speaker, has attempted in the past to ease the financial burden. Back in 1997 Congress passed and former President Clinton signed into law the Taxpayer Relief Act of 1997. This legislation created the Hope Tax Credit as well as the Lifetime Learning Tax Credit to help families afford the cost of sending a child to college.

Since then we have built on our work. We have added to the success of the 1997 bill. We have expanded education savings account. We have made prepaid tuition plans more attractive, and we have expanded the student loan interest deduction.

When the merits of the Hope Credit and the Lifetime Learning Credit were being considered back in 1997, the potential compliance costs for colleges and universities were raised as a potential drawback. In fact, I recall and probably the gentleman from Maryland (Mr. CARDIN) may recall the particular hearing we had in front of the Committee on Ways and Means and the former Treasury Secretary was appearing before us, and I asked Mr. Rubin about the compliance cost. We had been alerted to some potential substantial administrative burdens that colleges and universities were going to have to undertake, even while implementing this worthwhile legislation. I recall the answer that Mr. Rubin gave; he felt it would be a small, insignificant cost.

□ 1745

In fact, I think he said it would be the cost of a pencil and a piece of paper. Well, as C-SPAN was covering that hearing live that day, the phone lines in our congressional office began to light up as school administrators from around the country began to call, again with this concern about this burden, this compliance cost that they would have to undertake if, in fact, we enacted the HOPE scholarship or the HOPE tax credit, as well as the lifetime learning credit and, unfortunately, their premonition has been borne out. It has been clear that our Nation's institutions of higher learning have faced significant increased administrative burdens, which brings us today.

The bill before us, H.R. 3346 that has been introduced by the gentleman from Illinois (Mr. MANZULLO), accomplishes the goal of reducing administrative burdens on schools, while retaining the integrity of the HOPE and lifetime learning credits. We accomplish this by

modifying how tuition amounts are reported and also eliminating an unneeded reporting requirement in current law that colleges and universities provide the Internal Revenue Service with the name, address, and taxpayer identification number of taxpayers who could claim students attending the school as dependents. While these changes may seem minor, I can assure my colleagues that they will greatly reduce the administrative burdens on our colleges and universities. I urge this body to be supportive of H.R. 3346.

Mr. Speaker, I reserve the balance of my time.

Mr. CARDIN. Mr. Speaker, I yield myself such time as I may consume.

First let me thank the gentleman from Missouri (Mr. HULSHOF) for bringing forward this legislation. I agree with him that this is an important bill that helps us move forward on making it easier for families to afford college education and reducing the administrative burden of tax laws. I also want to congratulate the gentleman from Illinois (Mr. MANZULLO) for bringing forward this bill. It is his legislation. I thank him for putting together a sensible bill that will reduce the costs of compliance without raising the level of potential abuse. That is what we all try to do.

First, Mr. Speaker, this bill makes it easier for families to be able to have the HOPE scholarship and lifetime learning tax credit which this body, this Congress, passed in 1997, that allows up to a \$1,500 tax credit for higher education expenses. The gentleman from Missouri (Mr. HULSHOF) is correct. Education is a very important part of the American dream. We want to make it easier for American families to afford higher education. We want all Americans who can benefit from higher education to be able to afford higher education for their children, and the HOPE scholarship and lifetime learning tax credit carries out that commitment.

Mr. Speaker, many times Congress, in well-intended legislation, causes burdens to the private sector that are not really necessary. We are well intended in what we think is necessary in order for compliance. I remember working with the gentleman from Cincinnati, Ohio (Mr. PORTMAN), on IRS reform, and one of our principal objectives was to make the Tax Code easier to understand and to make it simpler for people to comply with the laws that we passed. This bill does that. This bill makes it easier for compliance.

The first part on reporting, the current law makes it difficult for some colleges to be able to report the dollar amount that is impacted by the credit. We make it a little bit easier by allowing the college to report the amount of expenses or the amount that is paid. It is a simple change, but it allows a lot of colleges to allow their current computer program to be adequate to deal

with the reporting needs of the Federal Government, rather than requiring them to change their entire system in order to meet the needs of the tax credit. That is common sense.

The second is the reporting of the taxpayer identification number. We already have the taxpayer identification number of the student, and that is all we really need because we can match that, and the IRS has indicated they can match that, rather than requiring a reporting number of the person who claims the child, adding to the complexity again, and adding to information that is not readily available by the college and university that is reporting the information to the government.

So the changes that are made in the legislation are common sense. They make it easier for the colleges and universities to comply with reporting requirements. It does not add to the potential abuse of tax law and it makes it easier for the law that Congress passed in 1997 to be utilized by American families. It is a bipartisan bill. It is a bill that I hope every Member of this body will support.

Mr. Speaker, I reserve the balance of my time.

Mr. HULSHOF. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MANZULLO), the author and original sponsor of this legislation.

Mr. MANZULLO. Mr. Speaker, of the many Federal regulations with which colleges and universities are required to comply, one of the most onerous is that associated with the HOPE scholarship and lifetime learning tax credit. Originally enacted as part of the Taxpayer Relief Act of 1997, the tax credits were intended to give parents back more of their hard-earned money, up to \$1,500 for the first 2 years of college, so that they could better afford to send their children to school.

While we were successful in providing this tax relief for students and families, we discovered an unintended consequence: an unfunded mandate burdening colleges, trade schools, community colleges, and universities in the form of a reporting requirement administered by the IRS.

I became aware of this regulatory issue during the fall of 1997. I was discussing several concerns with Dr. La Tourette, president of Northern Illinois University. While talking about the merits of the HOPE scholarship, he dropped the bombshell on me and informed us of the new Federal requirements forcing all 6,000 institutions of higher education in this country to collect unprecedented information on their students and disseminate that information to the IRS.

I knew compliance with the reporting requirement would be expansive and expensive and would ultimately be borne by the very families that they

were trying to help with the HOPE scholarship program. Both large and small institutions have been hit hard by the reporting requirement. The cost to schools to implement and abide by these regulations will soar into the hundreds of millions of dollars. And, of course, they will be passed on to the consumers of education, which are the parents and the students.

Since my conversation with Dr. La Tourette, I have worked with members of the higher education community and with Commissioner Charles Rossotti of the IRS to simplify the reporting requirements and ease the burden of the regulations on the colleges and universities of this country. Today, I am proud to say that H.R. 3346 is the product of a partnership that evolved between the IRS, the Treasury Department, the higher education community, and myself, and this can serve as a model for how we can positively impact higher education in the future by working together.

Specifically, while H.R. 3346 maintains the reporting requirement, the bill eliminates certain elements of the law such as reporting a third party's Social Security number, and changes others, such as allowing schools to report the amount students are billed or the amount they are paid. It is my hope that the simplifications instituted as part of H.R. 3346 will make the reporting significantly easier on colleges and universities.

Early estimates from Northern Illinois University predict that as a result of the passage of this bill, this school could avoid a one-time cost of approximately \$90,000. This includes the costs of program computer systems to accommodate requirements included in the original legislation that are not included in the pending legislation, as well as what it would cost initially to implement Social Security number reporting of the taxpayer claiming the student as a dependent.

Additionally, the university would have incurred ongoing costs on an annual basis for solicitation and data entry of the student-reported information, and those costs are estimated at \$30,000 a year. The University of California's system expects to save \$1 million in the first year alone as a result of H.R. 3346. Overall, the savings the schools will attain as a result of this legislation are very significant. When we consider that most institutions of higher education would incur costs of similar proportion, the impact is particularly traumatic.

I would be remiss if I did not take a moment to heartily thank Commissioner Rossotti with whom we met on no less than three different occasions in order to fashion this legislation. I also want to thank Curt Wilson and Beverly Babers of the staff. I would like to thank Northern Illinois University, both former president Dr. La

Tourette and current president Dr. John Peters and Kathe Shineham from the school for their insights and efforts as we have worked to craft this legislation. This bill is a memorial to Dr. Ruth Mercedes-Smith, former president of Highland Community College, who was killed in a car accident several months ago. Her support for our work was invaluable. Also, Dr. Chapdelaine of Rock Valley Community College and Dr. LaVista of McHenry Community College, and the National Association of Colleges and Universities Business Offices. All of these groups worked tirelessly together in order to craft the legislation. It took us 4 years to do it. During that period of time, the IRS worked with us, they withheld the implementation of these regulations because they knew that the goal was worthy. Lastly, I want to thank Sarah Giddens of our staff who, for 4 years, tirelessly worked on this legislation, dogging it dot by dot, i by i, in the hundreds of meetings, literally, that she had and the hours that she poured into this piece of legislation.

Mr. Speaker, it is a great piece of legislation. Instead of spending money on regulatory compliance, the schools can spend that money doing what they do best, and that is educating the kids.

Mr. CARDIN. Mr. Speaker, it is my pleasure to yield 5 minutes to the gentlewoman from Florida (Mrs. THURMAN), a distinguished member of the Committee on Ways and Means.

Mrs. THURMAN. Mr. Speaker, I thank the gentleman for yielding me this time, who may have to watch my university play in the Orange Bowl. We were just discussing that over here. But I want to say to the gentleman from Illinois (Mr. MANZULLO) how welcome this piece of legislation is. I do not know if my colleagues are reading what is happening in Florida right now, but the legislature is in a special session specifically for the purpose of cutting their budgets. The headline news in Florida is that the State universities were hit with cuts in excess of \$100 million, while community colleges must deal with \$33 million.

As the gentleman from Missouri (Mr. HULSHOF) has said, one of the things that makes our country great is the ability for us to have an educated population. What we did in 1997 in providing the \$1,500 tax credit for the HOPE scholarship and the lifetime learning tax credits I was hoping would not be taken away from by the administrative nightmares that they might be facing, as my colleagues can imagine, also based on the numbers that we heard of the increased tuition. I do not know where those monies are going to come from when they cut them, but certainly we did not want them to have to be raised in tuition. With the gentleman's help, we are going to be able to see this \$1,500 and the bureaucracy cut

so that our universities and our community colleges are not going to have to be hiring new staff and setting up new computer programs, so this might help them in looking at their overall budgets if we get this passed and through over in the Senate.

□ 1800

I just want to say that, in conclusion, because of the work and the people that the gentleman has recognized, this is a work that the higher education community has asked for. They have asked for the greater flexibility in reporting information to the IRS about the education tax credits. I believe that H.R. 3346 provides that requested flexibility through the simplification of the Tax Code.

I might just say, for all of us who serve on the Committee on Ways and Means, that it is always a pleasure for us to be able to come to the floor and talk about the idea that we are simplifying, and not adding to, the tax codes in this country.

I think it is something that the American people want us to be doing, have suggested that we do; and as we can see, as we work in a bipartisan manner, in fact we can provide not only the dream for our students and to help our universities, but we can also help the taxpayers of this country. So we thank the gentleman for his leadership.

Mr. HULSHOF. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have a few concluding remarks.

First, I want to amplify a point that my friend, the gentleman from Maryland (Mr. CARDIN), made regarding the situation regarding the computer systems.

The point is that as educational institutions begin to raise some concerns that these new reporting requirements would require their schools to completely revamp their computer systems at a substantial cost, these institutions noted that complying with the law's requirement to report tuition payments received would be difficult, and that because schools keep a running total of the payments that they receive from students, in other words, payments are not applied separately to tuition, but instead are applied to a student's total outstanding balance that may include room and board, books, student fees for recreational activities, or other costs, and, moreover, payments are not applied to any particular academic year. As a result, these institutions would have had to change their accounting and computer systems dramatically to make them compatible with reporting requirements. We have undertaken, instead, a change in those reporting requirements so those colleges and universities will not have to undertake that substantial cost.

As a final comment, I would just advise my colleagues that in the 1999 calendar year, the Hope scholarship credit was claimed by 3,334,000 students; the lifetime learning tax credit was claimed for 3,575,000 college students.

Clearly, the work we have done here in Congress back in 1997 has taken a large step forward as far as making higher education more affordable. I think we are taking an additional step forward for the administrators of these colleges and universities by reducing their burden.

Mr. CARDIN. Madam Speaker, I yield myself the balance of my time.

Madam Speaker, let me just concur with my friend, the gentleman from Missouri (Mr. HULSHOF).

Also, I would like to compliment the Internal Revenue Service. We do not often say that. But they have worked with us to implement, as the gentleman from Illinois (Mr. MANZULLO) has pointed out, this part of the code in a taxpayer-friendly way. If we look at the 1098-T form and 8863 form, I think we will find both of those forms are easy for the taxpayer to use.

They worked with us to modify the law in regard to the unnecessary burden upon the institutions of higher education. As a result, we have had, I think, the right spirit in simplifying the Tax Code to carry out the purposes of Congress.

This legislation is important legislation, and I urge my colleagues to support it.

Mr. HULSHOF. Madam Speaker, I urge adoption of H.R. 3346, and I yield back the balance of my time.

Mr. CARDIN. Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentleman from Illinois (Mr. MANZULLO) that the House suspend the rules and pass the bill, H.R. 3346.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GERALD B.H. SOLOMON SARATOGA NATIONAL CEMETERY

Mr. SMITH of New Jersey. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 3392) to name the national cemetery in Saratoga, New York, as the Gerald B.H. Solomon Saratoga National Cemetery, and for other purposes.

The Clerk read as follows:

H.R. 3392

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds the following:

(1) Gerald Brooks Hunt "Jerry" Solomon of Glens Falls, New York, served in the

House of Representatives for 10 terms, from January 3, 1979, to January 3, 1999, and during that service gained a reputation for being outspoken and tenacious in presenting his views on a wide range of issues.

(2) Congressman Solomon was born in Okeechobee, Florida, and grew up there during the Great Depression before moving to New York in 1945.

(3) Congressman Solomon enlisted in the United States Marine Corps at the onset of the Korean War and served in the Marine Corps for 8½ years on active and reserve duty.

(4) Before being elected to Congress in 1978, Congressman Solomon was a businessman in Glens Falls, New York.

(5) During his 20-year congressional career, Congressman Solomon served as the ranking Republican on the Committee on Veterans' Affairs, where he was recognized by the veterans community as one of its strongest advocates. Among his other accomplishments for veterans, Congressman Solomon spearheaded the effort to create the Cabinet-level Department of Veterans Affairs and successfully led a 15-year drive to establish the Saratoga National Cemetery in Saratoga, New York, where he is now interred.

(6) Congressman Solomon was also recognized for his efforts to promote pride, patriotism, and volunteerism, and when the Supreme Court ruled that laws prohibiting the burning of the United States flag were unconstitutional, Congressman Solomon was given the assignment to pass a constitutional amendment to prohibit desecration of the flag. The Solomon Amendment passed overwhelmingly in the House, but failed by one vote in the Senate.

(7) As chairman of the Committee on Rules of the House of Representatives, Congressman Solomon revamped the rules under which the House operates, abolishing proxy voting, opening all meetings to the media and the public, and making Congress subject to the same laws that the American people live under.

(8) During his congressional career, Congressman Solomon was the recipient of dozens of major awards from many national veterans organizations, including the coveted "Iron Mike Award", presented to him by the Marine Corps and Marine Corps League, and the Distinguished Citizen Award, presented to him by the National Congressional Medal of Honor Society for his legislative successes on behalf of the United States military and veterans issues.

SEC. 2. NAME OF THE NATIONAL CEMETERY IN SARATOGA, NEW YORK.

(a) NAME.—The national cemetery located in Saratoga, New York, shall after the date of the enactment of this Act be known and designated as the "Gerald B.H. Solomon Saratoga National Cemetery". Any reference to such national cemetery in any law, regulation, map, document, record, or other paper of the United States shall be considered to be a reference to the Gerald B.H. Solomon Saratoga National Cemetery.

(b) MEMORIAL.—The Secretary of Veterans Affairs shall provide for the placement in the national cemetery referred to in subsection (a) of a suitable memorial to honor the memory of Gerald B.H. Solomon and his service to the United States.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. SMITH) and the gentleman from Illinois (Mr. EVANS) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in very strong support of H.R. 3392, a bill to name the National Cemetery in Saratoga, New York, after Gerald B.H. Solomon, who we all knew and loved as Jerry. This is a fitting honor and memorial to our former colleague, the distinguished chairman of the Committee on Rules.

I want to commend and thank the gentleman from Illinois (Speaker HASTERT) for introducing this important bill. I know how highly the Speaker thought of Jerry Solomon and valued his service to the House of Representatives. So it is a tribute in itself that the gentleman from Illinois (Mr. HASTERT), who, as Speaker, does not normally introduce legislation, has taken this very extraordinary step. I am grateful to have been afforded the opportunity to be an original cosponsor of H.R. 3392.

In addition to naming the cemetery for Jerry Solomon, this bill will also authorize the Secretary of Veterans Affairs to place a suitable memorial in the cemetery to honor his memory.

It is highly fitting that our distinguished colleague was laid to rest in the Saratoga National Cemetery because the cemetery itself owes its existence to Jerry Solomon. He worked tirelessly for this cemetery for 15 years to overcome obstacle after obstacle to its establishment. He promoted it in his town meetings, he pushed for timely completion of the environmental impact studies, he worked with members of the Committee on Appropriations to ensure that the money was appropriated for it, and overcame official indifference in the executive branch.

His unwavering determination, no matter how difficult an objective, manifested itself time and time again. I think it probably had much to do with his service in the U.S. Marine Corps; but also it reflected the kind of man that he was: he was tenacious, he was tough, and he was fair.

He enlisted, as I think many of my colleagues know, in the Marine Corps at the beginning of the Korean War and served for 8½ years on active duty and in the reserve. He is one of the few who was good enough to be a Marine; and of the many awards he received during his public service, among his most cherished were the Iron Mike Award from the Marine Corps League, and the Distinguished Citizen Award from the National Congressional Medal of Honor Society.

All of us, Madam Speaker, learned from the example of Jerry Solomon. I recall so well when he was the ranking Republican member of the Committee on Veterans' Affairs, again, he always put veterans first. He was always fighting to ensure that there was an adequate veterans budget, particularly in the area of health care. He believed

that the VA was one of those commitments that, once we make it, that they had first dibs for every dollar that we would spend.

He was also one of the prime leaders in making sure that we had a cabinet level for the VA, so when it came to allocating scarce resources, that they would be there, the Secretary of Veterans Affairs would be there at the table fighting and fighting hard for veterans' benefits and for veterans' health care.

More recently, following his retirement after 20 years in Congress, President George Bush recognized Jerry Solomon's leadership and wisdom by appointing him to co-chair the Presidential Task Force to Improve Health Care Delivery for our Nation's Veterans.

Like everything else, he launched himself into this new endeavor with enthusiasm and commitment and actively served on that issue and on that commission until his final illness.

Madam Speaker, I had the honor of serving many years in the House with Jerry Solomon and in every case found him to be one of the most outspoken, straightforward, tenacious, and patriotic Members of Congress that this body has ever produced. He was a great man; and we honor him in a very modest way, much more could be done for this great man, by naming this important cemetery in his honor.

Madam Speaker, I reserve the balance of my time.

Mr. EVANS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in remembrance of our distinguished colleague, Jerry Solomon, and in strong support of renaming the Saratoga New York National Cemetery as the Gerald B.H. Solomon Saratoga National Cemetery. It is a well-deserved honor for an outstanding public servant.

I want to thank the Speaker of the House, the gentleman from Illinois (Mr. HASTERT), and the chairman of the Committee on Veterans' Affairs, the gentleman from New Jersey (Mr. SMITH), for bringing this bill to the floor today. I also want to recognize my colleague, the gentleman from New York (Mr. McNULTY), for introducing a similar bill in the 105th Congress. I am sure he will be pleased by the bill, and I look forward to his remarks.

Throughout his 20-year term in this Chamber, Jerry Solomon demonstrated an unyielding commitment to the men and women who risked their lives for the safety and welfare of this Nation. As a strong advocate of America's military veterans, I appreciate his efforts over the years to improve their benefits and health care through substantive and proactive legislation.

Jerry grew up in New York State and attended Siena College and St. Lawrence University before serving in the United States Marine Corps from 1951

to 1952, and I very much appreciate the chairman's remarks about his affiliation with the Marine Corps. I had some disagreements with the gentleman from New York, and we never took it out in the committee room. So he was a gentleman, and he worked hard to leave a great impression on the people that he met on a day-to-day basis.

Earlier this year, the President appointed Jerry to lead the President's Task Force to Improve Health Care Delivery for our Nation's Veterans.

As an original cosponsor of this measure, I can think of nothing more appropriate than to rename this cemetery. Jerry was interested in this cemetery, which was in large part due to his 15-year personal commitment to establish this cemetery.

It was a privilege to work with Jerry Solomon on the Committee on Veterans' Affairs and on committee issues. I am proud that I am able to join my colleagues in offering this measure in tribute to a great American, Jerry Solomon.

Madam Speaker, I reserve the balance of my time.

Mr. SMITH of New Jersey. Madam Speaker, I yield 3 minutes to the distinguished gentleman from New York (Mr. GILMAN), the distinguished dean of the New York delegation and chairman emeritus of the Committee on International Relations.

Mr. GILMAN. Madam Speaker, I thank the gentleman for yielding time to me.

Madam Speaker, I want to thank our Speaker, the gentleman from Illinois (Mr. HASTERT), for introducing this legislation designating the Saratoga National Cemetery after our good friend and former colleague, Jerry Solomon, and the distinguished chairman of the Committee on Veterans' Affairs, the gentleman from New Jersey (Mr. SMITH), and the ranking minority member, the gentleman from Illinois (Mr. EVANS), for pursuing this measure and bringing it to the floor at this time.

H.R. 3392 is a fitting tribute to Mr. Solomon. It was due to his efforts on behalf of our veterans that the veterans cemetery at Saratoga was created and that the administration was granted cabinet-level status. As a Marine veteran, it is appropriate that we honor Jerry in this manner. Jerry fully knew the sacrifices our men and women in the Armed Forces face each and every day in defending our Nation from aggressors.

Madam Speaker, throughout the House, in the Senate, in New York State, around our Nation, overseas, many of us were deeply saddened last month to learn of the loss of our former colleague and good friend, Jerry Solomon. In New York State's capitol in Albany, Jerry was an assemblyman noted for his energy, determination,

and commitment. It was, therefore, no surprise to those of us who knew him when he subsequently brought those same dedicated traits to bear as a member of this body.

Jerry came to the House of Representatives in January of 1979, serving here for 2 decades diligently, meritoriously representing the constituents of the 22nd district in upstate New York. When Jerry came to the floor of this House, he was always ready to stand up vociferously for what he believed, especially when it came to our Nation's defense and our Nation's veterans.

Last month, upon learning of the passing of our former colleague, President Bush said that "Jerry Solomon was a true patriot who will always be remembered as true to his creed, duty, honor, and country." The President's words remind us that as our military goes into battle against those who perpetrated the atrocities of the barbaric September 11 attack, our troops are relying on advanced weapons systems and technologies that Jerry Solomon fought so hard to obtain for them.

Congressman Solomon was proud to be labeled a hawk on defense, always arguing that our Nation had to be fully prepared and strong for the new challenges in the post-Cold War world. Today we fully recognize the wisdom of his policy as we pay tribute to this great American by honoring both him and all our veterans by designating the Veterans' Cemetery at Saratoga Springs as the Gerald B.H. Solomon Saratoga National Cemetery.

Accordingly, in honoring our good colleague, Jerry Solomon, I urge our colleagues to fully support this legislation. *Semper fi*, Jerry.

Mr. EVANS. Madam Speaker, I reserve the balance of my time.

Mr. SMITH of New Jersey. Madam Speaker, I yield 3 minutes to the distinguished gentleman from New York (Mr. SWEENEY).

□ 1815

Mr. SWEENEY. Madam Speaker, I thank the gentleman for yielding me time.

Madam Speaker, as the one who succeeded Jerry Solomon in Congress, I am proud today to stand and speak on behalf of this important piece of legislation.

As it has been pointed out, Jerry Solomon served in this body for over 20 years since 1978. He has many friends in this House and I count myself among them. I doubt there is one among us who did not respect him. He was an American's American, a Marine's Marine, a veteran's veteran.

Devoted to his wife, Freda, his 5 children, and his 6 grandchildren, Jerry Solomon became a great statesman, but always remained a loving husband, father and grandfather.

He was a man who called them as he saw them, Madam Speaker. Over his

career he led the way on veterans' issues, culminating in the establishment of a Cabinet post for veterans' affairs.

He led the way in fighting to cure an amendment to our Constitution to protect our flag.

He brought a national cemetery to Saratoga, New York, which happens to be my home county as well, where he himself has been laid to rest. Thanks to this legislation, it will now bear his name.

It is the right thing, an honorable gesture by this body to remember a patriot and his work.

In his final years in this House, Jerry Solomon served as chairman of the Committee on Rules. That achievement speaks volumes about the man, the leader, and the legislator.

What I learned about Congressman Solomon many among us know. If he cared enough to tell someone something, they had better listen.

Madam Speaker, Jerry Solomon has left us, but neither he nor his achievements will ever be forgotten. It is with great pleasure that I support this legislation to rename the Saratoga National Cemetery to the Gerald B.H. Solomon Saratoga National Cemetery.

Mr. EVANS. Madam Speaker, I yield such time as he may consume to the gentleman from New York (Mr. McNULTY).

Mr. McNULTY. Madam Speaker, I thank my colleague for yielding me time.

Madam Speaker, as he pointed out earlier, this is not the first time a bill has been introduced to accomplish this purpose. On August 3, 1998, I introduced H.R. 4385 to name the Saratoga National Cemetery in honor of my friend and late colleague, Jerry Solomon.

We quickly rounded up 88 cosponsors to that bill, very enthusiastically supporting it. We were moving forward with the bill and then some very small-minded people, bureaucrats in the Department of Veterans Affairs, raised an objection. Their objection, Madam Speaker, was simply this: Something like this has never been done before.

Imagine the kind of world we would live in if we all had that attitude. We cannot do it because it was never done before. I said, well, it ought to be done now.

The next day Jerry Solomon called me over to his side of the aisle, and we sat in that seat right over there, and he asked me to withdraw my bill. Jerry Solomon and I were a team for 10 years, and he was always the one that was a little bit more, let us say, excitable. But on that day I was the one who was agitated, and I said, Jerry, I want to fight this. And he very calmly said to me, very characteristically because of his love for veterans, I do not want any controversy associated with that cemetery, and if one person in the bureaucracy objects, I want you to withdraw the bill.

I acceded to the request of my friend and colleague. But today I thank the gentleman from Illinois (Mr. HASTERT). I thank the Speaker of the House for using the power and influence of his office to do the right thing and to name this cemetery for this soldier and patriot.

I am just so happy that Jerry lived to see the day when Communism fell apart in Eastern Europe; to see Lech Walesa and the Solidarity movement succeed; to see the downfall of Eric Honneker and Egon Krenz; to see the people out there tearing down the Berlin Wall piece by piece; to subsequently see the dismantling of the Soviet Union, devolving into 15 individual democratic republics; to see the people of Armenia, one of those former republics, standing up in September of 1991 and voting 98 percent for independence and shouting the next day, "Ketse azat ankakh hayastan," long live free and independent Armenia; and then pointing to the United States of America as their example of what they wanted to be as a democracy.

Yes, we live in the freest and most open democracy on the face of the Earth, but Jerry Solomon understood that freedom is not free. We have paid a tremendous price for it. And he did not let a day go by without remembering with gratitude all of those who made the supreme sacrifice and all of those who served, put their lives on the line, came back home, rendered outstanding service to our country—veterans of our country—and raised beautiful families to carry on in their fine traditions.

That was Jerry Solomon, and he spent 15 years of his life to make sure that that cemetery came to Saratoga. And I can say without any fear of anybody positing anything to the contrary, that cemetery would not be in Saratoga if it were not for Jerry Solomon. That is just a fact.

So today I ask my colleagues to support this bill, to support the Speaker, and to pay tribute to the memory of Jerry Solomon and, in doing that, to say thank you to Freda and Jerry's children and, yes, to all veterans.

Mr. SMITH of New Jersey. Madam Speaker, I yield myself 10 seconds to thank my good friend and colleague, the gentleman from New York (Mr. McNULTY) for his powerful statement on behalf of Jerry Solomon and for introducing, as he pointed out, a resolution earlier that would have named this important asset, this cemetery, in honor of Jerry Solomon. And customary and just so characteristic of Jerry, he wanted to be self-effacing and did not want any fuss being made about him. It does not surprise me that he approached the gentleman and said, hey, do not push it. That is just so typical of Jerry Solomon.

I want to thank the gentleman for his leadership. I think that epitomizes

the best of bipartisanship. That this is what it is all about. We care for each other. The gentleman cared for Jerry, and he showed it while he was alive in trying to get this cemetery named in his honor. I want to congratulate and thank the gentleman for that.

Madam Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Madam Speaker, I would also like to thank the gentleman from New York (Mr. McNULTY) because I do not have the words to follow the articulation.

Each of us individually have our own memories of our dear friend, Jerry Solomon. And I compliment the gentleman for his statement.

I rise and encourage all Members to support H.R. 3392. It is fitting that a national veterans' cemetery in Saratoga, New York be named after our colleague, Jerry Solomon. It honors not just the person but the contributions to our country.

I know Marines are proud of their military service but it is much more. It is the cohesion of the brotherhood that only combat Marines understand and it survives beyond the distant battlefield. It becomes a way of life, led by the attributes of honor, integrity, courage, and commitment. Jerry Solomon emulated these virtues and values during his life and left a distinct impression upon our country, his constituents, friends and family.

I am quite sure the comrades who he lies with are equally proud to have their remains rest in perpetuity in a national veterans' cemetery that bears the name of Jerry Solomon. We miss you, Jerry.

Mr. EVANS. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SMITH of New Jersey. Madam Speaker, I yield such time as he may consume to the gentleman from California (Mr. DREIER), the distinguished chairman of the Committee on Rules.

Mr. DREIER. Madam Speaker, I rise in strong support of this resolution and, as has been said by many of my colleagues, we all have our memories of Jerry Solomon. I have to stand here and say that I miss him. I miss the fact that we are no longer able to talk regularly on the phone. I miss his service here in this institution.

I believe that this is an appropriate action that we can take here because of his extraordinary service not only here in the Congress, but his service as a proud Marine.

My late father and Jerry became good friends. My father was a drill instructor in the United States Marine Corps and my father regularly encouraged Jerry to crack the whip on me. And Jerry followed my father's direction extremely well.

On more than a few occasions I was taken to the woodshed by Jerry Sol-

omon. I was encouraged to step outside, and I will say that it was good for me. And while at the time I may have been a little miffed with some of the things that Jerry said, as are many experiences in life, it was a great growing experience for me.

I appreciate the leadership that Jerry Solomon showed in so many areas. He was a Korean War hero veteran, and there was no one in this institution who fought harder for, as the gentleman from New York (Mr. McNULTY) said, the demise of the Soviet Union than Jerry Solomon.

I had the opportunity to travel with him throughout the world. We traveled in the Mideast. We traveled to Asia. He took me on my first trip to Vietnam on February 14 1986. I remember being there on Valentine's Day. We traveled numerous times to Central America.

I thought a lot about Jerry as we just saw a few weeks ago the successful election of a democratic, small "d," leader in Nicaragua, because we all know through the 1980s we had this amazing struggle providing assistance to the democratic resistance in Nicaragua so that we could encourage the kind of freedom and political pluralism and recognition of human rights and encouragement of the rule of law that Jerry had fought for through his entire life.

So to be able to name the Saratoga National Cemetery the Gerald B.H. Solomon Saratoga National Cemetery is a very fitting tribute.

Madam Speaker, I would like to thank the Speaker of the House, the gentleman from Illinois (Mr. HASTERT) for moving this resolution forward and the gentleman from New Jersey (Mr. SMITH) and the distinguished ranking member, the gentleman from Illinois (Mr. EVANS) for moving this as expeditiously as they have. And I want to say once again to Mr. Solomon and his wonderful family, to the members of his family, that our thoughts and prayers continue to be with all of them during this very difficult and challenging time.

Mr. SMITH of New Jersey. Madam Speaker, I yield myself such time as I may consume.

I want to thank the distinguished chairman of the Committee on Rules for his very eloquent remarks. We all have very fond memories. I know my first trip to Vietnam along with the gentleman from New York (Mr. GILMAN) on behalf of POWs was in 1984.

Mr. Solomon was again tenacious in trying to ensure that there was an absolutely thorough accounting and that any live sightings be followed up as aggressively as possible to ensure that nobody was left behind.

Mrs. KELLY. Madam Speaker, I rise in support of this measure honoring my friend and colleague Jerry Solomon.

As the rest of my colleagues, I was deeply saddened by his passing in October. Jerry

Solomon was my friend. His gruff exterior belied the thoughtful and kind man's interior.

Jerry fought for his Nation, his family, and his district like the admirable Marine he was. If the Hudson Valley had a need, Jerry was there to help, either with legislation of his own or by supporting legislation of those of us representing the Hudson Valley.

To meet Jerry was to fall under this great driving strength and to be offered an invitation to join him in whatever battle he was engaged in, and the Saratoga National Cemetery was a battle he fought for and won.

He was a great man, and we remember and honor him with this action today.

Mr. HASTERT. Madam Speaker, I rise today in support of this legislation which would name the national cemetery in Saratoga, NY, the "Gerald B.H. Solomon Saratoga National Cemetery." This is a fitting tribute for my friend and our former colleague.

I would like to thank Chairman SMITH, my colleague from Illinois Mr. EVANS, and the Veterans Affairs Committee for allowing this important legislation to move so quickly. As the sponsor of this legislation, I would also like to thank the numerous cosponsors, especially Mr. GILMAN and all the members of the New York Congressional Delegation.

I had the honor and privilege of serving with Jerry Solomon during many of his 20 years of service in the House. We all remember Jerry as someone who fought for what he believed in. He was your most tenacious advocate when he was on your side and a "pit bull" of an opponent when he wasn't. He was truly a man of principle, and you always knew where he stood.

Before being elected to Congress in 1978, Jerry Solomon had an impressive career of public service. He was, among other things, a U.S. Marine, successful businessman, volunteer fireman, scoutmaster, and a member of numerous organizations such as the National Rifle Association, the American Legion, Marine Corps League, Disabled American Veterans, and the Korean War Veterans Association.

When Jerry was elected to Congress, he took on several important issues. For starters, Jerry Solomon spent many years devoted to ending the scourge of drugs, where I had the opportunity to work closely with him. In this capacity, he successfully championed many pieces of legislation requiring random drug testing and penalizing users and sellers of illegal drugs. He was a strong believer that illegal drug use is one of the most pressing issues facing our Nation's youth and fought it wherever and whenever he could.

In addition, when Republicans took control of the House, Jerry Solomon served as the Rules Committee chairman, where he presided over sweeping reforms in the way the House operates. Among other things, his committee abolished proxy voting, opened all meetings to the media and the public, and made Congress subject to the same laws that the American people live under. These were important reforms that fundamentally changed the way this House conducts its business.

In addition to this important work, Jerry served as ranking member on the Veterans Affairs Committee, where, as a veteran of the Korean war, he understood firsthand the importance of meeting the needs of our military

veterans to the fullest extent possible. In this capacity, Jerry made sure that veterans were heard and represented when he sponsored the bill that created a cabinet level Department of Veterans Affairs. And, of course, he made certain that we remembered our country's military veterans when he fought for 15 years to see that the Saratoga National Cemetery was established.

I urge my colleagues to support this important legislation. This country cannot and should not forget the efforts of those like Jerry Solomon who by word and deed made this country a better place.

Mr. SMITH of New Jersey. Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentleman from New Jersey (Mr. SMITH) that the House suspend the rules and pass the bill, H.R. 3392.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SMITH of New Jersey. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 3392.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

□ 1830

EXPRESSING SENSE OF HOUSE OF REPRESENTATIVES THAT VETERANS DAY CONTINUE TO BE OBSERVED ON NOVEMBER 11

Mrs. MORELLA. Madam Speaker, I move to suspend the rules and agree to the resolution (H. Res. 298) expressing the sense of the House of Representatives that Veterans Day should continue to be observed on November 11 and separate from any other Federal holiday or day for Federal elections or national observances.

The Clerk read as follows:

Whereas the veterans of the Armed Forces are owed a tremendous debt of gratitude for their service and bravery;

Whereas veterans play important roles in communities throughout the United States;

Whereas maintaining Veterans Day as a legal public holiday separate from all other Federal holidays and days for elections or national observances is the least that a grateful Nation should do in recognition of its veterans; and

Whereas November 11 is a solemn commemoration of the contributions of those who have served and defended the Nation, especially those who gave their lives securing the freedoms enjoyed by all citizens of the United States: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that Veterans Day should

continue to be observed on November 11 and separate from any other Federal holiday or day for Federal elections or national observances.

The SPEAKER pro tempore (Mrs. BIGGERT). Pursuant to the rule, the gentlewoman from Maryland (Mrs. MORELLA) and the gentleman from Illinois (Mr. DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from Maryland (Mrs. MORELLA).

GENERAL LEAVE

Mrs. MORELLA. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H. Res. 298.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

Mrs. MORELLA. Madam Speaker, I yield myself such time as I may consume.

I rise in strong support of House Resolution 298. The message of this resolution is simple and straightforward. It is the sense of the House of Representatives that Veterans Day should be observed on November 11. It should be observed separate from any other Federal holiday, election day, or any other national observance.

Madam Speaker, Veterans Day is the one day on which America honors all of those who have served in our Armed Forces. Its roots trace back to Armistice Day, which established November 11 as the day to honor veterans of World War I; but in 1954, after World War II and the Korean War, the name of the holiday was changed to Veterans Day.

For a brief period, from 1968 to 1975, Veterans Day was not observed on November 11. By law it was observed on a Monday in order to provide Federal employees with 3-day weekends, but in 1975 President Ford signed legislation to return the observance of Veterans Day on November 11, where it remains to this day.

President Ford's action supported the expressed will of the overwhelming majority of State legislatures, veterans service organizations and the American people. Yet today, there are those who would alter this distinct opportunity to honor our veterans by merging Veterans Day with other public activities such as election day.

This would be wrong, Madam Speaker. Since our Nation's founding, some 48 million men and women have stepped forward to defend our way of life. There are more than 25 million living veterans who have served in peace and war. More than a million died in service to America; and more than a million and a half have been wounded, and some very seriously.

As we debate this resolution today, America's servicemen and women are fighting in Afghanistan to defend us

and our way of life from the terrorists who attacked us on September 11. As President Bush said in his Veterans Day proclamation this year: "Our Nation will always be grateful for the noble sacrifices made by these veterans. We can never adequately repay them, but we can honor and respect them for their service."

It would be a shame and a travesty, Madam Speaker, to allow the special meaning of Veterans Day to be submerged amid a welter of campaign activities. Election campaigns focus on issues that divide us. That is how our democratic system works. We engage in a great national debate over a variety of serious issues. Campaign ads flood television and radio. Campaign activities dominate the news, and then the American people vote and determine who will represent them.

This is a great process, Madam Speaker; but we would lose something very special if it were combined with Veterans Day. We would lose the opportunity to pause and honor our veterans as a Nation united in gratitude for their service. Maintaining Veterans Day as a legal public holiday, separate from all other Federal holidays, is the least that a grateful Nation should do.

I want to congratulate and thank the gentleman from Nebraska (Mr. TERRY) for introducing this legislation; and, Madam Speaker, I urge all Members to support this important resolution.

Madam Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, as we just listened to the debate and tributes being paid to Representative Solomon, I think that gives us one of the reasons why this bill is so important; and so I rise in strong support for H. Res. 298, a bill expressing the sense of the House of Representatives that Veterans Day should be observed on November 11 and separate from any other holiday or day for Federal elections or national observances.

Madam Speaker, in 1921 an unknown World War I American soldier was buried in Arlington National Cemetery. This site, on a hillside overlooking the Potomac River and the city of Washington, became the focal point of reverence for American veterans.

On Sunday November 23, 1921, Miriam Felt, then 23 years old, wrote a letter to her family describing the events in Washington, DC., during the time of that first burial, now known as the Tomb of the Unknown Soldier, in Arlington National Cemetery.

Miriam wrote: "Well, this last week has been quite an event in history, and I certainly do wish you all could have been in Washington. It certainly is something I shall never forget. Somehow, you can talk about it and think about it, but the realization of the

whole thing struck me so much more by seeing it all, and it was so impressive. Of course, Washington is alive with foreigners of all sorts, and I am turning around all the time to see something else for fear that I will miss something.

"Thursday night after work, Gertie and I went up to the Capitol to see the body in state there. We went up about six o'clock, thinking the crowd would not be so large. But at that time, the line four breast extended over two blocks, and by the time we had reached the Capitol steps and could look back at the crowd, it extended up on one side of the park, down another side, then the third side of it and on beyond the Capitol Building where we could see no farther, so I don't know how much longer it was. It was perfectly beautifully managed, and there was no crowding, and everyone, strangely enough, acted as though they really were there to pay respect to the memory which that body was to represent to the country."

As a postscript, Miriam Felt wrote: "Give my love to Grandpa. Sorry he isn't feeling up to par. Tell him to be a good boy. Tell him too that some of his old 'cronies' marched to Arlington Friday and they looked mighty fine, I'll tell you, and I thought a lot about what he did for his country."

November 11 is a time for us to reflect on what the men and women of the United States military have and continue to do for the country. The feeling of pride and patriotism expressed in Miriam Felt's letter should be felt by all of us. No longer can we take the freedoms that we enjoy today for granted, and no longer can we take the men and women who fought for those freedoms for granted.

Yes, Madam Speaker, I encourage that we hold aside this day for this purpose only and for no other purpose, except to honor and pay tribute to the men and women of this country who have given and continue to give the last measure of devotion that one might have so that we can continue to enjoy the freedoms that we so rightly deserve.

Madam Speaker, I reserve the balance of my time.

Mrs. MORELLA. Madam Speaker, I yield 4 minutes to the gentleman from Nebraska (Mr. TERRY), who is a prime sponsor of the legislation.

Mr. TERRY. Madam Speaker, certainly as Americans, especially now, we owe the men and women who served our country in times of war a tremendous debt of gratitude. Simply put, we cannot do enough to thank them for their contributions to our great Nation. We cannot do enough to honor them for their dedication to the principles of freedom and liberty which our families enjoy.

To that end, we set aside one day each year, November 11, to recognize

the contributions of American war veterans to this great Nation. We keep one day to be mindful of their sacrifices and the sacrifice of their families. Veterans Day is for them, and now the sanctity of that day is in jeopardy.

Just to tell my colleagues a story, last Veterans Day, just a few weeks ago, I attended several ceremonies; and one of the speakers got up at the ceremony in our memorial park in Omaha, Nebraska, and said to the attendees, If Congress has their way, this will be the last time we meet.

He went on to say that combining Veterans Day with election day is a little bit like combining Christmas and Halloween. I do not necessarily agree with his analogy, but the point was well taken.

Whenever I would attend the VFW groups, American Legion clubs at home, this issue was always brought up about protecting the sanctity of the one day a year that we put aside to thank these folks; but somehow some folks here in Washington have been sidetracked. There was an election commission that perhaps one of their recommendations was combining Veterans Day with election day to increase voter turnout. Some people up here on Capitol Hill endorsed that idea. It was a balloon that was floated, and somehow then that became what Congress was going to do to these folks who sacrificed their time and their lives for America.

Today, we have the opportunity then to take something that has just grown way out of proportion and set the record straight, that we in this body wish to see a day of reflection for our veterans who triumphed, who sacrificed; that we will pay tribute to them on that one day a year that we have set aside, the 11th day of the 11th month of each year.

I do not, Madam Speaker, nor do the proud veterans and the proud Americans of the second district, wish to see this date moved or blended in with some other holiday or event. The fact is that Veterans Day holds a patriotic duty for Americans to recognize the commitment of American veterans to duty, honor, freedom and liberty.

Election day is a day of civic obligation, dedicated to separate purposes, and combining this day with others would simply be to disrespect what they have done for us.

I urge my colleagues to vote yes on this resolution.

Mr. DAVIS of Illinois. Madam Speaker, I yield such time as she may consume to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Madam Speaker, I thank the distinguished gentleman from Illinois (Mr. DAVIS) for yielding me the time, and I thank the distinguished gentlewoman from Maryland (Mrs. MORELLA), as well the sponsor of this legislation; and I rise enthusiastically to support this legislation.

I come from a family of veterans, particularly having served in World War II; and every Veterans Day I look forward to embracing and celebrating with my community, with Houston and Houstonians, the veterans that have offered themselves for service so that I might live in freedom.

It is true that veterans everywhere deserve our honor and appreciation. They deserve the parades and the accolades. Now more than ever, as we live in the shadow of September 11 and realize that we collectively must fight terrorism, Veterans Day must be promoted and celebrated because even today we have young men and women going forth to protect our rights.

I have legislation, H.R. 934, which specifically indicates that the possibility of an election day holiday should not be on Veterans Day, and I rise enthusiastically to confirm the importance of voting, but likewise to ensure that no election holiday would take Veterans Day and that we would work to ensure that the sacrifice of our veterans is singularly honored on November 11 every year and that as we fight to ensure that there is opportunity for access to the voting booth that we can do that side by side.

Just this past weekend, Houston, Texas, experienced a very tough election; and that election was that of our city leader, Mayor Lee P. Brown. Many of us are well aware of his leadership in Washington. We base the success of his victory on simply encouraging people to express their viewpoint in getting out to vote.

□ 1845

That is all we want to do, to ensure that the improprieties and the injustices that eliminated people's rights to vote are corrected. We can do that side by side as we protect the veterans' holiday of November 11. So I also ask my colleagues to consider 934. H.R. 934 protects Veterans Day, November 11, as a singular holiday, and it promotes the idea of an election holiday separate and apart from November 11.

I am very gratified for the sponsor of this legislation, and I rise in enthusiastic support of this legislation. I believe that the causes and the purposes of H. Res. 298 are those that this body can collectively support as we pay tribute to our veterans yesterday, today and tomorrow, and then that we also acknowledge the privilege of voting and ensuring that people have the right to vote, and a special day to vote separate, but a day apart from any day we would honor our veterans.

To our veterans I say: You are, in fact, our first responders of freedom and justice and equality.

Mrs. MORELLA. Madam Speaker, I am pleased to yield 3 minutes to the gentleman from New Jersey (Mr.

FRELINGHUYSEN), who has sponsored such legislation.

Mr. FRELINGHUYSEN. Madam Speaker, I thank the gentlewoman for yielding me this time, and I rise today, along with my colleague, the gentleman from Nebraska (Mr. TERRY), to offer House Resolution 298, a resolution expressing the sense of this body that Veterans Day should be observed as a separate, distinct national holiday, and I thank the gentleman from Nebraska for all of his work in the interest of so many Members.

Madam Speaker, after the turmoil of last year's national election, President Bush rightly called for the creation of a National Commission on Federal Election Reform, chaired by two of his esteemed predecessors, President Ford and President Carter. Under their able leadership, this commission studied the lessons of that election and formulated a 13-point plan for reform. While they raised many valid points, I respectfully disagree with their third recommendation: that this Congress enact legislation to combine Election Day with Veterans Day.

As we know in this House, held on the 11th day of the 11th month, a date which marks the armistice which ended the Great War of 1918, Veterans Day began as a day to honor those who fought for freedom with the allies in Europe during World War I. It was later expanded after America's participation in World War II to include those veterans. But it was not until after the Korean War in 1954 that November 11 became a day set aside to honor all those who have worn our Nation's uniform and who have fought and died to preserve the ideals and values we hold most dear.

Now, as a way to increase voter participation and enable more public spaces to be used as polling sites, this commission and others have seized upon the idea of merging Election Day with Veterans Day. This idea is well intentioned but dead wrong. As a New Jersey resident and former national commander of the Veterans of Foreign Wars, Bob Wallace, wrote to me in September, "We believe that any suggestion or consideration of Veterans Day serving as Election Day would significantly diminish Congress' original intent to honor the men and women who served in the Armed Forces." As a fellow veteran, I agree.

Bob also said, and I quote, "The historical significance of Veterans Day should remain just that, a day to solemnly honor America's veterans for their patriotism and willingness to sacrifice all for freedom." It could not be said better. This is the reason we have sponsored this legislation, and I urge the Members of this House to support it.

Mr. DAVIS of Illinois. Madam Speaker, I continue to reserve the balance of my time.

Mrs. MORELLA. Madam Speaker, I yield 2 minutes to the gentleman from New York (Mr. GILMAN).

Mr. GILMAN. Madam Speaker, I thank the gentlewoman for yielding me this time, and I rise in strong support of this legislation expressing the sense of the House that Veterans Day should be observed on November 11 and be separate from any other Federal holiday. I urge my colleagues to lend their strong support to this bill.

I thank the gentlewoman from Maryland (Mrs. MORELLA) for her leadership in bringing the measure to the floor at this time, as well as the ranking minority member, the gentlewoman from the District of Columbia (Ms. NORTON), for her work. I also commend the sponsors, the gentleman from Nebraska (Mr. TERRY) and the gentleman from New Jersey (Mr. FRELINGHUYSEN), for their work on this legislation.

In recent years, there have been a number of proposals to merge Veterans Day with Election Day as one Federal holiday in order to encourage the maximum number of voters to go to the polls. While I support increasing voter participation in elections, I believe that proposals along those lines would be an insult and disrespectful to the contributions and service performed by our Nation's veterans.

For many years, we have had a unique, separate holiday for those who gave the ultimate sacrifice in the service of their Nation during our Nation's many military conflicts. It is only fitting that we continue to have a separate holiday for the living who served their country in military service.

Madam Speaker, those who want to encourage election reform by establishing a new Federal holiday can be heard on that subject. However, the service of our veterans should not be diminished in any manner by having Veterans Day share its honor with another Federal holiday observance. November 11, the day honoring our veterans of our Armed Forces, should remain solely a day to honor their contributions and their loyalty to our Nation.

Accordingly, I urge my colleagues to join in supporting this timely and appropriate measure.

Mr. DAVIS of Illinois. Madam Speaker, I continue to reserve the balance of my time.

Mrs. MORELLA. Madam Speaker, I am pleased to yield 3 minutes to the gentleman from New Jersey (Mr. SMITH), who chairs the Committee on Veterans' Affairs.

Mr. SMITH of New Jersey. Madam Speaker, I rise today in very strong support of this resolution, H. Res. 298, calling for Veterans Day to remain a distinct Federal holiday observed every year on November 11.

Eighty-three years ago, in a forest northeast of Paris, an armistice was signed that ended the fighting in World

War I commencing on the 11th hour of the 11th day of the 11th month of 1918. The war to end all wars was over. It had been won through the selfless service and sacrifice of tens of thousands of American men and women, joining together with millions of our British, French, and other allies.

To commemorate this historic event, the following year, President Woodrow Wilson, who I would note parenthetically was a former New Jersey Governor, issued a proclamation declaring November 11 Armistice Day, saying that, and I quote, "The reflections of Armistice Day will be filled with solemn pride in the heroism of those who died in the country's service and with the gratitude for the victory." Following World War II, Armistice Day was renamed Veterans Day to honor all those men and women who served a grateful Nation.

Madam Speaker, as chairman of the House Committee on Veterans' Affairs, I am unalterably opposed to any proposal that would alter or in any way diminish Veterans Day. In particular, I stand in opposition to the recommendation of the National Commission on Federal Election Reform that Federal elections be held concurrently with Veterans Day.

While I, like every other Member of this House, want citizens to fully exercise their franchise and to vote, I do not believe diluting Veterans Day is a way to achieve that end. Such a change would defeat the purpose of reserving a day in the year to honor all men and women, living and deceased, who have risked their lives to defend our Nation.

Veterans Day, especially when it is coupled with Memorial Day, the day we honor our war dead and those who have died who served honorably, are 2 days, and it is the least we can do, I would say, Madam Speaker. And, again, to diminish it would be wrong.

In 1987, Madam Speaker, Congress made a similar mistake when legislation was approved to change the national Veterans Day observance from November 11 to the fourth Monday in October to create a 3-day weekend for Federal employees. This misguided policy was quickly abandoned following a national outcry from millions of Americans, veterans and nonveterans alike.

Madam Speaker, Veterans Day is more than just a holiday. It is a continuing history lesson for all Americans. It is a reminder that freedom is not free; that our liberties, which are endowed by our Creator, must be defended against all who would remove them.

This is a very good resolution and I urge strong support for it.

Mrs. MORELLA. Madam Speaker, I am pleased to yield 2 minutes to the gentleman from Florida (Mr. JEFF MILLER), one of our newest Members of this august body.

Mr. JEFF MILLER of Florida. Madam Speaker, I thank the gentlewoman for yielding me this time, and I rise today in support of H.R. 298.

In respect and recognition of the contributions our servicemen and women have made to the cause of peace and freedom around this world, the laws of the United States make November 11 a Federal holiday in honor of every American who has served this country. While we always appreciate the men and women of the military, it is altogether fitting that we set a time aside to do so publicly. Veterans Day was established for this reason, and November 11 should be set aside for this reason alone.

Throughout the course of American history, nearly 48 million men and women have stepped forward to defend our land, our people, and our principles. Today, there are more than 25 million living veterans who served our Nation, many of them willingly entering harm's way to preserve, protect, and defend our freedom. The strength of the United States is a direct result of their courageous, patriotic, and dedicated service for which we can never fully thank them.

Because of their service to the United States in the cause of freedom and liberty, we are citizens of the greatest Nation in the history of the world. I thank our veterans for their dedicated service to our country, and I also thank their families for sharing their loved ones throughout the years. The excellence of our veterans is a model for men and women everywhere who are asked to defend our country. At this moment, men and women of the Army, the Navy, the Air Force, Marines, and Coast Guard are serving around the world, and they could have no better example to follow or tradition to live up to.

I urge my colleagues to vote in favor of this resolution and to retain this fitting honor for all of our veterans.

Mrs. MORELLA. Madam Speaker, I yield myself the balance of my time.

The 3 million members of the American Legion and the 100,000 members of the Noncommissioned Officers Association support this resolution. It is also supported by the 370,000 members of the Retired Officers Association, the 1 million members of the Disabled American Veterans, the 2 million members of the Veterans of Foreign Wars, the members of the Vietnam Veterans Association, the members of the Retired Enlisted Association, and the members of AMVETS.

I do again want to thank the gentleman from Nebraska (Mr. TERRY) and the gentleman from New Jersey (Mr. FRELINGHUYSEN) for introducing this resolution, as well as the gentleman from Indiana (Mr. BURTON), who chairs the Committee on Government Reform, as well as the gentleman from California (Mr. WAXMAN), the ranking

member, for having this resolution come to the floor so promptly.

I urge all Members to stand with our Nation's veterans and their organizations in support of House Resolution 298.

Ms. JACKSON-LEE of Texas. Thank you, Madam Speaker and Congressman TERRY, for this important resolution which expresses the sense of the House that Veterans Day should continue to be observed on November 11.

Under current law, November 11 of each year is designated as Veterans Day, a federal holiday honoring veterans of the U.S. Armed Forces. This important tradition began in honor of November 11, 1918—the 11th hour of the 11th day of the 11th month in which Americans began laying down their arms. In 1921, this day marked the burial of an unknown World War I American soldier who was buried in Arlington National Cemetery. Historically, similar ceremonies occurred in England and France where an unknown soldier was buried in each nation's highest place of honor. These memorial gestures all took place on November 11.

Armistice Day officially received its name in America in 1926 through a Congressional resolution (44 Stat. 1982). In 1938 it became a national holiday by an Act (52 Stat. 351; 5 U.S. Code, Sec. 87a) as "a day to be dedicated to the cause of world peace and to be hereafter celebrated and known as 'Armistice Day.'" Initially, set aside to honor veterans of World War I, in 1954, after World War II, the 83rd Congress amended the Act of 1938 by striking out the word "Armistice" and inserting the word "Veterans" in order to honor American veterans of all wars.

Just this past Veterans Day, I honored America's veterans and those who gave their lives for America's freedom and democracy at the Veterans Memorial National Cemetery in Houston, Texas. There, I expressed our gratitude to the men and women who have given themselves to national service. Their sacrifice, particularly in light of the September 11 attacks and the ongoing war on terror, reminds us that we cannot take our freedoms and democracy for granted. This important day should be preserved and honored at all costs.

I am a product of America's veterans and have several members of my own family who were veterans of World War II. For them and for all the veterans of this great Nation, I oppose any holiday or Election Day on Veterans Day. That's why, on March 7, 2001 I introduced H.R. 934 which ensures that Election Day never interferes with Veterans Day.

It is because of the sacrifices made by our veterans for freedom, the flag, and the American people that we are today able to vote, and that I was able to introduce this legislation which provides a greatly needed federal Election Day. It establishes Presidential Election Day on the Tuesday next after the first Monday in November in 2004 and each fourth year thereafter, as a legal public holiday.

This resolution before us today, H. Res. 298 expresses the sense of the House that Veterans Day should continue to be observed on November 11, as under current law, and separate from any other federal holiday. This is an important message, needed to express to our Nation's veterans and those across this great

Nation that we will forever remember and honor those who have served in our Armed Forces.

I strongly urge my colleagues to support it. Mrs. CHRISTENSEN. Madam Speaker, November 11th is Veterans Day period.

On behalf of the veterans of the U.S. Virgin Islands, who have fought in every one of this country's wars from the Revolutionary War forward, I support H. Res. 298, and commend our colleagues for introducing this resolution expressing the sense of the House, that this day would forever be set aside as the day we honor those who have so nobly served this country and all of us. That is as those from my district would have it.

What a small concession from the country to those who have sacrificed and been willing to fight unto death—willing to make the ultimate sacrifice. But it is of great importance and significance to them.

November 11th is Veterans Day, period. Let's not fix what ain't broke.

Mrs. KELLY. Madam Speaker, I want to rise in support of this measure which reminds us of the importance of honoring our nation's veterans.

In light of our current circumstances, with American soldiers now on hostile ground, we ought to be especially mindful of our efforts to acknowledge and honor those who have served our country.

While I understand that some may see this annual day of honor also as a day of convenience, an already-established holiday that can be used for other purposes, I believe that any effort to place any other designations on this day is unacceptable. These are our veterans. These are the men and women who have put the well-being of their country ahead of their own. It is not asking too much to have one day a year dedicated solely to their efforts.

Our veterans deserve it.

Mrs. MINK of Hawaii. Madam Speaker, I rise today in support of House Resolution 298, expressing the sense of the House that Veterans Day should be observed on November 11th and separate from any other federal holiday.

Veterans Day originated in 1920 and was originally named Armistice Day to mark the end of World War I on the 11th month, the 11th day, and the 11th hour of 1918. In 1954 Congress broadened the holiday by renaming it Veterans Day to honor American veterans of all wars.

In Presidential Proclamation 3071, President Dwight D. Eisenhower called on the nation to set aside Veterans Day to "solemnly remember the sacrifices of all those who fought so valiantly, on the seas, in the air, and on foreign shores, to preserve our heritage of freedom." He challenged the nation to "reconsecrate ourselves to the task of promoting an enduring peace so that their efforts shall not have been in vain."

On Veterans Day we meet that challenge and honor the 405,399 Americans that lost their lives in World War II, the 58,198 that lost their lives in Vietnam, and thousands of others that lost their lives in all other conflicts. Despite the need to protect the purposes of Veterans Day, the National Commission on Federal Election Reform recommended that Congress enact legislation to conduct federal elections on Veterans Day. We must not diminish

the importance of Veterans Day by sharing Veterans Day with any other even which distract our attention from the veterans who have served this country.

Veterans Day is a sacred day to honor veterans for their patriotism, love of country and willingness to make sacrifice for our nation.

I urge my colleagues to vote for House Resolution 298 and maintain the integrity of the day set aside to focus the nation's attention on the important sacrifices made by Veterans.

Mr. EVANS. Madam Speaker, I rise in strong support of House Resolution 298 and urge all of my colleagues to support this important measure. Mr. Speaker the purpose of House Resolution 298 is simple, but it is as profound as it is simple.

House Resolution 298 expresses the sense of the House of Representatives that Veterans Day should continue to be observed on November 11. In addition, Veterans Day should be observed separate and apart from any other Federal holiday or day for Federal elections or national observances. Our nation has a long-standing tradition of honoring our veterans on November 11. As many know, the observance of Veterans Day on November 11 has historic significance. On the 11th hour of the 11th day of the 11th month, the guns used to wage World War I were officially silenced. This day, Armistice Day, became known as Veterans Day as our nation recognized the sacrifice and service of all our Nation's veterans.

Veterans Day should be preserved and continue to be the day our nation pauses to recognize all veterans. Let us retain November 11 as Veterans Day and honor all those who have served our nation in uniform.

Mrs. MORELLA. Madam Speaker, I yield back the balance of my time.

Mr. DAVIS of Illinois. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentlewoman from Maryland (Mrs. MORELLA) that the House suspend the rules and agree to the resolution, H. Res. 298.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. TERRY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

CRIMINAL JUSTICE COORDINATING COUNCIL RESTRUCTURING ACT OF 2001

Mrs. MORELLA. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 2305) to require certain Federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to

serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2305

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Criminal Justice Coordinating Council Restructuring Act of 2001".

SEC. 2. AUTHORIZING FEDERAL OFFICIALS ADMINISTERING CRIMINAL JUSTICE SYSTEM OF DISTRICT OF COLUMBIA TO PARTICIPATE IN CRIMINAL JUSTICE COORDINATING COUNCIL.

(a) IN GENERAL.—Each of the individuals described in subsection (b) is authorized to serve on the District of Columbia Criminal Justice Coordinating Council, participate in the Council's activities, and take such other actions as may be necessary to carry out the individual's duties as a member of the Council.

(b) INDIVIDUALS DESCRIBED.—The individuals described in this subsection are as follows:

(1) The Director of the Court Services and Offender Supervision Agency for the District of Columbia.

(2) The Director of the District of Columbia Pretrial Services Agency.

(3) The United States Attorney for the District of Columbia.

(4) The Director of the Bureau of Prisons.

(5) The chair of the United States Parole Commission.

(6) The Director of the United States Marshals Service.

SEC. 3. ANNUAL REPORTING REQUIREMENT FOR CRIMINAL JUSTICE COORDINATING COUNCIL.

Not later than 60 days after the end of each calendar year, the District of Columbia Criminal Justice Coordinating Council shall prepare and submit to the President, Congress, and each of the entities of the District of Columbia government and Federal government whose representatives serve on the Council a report describing the activities carried out by the Council during the year.

SEC. 4. FEDERAL CONTRIBUTION FOR COORDINATING COUNCIL.

There are authorized to be appropriated for fiscal year 2002 and each succeeding fiscal year such sums as may be necessary for a Federal contribution to the District of Columbia to cover the costs incurred by the District of Columbia Criminal Justice Coordinating Council.

SEC. 5. DISTRICT OF COLUMBIA CRIMINAL JUSTICE COORDINATING COUNCIL DEFINED.

In this Act, the "District of Columbia Criminal Justice Coordinating Council" means the entity established by the Council of the District of Columbia under the Criminal Justice Coordinating Council for the District of Columbia Establishment Act of 2001.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Maryland (Mrs. MORELLA) and the gentleman from Illinois (Mr. DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from Maryland (Mrs. MORELLA).

GENERAL LEAVE

Mrs. MORELLA. Madam Speaker, I ask unanimous consent that all Mem-

bers may have 5 legislative days within which to revise and extend their remarks on the legislation under consideration, H.R. 2305.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

□ 1900

Mrs. MORELLA. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, H.R. 2305, as amended, formally establishes the Criminal Justice Coordinating Council, a joint Federal-local effort designed to foster cooperation among the various agencies that have law enforcement responsibility in our Nation's capital. I introduced this measure in June of this year, was joined by the gentlewoman from the District of Columbia (Ms. NORTON) as the original cosponsor of H.R. 2305. The bill was amended in subcommittee, and that is the version that we are now considering.

The amended bill authorizes the heads of six Federal agencies, the Court Services and Offender Supervision Agency for the District of Columbia, the District of Columbia Pretrial Services Agency, the U.S. Attorney for the District, the Bureau of Prisons, and the U.S. Parole Commission, as well as the U.S. Marshal Service, to meet regularly with District law enforcement officials. It also requires the CJCC to submit an annual report detailing its activities to the President, Congress and the appropriate Federal and local agencies.

The District of Columbia Financial Responsibility and Management Assistance Authority, known as the Control Board, originally established the CJCC 3 years ago through a memorandum of agreement. Cooperation between Federal and local law enforcement agencies has become even more critical in recent years because the Federal Government has assumed the responsibility of the District of Columbia courts and corrections functions under the 1997 Revitalization Act.

The CJCC is important because it brings the leaders of all participating agencies to the same table. They will work at getting rid of the interagency obstacles that are hindering attainment of the District of Columbia's criminal justice objectives. There are more than 30 law enforcement agencies with a presence in the Nation's Capital. There are 13 governmental agencies that have a direct role in the criminal justice activities in the District from arrest and booking to trial and correctional supervision. Four of these are city agencies such as the Metropolitan Police Department, six are Federal agencies such as the Office of the U.S. Attorney for the District of Columbia. And, finally, there are three agencies, Superior Court, Defender Services, and

Office of the Corrections Trustee that are local in nature but are funded by the Federal Government.

There is plenty of evidence, including recent reports from the GAO and the Council for Court Excellence, that shows that these individual agencies of the District of Columbia's criminal justice system are not always working in concert; and as a result, efforts at reform have sometimes stalled.

Some prime examples of the lack of coordination have been in the area of police overtime. According to the General Accounting Office the Metropolitan Police Department continues to lose millions of dollars each year because officers are waiting for court appearances or to consult with the U.S. Attorney's Office. The agencies use 70 different information technology systems that are not linked to one another. And most tragically, miscommunication among agencies have led to mistakes in correctional supervision, sometimes with fatal consequences. For instance, the killing of Bettina Pruckmayr, who was robbed and stabbed 38 times in 1995 by a convicted murderer who should have had his parole revoked on a drug charge but for the failures of the criminal justice system. This shows a terrible waste of human and monetary resources which I hope will be corrected by the CJCC.

With proper funding and structure, I believe the Criminal Justice Coordinating Council can be a very useful tool in fostering interagency cooperation. Not only can it assist in making day-to-day operations of the various criminal justice agencies more efficient, but in doing so the CJCC can help ensure that broader policy goals such as reducing violent crime and meting out justice more swiftly are also accomplished.

The language of H.R. 2305, as amended, reflects the input received from the Department of Justice. I thank the Department for its suggestions.

I recognize the gentlewoman from the District of Columbia (Ms. NORTON) for her support of this legislation; and I would particularly like to thank the chairman of the Committee on Government Reform, the gentleman from Indiana (Mr. BURTON), for his interest in issues affecting the District of Columbia and his help in bringing this important legislation affecting our Nation's capital expeditiously to the floor. I also thank the gentleman from California (Mr. WAXMAN) of the full committee. I urge all Members to support H.R. 2305.

Madam Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in strong support of H.R. 2305, the Criminal Justice Coordinating Council Restructuring Act of 2001, a bill to strengthen the

District of Columbia's Criminal Justice Coordinating Council by ensuring Federal participation and funds.

I also thank the Chair of the D.C. subcommittee, the gentlewoman from Maryland (Mrs. MORELLA), for working closely with the ranking member, the gentlewoman from the District of Columbia (Ms. NORTON), to develop this measure.

In 1998, the District of Columbia's financial authority created the D.C. Criminal Justice Coordinating Council. The goal of the CJCC was to coordinate criminal justice activities between the various Federal and D.C. agencies that have responsibility for different aspects of the criminal justice system in the District of Columbia. This coordination is essential because following the passage of the District of Columbia Revitalization and Self-Government Improvement Act in 1997, most of the District's criminal justice entities were either Federal agencies or D.C. agencies funded by the Federal Government.

Currently, there are 13 agencies with responsibility for some aspect of D.C.'s criminal justice system. All of these agencies are members of the CJCC, in addition to the Mayor's office and the Council of the District of Columbia. The goal of the CJCC is to provide a forum to identify and resolve coordination issues that arise in the District of Columbia's criminal justice system and to help implement critical justice reforms.

The Criminal Justice Coordinating Council Restructuring Act meets the legitimate concerns by District actors and the CJCC not to become a super agency while at the same time ensuring that supremacy clauses and federalism notions are respected. Specifically, the bill recognizes the Criminal Justice Coordinating Council as the appropriate entity set up by District legislation, the Criminal Justice Coordinating Council for the District of Columbia Establishment Act of 2001 to coordinate criminal justice activities in the District.

In addition, the bill requires that Federal agencies with a role in criminal justice matters in the District, including Court Services and Offender Supervision, Pretrial Services Agency, Office of the U.S. Attorney, the Bureau of Prisons and the United States Patrol Commission, serve on the CJCC, participate in its activities, and take such action as may be necessary to fulfill their duties on the CJCC.

However, in keeping with the mandates, no District official can compel a Federal official to take any action. The bill also authorizes Federal funds to carry out the duties of the CJCC. This measure will strengthen and enhance the CJCC as a vital coordination entity for the District's multi-jurisdictional criminal justice system.

Madam Speaker, I again thank the gentlewoman from Maryland (Mrs.

MORELLA) for her work in bringing this important legislation to the floor. I urge its passage.

Madam Speaker, I include for the RECORD the statement of the gentlewoman from the District of Columbia (Ms. NORTON).

Ms. NORTON. Madam Speaker, I rise in strong support of H.R. 2305, the Criminal Justice Coordinating Council Restructuring Act of 2001, a bill to strengthen the District of Columbia Criminal Justice Coordinating Council by ensuring federal participation and funds. I want to thank the Chair of the D.C. Subcommittee, Representative CONNIE MORELLA, for working closely with me to develop this measure.

In 1998, the District of Columbia Financial Authority (control board) created the D.C. Criminal Justice Coordinating Council (CJCC). The goal of the CJCC was to coordinate criminal justice activities between the various federal and D.C. agencies that have responsibility for different aspects of the criminal justice system in D.C. This coordination is essential because following the passage of the District of Columbia Revitalization and Self Government Improvement Act (Revitalization Act) in 1997, most of the District's criminal justice entities are either federal agencies, or D.C. agencies funded by the federal government. In the Revitalization Act, the District exchanged its traditional static federal payment for the federal funding of several functions normally funded by states. These functions included such criminal justice matters as prisons, offender supervision, public defender service, and courts.

Currently, there are 13 agencies with responsibilities for some aspect of D.C.'s criminal justice system. These agencies can be broken down into three categories: (1) D.C. agencies that are D.C. funded: the Metropolitan Police Department, Office of the Corporation Counsel, Department of Corrections, and Office of the Chief Medical Examiner; (2) federal agencies that are federally funded: the Office of the U.S. Attorney, the Bureau of Prisons, the U.S. Marshals Service, the U.S. Parole Commission, Court Services and Offender Supervision Agency, D.C. Pretrial Services Agency; and (3) D.C. agencies that are federally funded: the Superior Court, the Public Defender Service and the Office of the Corrections Trustee.

All of these agencies are members of the CJCC in addition to the Mayor's Office and the Council of the District of Columbia. The goal of the CJCC is to provide a forum to identify and resolve coordination issues that arise in the D.C. criminal justice system and to help implement criminal justice reforms.

The Fiscal Year 2000 District of Columbia Appropriations Act mandated that the General Accounting Office (GAO) perform a study to examine the effectiveness of coordination among the various entities charged with the operation of the District's criminal justice system. GAO released its report, entitled D.C. Criminal Justice System: Better Coordination Needed Among Participating Agencies in March 2001.

On May 11, 2001, the D.C. Subcommittee held an oversight hearing to examine the coordination of criminal justice activities in the District of Columbia and the GAO report.

GAO found that the CJCC is the "primary venue in which D.C. criminal justice agencies can identify and address interagency coordination issues." The CJCC has worked on many such issues, including positive identification of arrestees, halfway house operations, and drug treatment of defendants. GAO praised the CJCC for its work on coordination projects where all participants stood to gain, such as data sharing and technology issues among agencies. However, GAO found that the CJCC was less successful on projects where one agency stood to gain at the expense of another, because the CJCC operates by the consent of the members and does not contain an enforcement mechanism.

GAO cited numerous projects where poor coordination led to inefficient operations and poor program performance. One example discussed at length in GAO report is case processing. In the District of Columbia, as many as six agencies are responsible for processing a case before a court appearance on a felony charge can occur. Unlike many jurisdictions, the U.S. Attorney's office requires officers to meet with prosecutors personally before they determine whether to charge an arrestee with a felony or misdemeanor. GAO found that during 1999, the equivalent of 23 full time officers were devoted to these appearances, reducing the number of officers on patrol.

GAO cautioned that although the CJCC had been funded by the D.C. control board, the board did not include funding for the CJCC in the District's Fiscal Year 2001 budget. The last remaining staff person, working almost exclusively on technology issues, was funded by a grant. GAO recommended that "Congress . . . consider funding CJCC—with its own director and staff—to help coordinate the D.C. criminal justice system, and to require CJCC to report annually to Congress, the Attorney General, and the D.C. Mayor."

In addition, GAO found that as of November 2000, the CJCC and other agencies reported "93 initiatives for improving the operation of the [D.C. criminal justice] system." Although GAO stipulated that many of these coordination projects are ongoing and therefore cannot yet be fully evaluated, it found that of the 93 current projects there were 62 instances where participating agencies did not agree on the initiative's goals (11 instances), status (10 instances), starting date (1 instance), participating agencies (22 instances), or results to date (18 instances).

Several of the CJCC members disputed these findings, explaining that GAO did not examine closely enough the actual work performed on these projects and merely relied on summaries provided by the participants that may have appeared inconsistent. However, GAO found that "this lack of agreement underscores a lack of coordination among the participating agencies that could reduce the effectiveness of these initiatives." GAO therefore recommended that Congress require all D.C. criminal justice agencies to report multi-agency activities to the CJCC, which would serve as a "clearinghouse" for these initiatives.

Although members of the CJCC agree that coordination among the various agencies that have responsibility for the District's criminal justice system needs to be improved, several members disagreed with GAO's recommenda-

tion for a congressionally created and funded entity to oversee coordination and reform initiatives.

For example, Deputy Mayor Margaret Nedelkoff Kellems, formerly the Executive Director of the CJCC, wrote in response to the GAO report, "It has been my experience [however] that to the extent that reforms have taken root in the District through the CJCC, it has been not only because of coordination resources, but equally because the member agencies have felt ownership over the body. As reporting to the new entity you describe becomes a requirement, criminal justice agencies might perceive it to be threatening and respond on a perfunctory basis. Nevertheless, I concur in your basic premise that there must be a coordinating organization and it must have dedicated resources."

Similarly, Superior Court Chief Judge Rufus King wrote, "it is important that any successor [to the CJCC] not become a 'superagency' which dictates to the different criminal justice agencies what the agenda should be or how problems which involve more than one agency should be approached . . . The most important thing to preserve in any newly constituted council is that it remain a council of independent agencies who are able to recognize their responsibilities to different funding authorities."

Finally, former U.S. Attorney Wilma Lewis offered the following criticism of GAO's recommendation: "I have some concern about your proposal that Congress 'consider requiring that all D.C. criminal justice initiatives that could potentially involve more than one agency be coordinated through the new independent entity' . . . I question whether such review is necessary for all initiatives that could potentially involve more than one agency. Given the interrelatedness of agencies in our system, it is difficult to think of any initiative—no matter how limited in scope or application—that would not fit that definition and require review by that entity. As such, I am concerned that such a requirement would be counterproductive, as it would hamstring each agency's ability to implement policies and practices within its appropriate sphere of activity."

The Criminal Justice Coordinating Council Restructuring Act meets these concerns of District actors while at the same time ensuring that supremacy clause and federalism notions are respected. Specifically, the bill recognizes the Criminal Justice Coordinating Council (CJCC) as the appropriate entity set up by District legislation (the Criminal Justice Coordinating Council for the District of Columbia Establishment Act of 2001) to coordinate criminal justice activities in the District. In addition, the bill requires that federal agencies with a role in criminal justice matters in the District, including Court Services and Offender Supervision (CSOSA), Pretrial Services Agency, Office of the U.S. Attorney, the Bureau of Prisons, and the United States Parole Commission, serve on the CJCC, to participate in its activities and take such action as may be necessary to fulfill their duties on the CJCC. However, no District official can compel a federal official to take any action. The bill also authorizes federal funds to carry out the duties of the CJCC.

This measure will strengthen and enhance the CJCC as a vital coordination entity for the District's multi-jurisdictional criminal justice system. I once again thank Chairwoman MORELLA for her leadership in bringing this important legislation to the floor. I urge its passage.

Mr. DAVIS of Illinois. Madam Speaker, I yield back the balance of my time.

Mrs. MORELLA. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I commend the gentlewoman from the District of Columbia (Ms. NORTON) for joining with me in this important act, and I thank the gentleman from Illinois (Mr. DAVIS) for being a floor manager and for being so supportive of this legislation. I urge this body to endorse this bill by its vote.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentlewoman from Maryland (Mrs. MORELLA) that the House suspend the rules and pass the bill, H.R. 2305, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to authorize certain Federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes."

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will now put the question on three motions to suspend the rules on which further proceedings were postponed earlier today. The remaining questions postponed earlier today will be taken tomorrow.

Votes will be taken in the following order:

H.R. 3323, by the yeas and nays;

H.R. 3391, by the yeas and nays;

S. 494, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

ADMINISTRATIVE SIMPLIFICATION COMPLIANCE ACT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 3323, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from Louisiana (Mr. TAUZIN) that the House suspend the rules and pass the bill, H.R. 3323, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 410, nays 0, not voting 23, as follows:

□ 1935

Mr. PAUL changed his vote from “nay” to “yea”.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. BRADY of Texas. Mr. Speaker, on roll-call No. 466, I was inadvertently detained. Had I been present, I would have voted “yea.”

MEDICARE REGULATORY AND CONTRACTING REFORM ACT OF 2001

The SPEAKER pro tempore (Mr. CULBERSON). The pending business is the question of suspending the rules and passing the bill, H.R. 3391.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Connecticut (Mrs. JOHNSON) that the House suspend the rules and pass the bill, H.R. 3391, on which the yeas and nays are ordered.

This is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 408, nays 0, not voting 25, as follows:

[Roll No. 467]

□ 1954

Mr. BERRY changed his vote from “yea” to “nay.”

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MAKING IN ORDER MOTIONS TO SUSPEND THE RULES ON WEDNESDAY, DECEMBER 5, 2001

Mr. NUSSLE. Madam Speaker, I ask unanimous consent that it be in order at any time on the legislative day of Wednesday, December 5, 2001, for the Speaker to entertain motions that the House suspend the rules relating to the following measures: H. Con. Res. 232, H.R. 3248, H. Con. Res. 280, H.R. 3322, H.R. 2238, H.R. 2115 and H.R. 2538.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

ELECTION OF MEMBER TO CERTAIN STANDING COMMITTEES OF THE HOUSE

Mr. NUSSLE. Madam Speaker, I offer a resolution (H. Res. 301) and I ask unanimous consent for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 301

Resolved, That the following Member be and is hereby elected to the following standing committees of the House of Representatives:

Transportation and Infrastructure: Mr. Boozman.

Veterans' Affairs: Mr. Boozman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBER OF ADVISORY COMMITTEE ON STUDENT FINANCIAL ASSISTANCE

The SPEAKER pro tempore. Without objection, pursuant to section 491 of the Higher Education Act (20 U.S.C. 1098(c)), and upon the recommendation of the majority leader, the Chair announces the Speaker's appointment of the following Member on the part of the House to the Advisory Committee on Student Financial Assistance for a 3-year term to fill the existing vacancy thereon:

Ms. Norine Fuller, Arlington, Virginia.

There was no objection.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

MIAMI WELCOMES DOLE FRESH FLOWERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Madam Speaker, on December 9 of this year, approximately 300 employees will move into the newly-built world headquarters of Dole Fresh Flowers in Miami's International Corporate Park.

Miami has historically been the U.S. gateway for the floral industry, since the majority of flowers for commercial use are grown just south of us in South America.

Dole entered the flower business just 2 years ago, bringing to this industry 150 years' experience in growing, shipping, and marketing fresh produce around the world.

Dole consolidated four companies into a single entity, to be housed on 17 acres of land in a state-of-the-art facility measuring 328,000 square feet. Nearly 3 million stems of flowers will pass through the facility every day during this holiday season alone.

Employees have been eagerly awaiting the move to this efficient and beautiful new home since its groundbreaking last April.

□ 2000

Miami, and indeed all of our State of Florida, is enthusiastic about having this worldwide brand Dole in our community.

Welcome home, felicidades.

PASSAGE OF FAST TRACK LEGISLATION

The SPEAKER pro tempore (Mrs. BIGGERT). Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 5 minutes.

Mr. BONIOR. Madam Speaker, I congratulate the flower company for locating in Miami, but I would like to tell my friends that the bloom is off the rose here on Fast Track coming up this Thursday.

Madam Speaker, this Thursday's vote on Fast Track is an ill-timed attempt to force a divisive issue on our Nation when we least can afford it. Last week, the United States was officially declared in recession. Job losses are skyrocketing as a result of the faltering economy and the September 11 attacks. Workers are unsure of their jobs and unsure of their futures.

Meanwhile, nothing, absolutely nothing, has been done to help these workers. The Republican leadership has blocked effort after effort to address these most important questions that affect working men and women in this country. A meaningful improvement of unemployment compensation laws, any attempt to help expand health care for those who are out of work, and any

other assistance that these worker desperately need, we have tried repeatedly month after month to get the leadership on the other side of the aisle to address these questions; and nothing has come from our efforts.

What the Republican leadership has done is use every opportunity available to spend billions of dollars in corporate tax benefits at the expense of working men and women in this country. We are waging war abroad, and we are united in that; but what is happening in this country is that the leadership of the Republican Party is waging war on the workers of this country.

This push for Fast Track is no different. Our flawed trade policies of the last decade have had a devastating toll on American workers. Since 1994, three million U.S. jobs have evaporated as a direct result of our failed trade policies.

In my home State of Michigan, over 150,000 jobs have been lost. Thousands of workers around the country are struggling to keep their jobs right now. They are in danger of becoming tomorrow's job-loss statistics.

It is time we reversed this trend. It is time we woke up and dealt with the crisis that is affecting millions of American workers and their families today. No money and unemployment comp to pay for the rent, to pay for the mortgage, to pay for education, to pay for food. No resources for health care, for members of the workforce or their families.

We do not need more job losses. We do not need more corporate giveaways, and we certainly do not need Fast Track.

I want to thank my colleague, the gentleman from Ohio (Mr. BROWN), for organizing this important discussion which we will have a little later on this floor tonight and for his work to highlight the efforts of Fast Track will have on all of our workers, including our farmers. Madam Speaker, many farmers are already reeling from bad trade deals. It is the same tune; it is the same song every time we get one of these things. Whether it is NAFTA or WTO or China, they come and they will offer the world, they will tell people they will fix this and they will fix that; and then the farmers, they get taken in every time on these things, not all of them. Some of them have figured it out, but the numbers prove what we have been saying all along: these trade policies are not good for our agriculture community.

I say to my colleagues, the timing of the Fast Track bill puts many U.S. farm bills in jeopardy once again, and the administration's willingness to put our trade laws on the table after the recent WTO ministerial shows our farmers have just as much to lose as every other worker in this country.

Madam Speaker, I ask that my colleagues look seriously at the proposal

that the gentleman from California (Mr. THOMAS) is bringing to the floor. It is flawed. It does not deal with workers rights, environmental rights, farmer rights; and the upshot of all of this is that we will give away much of our authority and power in the United States House of Representatives and in the other body to deal fairly and adequately and substantively with trade laws that will affect not only those areas, labor, environment, agriculture, but a whole host of other areas that affect the American public.

I ask my colleagues to stand with us as we fight this ill-conceived idea of Fast Track.

OPPOSE FAST TRACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. LYNCH) is recognized for 5 minutes.

Mr. LYNCH. Mr. Speaker, I am indeed new to this body; but I am by no means new to this issue. Prior to the great honor of serving in this body as the elected representative of the 9th Congressional District, I served as an iron worker for 18 years. I worked in the Quincy shipyard just outside of Boston. I worked in the steel mills in Michigan and Illinois, worked in United Auto Workers plants in Framingham, Massachusetts, and again in Michigan.

I have seen a lot of those jobs and a lot of those plants where I worked at one time disappear. I have seen them relocated. Good, highly skilled, well-paying jobs moved mostly to Mexico, but to other countries as well, in a race to find the lowest-paid worker and the least-strong labor standards and environmental standards.

First of all, I want to congratulate the gentleman from Michigan (Mr. BONIOR), as well as the gentleman from Missouri (Mr. GEPHARDT) and my own predecessor, John Joseph Moakley from Massachusetts, for their great work in fighting against this so-called Fast Track and also against NAFTA, which has served to really lower the working standards in some foreign countries that we are now dealing with as a result of NAFTA and which we seek to expand through this Fast Track legislation.

The proponents of this bill say that this is dearly tied to our fight against terrorism, but that cannot be further from the truth. The truth is, however, that Fast Track would do nothing to address America's security and economic needs in the wake of September 11. It neither rebuilds, nor does it restore the healing that is necessary to occur in this country.

What this does do is create what in effect a silent auction, and what is being auctioned off here is first of all Congress' responsibility to deal with foreign trade. The United States Con-

stitution says that it requires that Congress shall have the power to regulate commerce with foreign Nations, and it also says that it shall have the power to make all necessary laws proffered for carrying out those powers.

Fast Track changes all that. We give away our rights. We auction off the right to have a lively and open debate and choose instead to allow the U.S. Trade Representative to negotiate these deals in secret. It should be no surprise that this country has not been well served by secret negotiations, and we have proof positive that this is not the way to conduct our trade policy. Look at NAFTA. Look at the recent round of discussions and the latest ministerial pronouncements as a result of the WTO conferences.

There are no guarantees, no enforcement mechanisms for enforcing our labor laws or human rights. There are no mechanisms, no enforcement devices that allow us to enforce safety standards for food and for the environment.

What one does see is great protections for multinational corporations, no protections for American jobs, and this is simply a pattern that we should not follow; we should expand for the sake of following what some describe as free trade, which is not free trade at all, but it is trade that is dictated by unelected bureaucrats who sit in Geneva, Switzerland.

This bill would cut the Congress out of the process. It would eliminate the constitutional obligation that Congress has right now to serve the people.

The American worker should not be forced to compete with auto workers making 67 cents an hour in the maquiladoras just over the Mexican border. The sons and daughters of America should not be forced to compete with slave labor, which Fast Track would allow. The sons and daughters of America, our workers, should not have to compete with child labor, which Fast Track allows.

Tonight, as we have our armed services personnel, our proud sons, fighting on the ground in Afghanistan to restore and to preserve peace at home, we are seeing through this Fast Track legislation the derogation of the very powers that they seek to protect. I ask my colleagues to join me in opposing this Fast Track.

Now, this body stands to turn its back again on the American working men and women by engaging in this Fast-Track procedure.

I am new to public service, prior to the privilege of my office now, I was an ironworker for 18 years; I worked at the Quincy shipyard just outside of Boston, Steel Mills in Indiana, and GM plants in Framingham, and in Michigan. I've seen those jobs disappear with thousands of others because companies could exploit low-wage labor through unfair foreign competition. So, as you can see, I am not new to this issue.

The proponents of this bill, the President, Trade Representative Bob Zoellick, and oth-

ers, seek to link Fast Track to our Nation's antiterrorism efforts. At times, claiming that not to support this bill is to be less than patriotic.

The truth is, however, Fast Track would do nothing to address America's security and economic needs in the wake of September 11. Fast Track neither rebuilds, nor does it restore, it does not heal and it will not bring America together. Instead it will work to continue to drive America apart—starting with the denial of an open and honest debate on this very floor.

The United States Constitution says Congress shall have the power to regulate commerce with foreign nations; and it shall have the power to make all necessary laws proper for carrying out those powers.

Fast Track is a procedural rule that would obligate us to resign our responsibilities on behalf of our constituents. It makes us give up our rights and responsibilities to the people who sent us here.

Mr. Speaker, I can without a doubt affirm that my constituents did not send me here to give away their rights or allow their voices to be silenced.

And in silence and secret is exactly how these trade negotiations will be carried out under Fast Track. U.S. Trade Representatives, who are not elected by the people, will be deciding and negotiating in closed-door backroom sessions.

It is a troublesome process we endorse by engaging in this Fast-Track procedure and we do not have to look far to see the example of failure in that process. We can look to NAFTA.

We see it in the fact that there are no enforceable labor and environmental standards in NAFTA or in the proposed expansion of NAFTA to 34 other countries under the Free Trade Area of the Americas Act.

While the bill raises the issue of labor standards and raises the issue of environmental protections, enforcement of these issues is recklessly absent.

It is easy to see, Mr. Speaker, exactly who benefits from an extension of NAFTA just by examining the juxtaposition of enforceable worker and environmental rights with the rights of investors.

Most troublesome are the protections that allow corporations to impose rules on the global economy that effectively mute competing voices and values, while undermining the sovereign capacity of a nation to defend its own citizens' broader interests by overriding established rights in domestic law.

We have seen the United States has lost millions of dollars to corporations who have successfully sued States under NAFTA's Chapter 11 bylaws claiming that government efforts to improve environmental standards impeded company rights. These are cases not decided in Federal court but in a NAFTA tribunal—again—behind closed doors. The State of California stands to lose \$1 billion to the Methanex Company for trying to enforce laws that keep poisonous carcinogens out of gasoline.

In contrast we have seen what NAFTA has done for families, workers and the environment.

The impact of NAFTA on American jobs and worker's rights in member nations is astounding. In the 8 years of its existence, Trade Adjustment Assistance has tallied 800,000 American workers who have lost skilled, well-paid

jobs to import competition under NAFTA, the threat of factory relocations holds down wages for tens of thousands more.

Those who have lost their jobs are working, however—making a fraction of what they used to earn. And their jobs? They're held by workers in Maquiladora earning pennies on the dollar with no breaks, no rights to organize and no laws to keep children in school and out of slave labor. This bill is completely absent of any enforceable standard.

The sons and daughters of America's Great-est Generation should not have to compete with child labor and American workers should not have to compete with slave labor.

The American public should not be faced with the risk posed by the safety hazards and the emissions impacts of the 4 and half million Mexican trucks that travel over the border every year. Not to mention the contents of those trucks.

Less than 2 percent of those trucks—roughly 90,000 are ever inspected. Meaning many enter without the proper safety codes and emissions standards required by all 50 states.

Worse yet, the lack of accountability allows produce and meats to come into this country that do not meet the regulatory standards of the FDA—giving families the unfortunate prospect of not knowing if they're eating off the NAFTA diet.

We have seen examples of that, with the outbreak of Cyclosporiasis in seven States—California, Nevada, Maryland, Nebraska, New York, Rhode Island, and Texas (FDA source)—from the consumption of Guatemalan Raspberries contaminated with parasites. A virus that was allowed into this country because the produce did not undergo the FDA process and the sanitation process that is given to U.S.-grown produce.

It's accountability that is missing from these types of trade agreements. And without it, we are unable to guarantee protections and safeguards for the American worker and the American public.

At issue is not whether America should be part of the global economy but how it should be a part of the global economy. Before riding the fast track to more trade agreements, we ought to address the failures and pitfalls of prior ones.

Putting working families first ought to be a major priority especially in the wake of thousands of lost jobs during this recession. Congress has made bipartisan progress on a whole range of issues since then. What we now need to do is to take advantage of this high spirit of bipartisanship and put America's trade agreements on the right track by preserving Congress's legislative role; require negotiators to install provisions that will promote workers' rights, and require negotiators to develop trade rules that cannot undercut environmental laws.

We must do whatever we can to recapture the accountability entitled to the American people. The first step in doing that is to defeat fast track. I urge all of my colleagues on both sides of the aisle to vote down this bill.

COMMEMORATING 25TH ANNIVERSARY OF ALLIANCE FOR COMMUNITY MEDIA

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I rise to help celebrate the 25th anniversary of the Alliance for Community Media. This is a nonprofit organization which was founded in 1976 to provide access to voices and opinions that otherwise would not be heard. The alliance promotes this idea through public education, progressive legislation, regulatory outreach, coalition building, and grassroots organizing.

The alliance's primary goal is to educate and advocate on behalf of the community at large. It works with the Federal Communication Commission, Congress, State legislatures, State regulatory agencies, and other partners to ensure that all people, regardless of race, gender, disability, religion or economic status, have access to available technology to express their opinions, to express their views.

In my congressional district back in Chicago and in the western suburbs, I use extensively this media to reach out to my constituents. We do a program called Hotline 21, where citizens can call in and voice their opinions and get answers to their questions. That is a 30-minute one. We do another one that is an hour where individuals come in and talk about public issues, public policy directors, notions, concepts and ideas. As a matter of fact, the group of community producers, individuals who have their own shows, who have learned how to use technology, how to use cameras, as a matter of fact, they have built up quite a following; and everybody knows that whatever it is that they want to get out, they can get it out through this media.

So I again commend the Alliance for Community Media, congratulate them on their 25th year anniversary; and I also congratulate their executive director, Bunnie Riedel, and her associates for having done an outstanding job and for having helped to keep alive the notion that as people talk and interact, share notions, ideas and concepts that really binds us closer together as a Nation, it helps to promote the concepts of democracy and it helps to make America a stronger, more open, more productive Nation.

SUPPORTING THE BIPARTISAN TRADE PROMOTION ACT OF 2001

The SPEAKER pro tempore (Mr. OTTER). Under the Speaker's announced policy of January 3, 2001, the gentleman from Virginia (Mr. CANTOR) is recognized for 60 minutes as the designee of the majority leader.

Mr. CANTOR. Mr. Speaker, I rise today in support of the bipartisan trade promotion Act of 2001 and encourage my colleagues in the House to support its passage when we take that crucial vote this week.

Mr. Speaker, I yield 10 minutes to my colleague, the gentleman from Virginia (Mr. SCHROCK).

Mr. SCHROCK. Mr. Speaker, I thank the gentleman for yielding, and I come to the floor this evening with a plea for the people of the district I represent. When the House votes Thursday to grant the President Trade Promotion Authority, I urge my colleagues to support this important measure.

□ 2015

The district I represent sits on the shores of the Atlantic Ocean at the mouth of the Chesapeake Bay. Millions of dollars' worth of goods pass through these waters every day, both from domestic sources and from our trading partners abroad.

The Commonwealth of Virginia is home to four State-owned ports, the Newport News Marine Terminal, the Norfolk International Terminals, the Portsmouth Marine Terminal and the Virginia Inland Port in Warren County, Virginia. At these ports, importers and exporters find an intricate transportation network, bringing maritime commerce together with road and rail transport. This network allows the goods brought into the ports to reach two-thirds of the American population within 24 hours. If a country or foreign company wants to do business with Americans, they will no doubt deal with the ports of Virginia at some point.

For this reason, the upcoming vote on Presidential Trade Promotion Authority is vital to the people of Virginia's Second District and for all Americans. On Thursday, we will consider granting the President Trade Promotion Authority to negotiate new trade agreements with foreign nations. It is the first step in gaining access to foreign markets for our economy and to open doors to other countries for similar access. This measure has a great impact on the residents of the district I represent because we live where the effects of trade are most evident.

When trade increases, more ships and barges come into these ports, packed with containers and creating the need for more people to handle these goods and ensure their safe transport to communities across the country.

Equally important is the impact that the trade has on the rest of the country. Increasing trade by removing trade and investment barriers benefits all Americans in the checkout line, giving them a wider choice of goods at better prices. Thousands of U.S. manufacturing jobs depend on exports, and TPA will open more foreign markets for these products, and American farmers will benefit as more markets open for their goods.

When the lack of free trade agreements makes our wages lower and makes goods cost more, this is a tax.

The fact that America is party to only a few trade agreements amounts to an invisible tax on the American people and holds back American prosperity. American exports are burdened by harsh tariffs, making those goods less competitive in foreign markets and hindering the success of American companies. Similarly, the lack of imports gives Americans access to fewer competitive choices, forcing them to pay higher prices at the checkout register.

The free trade agreements that America has entered into have been shown to benefit the economy and workers. Exports to Canada and Mexico have more than doubled since NAFTA was enacted in 1974. Higher exports translate directly into more business for American companies and more jobs for American workers.

The last time trade promotion authority for America was in place was in 1994. Since that time, the United States has not enacted a single free trade agreement with any Nation. This sends a signal to our potential trading partners that when TPA is not in effect, America is either not able to negotiate effective agreements or simply is not willing.

But we can send an equally strong signal to our potential trading partners on Thursday by telling them that we are ready to broker trade deals and we have the tools to do so efficiently. This vote will help us reaffirm America's role as the leader in international trade in order to bring better jobs and more business to America.

Naysayers will argue that Trade Promotion Authority should not be granted until it is guaranteed that we will impose labor and environmental standards on the countries with which we deal. We must remind ourselves that these agreements are with nations as sovereign as our own. We would disapprove of a country who required our Nation's factories to meet environmental standards or pay employees particular wages. Environmental and labor concerns are certainly causes worthy of our efforts, but attaching unnecessarily strict regulations to trade agreements only breaks down agreements and blocks access for American companies and consumers.

Experience has proven that free and fair trade gives way to higher environmental and labor standards abroad. As foreign economics grows as a result of trade liberalization, governments have a greater desire and greater means to enforce labor laws and environmental protection initiatives from within.

Perhaps the most important result of Trade Promotion Authority is that America will be able to increase its most valuable export, the ideals of freedom and democracy. Free and open trade allows other countries to see the benefits of capitalism and democracy. As President Bush has said, "Economic

freedom creates habits of liberty. And habits of liberty create expectations of democracy."

Our vote on Thursday will send a message to our potential trading partners. I hope we do not send the message that Congress does not stand behind our President and that Congress wants to build up barriers to free trade. Rather, I hope that we can pass Trade Promotion Authority and send the message that America stands united, ready to do business, and ready to trade.

Our economy is now at a crossroads. We can take the road that leads to increased isolationism and give up hope of creating new global trade alliances, or we can choose to take the road that leads to increased trade, better American jobs, and a better standard of living for America and our trading partners.

I hope my colleagues will join me in ensuring that we travel down the path that leads to more opportunities and economic freedom for all of our citizens by supporting Presidential Trade Promotion Authority.

Mr. CANTOR. Mr. Speaker, it is now my pleasure to yield to the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. Mr. Speaker, I thank the gentleman from Virginia for yielding to me and for bringing this forum together for the discussion of an issue truly vital to Indian farmers, and congratulate the gentleman from Virginia for his leadership on behalf of agriculture and trade.

Mr. Speaker, I rise today on behalf of America's farmers and ranchers, particularly those serving eastern Indiana. Every evening they leave their sweat in the fields to ensure the good health and well-being of their fellow Hoosiers. They do so much for Indiana, and this Congress can do so much for them by simply granting the President desperately needed trade negotiating power.

Mr. Speaker, trade already benefits Indiana. Hoosiers exported an estimated \$1.5 billion in agricultural goods in the year 2000. These exports helped boost farm prices and income while supporting 24,000 jobs on and off the farm in food processing, storage, and transportation. The numbers are truly staggering in Indiana alone: Soybeans and products, \$543 million; feed grains and products, \$470 million; live animals and red meats, \$107 million; wheat and products, \$69 million; and poultry and products, \$55 million. An estimated \$1.5 billion just from the 92 counties of Indiana.

Mr. Speaker, world demand for these products is increasing, but so is competition among our various and diverse trading partners. The reality is if Indiana's farmers and food processors are to compete successfully for opportunities ushered in by the 21st century, they need free trade and open access to growing global markets.

Let us quickly examine previous trade agreements and how they have assisted my home State. As the Nation's sixth largest corn producer, Indiana benefited directly under the North American Free Trade Agreement when Mexico converted its import licensing system for corn to a transitional tariff rate quota. Under this system, the volume of U.S. corn exports to Mexico has nearly tripled since 1994, reaching 197 bushels valued at \$486 million in the year 2000. Additionally, under NAFTA, Mexico eliminated import licensing and is phasing out tariffs for wheat all together. Wheat exports to Mexico have doubled from Indiana since 1994.

Mr. Speaker, the Uruguay Round agreement has also benefited Indiana in its capacity as America's fourth largest soybean producer. South Korea continues to reduce its tariffs on soybean oil, a process that has already supported a threefold increase in our export volume. The Philippines is doing the same for soybean meal.

So, Mr. Speaker, you can see that our existing trade agreements have truly benefited Indiana and the entire United States. So why do we need additional trade agreements in the form of TPA to help our Nation's farmers and ranchers? Let me offer a few reasons.

Number one, exports are the lifeblood of American agriculture. Without Presidential Trade Promotion Authority, we risk losing our existing share of foreign markets to other competitors.

Second, with TPA, we can begin in earnest with a round of WTO talks where the greatest gains will be made in agricultural trade.

Third, the only way to fix the problems that have emerged under existing agreements is to use the credibility of Trade Promotion Authority with the President of the United States at the negotiating table.

Additionally, growth in purchases of U.S. food and agricultural products is most likely to come from the 5.9 billion people who live outside of the United States of America. If we do not supply their needs, Mr. Speaker, someone else will.

Fifth, economic studies show that the most significant growth in demand for agricultural products is in societies with emerging middle classes. Middle-class families spend an increasing portion of discretionary income on food. The next decade is expected to usher in 250 million Indians and 200 million Chinese to the level of middle class. These markets will be the strongest for growth in commercial food demand.

Also, some of the highest growth in food demand is occurring in Asia. Only with Presidential Trade Promotion Authority can we tear down the barriers and eliminate tariffs in that region to maximize our economic opportunities.

Additionally, other countries are moving forward without us. The European Union, Mexico, Canada, and Latin

America are negotiating new free trade agreements that do not include the United States. There are 130 agreements that exist today, and only two of them include the United States of America.

Allow me to repeat that again, Mr. Speaker. There have been, over the last decade, been negotiated worldwide with our competitors in agriculture and elsewhere, 130 trade agreements, of which the United States is party to 2.

Also, world agriculture tariffs today average about 62 percent, while U.S. tariffs average 12 percent. Trade Promotion Authority and other trade agreements can only eliminate foreign barriers such as this.

Ninth, other countries are more likely to agree to WTO negotiations pertaining to strengthening world prices if the President is armed with Presidential Trade Promotion Authority.

And last, Mr. Speaker, this Congress can no longer afford to stand idly by while other nations' governments improve trading opportunities for their citizens and their industries and their agricultural sector. Leadership and action by Congress must no longer be delayed. Congressional passage of Presidential Trade Promotion Authority is absolutely essential, and I hope that Congress will do so this week.

And let me say I support Trade Promotion Authority to assist Hoosier farmers. I urge my colleagues to help their farmers as well. But also, Mr. Speaker, and I say this somewhat in jest but in a great deal of seriousness, I believe that this President has earned the confidence of the American people in the days of the fall of 2001. Trade Promotion Authority for the President of the United States asks one simple question: Do you trust the President of the United States at the trade negotiating table to put American agriculture, to put American interests, to put American jobs first?

Well, I, Mr. Speaker, today do not believe I am in the minority when I say that I trust the President of the United States of America to put American jobs, American interests, and American agriculture first. I trust President George W. Bush, and I hope that all of my colleagues will join those many millions of Americans who have found this President truly trustworthy and give him the authority he needs to advance our interest in agriculture and for our entire economy by adopting Trade Promotion Authority.

□ 2030

Mr. CANTOR. Mr. Speaker, I thank the gentleman for his eloquent remarks.

Mr. Speaker, I yield to the gentleman from Idaho (Mr. OTTER).

Mr. OTTER. Mr. Speaker, I thank the gentleman from Virginia for putting together this opportunity tonight for us to talk about Trade Promotion Au-

thority. We know that is going to be coming up later this week; and so the information, and there has been a lot of disinformation, I think we heard some of that during the 5-minute Special Orders tonight, disinformation that is being put out into the idea marketplace.

Trade Promotion Authority has been much discussed over the last few weeks, anticipating this vote that we are going to have later this week; and I would like to share a little information about how Trade Promotion Authority will benefit not only Idaho, but our 49 sister States as well.

Let me start with something I know best. Idaho is the world's foremost producer and processor of potatoes. We plant over 380,000 acres a year, and we yield well over 100 million hundred weight as a result of those plantings. Most of those potatoes are processed into products which find themselves into the marketplace and restaurants throughout the world.

Idaho potatoes dominate almost every market they have ever gone into. I traveled to some 80 foreign countries and opened many McDonald's throughout the world with the JR Simplot Company because we had the best potatoes in the world, and those best potatoes came from Idaho.

One of those markets that I was part of opening up was in Chile. Today, as a result of our inability to get a seat at that negotiating table, Canada and Chile came together and put together a trade agreement. Idaho no longer shares in that market because that agreement, when we did not have a seat at that table, pushed the Idaho potatoes out of the market.

What concerns me even more than the fact that we are losing some of these markets to some of our foreign competitors is the fact that we are now starting to lose situs for some of our best processors, some of the best processors in the world, some of them historically proven since Birds Eye first discovered how to freeze and then reconstitute products, adding portability and shelf life to some of the best vegetable products throughout the world, and that happened in the early part of the last century.

Some of these best products and their processors are now reducing the size of their plants in the United States south of the Canadian border and are actually expanding some of their potential to be in these foreign markets in plants in Canada, and the result is because Canada has Trade Promotion Authority and they have a seat at the table that they can go to the markets throughout the world and negotiate trade agreements.

Idaho's wheat producers is another example. They are also suffering from our inability to enter into new agreements. The Idaho National Wheat Growers for that purpose and that pur-

pose only are supporting the passage of Trade Promotion Authority. We have documented evidence of how trade has benefited our farmers.

Since the passage of NAFTA, U.S. farm exports to Mexico have doubled. The more trade agreements we enter into, the more food we can sell, because 90 percent of the world's people live outside of the United States. Ninety percent of the mouths that sit down to that plate every night, three times a day, 90 percent of those plates are served in other parts of the world, not the United States. If we are not going to be part of those agreements, if we are not going to have a seat at that table, to whom are we going to be able to sell the increased production that we have from our farms?

The U.S. only consumes about two-thirds of what American farmers always produce because they are the best and most prolific in the world. Without our foreign markets, already depressed prices could be much lower. We need foreign markets to maintain our current production and to increase our market potential in the future. Because the United States has more productive farmers in the world, other nations maintain extensive subsidies and trade barriers and trade walls. The average American agriculture tariff is 3 percent, whereas in Europe it is 15 percent; and worldwide the average is well over 40 percent.

In addition, the European Union maintains export subsidies of up to 75 percent greater than those that we have in America. Passing the Trade Promotion Authority, giving our President the opportunity to sell our wares, to strut our stuff throughout the world will help further our national goals by allowing the President to sit down and negotiate these deals. We will be able then to eliminate trade barriers, and our products will increase our exports and be able to reduce the export subsidies throughout the world.

Let me share some of the state barriers that our farmers all over the United States currently face. In Australia, a monopoly wheat board now sets the price of wheat. American farmers are therefore priced out of one of the most important markets in the world. In Canada, a monopoly wheat board also competes against the United States in world markets.

Mr. Speaker, passing the Trade Promotion Authority would speed the negotiations to remove these wheat boards from their position of power and monopolistic predatory practices in the world marketplace. Idaho is the fifth largest spring wheat producer in the country, and I would not promote Trade Promotion Authority if I were not certain it would benefit our farmers.

China currently imposes restrictions on which varieties of apples, of which Idaho is one of the best producers, that

they can import into their country. Currently only three varieties can be imported into China, and the two versions that are actually favored by the Chinese consumer cannot be brought in because of trade barriers. With Trade Promotion Authority, we could negotiate an end to these barriers and benefit our apple farmers.

Similarly, Taiwan maintains a 40 percent tariff on apples and that needs to be reduced and could be through the passage of Trade Promotion Authority.

Mr. Speaker, I could go on and on; but I would simply like to demonstrate for this House and for those who are listening, Idaho's director of agriculture, Mr. Takasugi, has prepared "Idaho Trade Issues: An Action Plan." This was produced earlier this year. As the Lieutenant Governor of Idaho, I led trade missions throughout the world. I visited some 80 foreign country. Mr. Takasugi went with me to many of those. We were able to break down barriers because we were sitting at the table when we had the opportunity to overcome some of the differences we had with some of these foreign countries.

Mr. Speaker, this is a 54-page booklet that itemizes every trade barrier that Idaho and Idaho's farmers face in every country of this world, and I would like to provide this booklet to any Members who do not believe that passing Trade Promotion Authority to the President would not be a valuable asset for this country and its economy and the producers.

Some may say Idaho is a small State and we have nothing to gain from Trade Promotion Authority and that it is actually a coastal issue; and I am saying nothing could be further from the truth. Last year, Idaho's exports alone were \$826 million. That may not sound like an awful lot to a lot of folks; but my 1,285,000 people thought that \$826 million in sales to foreign countries was terribly important. A lot of families are able to provide for themselves and provide for their future because of that \$826 million.

Let me break it down: \$303 million was potatoes and other vegetables; \$151 million in wheat products, \$98 million in livestock; \$54 million in dairy products; and \$51 million in feed products.

More than 12,000 Idaho jobs depend upon exports. As I said earlier, our ability to process this food into a portable and into a storable product is one of the things that has got us into these foreign markets.

I am also aware of the concerns of those who are afraid of H.R. 3005 because it means an end of our anti-dumping and countervailing duty legislation. If I thought that was the case, I would be opposing this instead of here helping the gentleman from Virginia (Mr. CANTOR) and our other folks champion this effort. I know firsthand the effects of illegal dumping and the value

of our anti-dumping laws. Voting for the Trade Promotion Authority is neither an endorsement of repealing anti-dumping laws, nor a repudiation of the English resolution that this House passed with such an overwhelming majority just last month.

Mr. Speaker, earlier in the last century a fellow by the name of Hans J. Morganthau said when food does not cross borders, troops will. When we look at most of the problems of the world that have been associated with folks who have something and it is desired by folks who do not, those troops cross the border.

I have said twice now and at the risk of repeating myself, I have been in 80 foreign countries, and I have negotiated with every manner of government in every way that I possibly could for every kind of product; and having a seat at that table and being right there, face to face with the potential buyer, is the most important thing we can do.

Trade Promotion Authority, Mr. Speaker, gives us a seat at that table. Trade Promotion Authority will indeed manifest the value that Hans J. Morganthau put into his idea that when we are trading with people, we are building a relationship, and that relationship then leads to an exchange of values and an exchange of goals and eventually an exchange of ideas and peace.

For those Members who may doubt the value of trade, I direct them to a book called "The Lexus and The Olive Branch," Chapter 6, and it is called "The Golden Arches Theory of Peace." No two countries that ever received a McDonald's franchise since they received that franchise have gone to war because they understand the value of a relationship and a trade consumer and a provider and supplier-consumer relationship.

Mr. Speaker, I urge my colleagues to join me and all of those who are speaking on it tonight in passage of H.R. 3005, and assure that we can unleash the power and the potential of the American farmer and the American trader.

Mr. CANTOR. Mr. Speaker, I thank the gentleman from Idaho (Mr. OTTER) for that very well thought out and impassioned plea for the passage of the President's Trade Promotion Authority.

Mr. Speaker, I yield to the gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Speaker, I thank the gentleman from Virginia (Mr. CANTOR) for organizing this Special Order and rise in support of Trade Promotion Authority.

One-third of all American families depend directly or indirectly on foreign trade for their income, and America is the number one exporting nation in the world. But unless we act to promote fair and free trade, this leadership will

fade. Trade Promotion Authority ensures that the United States will have better access to foreign markets while strengthening domestic industries.

An increasingly important force behind our Nation's economic growth is the high-tech sector. In the past 5 years, high-tech industry accounted for one-third of the growth of our gross domestic product. It lowered our inflation rate and created 1.5 million new high-paying jobs. Overall, the world market for IT products rose steadily to \$1.3 trillion in 2000 and is expected to grow as companies take further advantage of the Internet and e-commerce.

In the United States, the information sector employment rose by 15 percent from 1997 to over 2 million jobs last year. Additionally, more than half of the 2.6 percent increase in U.S. labor productivity between 1996 and 1999 was directly related to increasing investment in IT. What may not be known is that U.S. high-tech companies exported \$223 billion in merchandise last year. In Illinois, the number of companies exporting increased by 50 percent from 1992 to 1998.

Mr. Speaker, Motorola, which is based in Chicago's northern suburbs, is one of our Nation's leading exporters of high-tech goods. In the past several years, their exports have increased steadily. Last year almost two-thirds of Motorola's sales were exported. Additionally, thanks to the innovation of the Internet and e-commerce, health care companies such as Allegiance and Medline, based in northern Illinois, greatly contributed to overall Internet sales transactions worldwide, providing critical health care supplies for hospitals both here and abroad.

Allegiance alone provides goods to over 80 countries and has 20 subsidiaries worldwide. These companies support incomes of thousands of families in Deerfield, Vernon Hills, and Libertyville.

□ 2045

If we grant the President Trade Promotion Authority and these employees continue to take advantage of the Internet, more jobs will be created in Illinois's high-tech sector.

New markets represent an enormous opportunity for high-tech industry to maintain our global leadership. With 500 million people living south of our border and Latin America with only 18 million personal computers on hand, now is the time to open new markets to America's high-tech goods.

While the Information Technology Agreement eliminated duties in the IT sector in some major markets, the larger markets of Latin America are not a party to this agreement. Tariffs on IT products in key Latin American countries remains as high as 30 percent. Beyond tariffs, IT products also face nontariff restrictions such as redundant testing and certification requirements. U.S. suppliers, including

those in Illinois, will see a rise in job creation if these barriers are lifted. And if we act now and give trade promotion to the President, we can accomplish this.

Opportunity is a two-way street. Opening markets in Latin America to computers and the Internet will help modernize their economies while, at the same time, promoting free markets, competition, and improved quality of life. As computer and new technologies bring opportunity for economic growth in Latin America, U.S. jobs will be created.

Since NAFTA was enacted, the United States exports to Canada and Mexico have increased 104 percent. Every day, America transacts an estimated \$1.8 billion in trade with our NAFTA partners at a rate of \$1,200,000 a minute. In 2000, America's exports to our NAFTA partners grew 30 percent faster than to exports to the rest of the world. Since 1992, open markets with Mexico and Canada created more than 20 million new jobs in the U.S., with wages and workers supported at incomes 13 to 18 percent higher than the national average. NAFTA is a proven trade agreement that has led to success for American business.

If we fail the President on Trade Promotion Authority, we will fall behind the curve and the cost will be American jobs. Already, nations worldwide have entered into an estimated 130 preferential trade agreements, while the United States is just party to two, one being NAFTA and the other with our allies in Israel. Only 11 percent of the world exports are covered by American trade agreements, compared to 33 percent for European Union free trade agreements and Customs arrangements. We must act now, and every day America delays, America loses. Communities, families, businesses, and workers lose opportunities and income that could come with expanded markets for American goods and services. During this time of economic uncertainty, it is crucial that we grant the President Trade Promotion Authority to open new opportunities for American businesses and to preserve American jobs.

Past trade agreements have benefited the typical family of four in Illinois by \$1,300 per year. Illinois exports totaled over \$2,500 for every man, woman, and child in our State. Over 350,000 Illinois families depend on exports for their income, with another 150,000 indirectly depending on export business. Since 1993 and the conclusion of the Free Trade Agreement with Mexico and Canada, Illinois increased our exports to those two countries by 73 percent.

Let me look at one key industry: environmental technology, which grew its exports to Mexico by 385 percent. Exports from the city of Chicago alone totaled \$21 billion last year. Over 1,400 businesses in Illinois exported last

year, and 86 percent of them were small- and medium-sized companies.

Take the case of Fluid Management in Wheeling. Over 60 percent of the company's business depends on exports. Mr. Speaker, 360 jobs alone. And Fluid's skilled engineering force grew from 6 in 1989 to over 100 by 1996. The firm has expanded here, at home, and in Australia, Europe, and Latin America. After NAFTA, Fluid opened offices in Latin America. The total number of exporting companies in Illinois grew from 9,400 to 14,200 and, in sum, Illinois exported over \$32 billion last year to 208 foreign markets.

That is why we need to pass Trade Promotion Authority in this Congress, and, once passed, we will lower tariffs against American goods and enable exports to lead our country out of recession.

Mr. Speaker, I want to thank the gentleman from Virginia (Mr. CANTOR) for organizing this Special Order on the need to boost exports in America. They are important for Virginia, and they are important for my State of Illinois.

Mr. CANTOR. Mr. Speaker, I thank the gentleman from Illinois (Mr. KIRK), my good friend, and join with him in that heartfelt statement of support for the Trade Promotion Act of 2001, which we are poised to vote on here in this House this week, on Thursday.

Mr. Speaker, the economists have announced what many Americans have known for months. America is officially in recession, and granting the President Trade Promotion Authority will allow him to negotiate trade treaties that will create jobs and deliver a much-needed boost to our economy. The real cost to American business of not granting the President Trade Promotion Authority is that other countries will continue to negotiate free trade agreements to the exclusion of the United States and its interests, putting American businesses at a competitive disadvantage.

Two vital sectors of America's economy that have suffered greatly during the recent economic downturn here in this country will benefit most from Trade Promotion Authority, and those are the sectors that we are focusing on tonight and that have been spoken to on the part of my colleagues, and they are the agricultural and high-tech sectors.

Mr. Speaker, I would like for a minute to focus on the Commonwealth of Virginia and how it benefits from increased trade. My district, the southern district, and the Commonwealth of Virginia as a whole, strongly benefit from America's current trade activity. We, like America, benefit from a vibrant international trade environment. Last year, Virginia sold more than \$10.5 billion of exports to nearly 200 overseas markets. Virginia exported more than \$9.2 billion of manufactured items such as machinery, transpor-

tation equipment, computers, and electronics, fabricated metal products, and beverage and tobacco products. The number of Virginia companies exporting increased 62 percent from 1992 to 1998. Demand is growing for the top five agricultural products exported from Virginia, including tobacco leaf, poultry products, live animals and red meats, wheat products and soybean products.

Here are some of the benefits that we stand to gain from increased trade in Virginia. Nearly 60,000 manufacturing jobs are tied to exports. Roughly 6,000 Virginia citizens hold jobs related to agricultural exporters. Jobs supported by exports in Virginia are 13 to 18 percent better paying than the national average. In 1997, an estimated 42,000 Virginia jobs depended on or were indirectly related to manufactured exports, and 1 in every 7 of the manufacturing jobs in Virginia is tied to exports.

Mr. Speaker, no doubt that one of the tremendous engines for the Commonwealth of Virginia and the Nation as a whole and our economy has been the high technology sector. This industry is particularly affected by the absence of Presidential Trade Promotion Authority, and it is this industry which also will stand to benefit most in terms of job creation and increased productivity across this land.

Firms in the United States face many obstacles in the global market such as high tariffs and regulatory burdens. These facts inhibit the competitiveness of American firms. Such obstacles, if not removed, will ultimately lead to the loss of American jobs to our foreign competitors, adding fuel to the fire of the already stalled American economy and associated job layoffs.

Obstacles exist such as the soaring tariffs. These tariffs on American information technology products, scientific instruments, and medical equipment being sold in countries with which the United States does not have trade agreements reduces American competitiveness with the indigenous goods produced in that target country and our foreign competitors. Second, American companies face regulatory barriers on trade of information technology and communications products that are in place without trade agreements. Absence of Trade Promotion Authority, make no mistake, results in countries being unwilling to negotiate trade agreements with the United States. And why would they agree to negotiate with us if a deal as struck is not really a deal? As was stated before by the gentleman from Indiana (Mr. PENCE), I think our President, Mr. Bush, has earned the confidence of the American people and we must confer upon him Trade Promotion Authority to make sure that our American businesses stay competitive in the global marketplace.

Mr. Speaker, to give my colleagues an example of a free trade agreement,

most trade between Brazil and Argentina is now tariff free, while U.S. firms still face an average tariff of more than 14 percent on exports to those Western Hemisphere countries and neighbors of ours. Foreign Ministers from both Brazil and Argentina have suggested that they cannot negotiate trade agreements with the United States until the President has Fast Track authority.

Granting the President Trade Promotion Authority will allow him to negotiate trade treaties that create access to new markets for the high-tech industry. Access to new markets will be a major force behind the success of our technological community and the job growth therein. This success will be obtained by allowing companies to expand their markets and their sales in developing countries in order to continue the rapid expansion of the high-tech industries here at home.

As an example of how important opening up foreign markets is to American companies, this is a staggering statistic: 58 percent, that is, nearly 60 percent of Microsoft's revenues, is derived from international sales. Passage of TPA will allow companies like Microsoft to continue to increase their revenues in the global marketplace, and at the same time we are opening up new markets we are growing the job base here in America.

Trade agreements could also help establish the framework for additional e-commerce by American firms between those businesses and their customers abroad. High-tech products from America will be available at lower costs as these markets continue to open. If we have the ability to enter into more bilateral trade agreements, American goods and equipment will begin to show up in more countries and more markets, in much greater numbers and at much more competitive prices.

Recently, President George W. Bush addressed a meeting of leaders in the high-tech industry. The President expressed his vision of a world with increased free trade and described trade's benefits for the U.S. economy. And he said, "Ours is an administration dedicated to free trade. I hope that Congress gives me Trade Promotion Authority as soon as possible so I can negotiate free trade agreements. We should not try to build a wall around our Nation and encourage others not to do so. We ought to be tearing these walls down. Free trade is good for America and it will be good for your industry as well."

Mr. Speaker, another aspect within the international trade environment which is providing obstacles, especially in the area of the high-tech sector, is the issue of piracy. Piracy is currently costing the high-tech sector in America a tremendous amount of revenues. The protection of American know-how is another benefit and an essential part of TPA.

For example, 58 percent of business software applications used in Latin America were pirated in the year 2000, costing the software industry in our country nearly \$869 million in licensing revenues. In 1998, Latin America's software market generated approximately \$3.5 billion and is expected to grow by 18 percent annually.

□ 2100

Latin America is currently considered a region where a free trade agreement could occur fairly quickly with the United States. This is a region that provides a huge opportunity for the U.S. software industry. TPA will allow the President to negotiate trade treaties that will combat piracy by making intellectual property protection a fundamental condition of membership in multilateral and bilateral trade alliances. It will also open wide this natural growth market to the south for all American businesses, thereby increasing the job base in America.

Singapore is also a natural destination for the President and his team of negotiators to engage in talks and produce a bilateral trade agreement to open up markets to United States business. Intellectual property reforms in Singapore and cooperation in that country with policymakers have created an environment prepared for increased high-tech trade. We must allow President Bush to take advantage of this conducive environment and lock in the opportunities for American businesses in that country with a bilateral trade agreement with Singapore.

The issue of privacy is certainly linked and has as its pillar the protection of intellectual property owned by American businesses. If America's copyright industries are to continue to be successful in the world markets, the President must be able to effectively negotiate trade agreements that reduce barriers to creative works in America. Trade agreements are the vehicle to license and insure the continued growth of the industry in America. That is why the International Intellectual Property Alliance supports Trade Promotion Authority.

A recent report indicates that the copyright industries, including computer software makers, music, computer hardware, and many more, they employed more than 7.6 million Americans in 1999. Mr. Speaker, my colleagues before me have stated the many benefits that NAFTA has conferred upon this country.

Eight years ago last month, the House of Representatives debated and passed the North American Free Trade Agreement. It has produced a tremendous growth in trade for the United States and our two partners, Mexico and Canada. Trade with our NAFTA partners is growing twice as fast as U.S. trade with the rest of the world and accounts for approximately one-third of all U.S. merchandise trade.

NAFTA trade exceeds trade with both the European Union and Japan combined, approximately \$1.8 billion a day, as was pointed out earlier. NAFTA has kept Mexico on track to sustain internal economic reform, which in turn has helped the United States. NAFTA has resulted in reduced tariffs for American goods, benefiting American companies and American workers.

Under NAFTA, Mexico eliminated its 15 percent tariff on live slaughtered cattle, its 20 percent tariff on chilled beef, and its 25 percent tariff on frozen beef. Mexico has been the fastest-growing market for U.S. beef. U.S. beef exports to Mexico rose from the 1993 pre-NAFTA level of 39,000 tons valued at \$116 million, to 179,000 tons valued at \$531 million in 2000.

In the year 2000, 73 percent of Mexican imports were products from the United States: capital goods, from road-building equipment to hospital instruments; consumer goods from Mexico's emergent middle class; everything from blue jeans to compact disks and food. NAFTA led to a stronger economy, which led to improved living standards for Americans.

Examples in my home State of Virginia: the Jones Group International, based in Fairfax, illustrates how an increasing number of American small service companies are competing in world markets. This firm provides consulting services for developing countries.

The Regional African Satellite Communications Organization contacted the company in 1999 to develop two detailed documents, one for technology transfer and the other for know-how and an assistance program.

Millicom International Cellular. This Arlington, Virginia-based telecommunications company announced in 1998 that SENTELgsm, a 75 percent Millicom-owned company, has been awarded a nationwide global systems for a mobile communications license for the Republic of Senegal.

The company plans to embark on a rapid development program to build and launch a GSM mobile network to initially launch service in Dakar, with plans to expand coverage to all the regional capitals.

The license award is for a period of 20 years, renewable every 5 years thereafter. The firm reports that this significant investment will result in nearly \$10 million in U.S. exports and will create or retain more than 100 U.S. jobs.

In a recent speech, Commerce Secretary Don Evans summed up the benefits of Trade Promotion Authority: "The President is also committed to keeping electronic commerce free of roadblocks, ensuring the protection of intellectual property rights, and the strict enforcement of our trade agreements. But to achieve these goals in a successful trade policy that serves the

interests of American business and American workers, the President needs Trade Promotion Authority."

Without TPA, other nations will continue to refuse to negotiate treaties with the United States.

Mr. Speaker, it is vital for our economic interest and security that the United States set the trade agenda for the world market.

HONORING LEW RUDIN

The SPEAKER pro tempore (Mr. SCHROCK). Under a previous order of the House, the gentlewoman from New York (Mrs. MALONEY) is recognized for 5 minutes.

Mrs. MALONEY of New York. Mr. Speaker, if anyone watching tonight has ever called New York "the Big Apple" or uttered the words "I love New York," I hope they will join me tonight in remembering the man who brought those phrases into the public domain. His name was Lewis Rudin, but he was better known as "Mr. New York."

On September 20, at the end of his 74th summer, Lew Rudin died of cancer. We all know what happened in New York 9 days earlier. As we look to rebuild and renew New York after the tragic events of September 11, we must do so with Lew Rudin's vigor, vision, imagination, spirit, and wholehearted love for our great city.

At a time when the city's skyline has two gigantic cavities, I take heart in knowing that it is populated with so many buildings developed by Lew and his family. The Rudin family has never sold a building it developed, embodying a virtue that too few people value and practice today, and that is loyalty. Lew was fiercely loyal to his family, his friends, his city, and his father's commitment to rewarding New York because New York had rewarded his family.

Lew was a tireless booster and advocate for New York City. He co-founded the Association for a Better New York, which has lived up to its title time and time again. It has also brought us better schools, improved transportation, and cleaner and safer streets. The association became a watchdog, rewarding those who enhanced our city with Polish Apple Awards.

Lew Rudin bet on the city, even in its darkest hours; and he bet right every time, in part because he helped solve the city's biggest problems. In the mid-1970s he helped rescue New York from the brink of bankruptcy by convincing corporations to prepay their property taxes.

He beat back an effort by the President of the United States to abolish deductions for State and local taxes, which could have caused an exodus of businesses operating in the city.

He persuaded the U.S. Tennis Association to move within Queens, rather

than outside of New York. He gained landing rights for the Concorde, enhancing our stature as the business capital of the world. He helped expand the New York City Marathon to the five boroughs. Today, 30,000 athletes participate and millions watch around the world.

Lew worked with me recently to transform the dream of a Second Avenue subway into a reality, and he championed the cause of bringing the Olympics to New York in 2012.

Serving in various roles, Lew was a leader and member of a broad array of New York institutions, from North General and Lenox Hill Hospitals to Central Synagogue and Ford's Theater to Meals on Wheels and New York University. His enormous contributions to so many institutions made Lew Rudin an institution unto himself, and prompted the New York City Landmarks Conservancy to designate him a living legend landmark.

Anything Lew Rudin loved, he also served. An avid golfer, Lew founded First Tee, which was dedicated to bringing the game to the inner city. He knew how to get things done.

But as a third-generation American whose grandfather immigrated from Poland with only the change in his pocket, Lew did what he did mostly for ordinary New Yorkers: he fought to improve their quality of life, enhance the resources available to them, and to make a very special city all the more unique.

Lew Rudin left behind a tremendous legacy of visible accomplishments, but he is also responsible for all sorts of contingencies that never came true, crimes that did not happen, companies that did not leave, criticisms of New York that were not uttered because Lew's efforts made them invalid.

Tonight we honor Lew Rudin with kind words, but tomorrow we must honor his memory with good deeds. Mr. New York, we thank you, we miss you. May you sleep in heavenly peace.

Mr. Speaker, I include for the RECORD other eulogies and statements regarding Lew Rudin:

EULOGY BY DAVID N. DINKINS—FUNERAL SERVICES FOR LEWIS RUDIN CENTRAL SYNAGOGUE, NEW YORK CITY—SUNDAY, SEPTEMBER 23, 2001; 10:00 A.M.

Rabbi Rubinstein; Cantor Franzel; Rachel; Jack and Susan; Beth and Clift, Billy and Ophelia; Carlton and Kyle, Samantha and Michael; Eric and Fiona, Madeline and Bruce Grant, Kathy and Nancy; President Clinton; Governor Pataki; Senator Schumer, Senator Clinton; Mayor Giuliani; Governor Cuomo; and the many other family and friends here today to remember Lewis Rudin.

I have always looked upon Lew as a brother, and I am feeling an unspeakable sorrow at his passing. I ask your forbearance as I attempt to share my thoughts.

I am reminded this morning of two others who regarded each other as brothers—the great theologians and activists, Rabbi Abraham Heschel and Dr. Martin Luther King, Jr. It was Rabbi Heschel, author of the definitive text "What Manner of Man is the Prophet?," who was called upon by Coretta Scott King to eulogize her husband who, parenthetically, was later the subject of a fine biography by Lerone Bennett, entitled "What Manner of Man."

As the biblical reference that moved both Heschel and Bennett told us, the world is yet in awe of that manner of man who "even the wind and the sea obeyed" upon his command "Peace, be still." Rabbi Heschel and Dr. King have long since found their answers to the question, "What manner of man?" And today, we each have our own answers . . . with respect to the man, Lewis Rudin.

What manner of man is this that even the wind and the sea obey? Well, we know that our dear friend was a powerful man, though not perhaps so powerful that he could literally calm the wind and the sea. He did, however, have the power to calm an entire city in its times of storm and crisis. He not only had such power, he used it on every occasion that threatened his city's future. And he used it well. We will hear the truth of this often this morning, and rightfully so, for we are thankful for the strength, the wisdom, and the love that guided him in his mission here on earth.

What manner of man was Lew Rudin. Lew Rudin was a man whose name became known to every New Yorker. He was, as many have said and will always say, "Mr. New York." He earned that title. His extraordinary passion for his City and his spirit of public service will live on in our hearts as long as there is a New York. To Lew Rudin, New York City was more than a place . . . it was a people—a people whose struggles and joys, uniqueness and oneness, touched his heart and moved him to take on our burdens as his own.

What manner of man? Many knew what manner of man he was by his deeds. He was a moving force and guiding light behind so many of the things that have become part of the fabric of New York—the many buildings of the most famous skyline in the world; the New York City Marathon and its Rudin Trophy, born of a collaboration of Percy Sutton, George Spitz and Fred LeBow (it was Percy Sutton who introduced me to Lew); the USTA National Tennis Center (a result of the hard work done with then USTA President Slew Hester) and later the realization of Arthur Ashe Stadium (when David Markin and Judy Levering were President); the "Big Apple" and campaigns; and so many other things that make New York, New York.

Lew Rudin was always there, in times of joy and times of triumph,

leading the cheers for this City and making things happen. But, as we know now too well, all is not joy and triumph. And it was during times like these—the toughest of times—when Lew Rudin's "polished apple" shone brightest. He knew, as did Dr. King, that: "The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy."

It was Lew Rudin who stood with Abe Beame on the deck of what was then considered a sinking ship, and brought us in to a safe port. They refused to deliver up New York City to default. Instead, with the help of other faithful New Yorkers—Governor Hugh Carey, Victor Gotbaum, Felix Rohatyn, Barry Feinstein, Jack Bigel, among them—they weathered the storm of the most severe fiscal crisis this city has ever seen.

And, with a national coalition in which Senators Moynihan and D'Amato, Cardinal O'Connor, Jay Kriegel, and my other brother Charlie Rangel played pivotal roles, Lew went toe-to-toe with the President of the United States to fight off an attempt to abolish deductions of state and local taxes—a move that would have caused corporations to flee our City. It couldn't have been done without Lew Rudin. This City is, indeed, in his debt.

Lew Rudin was the heart of what has been called the "Naked City", a phrase all the more poignant in light of the events of September 11th. And he gave us so much more than magnificent structures and symbols. He gave us an unparalleled example of civic responsibility and commitment. And, man, do we need him now! In his final days, he was so proud of his fellow New Yorkers . . . of his City's spirit and resilience. He was proud of our resolve to rebuild our structures and reclaim our lives. He applauded the heroic efforts to rescue the missing, honor the dead and restore order to the City he helped to build, helped to save, and loved so dearly.

Lew Rudin was, indeed, a true friend to this City. And he remained a true friend to his dying day. And this he did because he had a deep and abiding commitment and caring for the people of New York. For all of the people of New York. So many times, Lew Rudin was the only white person in a sea of black and brown faces, whether occasioned by a time of conflict or a time of celebration. Without fail, the annual gathering of the One Hundred Black Men and the Association for a Better New York found Lew and Jack, Howard Rubenstein, Bob Tisch, Alan Tishman, Al Marshal, Burt Roberts and others in brotherhood with Bruce Llewellyn, Arthur Barnes, Roscoe Brown, Luther Gatling and Paul Williams. Lew always welcomed, and was always welcomed by all the communities of this City.

Lew Rudin lived his life according to very basic principles. He was heir to a family philosophy taught by his beloved parents, Samuel and May, that giving is its own reward . . . and giving of self is glorious. He shared that philosophy with Jack, and passed it on to his son Billy and daughter Beth. He gave his all to this City and its people, and gave of himself to many of us as individuals.

Those of us who had the great good fortune to know him as a friend and brother have been blessed to know intimately . . . what manner of man he was. Joyce and I will miss you, Lew. Our lives are so much fuller for having known you. You gave us the gift of your wisdom and humor, your counsel and your support . . . you gave us the gift of your friendship. And there is no greater gift. The City of New York is a better place because you were here. And we promise you, Lew, that we will not permit your City to remain buried in ashes. We will rebuild, we will restore, we will reclaim.

The death of Lew Rudin gives us reason to mourn. But his life gives us so much to celebrate. Lew Rudin has left us with more than memories—he has left us a rich legacy of his friendship, a legacy of caring, and a legacy of doing for others. It is said that service to others is the rent we pay for our space on earth. Lew Rudin departed us paid in full. Let him not look down and find any of us in arrears.

EULOGY BY IRA HARRIS—FUNERAL SERVICES
FOR LEWIS RUDIN

Louie . . . when Rachel & Bill called Monday and said you wanted to see all your friends I cried as I realized there was going to be no more golf games or early morning or late night phone calls. When you asked me to speak today I felt like I had just been given the greatest honor one could receive.

I want to talk about Lew Rudin, the friend that so many of us were so privileged to have. The guy with whom I spend so many good times on the golf course. The guy who had that great sense of humor. I remember the gleam in your eye when we found out the first time I played the Nabisco-Dinah Shore, that my celebrity partner was not one of the great sports heroes like Frank Gifford or Bobbie Orr, or a movie star like Kevin Costner, but you, "Mister New York". I gave you the needle when I told you that I was going to ask for my money back, but you then reminded me that I was a guest of RJR.

President Ford reminded me yesterday, when we were telling "Lew" stories, how Phil Waterman and I got even by telling everybody at the Ford tournament in Vail that Rachel had made a "hole in one" that day. Bob Barrett got you to pick up the whole bill in her honor at the party that night at the saloon in Vail. You never complained even when Rachel announced that she

had now conquered the game and was going to retire from golf. President Ford said playing golf with you was always a treat. He said to say thanks again for all your support over the years to both his and Betty's tournaments, and for being such a good friend to both of them.

It wasn't just presidents who loved and admired you, but it was all the pros and caddies too. Whatever tournament you arrived at it was always the same, the caddies crying out "Mr. Lew, Mr. Lew". They all loved you and it wasn't because they were impressed with your swing, but because you were you. . . . Then there was the time we were playing a tournament and you missed three shots in a row in the sand. You threw your club down, took out your cell phone and called your favorite pro at Deepdale, Darrel Kestner, to find out what you were doing wrong. Yes, Lew, I could go on all day telling Lew Rudin stories.

You loved to brag about your kids and grandchildren. They were so important to you. You left them the highest crown of life—a good name.

You never let your failing eyesight interfere with golf or anything else. Helen Keller was once asked if there was anything worse than losing your eyesight, she said, "yes, losing your vision." Louie, you never lost your vision.

Lew, I knew when you got to the first tee up in Heaven, Gray Morton was waiting for you. Just remember he's a lousy cart driver and don't give him any gimmes, he chokes on the short ones.

Until we tee it up again . . . I'll miss you.

EULOGY BY WILLIAM RUDIN—FUNERAL
SERVICES FOR LEWIS RUDIN

Good Morning,

On behalf of Rachel, Jack, Susan, Beth, Cliff, Carlton, Kyle, Ophelia, Samantha, Michael, myself and the entire Rudin Family we thank you all for coming. My dad would be upset that we are holding his funeral on Sunday, as he knows many of you have sacrificed your golf games to be here; he did not like to inconvenience people. But I know everyone here is very happy to make that sacrifice and be a part of the celebration of his wonderful life.

Dad, deciding where to seat people today was tougher than seating an ABNY breakfast. If you were here today, you would be looking out at this incredible audience made up your family, friends, co-workers, and the many leaders of business, politics, labor, media, not-for-profit and sports world, and the working men and women, like Alex his caddy and Jose his doorman, that gave as you used to call New York "Your Town" its energy and vitality.

It always amazed me how my father referred to a city of 8 million people, a melting pot of every race, nationality,

creed and religion as just "a town". He beautifully and poetically synthesized the capital of the world into a small town where everyone knows each other and works together to make "his town" a better place.

If my father was standing here today he would ask Mayor Giuliani, Governor Pataki, and members of New York's Finest and Bravest to stand up and receive our thanks and gratitude for what an incredible job they have done to pull this city together during these trying times. He would tell us, just like he did with Governor Mario Cuomo the day after bombing, what strategies we should be using to rebuild Lower Manhattan and then give us a pep talk on how that if we work together we can accomplish anything.

This morning you will hear from the other speakers about how my father and his brother, Jack, carried on the tradition, established by their parents, May and Sam, of building major office and apartment buildings in New York City. And then using that position and power to help his town.

You will hear how he helped save New York City several times from the brink of bankruptcy.

How he formed ABNY in 1971.

How he saved the United States Tennis Association from moving out of New York and how he and Jack helped start one of the world's premier sporting events. The New York city Marathon in 1976.

You will hear of Dad's golf exploits and how at The Bing Crosby Pebble Beach Pro-Am he was on TV for a half an hour having his famous golf swing analyzed by Ken Venturi.

How he loved his many calm, relaxing, quiet games of golf at his favorite clubs, Deepdale and The Palm Beach Country Club with his buddies, especially Burt Roberts, Ira Harris, Gene Goldfarb, Jack Callahan, and Jimmy Peters. Guys, he loved taking your money. For a man "almost" blind he could sure hit those 40 foot putts.

You will hear about his wonderful medical team at New York Hospital and his excellent private nursing staff who cared for him while he was ill and helped prolonged his life.

And I am sure you will hear about many other aspects of a very successful, powerful but caring man.

To his friends he was Lew, Lewis, Luigi, or Mr. New York. But to Rachel, Ophelia, Samantha, Michael, Kyle, Carlton, Beth and myself, he was just Pops. A man who would stop whatever he was doing, even when talking to a Mayor, Governor, major tenant or banker and stop to take our call to us give directions because we were stuck in traffic on the LIE and wanted to know a short-cut around it. He was a frustrated commissioner of transportation. His door was always open and he was always available to offer sage advice whether it be a lease negotia-

tion, refinancing, personal problem or a putt on the 7th hole of Deepdale. "Four inches outside the cup on the right and do not hit it too hard or else you will knock it off the green". Of course many times. I hit it off the green but the times I did sink the putt he would flash me one of those grins that a father has for a son he is very proud of. For Pops family came first and foremost. He loved and cherished his family and was very happy when we were all together.

Pops we will miss those impromptu visits to the apartment as you were heading between 3 cocktail parties and 2 charity, black-tie dinners you were going to that evening just to give your grandkids a kiss hello. Michael and I will miss our rounds of golf particularly with you and Burt. Well, maybe not with Burt. Even when tired from the chemo treatment, you were always there for your grandchildren, attending a performance by Samantha or going out to dinner just so you could be with all of us.

Rach, Mom, thank you for providing Pops with his only ever true home. He loved what you had created in Palm Beach, he truly relaxed down there. We will continue to cherish the memories of all the wonderful vacations and holidays we spent together. Thank you for sharing it with all of us.

Pops, know that we will take care of Rachel and the rest of yours and her family. Rach, or as he lovingly called you Dr. Gotsmacher, Pops was not the easiest patient but he knew you were always taking good care of him and trying to get him back on the golf course. Mom, we love you very much and we will never forget the joy and happiness you brought to Pops.

Fifi, that was Pops' nickname for my beautiful wife Ophelia. He loved you and knew you were always there for him for the last 25 years, as he was always there for you. He knew what an important part you played in my life, always giving me support and encouragement and giving me true happiness. Your love and dedication particularly during his illness and making him feel at peace with his decisions is truly remarkable. You helped him fight an incredible fight with will and determination, strength and guts that is a role model for us all. Fifi, as he would say looking up from behind his desk in the den at Palm Beach, with his glasses partially down on his nose, "Would you mind coming over and read the paper to me?" "Sure Popsical", she would respond, "What section would you like me to start with?" He loved you very much.

Beth, the other night as Dad's breaths were slowing, you hugged me and said I had big shoes to fill, I hugged you back and said and I know you will help me fill them. Pops relied on you and your wonderful sense of philanthropy, your special sensitivity

for finding and getting involved in causes not necessarily popular but very important such as AIDS, homelessness, child advocacy and substance abuse. He was very proud of you and loved you very much. He was especially glad to get to know Cliff and see you happy.

Samantha, Michael, Kyle and Carlton, Pops was very proud of you. Each very special in your own unique way, but connected by the same instincts inherited from Pops—compassion, caring, giving back, and each are blessed with the rare ability to bring people together and make them feel important and special—just as Pops did.

You Kids, are his true legacy.

Thank you Uncle Jack for always being there for Dad and us. Your brother loved you very much. Dad cherished your relationship for it was a truly unique partnership. He knows that he has left behind an awesome responsibility and weight on your shoulders; but know that I speak for your kids, our cousins, and Beth, John, Dave, Sidney and myself and the rest of the Rudin Management team, we will all help you carry on the Rudin tradition. The two of you were true role models on how a family business should be run—we will make you proud.

Thank you all at Rudin Management Company and at ABNY for all your support, dedication and love. Lewis cared for all of you and wanted to know he appreciated everything you did for him and his family. Last week I told him what happened downtown and how brave and heroic our men and women performed under unbearable circumstances. He was very proud of each and every one of you. He loved you all. He also wanted me to especially thank his personal staff and express words of gratitude to each of you. Saundra, Lori, Chris, Tammy, Antoinette, Horace, Mary, Maggie, Krista, Doris and Isabel, he could not have gotten through his busy day and accomplished so much without all of you.

Several people have asked me what will happen to ABNY now that Lewis is not here, the answer is simple, with the wisdom and experience of my father's generation, the energy and drive of my generation, the enthusiasm and optimism of our children's generation and the love and power that fills this sanctuary, we commit to you, Pops, that the ABNY legacy will continue and we will fulfill your vision for a better New York. I asked everyone here and throughout this great city, to help us fulfill Pops' mission and help us rebuild and renew Pops' town.

One of the reasons I believe my dad fought so long was so that he could see his beloved synagogue re-open. Two weeks ago today he participated in the rededication. This synagogue and its leadership is a role model for downtown. Thank you Rabbi Rubinstein for being such a good friend and leader.

For a man with limited vision, Pops had true vision. He was always looking to the future, whether it was the 2nd Avenue subway, new baseball stadiums, or bringing the Olympics to NY in 2012; his vision stretched throughout his town. For a man who talked to Presidents, Governors, Mayors and world leaders and pinned Big Apples on all of them, he related to every person of his town, black or white, rich or poor the same, with dignity and respect. Pops saw no color, he loved everyone. Although he ate at The Four Seasons and "21" he preferred a Sabrett hot dog with kraut and mustard and a cream soda from the hot dog stand on 51st Street.

Dad was the scientific model for multi-tasking. He was not truly happy unless he was in his office simultaneously in a meeting, signing leases, barking out to Lori to get the Mayor on line 1; while screaming on line 2 to Burt Roberts to be quiet and "So what if you were in the papers more than me today!"

He has gone in peace and left behind his "town" not just a little better but a great deal better than he found it—This is all he wanted people to remember him by.

Pops, I know right now you are already meeting with God to organize the Association for a Better Heaven, probably telling him to be brief because you have a tee-off time with your friend Gary Morton in an hour.

Moments after Pops made the transition to the next world the other morning, surrounded by his loving family, the phone started to ring. I looked around to everyone and said, "It must be Pops, he borrowed God's cell phone to let us know he got to Heaven safely."

We love and miss you Pops.

THE HISTORY OF NAFTA AND TRADE PROMOTION AUTHORITY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from Ohio (Mr. BROWN) is recognized for 60 minutes as the designee of the minority leader.

Mr. BROWN of Ohio. Mr. Speaker, I was a little disappointed a moment ago when my colleague, the gentleman from Virginia (Mr. CANTOR), spoke on this floor in support of the Trade Promotion Authority.

We all, including viewers of these proceedings, Members of Congress in their offices, Members of Congress that stop by and watch these proceedings, and others that tune into C-SPAN, see often Members of Congress simply talking about issues. They tell their side for an hour or 30 minutes, and the other side tells the other side, sometimes by party, sometimes by issue.

It is too bad that we did not get a chance today, as I would have liked to,

to engage in a discussion as my colleague from Virginia began on his side a discussion of NAFTA and what the North American Free Trade Agreement has meant to this country.

There is so much to talk about with the North American Free Trade Agreement. While that passed back in November of 1993, my first year in this institution, and took effect in January of 1994, a couple of months later, what has happened with the North American Free Trade Agreement is very, very significant in this body today. That is because on Thursday the issue my friend, the gentleman from Virginia, was just talking about, the Trade Promotion Authority, which used to be called Fast Track until Fast Track became so singularly unpopular a term, after this body had defeated Fast Track not once but twice, in fact, in the late nineties, nonetheless, President Bush is bringing back Fast Track in a new cloak, only a new name, not much different, called Trade Promotion Authority. Trade Promotion Authority mostly is simply about taking NAFTA and all of its pluses and minuses and extending NAFTA to the rest of Latin America. I think that most people in this country, if NAFTA came to a vote, would say, I do not think we really want to expand NAFTA to the rest of Latin America, the President's flowery words notwithstanding and the flowery words of my friend, the gentleman from Virginia (Mr. CANTOR), notwithstanding.

Mr. Speaker, the issue of NAFTA can be encapsulated in a story that I would like to tell. Back when Congress in the late nineties considered expanding NAFTA to the rest of Latin America, considered what was then called Fast Track, now granting Trade Promotion Authority to this President, I, at my own expense, flew to McAllen, Texas, rented a car with a couple of friends, and went to Reynosa, Mexico, to see what the face of the free trade future looked like; how was NAFTA working, since it had been 5 years or so; and how were people in Mexico doing under NAFTA.

I went to the home of two people who worked at General Electric, one of America's and one of the world's largest corporations. They were a husband and wife, and lived in a shack not much bigger than 20 feet by 20 feet. This shack had no running water, no electricity, a dirt floor. When it rained hard, this floor turned to mud.

Now, these were two people who worked at General Electric at 90 cents an hour, they each made, 3 miles from the United States of America. Behind their shack was a ditch about 3 feet wide. Across that ditch was a 2-by-4 people could walk across to get to shacks on sort of the next block, if you will.

This ditch, flowing through this ditch was some kind of effluent. It

could have been human waste, it could have been industrial waste, and likely it was both. Children were playing in this ditch. The American Medical Association, the Nation's doctors, called the border along the United States-Mexican border a cesspool of infectious diseases. They claimed that this area is perhaps probably the worst place for infectious diseases in the western hemisphere.

□ 2115

Now, when you visit the colonias where these Mexican workers, almost all of whom work for major American corporations, where in this country those workers are paid \$15, \$10, often \$20 an hour working under generally safe working conditions protected by government regulation that keeps these workplaces safe, generally those companies dispose of their industrial waste into the air or into the water properly, so it does not pollute in the neighborhood very much. All of those companies in Mexico tend not to follow these rules. They tend not to install worker safety regulations and worker safety protections in the workplace. They tend not to dispose of their waste properly for the healthy well-being of their employees and the neighbors. Of course, the wages are one-tenth, one-fifteenth, one-twentieth as much, 3 miles from the United States.

As you walk through these neighborhoods, these colonias, you usually can tell where the worker works because their homes are constructed, the roofs and walls, the homes are constructed of packing materials that come from the companies where they work. They unload equipment. They unload supplies. They unload components from a supplier and they take those boxes home. They might take boxes from General Electric or General Motors, wherever these companies are, wherever these employees work, they might take those boxes home. They might be wood crates, whatever, and they construct their homes with these crates and boxes and packing material.

As you walk through the colonias in these neighborhoods where the husband and wife are both working 10 hours a day, 6 six days a week for big American corporations, making 90 cents an hour, they live in shacks with dirt floors, no electricity, with no running water, shacks made of packing materials coming from the company where they work.

This is the picture of the free trade. This is the picture of the future under NAFTA and a picture of the future under extension or expansion of NAFTA to Latin America through the Trade Promotion Authority proposal.

FOOD SAFETY

Mr. BROWN of Ohio, I would like to talk a little bit about food safety tonight, because one of the things I learned as Congress has passed NAFTA

in 1993, I think not a good reflection on this body, but nonetheless Congress passed NAFTA in 1993, what I found interesting about food safety is under NAFTA one of the things that has happened with food safety and with trade law is that pesticides that we have banned in this country, a chemical company might make something like DDT; it is still legal to make the pesticide in our country, it is simply illegal to apply those pesticides to fields in our country or to gardens or to lawns or anything.

Certain pesticides that are banned are banned for use in this country, but American companies still make pesticides and they export some of them to Mexico. So when we buy strawberries and raspberries from Mexico, in many cases those strawberries and raspberries would have had applied to them pesticides that are illegal in this country to use, but were made in this country and exported to those countries for their farmers to use.

Many of those farms are owned by large companies where there is not high regard for the workers' health, where there is not high regard, frankly, for the end product in terms of its safety for consumers' dining room, breakfast room tables.

So what happens, Mr. Speaker, is so often a pesticide will end up sold to Mexico, made by an American company, applied by dirt-poor, underpaid farmers, barely making a living, jeopardizing their health, because putting these pesticides on the land is every bit as dangerous, if not more so, because of the amounts they use, the volume they use, perhaps more dangerous than the ultimate consumption of those fruits and vegetables.

Mr. Speaker, after the pesticides are produced in the United States, sold to Mexico, applied on food, to strawberries and raspberries in Mexico, those fruits and vegetables are then sold back into the United States. And, frankly, it is pretty certain that pesticide residues are still on those vegetables or strawberries and raspberries and other fruits. So rest assured, in some cases as these fruit and vegetables come across the border, generally dismantled by the Gingrich years in this congressional body, our food safety and food inspection measures at the border are so weakened or so unsubstantial, if you will, that this creates some danger for American consumers.

In fact, it is three times more likely that fruits and vegetables in the United States, imported fruits and vegetables are contaminated, three times more likely contaminated than those grown in the United States.

Instead of our passing trade laws that say we do not allow these pesticides in our country, we will buy your fruits and vegetables but you are not going to allow those pesticides to be used either, we do not do that. We simply say come on in, bring them in.

Let me talk about food safety and what is happening. In 1993, 8 percent of fruits and vegetables coming into the United States were inspected at the border. Today that figure has dropped to one-tenth that amount. Seventenths of 1 percent of fruits and vegetables coming into the United States are inspected at the border. That means, if my math is right, that means for every 140 truckloads of broccoli, one truckload is inspected. For every 140 crates of broccoli, 1 crate is inspected. For every 140 bunches of broccoli, 1 bunch is inspected.

That does not bring a lot of confidence to the American public, the consuming public, the eating public, if you will, as we eat the fruits and vegetables coming from these countries.

When I went to the border, and I am joined by my friend, the gentlewoman from Ohio (Ms. KAPTUR) who is one of the premier experts in this Congress and in this country in agriculture. She is the ranking Democrat on the agriculture Committee on Appropriations. She knows food safety in and out.

Before I yield to her, I want to tell another story about that same visit to Mexico where I stood at the border and watched the inspection of broccoli. I mentioned broccoli earlier because it is so in my mind from watching this inspection.

The FDA inspector who was doing his job, doing his best, he in those days was inspecting 2 percent of vegetables coming in. Since then, because of budget cuts that this Congress continues to do on public health issues and public safety issues, and nothing is more important to public health and public safety than a clean food supply, he was inspecting 2 percent then, it is one-third that amount now, about .7 percent.

He took a crate of broccoli off a truck, put it down next to him, took broccoli in his hand, took a bunch in each hand and slammed it down on a steel grate and was looking for pests, for insects to fall out of that broccoli, presumably dead or alive insects. If there had been insects that were alive that fell out, he would have put the whole truckload into a machine that would have sprayed the broccoli to make sure any of the pests were dead. If the pests were already dead, I am not sure what he would have done.

The FDA has only 750 inspectors, spends \$260 million to scrutinize 60,000 food plants, inspect 4½ million imported food items each year.

As I said, in 1993 when NAFTA was passed, 8 percent of fruits and vegetables were inspected. Today that number is down to .7 percent, seven-tenths of 1 percent of fruits and vegetables are inspected.

We do not have the equipment on the border to check for E. coli. We do not have the equipment on the border to check for microbial contaminants. We

do not have the equipment on the border to check for pesticide residues. You cannot hold broccoli and you cannot hold strawberries at the border for 2 weeks until the lab tests come back. So basically our food inspections at the border simply do not work right.

Now, Mr. Speaker, today we had a news conference to discuss this, and I want to mention one more thing before I yield to my friend, the gentlewoman from Ohio (Ms. KAPTUR).

The executive director, Mohammed Akhter, a physician, is the executive director of the American Public Health Association. He said in no uncertain words that fast track Trade Promotion Authority will undoubtedly mean more fruits and vegetables into the United States and a smaller and smaller percentage of those fruits and vegetables inspected. There is no doubt, because we have passed NAFTA on the cheap. We did nothing for truck safety, nothing for food safety, nothing for drug interdiction when we passed NAFTA. As traffic and congested increased 4 times, 400 percent along the border, we did nothing to prepare. There is nothing to prepare in the Trade Promotion Authority that the President is asking for to prepare for food safety inspections. We still are not doing our job. Especially the director of the American Public Health Association, the highest-ranking public health official in the country is saying that passage of Trade Promotion Authority, in his words, will mean more unsafe food in the United States, more outbreaks of disease, more infectious disease in the American people.

Last year 5,000 Americans died from food-borne illnesses, not all of them from imports to be sure, but it is three times more likely imports cause disease than locally grown produce. Not that we do not need to do better in both; 5,000 people died of food-borne illnesses, 80,000 people went to the hospital from food-borne illnesses; 300,000 people were sick from food-borne illnesses.

That is something we should not be proud of. Those numbers are going up more every single year. Those numbers will keep going up. In the words of the executive director of American Public Health Association, those numbers will just sky rocket if we pass Trade Promotion Authority, simply because we are not prepared at the border to do what we need to do to preserve food safety for the American public.

Mr. Speaker, I yield to the gentlewoman from Toledo, Ohio (Ms. KAPTUR), who has been to Mexico, who has seen all of these food safety issues. She, I believe, will talk about some other things with Fast Track also. I yield to my friend from Lucas County, Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Speaker, I want to thank the gentleman from Ohio (Mr. BROWN), the very able Member from

the Lorain, Ohio region, for asking me to join him in this Special Order this evening. I do not want to consume an undue amount of his time, and want to say that we are a better country and world because of his involvement and leadership on this issue in the area of trade, jobs, the betterment of the working conditions of America's workers and workers around the world. It is my great pleasure to join him this evening.

I am reminded of the former Governor of Texas, Ann Richards, who used to always say, "You can put lipstick on a pig and call it Monique, but it is still a pig."

In thinking about what is called Trade Promotion Authority, I am reminded of the trade debates we have had here in the Congress where the administration always changes the name. We know it is Fast Track. They tried to do that to us before where they bring a trade measure before the Congress and we have no opportunity to amend it. Through the Committee on Rules, they take away the constitutional rights of this Congress to amend and to involve itself in trade-making. It is right in the Constitution. Pick up a copy of it and read it.

So Fast Track basically handcuffs the Congress of the United States and takes away our constitutional power to make the trade laws for this Nation, because it says any president can negotiate an agreement with 59 other countries and not have to negotiate with us. Just bring it up here and try to fast track it through.

So when that ran into trouble, and the gentleman might recall this, when we became involved with China, they could not call it Fast Track. They had something called Most Favored Nation. They could not use Most Favored Nation, so then they changed the name. They said we will call it Normal Trade Relations with China. Well, no relations with China are normal. We are not dealing with a country that even recognizes any democratic rights, no worker rights, no religious rights, corruption at every level, state-owned companies, prison labor. And they want to have normal trade relations. So they changed the name.

Now we are back to, we had the North American Free Trade Agreement, NAFTA; like a treaty, and we were not allowed to amend. It was either up or down inside here, and I will talk about that in a second. Now they are talking about this Fast Track agreement for all of Latin America, not just Mexico, but adding Brazil and Argentina and a lot of other countries; but they do not want to call it Fast Track. No, we cannot call it what it really is. No amendment by Congress to a trade agreement negotiated by the President. We are going to call it Trade Promotion Authority. That sounds like homogenized milk. Who can be against that?

Mr. BROWN of Ohio. Reclaiming my time, it is interesting that they have done that, because even though almost every newspaper editor, most of the large newspapers have supported all of these free trade agreements, because they are very conservative and very close to many corporations, and all the reasons newspaper editors do. And even with all of that and the President being for it and the business leaders being for this trade agreement, even with all of that, the American public clearly oppose NAFTA, clearly oppose Most Favored Nation status with China, clearly oppose what we do in the World Trade Organization, clearly oppose Fast Track.

Each one of these issues the public opposes. So as the public builds its understanding of these issues, they always, as my friend from Toledo points out, they always change the name. So Most Favored Nation status became PNTR. What is that? Fast Track Authority became Trade Promotion Authority. What is that? So they continue to try to confuse the public, and the public always catches up and understands it. You can bet 3 years from now when they are trying this again after we defeat it on Thursday, they will try it next year and the year after. They will come up with a new name because Trade Promotion Authority will not be a very acceptable name to the public.

Mr. Speaker, I yield to the gentlewoman from Ohio (Ms. KAPTUR).

□ 2130

Ms. KAPTUR. Mr. Speaker, that is correct and the reason that the public does not support any of these is because they have been hit directly. That means they have lost their jobs.

In this country, ask the Brachs Candy workers in Chicago where their jobs are moving, already to Argentina, because of the way in which sugar is produced in Argentina, and Brachs uses a lot of sugar. So they cannot have farmers producing sugar, and the gentleman from Ohio (Mr. BROWN) talked a lot about foreign policy in agriculture; but because they can have plantation style sugar production, where workers earn nothing, where there are no environmental standards, where one does not have to dispose of field waste in an environmentally responsible way, and then companies like Wal-Mart, the largest purchaser of Brachs Candy, can set the price it wants.

That is what is going on in the world. Ask the workers at Phillip's Electronics in Ottawa, Ohio, whose jobs are being moved to Mexico; ask the workers at Fruit of the Loom in Mississippi. One can go State by State, region by region; and one can see the outsourcing of manufacturing and of agricultural jobs in this country, and it is the reason that the census bureau and all the income statistics that have just come out have shown that the wages of ordi-

nary Americans for the last 10 years have not risen. When one discounts for inflation, people have been running in place and falling behind and losing their benefits, as the workers at Enron just did as it went bankrupt this week and they lost their 401(k) plans and lost everything that they had worked for.

This trade regime that has been set in place, that disempowers this Congress to represent our constituents has produced an economic policy that is drumming down the middle class in this country and forcing people around the world to work for almost nothing.

I would be pleased to yield.

Mr. BROWN of Ohio. As my friend, the gentlewoman from Ohio (Ms. KAPTUR), says, the biggest reason that wages have been stagnant in this country, understand for the 10 or 20 percent on top, salaries have gone up, but for most of the public, in the last 10 years, at a time of supposed economic growth, wages have not risen; and one of the major reasons for that is that company after company after company simply threatens to go to Mexico or threatens to go to Haiti or threatens to go to Honduras or threatens to go to China; and workers then are much less likely to demand wage increases, and in many times, many cases will give due wage give-backs so the company will stay there.

York Manufacturing in O'Leary, Ohio, was faced with threat after threat after threat of moving production to Mexico. Their wages stagnated for several years. Even then finally the company closed, moved part of its production to another place in the United States and most of its production to Mexico. So those wages were stagnant for several years, then the factory was closed and the wages became zero.

Ms. KAPTUR. Mr. Speaker, I hope that every worker in America who has lost their job because of one of these trade agreements will write the gentleman from Ohio (Mr. BROWN) or myself, will tell us who they are because we are going to keep a list of who they are because there are now millions and millions of Americans who have been hurt by these misguided trade agreements.

I heard some of the prior speakers saying how great this would be for trade and it is going to create all these great exports and cheap imports, and the truth of the matter is that is not happening either way.

First of all, in terms of exports, take Argentina and beef. Argentina now exports more beef before this authority even voted on, and wait until after it is passed, than we export to them. We are already a net importer of beef from Argentina.

Mr. BROWN of Ohio. In China, during the PNTR, remember, the Most Favored Nation Status that we talked about, they changed it to Permanent Normal Trade Relations to confuse as

many people as possible, during that debate the administration promised, the supporters and the Republican leadership and others here promised, that American farmers would sell grain to China. They said China only had, if I recall, some 12 or 13 million metric tons of grain in their storage facilities in China; they would be importing grain.

What happened? Well, they actually had 50-some million metric tons of grain stored in China, and China since PNTR passed is now known to be a grain exporter. So every time we have a trade agreement, the agriculture community, family farmers like the Snyder family in Richland County where I used to work as a kid on a family farm, family farmers like that are promised that they are going to be able to export more grain, they are going to be able to export more fruits and vegetables all over the world because these trade agreements create all kinds of new markets.

The fact is, rarely, if ever, does American agriculture benefit. Some of the big American grain companies benefit, but almost never do family farmers benefit, whether they are corn farmers, whether they are tomato farmers, especially if they are tomato farmers, winter vegetable farmers, fruit and vegetable farmers in Florida where the price of tomatoes went up and Mexico has increased their tomato production exports to the United States and American farmers have gone out of business and Americans are paying more for tomatoes.

So we get it three ways: we lose jobs, prices often go up, and small farmers, even in Mexico, are put out of business, also.

Ms. KAPTUR. The gentleman raises an excellent point; and if there are farmers listening to us this evening, this Member of Congress' opinion is that the answer for increasing income to America's farmers does not lie in the export market. Rather, it lies in recapturing the market that we have lost here at home and moving our production to higher value-added products, including the production of new fuels.

If one looks at what is going on in Minnesota, with the corn growers in Minnesota, they have raised the price they are getting per bushel by the production of ethanol in southeastern, southwestern Minnesota by one dollar. In other words, they are at a low per bushel cost, about a \$1.65, which is lower than we have in Ohio. They have actually added a dollar, not through exports, but through producing for the people in their own State; and we have to look toward new uses of agricultural product by our consumers here in this country; and we here at the Federal level, including our Department of Agriculture, our Department of Energy, have to help our farmer reposition in an international marketplace in which

they have been forced to become the low-price producers, and they are not able to make ends meet.

They have got it backwards. We ought to be helping our farmers here at home invest here in order to recapture new markets in value-added markets here at home. And I wondered if I just might put some facts on the record because they are so staggering they often get lost in the debate, but they are important to talk about.

Let us talk about Mexico, and a lot of us were here and fought against NAFTA. It actually broke my heart because I knew how many people would be displaced here at home, and in Mexico; the wages had been cut in half. They had been cut in half. So one can ask who is making the money off a system where workers like Phillips workers in Ohio, thousands of them, lose their jobs and those jobs are moved to Mexico and the people down there, their wages have been cut in half. So who is making the money off this? That is the real invisible hand. That is the invisible hand that we need to identify.

If one looks at the U.S. trade balances with Mexico, prior to NAFTA's passage, the black bars represent trade balances, we had a trade surplus with Mexico. That means we sent them, sold them, more than they sold us. The minute NAFTA was signed, our trade balance began to turn into trade deficits. That means they are selling us more than we are selling them. That is a negative on the international trade ledger; and it is a very, very serious one.

I wanted to point out a couple of other points. It is not only a deficit. It is a growing huge deficit. Prior to NAFTA's passage in 1993, we had a \$51.7 billion surplus with Mexico. That has now turned into a \$24 billion annual record deficit. With Canada, which was also a party to NAFTA, we had before NAFTA a problem already. We had a \$10 billion trade deficit with Canada. Guess what, since NAFTA passed we have a \$50 billion trade deficit with Canada, the worst in the history of this continent.

So NAFTA has really had a reversal of fortune for our country and in one very important sector, and I just want to look at the automotive industry for a second. They said this would be just terrific for jobs in America; we would create all these jobs. What we are doing is parts are being sent down to Mexico from this country, things are being done to them, they are being stamped, they are being bent, they are being this and that. They are put in cars that are sent then from Mexico to the United States. So prior to NAFTA's passage, we already had a stream of production where production was being relocated from our country not to sell cars to Mexico's consumers, because they do not earn enough to buy them,

but they back-doored the production into Mexico in order to pay the workers almost nothing and then send those cars up here.

In fact, the most popular car, the PT Cruiser, PT Cruiser costs about \$10,000 to make. Not a single one of those PT Cruisers is made in the United States of America. Every single one of them is made in Mexico, and when one goes down to Mexico, how many Mexicans do we see driving PT Cruisers? We do not see any. Why? They cannot afford them. They are sent up here, and the amount of automotive trade has just tripled between Mexico and the United States. Those are jobs that used to be here. They are now being made in Mexico, and our trade deficit in automotive has just exploded.

What it is, it is the relocation of production. So that is NAFTA, that is Mexico, and Trade Promotion Authority. We are going to see the same with Brazil, the same with Argentina, any country simply because they do not have systems of governance, and their economic systems are not developed in a way that ordinary working people can benefit from this kind of investment.

Mr. BROWN of Ohio. Mr. Speaker, would the gentlewoman yield about autos for one second?

Ms. KAPTUR. I would be pleased to yield to the gentleman.

Mr. BROWN of Ohio. Mr. Speaker, I heard the gentlewoman say many years ago, before I made my first trip to Mexico to look at sort of what was happening in these industrial plants, that when one goes to Mexico and went to an auto plant where Mexican workers are making 90 cents an hour, roughly, that when one visited a Mexican auto plant it looked a lot like an American auto plant.

I remember the gentlewoman from Ohio (Ms. KAPTUR) said this years ago, that for the first time, that its technology was up to date; the plant sometimes was even more modern than American plants, they are newer; the workers were productive, they were working hard and the floors were clean. Everything looked just like an American auto plant except for one thing: the Mexican auto plant did not have a parking lot because the workers could not afford to buy the cars.

One can go all the way around the world to Malaysia and go to the Motorola plant, and the workers cannot afford to buy the cell phones. One can come back to the New World, to Haiti and go to a Disney plant and the workers cannot afford to buy the toys or one can go back to China into a Nike plant and the workers cannot afford to buy the shoes.

The tragedy of these trade agreements is that workers are creating wealth for large corporations, and they are not sharing in the wealth they create. They are paid barely enough to

live on. They will never be in the middle class, and as the gentlewoman from Ohio (Ms. KAPTUR) said, they will never be able to buy American products. That is why the arrow always goes one way.

We send industrial components to Mexico. As a friend of ours, Harley Shaken, an economist in California, pointed out, they are industrial tourists. These components go from the United States to Mexico, almost like a San Diego teenager going to Tijuana for the weekend. The components go to Mexico for a couple of days; they are industrial tourists. They get assembled into cars and they come back into the United States. Everybody except for the large company loses. American workers lose their jobs; Mexican workers are paid subsistence wages and can never get off the bottom.

Ms. KAPTUR. The gentleman raises an excellent point because those are not real exports. They are U-turn goods. The gentleman is right. They are industrial tourists. They do not really create real wealth. They are merely there to try to exploit cheap labor, and this is happening all over the world, and the American people know it intuitively because when they go shop, it does not matter what one buys, it is all made someplace else.

In fact, trying to find something made in America is now an exception, rather than the rule; and that is draining out of our economy in a very invisible way to the ordinary person's experience the money that should be there for health benefits, the money that should be there for retirement benefits, the money that should be available in local regions to support the construction of schools, all these tax abatements that are being handed out left and right in all the 50 States to try to attract some of this investment that is moving to other locales around the world. They are not paying their fair share of property taxes and of taxes for education and all of the sudden education is being Federalized simply because local regions do not have the money to pay for the schools.

There are lots of costs for what we are seeing; and one of the biggest costs is America's image abroad, and let me give one example. Recently, I had a most compelling set of visitors in my district from the nation of Bangladesh, one of the poorest nations in the world, with over a hundred million people; and these were women workers. They did not speak English, but they came with a translator, and what did they do? Every hour, each of them makes 320 hats, ball caps and T-shirts, for places like Ohio State, the University of Michigan, all of our Big 10 schools, all these football teams and all around our country. For each hat that these women make, they are paid one and a half cents.

When those hats land in the United States, according to U.S. customs

forms, the total cost of the material, the labor and the transportation is \$1.

□ 2145

The average cost of one of those caps at any one of our universities is over \$17. So you ask yourself, who is making the money?

And what is going on with this kind of system is that the very big investors around the world, and they have always been there, it was true for women in the textile industry from the time of the Lancashire Mills in England, investment moves to an area where they can access cheap labor, and it is up to those in political life to hold them accountable for the communities in which they exist. They have no automatic right to be here. We allow them in our system to be here, and they had best respect the political system we have created because it is not continued by magic. It is continued because of the set of values and beliefs that we hold as a people.

With a nation like China with over 1.250 billion people, and we only have 270 million people in this country, when there is this kind of trade deficit, and that is what this chart represents, U.S. imports from China exceed our exports there by 6 times, by 6 times, the amount of trade deficit in any 1 year that we are amassing with China is over \$50 billion annually. That is \$50 billion that is escaping communities in this country, workers' paychecks, workers' benefit checks, the taxes that would go into supporting our educational system, and it is getting worse.

The trade agreement that was signed with China has not made our trade accounts improve. They have only gotten worse every single year. So whether it is Mexico, whether it is China, whether it is Bangladesh, whether it is Argentina, it does not matter. The system is the same system.

I hear President Bush talk a whole lot about evildoers. People can be evildoers, but also economic systems and political systems can be evildoers. They can do harm in a very, very real way. Those women from Bangladesh came to my community and told me that they had to work 7 days a week, these young girls, 18, 19, and 20 years old. They would work 12-15 hours a day, sometimes 20 hours a day, sometimes 48 hours straight because they had to meet their production quota or their company would lose its contract. They would literally curl up and sleep under their sewing machine for 2 or 3 hours, and then they would get up and sew again. None of them were beyond the age of 29, and one girl was fired because she got a gray hair and they said, she is getting old, get rid of her. They are treated like dirt.

This is not the image that I want our country to portray internationally. And to most Americans, these are hid-

den activities that they never get a chance to see. But I hope retailers, some of whom are listening tonight, please, develop some conscience. Your actions have consequence. There is a moral order here that we ought to uphold. And the economic system that you are a party to does not treat people with respect. It is not just commodities you are buying, you are buying a chain of production, and there are people at every juncture along the chain, and the invisible hand should not be invisible any more.

If I might, I wanted to share again a chart here that shows the long history of our country and what has been happening with these trade deficits year after year after year, lopping probably about 25 percent off of our economic prowess in any given year because of the extent of it, over \$300 billion. And back in, oh, 1974, and then moving into the 1980s, we began to move into deficit cumulatively with all these countries, and it has gotten worse and worse and worse every single year.

Now, some people talk about the budget deficit, where the amount of tax revenue that we take in as a country is not enough to pay for all our bills, our defense expenditures, our Social Security, and all the other things we have to pay for. Well, there is another deficit, and that is the trade deficit. It is not talked about a whole lot, and people often confuse the two, but the trade deficit is another number that is terribly important. Because when we have this deficit, how do we finance it? When other countries and companies make money off this marketplace, where do they put those earnings? They have been buying the U.S. Government debt.

When I first came to Congress, 12 percent of our debt was owned by foreign interests. In other words, every year we would have to pay them interest on the loans that they would make to us. Today, that has gone up to 42 percent of our Federal debt is owned by foreign interests. And every year we have to pay those interests, over \$300 billion a year now, to pay for their loans to us.

So for the younger generation, this is not a stable situation in which to leave the Republic. If anything goes wrong in the international marketplace, collapse in Japan, collapse in Germany, whatever might happen in terms of the economy, the question becomes: Where are other investors going to be putting their money? How secure is the United States? Politically, yes, we are very secure; but economically we have some pretty big gaping holes in our hull and we best take care of it.

I think that people like my colleague, the gentleman from Ohio (Mr. BROWN), and myself, those who will oppose us this week will say, well, you are not for trade. That is absolutely wrong. That is not even the issue. Those people who do not want to talk

about the real issue will say that against us. But, in fact, we represent the northern part of Ohio. There is no part of America that trades more and is more dependent on free enterprise and the free market than northern Ohio, because we are heavily automotive, we are heavily agricultural, we have major ports, seaports, we have 24-hour-a-day air service out of our communities. We are the major spine of industrial America and also the crossroads of the Midwest.

Seventy-four percent of the American population is within a day's drive from my district alone. We are centrally located in our country. We must trade. But we want to trade in a system that respects democratic rights and freedom and the right of ordinary people to better themselves by the work that they do.

Mr. BROWN of Ohio. I thank my friend from Toledo. What she said about trading with democracies is so very important.

Last year, during the debate on Most Favored Nation status with China, what was euphemistically relabeled PNTR, executives and CEOs who normally do not bother with workaday Members of Congress, they normally only go to the leaders in each party, the Speaker, the minority leader, whatever; but CEOs were roaming the halls of Congress and repeating the mantra, we want access to China's 1 billion consumers; we want to sell our products to China's 1 billion consumers. But what they really cared about was access to China's 1 billion workers, who could work and sew those Ohio State baseball caps and those T-shirts from the University of Toledo or from Oberlin College or wherever. They wanted access to those workers who would work, had no choice really, would work for a few cents an hour.

In the last 10 years, and the gentlewoman from Ohio (Ms. KAPTUR) mentioned buying products, trading with democracies, what has happened in the last 10 years is western investors, investors from France and England and Germany and the United States and Canada, they are not very interested anymore in investing in democratic developing countries, countries that are struggling but that are democratic and developing, still pretty poor but democratic; they are interested in trading and investing in developing authoritarian countries.

In other words, they are not all that interested in Taiwan anymore, because Taiwan, again on Saturday, had a free election, perhaps the third free election in Chinese history. So Taiwan is clearly a working democracy. It is successful. They have done all kinds of great things. One of the great success stories in the world in the last two decades. They are not so interested in investing in Taiwan, but they are much more interested in investing in Singa-

pore because they have a totalitarian government there.

They are not much interested in investing in India, but they are very much interested in investing in China. Why? Because China's workforce is docile, it does not talk back, it is an authoritarian country with no democratic elections, with no ability to speak out, with no ability to change jobs, and with no ability to organize a trade union.

And that is really why the World Trade Organization, which once met in Seattle in 1999 and had all kinds of demonstrations and all kinds of people speaking out in opposition to these policies, that is why they went to a city called Doha, the capital of a country called Qatar. The trade ministers decided enough of this openness, enough of this freedom, enough of this people assembling and protesting and speaking out and having elections. They went to a country where they like to practice their business. They went to a country with no free elections; a country without the freedom of religion, unless you are publicly a Muslim, you are not allowed to worship any other religion; with no freedom of assembly; with no freedom of speech; with no free elections; with no freedoms at all that we are used to.

That is really what our trade policy has turned into. Our investors want to go to China where they have slave labor, where they have child labor, where there are no elections, where their workers are docile and do not talk back, rather than going to a free country where workers organize, where the environment might be protected, where worker rights are protected.

That is why many of these countries leave the United States to go to China. In this country, they pay a Social Security tax. That money is gone when they go to China. They pay into Medicare. That money is gone when these jobs go to China. They have to keep the environment clean in their businesses here. Do not have to do that in China. They have to pay living wages in this country. They do not have to do that in China. They have to have worker protections in the workplace. They do not have to do that in China.

Why are companies investing in China rather than staying in the United States? Why are they investing in China rather than India? Because India is a democracy, China is not. Why not in Taiwan? Because it is a democracy, Singapore is not. That is why it is so important that we in fact support trade.

My colleague and I both support trade, the gentlewoman from Ohio (Ms. KAPTUR) and myself, and so do all of us that are against Trade Promotion Authority. We promote trade, we support trade, we advocate trade, but we want to see trade with democratic countries where workers can share in the wealth

they create. Not a place like China, where the workers at Nike cannot afford to buy shoes; not a place like Haiti where the workers at Disney cannot afford to buy the toys they make; not a place like Malaysia, where the workers for Motorola cannot afford to buy the cell phones they make.

We want workers to share in the wealth they create. They will then join the middle class and buy American products, and we will see both countries raise their living standards. That is what trade is all about.

Ms. KAPTUR. While the gentleman was talking about democracy and about trying to have a trade regime that uses the power of the democratic republics of the world and the free enterprise systems with the rule of law that have developed over two centuries, and then invite in the nations that would wish to advance, to have a system that would use the strength of the democratic republics and bring the others forward rather than pit them against one another, which is what is happening now, I could not help but think of one of the opponents who often comes to the floor and speaks against the gentleman from Ohio (Mr. BROWN) and myself, who usually says, well, we have got to trade because trade brings freedom. Trade brings freedom.

They use that phony argument. And I say, yes, we can have free trade among free people, but if we look at what is happening in the Middle East right now, there is not any set of nations that we have traded more with as a country than Saudi Arabia, Kuwait, and the United Arab Emirates. Why? Because we are totally and stupidly dependent on imported petroleum.

Now, if trade had brought freedom, they would have the most lively democracies in the world. But trillions and trillions of our oil dollars, every time we go to the gas pump and we buy petroleum, we buy gasoline, half of the money we spend goes offshore to places like Saudi Arabia and Nigeria. And now they are drilling in Sudan.

Mr. BROWN of Ohio. Right. Trade and economic activity did not bring freedom to Nazi Germany, to Fascist Italy. It has not brought freedom in any way, all the trade and supposed prosperity, to Communist China. And, as my colleague points out, it has not brought freedom to the Middle East, where we have all kinds of economic exchanges back and forth with Saudi Arabia.

Ms. KAPTUR. I have a story I want to put on the record. I know President Bush is very high in the polls, and I suppose one would be struck by lightning if they were to try to say anything that presents a different truth, but I have to present that truth because I personally experienced it.

As my colleague knows, a few months ago, before the terrorist attacks here in our country, President

Bush brought the President of Mexico to my district, the Ninth District of Ohio. And one of the reasons he was brought in there was because, I am sure, President Bush would like to learn more about why people in our region, just like people in every region of America, oppose these trade agreements. So he brought in President Fox, and I had a chance to ride out there on Air Force One with both Presidents and had a chance to talk to them.

I had asked the White House, and I presented President Bush with a letter on the airplane confirming what I had called about, saying, you know, Mr. President, you and I do not agree on NAFTA, and many, many, millions of people have been hurt by NAFTA.

□ 2200

But we have to figure out a way to improve it and to make it better. I would be willing to travel with you from any point in America where jobs have been lost to the places in Mexico where those jobs have been transplanted, and to talk to the workers in both locations with both Presidents and with Members of Congress and to try to figure out how do we work together as a continent in order to treat workers with the respect they deserve, whether in the industrial workplace or the agriculture hinterlands.

When we got on the airplane and he talked to us, I said, Mr. President, I proposed the trip and that we amend NAFTA to create an organization on an inter-continental basis for working life in the Americas. I said we could have a forum to deal with some of these poignant and deeply difficult and complex labor and environmental issues.

He said, no, he did not have a chance to read the letter I sent his staff a week before. I said, Mr. President, here is another copy of the letter. And I handed another copy to President Fox, and I had sent it to the Mexican embassy. President Bush said, It looks kind of thick. Is it single spaced? That is what he said to me.

I said it is single spaced, but the paper is folded. That may be why it looks a little thick. I said, I would appreciate if you would read it. He said it is single spaced, I have to use my glasses, and I cannot do it now.

I said, Mr. President, I appreciate an answer because I do not think anything that I am proposing is very radical. I did not get an answer from the White House. I can say September 11 happened and the world shifted, but I did receive a reply from President Fox.

Last night at the White House Christmas party, I occasioned to talk to President Bush, wishing him and his wife and all those who are involved in the war God's blessing.

I said, Mr. President, I do have to mention one item: you never did answer me on the letter from the airplane; remember we talked about it?

He said oh, yes, and he kind of winked and smirked a little bit, and he said it must have gotten lost in the shuffle. It was not even said with seriousness, and it really hurt me because that is how workers are being treated. They are being lost in the shuffle, in this country, in Mexico, in places like Bangladesh. We are not fully conscious; we are not paying attention. We do not want to pay attention to the economic system that is hurting so many and not treating them with the human dignity that they deserve.

So much of world history is related to economics. I would say most wars, 74 percent, 75 percent of the reason we get in wars relates to economics. The history of this country, the Civil War, the pains of which and the scars of which we are still healing today, what did it have to do with? It had to do with whether or not we would extend the plantation system of the South to the West, and the plantation system with the slave labor with the kind of indentured servitude that characterized economic activity up until that point. It was about economics.

Even now to a great extent, in my opinion, the unrest and the hatred of so many in the Middle East toward us is due to the fact that because we have been trading with undemocratic systems that have not shared that vast wealth with the ordinary people of those countries, figured out some more representative system of government where all parts of the country could have roads and hospitals and children would have the ability to go to school, not just because you are the king's cousin or because you are Sunni as opposed to a Shiite, that there are divisions that do not get full representation, economics underpins so much of the trouble in the world today.

Mr. Speaker, I guess that is the reason we fight so hard because we know if we do not do it right in the first place, we are going to get a reaction down the road that will be like a boomerang.

Mr. BROWN of Ohio. Mr. Speaker, one of the joys of this job, serving as one of 435 Members of this body that we call the House of Representatives, is that we are at an interesting time in our history. We are clearly the wealthiest Nation on Earth, the most powerful militarily. We clearly are a country that has the most opportunity to do good in the world. One of the ways we do that is using our economic prowess in trade agreements; we could do this, to lift up standards around the world.

Mr. Speaker, that means when we trade with Mexico, for instance, and I think we should trade with Mexico and do a lot of trading with Mexico, rather than pulling our truck safety standards down to Mexico's level or pulling our food safety standards down to Mexico's level, or pulling our safe drinking water and clean air and anti-pollution

standards down to Mexico's level, that we can instead pull their standards up. We have the ability to do that. We can write trade agreements that say when an American company invests in Mexico, they have to dispose of their waste in the same way there that the Environmental Protection Agency makes them do in this country.

These companies, the chemical companies, the steel companies, the automobile companies, they do not do the right things in the environment in the United States because they are being kind, they are doing the right things because it is Federal and State law, and local public health department regulation that they dispose of their wastes in a certain way that keeps the environment cleaner and healthier.

We could say to American companies in Mexico that they have to follow the same environmental standards. Pesticides that we banned here are not made and sold to other countries by American companies. We could say in China, sure, we will trade with you in China. We will be glad to buy and sell and trade with the People's Republic of China; but in return no more slave labor, no more child labor, no more selling nuclear technology to Pakistan, no more shooting missiles at Taiwan because they are holding a free election.

We are a wealthy enough country to say if you want access to us, you cannot behave certain ways. If China wants to sell their products into the United States, and clearly they do because the U.S. buys 40 percent of China's export, and they cannot say we will sell it somewhere else, because they are already trying to sell as much as they can everywhere else. If we say we are not going to buy your goods anymore if you keep using child labor and if you exploit 15- and 16- and 17-year-old girls and break their spirits and bodies and souls, and throw them out on the streets when they are 22 and make them work in the sex trade and give them no other choice, we could do that; and that is why it is so disappointing that we pass trade agreements that do exactly the opposite.

Instead of lifting up environmental standards around the world, lifting up wages around the world and lifting up food and drug safety and auto safety, instead of doing that we are bringing our own standards down. As wages stagnate in this country because of threats to move abroad, as jobs are lost, as we weaken public health laws in this country closer to what they are in other countries, we are giving away so much that we fought for in this country for 100 years.

I have a pin that I wear that is a depiction of a canary in a bird cage. One hundred years ago mine workers used to take a canary down into the mines and if the canary died, workers got out of the mines. In those days, a baby boy

born in the United States could live to be about 46; a girl could live to be about 48, the average life expectancy. Those workers had no protection from the government. Their only protection was the canary they took down in the mines.

But because of progressive government fighting against the gold mining companies, the coal companies, against other wealthy, rich advantaged interests in this country, we were able to pass minimum wages laws, worker safety laws, pure food laws, automobile safety laws, and all of the things that enabled people to live 30 years longer, enabled people to live better, longer lives through Medicare, through Social Security, all of the things that we in this body and in State legislatures and public groups and citizens' organizations have done to make the standard of living better in this country.

Mr. Speaker, I do not want to give that up as a Nation. That is why we need to defeat Trade Promotion Authority and write trade agreements that lift people up, not pull people down. That is the American way.

When U.S. Trade Representative Bob Zoellick, appointed by the President, when he says those of us like the gentlewoman from Ohio (Ms. KAPTUR) and the gentleman from Michigan (Mr. BONIOR) and the gentleman from Michigan (Mr. STUPAK), when we oppose these trade promotion authorities, we are not helping them in the war against terrorism, implying that people like myself and the gentlewoman from Ohio (Ms. KAPTUR) are soft on terrorism, implying that people like the gentleman from Ohio (Mr. BROWN) and the gentlewoman from Ohio (Ms. KAPTUR) are a little less patriotic because we are not supporting the administration on these agreements. The fact is the right side of American values is to lift people up around the world, not pull people down.

Mr. Speaker, it is important, as the gentlewoman from Ohio (Ms. KAPTUR) and I discussed, that Members vote against trade promotion authority.

Ms. KAPTUR. Mr. Speaker, I thank the gentleman for allowing me to join him this evening in our great efforts to defeat Trade Promotion Authority and move toward more democratic trade agreements for the world.

HISTORY OF THE CIVIL WAR, MILITARY TRIBUNALS AND DETENTION

The SPEAKER pro tempore (Mr. REHBERG). Under a previous order of the House, the gentleman from Colorado (Mr. MCINNIS) is recognized for 60 minutes.

Mr. MCINNIS. Mr. Speaker, obviously the last hour of conversation was very one-sided, and clearly no opportunity to rebut it; so I intend to address a couple of comments by the gentle-

woman from Ohio (Ms. KAPTUR) and the gentleman from Ohio (Mr. BROWN) because I think clearly they were either confused or there was some confusion in the research that they did for their comments.

Then I intend to move on from that and address my primary subject this evening, military tribunals, the question of treason against the individual who claims that he is an American, apparently is an American, and has been captured by the Northern Alliance and now turned over to American troops.

I would also like to talk about what is called detention of certain individuals in the country under this investigation and protection of the security of the Nation.

First of all, let me address a few comments made by the gentlewoman from Ohio (Ms. KAPTUR). First of all, it would be some benefit to her to study history of the Civil War. She would find, probably to her surprise, that the Civil War was not driven by economics; the Civil War was driven by the principle of slavery.

Ms. KAPTUR. Mr. Speaker, will the gentleman yield on that point?

Mr. MCINNIS. Mr. Speaker, if the gentlewoman will not interrupt me.

Ms. KAPTUR. Mr. Speaker, the gentleman from Colorado (Mr. MCINNIS) mentioned my name.

Mr. MCINNIS. Mr. Speaker, I have the floor and I ask the courtesy that that rule be respected, and say to the gentlewoman from Ohio (Ms. KAPTUR), I would be happy to yield to the gentlewoman on another occasion. However, they had 1 hour of uninterrupted time. Perhaps at the end of my hour, I would be happy to have that conversation with the gentlewoman. Prior to that, I have no intention of yielding.

Mr. Speaker, let me go back to the Civil War. The comment made about the Civil War was driven by economics, come on, give me a break. It was not economics; it was slavery.

Let us go on to another comment. The Middle East problems are because of trade. Jimmy Christmas, somebody has to study some history here before those kinds of comments are made to our colleagues.

Clearly there are economic issues anywhere in the world; but the economic issues, contrary to what the gentlewoman from Ohio has said, they are not the driving problem in the Middle East. What I would suggest to the gentlewoman, with all due respect, is to take a look at the religious history of those countries, and I think she will find more of the fundamental problem in the Middle East has to do with the religious differences and the religious histories of those regions of the world than it does whether or not America allows their President to have authority on Fast Track.

I think it is a little unfair for any of us, and this includes the gentlewoman

from Ohio, and I say this with due respect, nobody else is here to rebut it, and I think the gentlewoman before she carries on about a personal conversation between she and the President of the United States, especially a conversation that was not intended to be of kindness towards the President of the United States, that those conversations also allow for a response from the executive branch so we hear both sides of the story. It is not to question the accuracy of what the gentlewoman from Ohio said. Maybe she was accurate in her comments about what the President said, but I think the President or a representative of the executive branch ought to be included in this debate so we hear both sides of it.

□ 2215

Finally, let me stress, and then I will move on to the comments of the gentleman from Ohio (Mr. BROWN) and the comments of the gentlewoman from Ohio (Ms. KAPTUR), let me tell my colleagues, an isolationist view is not going to cut it. If we had adopted the type of view that is proposed by the gentlewoman, how would we ever build a coalition, for example, to help us in our war against terrorism? Trade has to be fair trade. There is no question about it. I do not know one of my colleagues, I do not know a Democrat, I do not know a Republican, I do not know either one of them, that proposes that the United States enter into an agreement that puts the United States at a disadvantage. I know none of my colleagues that want the United States at a disadvantage in a trade agreement. Maybe I am wrong, and I stand corrected. By the way, I will yield time to any one of my colleagues that wants to come up and say they are willing to agree to an agreement that puts the United States at a disadvantage. None of us agree to that. Of course not. That is pretty fundamental. The only reason people are supporting trade is because they think in the long run it benefits the United States of America. It is not because of, as some have suggested, corporate greed for an effort to revolutionize the Middle East or some of these other things that have been mentioned, I think somewhat recklessly. It is not that.

Mr. Speaker, all of us in our own heart of hearts have differing views on this floor, but I can tell my colleagues that the view of just saying that look, the only time we are ever going to agree with trade with other countries or to trade agreements with other countries is the idealistic view that everything the United States wants is everything the United States gets or we are going to take our ball and go home. I think an agreement ought to benefit the United States of America, but I do not think we are ever going to reach many agreements, including with many constituents who I think are

benefited in the State of Ohio, I do not think we are going to reach many agreements if it has to be 100 percent for the United States and zero for the other side.

Take a look at our agreements with Canada. They are critical about the free trade agreements we have. Look at the Canadian trade. Sure, we have disagreements with them on beef, we have disagreements with them on some of the fisheries and so on. But take a look at all of the products that go back and forth across those borders. That border is probably the most traded border in the world. It has been a pretty darn good relationship, and the United States has benefited from it over the years.

Now let me comment about the comments of the gentleman from Ohio (Mr. BROWN) which I think were most unfortunate. The gentleman made a comment, and I am quoting to the best of my ability here: We should not pull our standards down to Mexico, our environmental standards, our labor standards, et cetera. Remember what was just said. We should not in these trade agreements pull our standards down to Mexico. I challenge the gentleman on that. I challenge that gentleman to show me one trade agreement, one trade agreement that requires the United States to reduce its environmental protections within the boundaries of the United States of America. I challenge the gentleman from Ohio, contrary to what he has said, but I am asking him to show that he is correct. I am asking him to buttress his argument with facts, show me where the air quality of the United States is required to be reduced or made more dangerous because of some kind of trade agreement where we agree with some other country that our air standards, our water standards, our sewer standards, our hazardous waste standards, should be lowered because the other country wants to trade with us. That, in my opinion, is flat wrong. The facts do not support it. Yet the statement is made.

If I were not here, this statement would have gone un rebutted. The statement is freely made on this House floor to all of my colleagues that when the United States, when they asked the United States to give the President fast track authority, what they are doing is asking the United States to lower its environmental standards for the United States. That is not correct. That is inaccurate. I would hope that the gentleman tomorrow makes a corrective statement.

Now, I give the gentleman credit. The gentleman is a very bright man, very capable, obviously. So perhaps the gentleman misspoke, and I would hope that tomorrow he has the opportunity with the RECORD to correct that kind of statement because, frankly, it is now a part of the RECORD, and I think we have to be very careful about those

statements that continue as a part of the RECORD and may later on be introduced in some type of proceeding.

My comments were not intended this evening to center on a rebuttal of the previous 1 hour. Let me make it clear to my colleagues out here, my purpose in rebuttal was simply that no one else was responding to these charges and, under the rules, the previous speakers did not violate any rules, they spoke in the time that was allotted to them. They were allotted an hour and they gave their side. Well, I did not intend to speak on their specific subject. I do feel that sometimes it is a little unfortunate up here that one side speaks and the other side is not heard, so that is exactly why I spent the first 10 minutes of my comments this evening at least giving somewhat of a perspective of the other side, so we can have a little bit more of an open debate based on facts versus emotional charges of which, in my opinion, the previous hour was full of.

Let me move on. We have seen in the news in the last couple of days something that I guess we should have expected would happen but, nonetheless, we were all taken back a little bit by it. None of us really envisioned that an American, an American young man would go over to Afghanistan and join the Taliban. None of us suspected that a young man would take on the cause of atrocities against the people that a government represents. Take a look at the abuse of the women, the abuse of the people of that society. Well, it happened. A young man, 20 years old, I guess his name is Richard Walker, Mr. Walker. He has changed his name legally. I do not know what the new name is, but at one point he was known as Mr. Walker, 20 years old.

Let me give some facts, the facts as they have been presented to us, we will have to determine, these are subject to change, but as of right now this is apparently what happened. The young man dropped out of school, decided to convert to Islam and, at some point in his conversion to Islam, decided to take or adhere to a very radical interpretation of Islam, which most of the people of Islam that I know of say is not a part of Islam, that this radical approach by the Taliban and by bin Laden is an incorrect interpretation of the Koran. But this gentleman, this 20-year-old man, decided to take the study and decided to affiliate with the radical aspect or the radical interpretation, especially when it came to Jihad. So he took up arms apparently with the al Qaeda in support of bin Laden, fighting, fighting his brothers and sisters in the United States of America. In other words, the facts show that in an earlier e-mail to his father; now, I just heard "father," I would assume to his parents, let us just say to his parents at this point, e-mailed arguments in support of the

right to blow up the USS *Cole*. Remember, that is the ship, I say to my colleagues, that a few months ago a boat full of explosives blew up the side, I think it killed 18 sailors. Also, at the time of his detention when he was captured in Afghanistan a few days ago, his comments were such that he supported the fighting action and the acts of terrorism taken against the United States on September 11. On top of this, this American citizen was also found with an AK-47.

So those are facts. Now, each of those facts on their own, well, with the exception of maybe the AK-47, but the fact that an American citizen agreed that the USS *Cole* should have been bombed, that in itself is not a charge. I mean we do have freedom of speech in our country, although certainly that is a very, very small, small minority of opinion from this country. Certainly he is entitled as an American to make those kinds of statements. A person saying that they support actions, the terrorism actions against this country on September 11, those statements made by an American citizen, while clearly wrong, it is a right of freedom of speech to make them.

But it is the accumulation of these that begin to outline exactly what I think this individual should be charged with. When we take those comments and we add them with the fact that this young man was captured in a battle when the opposing troops who fired upon American soldiers with the intent of killing American soldiers, who fired upon American aircraft and allied aircraft with the intent of bringing down those aircraft, who was involved with an organization that we know has savagely killed people in that country and, of course, was also the organization responsible for the attacks on September 11, when we combine it with that and the fact that he was arrested with an AK-47, we begin to say, wait a minute; this is an American who has turned as a trader against his country, he has betrayed his country, he has left America, maybe not formally by denouncing his citizenship, but the fact is, there may be an automatic denouncement of one's citizenship if, in fact, one takes up arms with the enemy and fights against the United States of America and attempts to kill citizens of the United States of America in an action, in a war against the United States.

That is a question that I am not really prepared to answer tonight, but I was interested in what would we charge this young man with, or should we charge him with anything? We have heard some argument come out in the last couple of days that oh, the poor little kid, the poor young boy, he is confused. We ought to do what some of the Afghans are allowed to do. The Taliban that are Afghans of nationality, some of them have been allowed

to surrender their arms and go home. There is some argument that this young man should be allowed to drop his arms and come back to the United States and go home.

That is a hard one for me to swallow. I do not think we have that case at all. I think what we have is a clear-cut case of treason. I say this carefully. I have been spending the last several hours in my office doing a lot of research. I listened to, frankly, Jonathan Turley, an expert in constitutional law. I should let my colleagues know I was a lawyer, I am legally educated, I am not a constitutional lawyer, do not pretend to be; but Mr. Turley is, and I listened to his arguments this evening on the Bill O'Reilly Show, and both of those individuals spoke with some eloquence on this issue.

I want to look at the Constitution itself. Treason is such a serious crime. In our Constitution, we do not describe within the four corners of our Constitution homicide, we do not talk about burglaries, we do not talk about speeding or any of these other acts. There are a couple of acts that we talk about, but the first crime of this Nation, and probably the most egregious crime against this Nation is addressed in the Constitution, and I have it right here in front of me. That is the crime of treason. So I am asking my colleagues tonight, because we might, and I hope we do not, but we might discover there are some other Americans who have betrayed this Nation who have committed treason, in my opinion, against this country, and we really ought to assess, should we just turn our cheek in the other direction simply because the gentleman had an American citizenship card? Or should we look at how horrible the act of treason is against this country, so significant that the drafters of our Constitution included it within the Constitution, the definition and the description of treason against this country.

Let me refer my colleagues here to Article III under the Judicial Department, section 3, Treason against the United States. "Treason against the United States shall consist only in levying war against them," they refers to the United States, "or in adhering to their enemies." In other words, they are going to join the enemies, giving them aid and comfort.

□ 2230

Giving them aid and comfort: "No person," and this is interesting in the crime of treason, "no person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or a confession in open court."

There are a number of issues presented by this paragraph. Let us go section by section. Let us go in reverse order.

First of all, a confession in open court. Where will this case be tried? Is

this the type of case we would try in a military tribunal? I think there is wide agreement this would not be tried in a military tribunal. He is an American citizen. The military tribunals were not intended for American citizens. So because of the fact that he is an American citizen, it probably will be tried in the Federal courts, not a military tribunal nor in the military courts.

Two witnesses to an overt act. Why is it important? Our forefathers saw treason as such a horrible crime against the Nation, as a crime of such significance against this Nation, that they said we could not build it on circumstantial evidence alone, we actually had to have two witnesses to the act of treason.

We do not want to convict someone of treason, was the thought of the drafters of the Constitution, unless we know and have witness to the treasonous acts carried out by these individuals. So that is stated very clearly.

Now, let us jump, here. Giving them aid and comfort. There is no question that the facts as we know them so far are that this individual gave aid and comfort to the Taliban. He considered himself a member of the Taliban. He probably had dual citizenship, and there is actually some point about dual citizenship.

This is a further interpretation of treason:

"An American citizen owes allegiance to the United States of America," wherever they may reside. So in our interpretation, under our Constitution, it is clearly the intent of the Constitution that an American citizen owes allegiance to the United States, owes allegiance to our Nation, wherever they may reside. It does not matter whether one lives in Japan, whether one lives in Afghanistan, whether one lives in Europe, that as a citizen of the United States of America, one owes allegiance to the United States of America. Dual nationality does not alter that situation.

So some might say, wait a minute, he was a citizen of the Taliban government and he was a citizen of the United States of America, so he had a dual citizenship. He has a conflict. He had an obligation to carry out the wishes of bin Laden and the Taliban government and the al Qaeda.

But we have already addressed that situation. This is not a new factual situation. It is very clear: wait a minute, it does not matter what other countries one has a citizenship to, but if one is a citizen of the United States of America one must have allegiance to the United States of America.

That standard of allegiance is not in any fashion diluted by the fact that one also has citizenship of another country. So keep that in mind, because I am sure as the defense attorneys start to put this together, that will be an argument as brought up initially. It

will be quickly squashed by the courts, because it is clear under our law that one's allegiance to the United States of America is not diluted, that the standard of allegiance is not diluted because one has dual citizenship.

Now, we are already beginning to see the old defense tricks starting to bubble up in some of these interviews that I have seen just in the last 24 hours. I do not practice law anymore under the ethics of the House, but when I practiced law, I was able to observe a lot of criminal defense work. I was not a criminal defense attorney. In fact, I need to be fair and give a little disclosure: I used to be a police officer. I served in a squad car on the street before I went on to law school.

I was not a prosecuting attorney, either; but I did like to observe, out of interest, a defense attorney work. There is kind of a basic rule, a fundamental rule if one is going to defend somebody.

Number one, if they are innocent, that is the best defense one can get. If one's client is innocent, you could not ask for a better defense, because the facts will play it out. It is a strong weapon to go into the courtroom with, that is, that the client is innocent.

But a lot of times one does not get that benefit. A lot of times the client is not innocent. Then what one tries to do is to divert from the lack of innocence of the client and divert attention to the people who are accusing the client.

For example, they might allege sloppy police work or that the witness was having an affair or is a known liar or has some incentive to turn witness against the client; do anything you can to divert from your client's lack of innocence to some kind of vendetta or sloppy work, and therefore your client has been unjustly charged.

If those two steps do not work, then go to the traditional, and probably as long as this country has been around, probably as long as defense law has been around, but certainly much more prevalent in this country in the last 10 or 15 years, go to that old standard, "My client was a victim." That is exactly what we are beginning to see here in the last 24 hours with this young man who I allege committed treason against the United States of America.

By the way, I have sympathy, but that is about the extent of it, for the parents of this child. I am a parent, about the same age as the father. I would be horrified if one of my children was doing the same thing. But the fact is that it does not forgive it.

What we are beginning to see is that this young man was a victim; that somehow, as the father said yesterday, he was brainwashed; or he was a victim of the Taliban; or they put pressure on him; or, you know, he was such a young man.

Let me tell the Members, the people he was shooting at were young men and

women, too; young men and women who were not brainwashed, so to speak; young men and women who obeyed the allegiance to the Constitution of their Nation; young men and women out there who this young man was trying to aid and comfort the enemy of, and joined the enemy in attempting to wipe out the United States.

Those thousands and thousands of citizens killed on September 11 were innocent. And by the way, there was the most fundamental violation of wartime moral ethics, and that is, one does not attack innocent citizens; one attacks a military target under a situation like this.

But what we are beginning to see is some kind of sympathy buildup for this young man, because he was young and, oh, my gosh, the parents are horrified. I understand the parents, by the way; I feel for them. But that is all the further it can go. Our Nation cannot allow, cannot allow us to turn our cheek on the Constitution, on an act like treason; an act, as I said earlier in my comments, that was taken so seriously it was put in the Constitution.

It is right here. It was put in the four corners of that Constitution to tell us that treason is probably not only the first crime recognized by this Nation, but one of the most serious crimes recognized by this Nation.

So I am going to look with interest to see exactly how this is handled. And obviously, from my statements, Mr. Speaker, this evening, Members know that my thoughts are that this gentleman should be tried in the Federal courts for treason against the United States of America and that he should be prosecuted to the fullest extent of the law.

Let us move on. We have had a busy evening so far. I want to talk about another issue that is very important, that is, military tribunals.

There has been a lot of talk. The talk radios are full of it, the newspapers, lots of editorializing on both sides of the issue. So I wanted to lay out some of the facts.

I have spent a lot of time. I have been on several shows talking about military tribunals. I think I am somewhat knowledgeable on the subject; I do not claim to be an expert in much of anything. But the fact is, I do want to share my views on these military tribunals. I think there are some legitimate, good reasons to support military tribunals.

I know some of my colleagues are dead set against this kind of thing and that somehow they have bought the ticket that this is a violation of civil liberties, that this is unconstitutional, et cetera. I will address those points. All I am asking is that for a few minutes Members give me consideration of presenting the other side of the issue, the side that supports the need for military tribunals.

First of all, Members should remember that the actual rules of the military tribunal have not been laid out specifically; but I think we can feel very confident, and I think they will be required by the standards set for military tribunals throughout the history of this country, that the defendant obviously will have the right to counsel; the defendant obviously will have the right to testify; the defendant will have a full and a fair trial; the defendant can be assured that they will not be prejudiced against because of race, gender, or status; that they can freely exercise their religion while in captivity; that they will be given food and shelter and the other things that are provided for people, citizens that are alleged of a crime.

So do not let people tell us that for some reason they are not going to get legal counsel. I will talk about the secrecy issue a little later on, but the secrecy is not going to apply to the extent that it denies the defendants in these cases a full and a fair trial. If it did, they would be unconstitutional.

Now, the constitutionality of military tribunals has twice been addressed by the United States Supreme Court. Twice the United States Supreme Court has upheld the constitutionality of military tribunals. So as we hear people say, well, it is unconstitutional, I think we need to say, wait a minute, be a little more specific. If the military tribunals follow the same standards or the same course of conduct as previous military tribunals have, they have been found constitutional. So on what basis can people say they are unconstitutional?

The fact is, they are constitutional. There is a lot of history to military tribunals. They did not just start with President Bush. Remember, President Bush's priority is not to get the defendants, not to create some type of new Constitution in this country, not to usurp the current Constitution. President Bush's primary drive here is to protect the security of U.S. citizens.

When we have to decide, okay, which way do we lean, in favor of protection, home security, homeland security for the citizens of the United States, or should we sacrifice homeland security for the citizens of the United States to go out and quell the concerns of a few civil libertarians, who, by the way, do not have the law on their side? The law is not on the side of those who are saying it is unconstitutional; the law is on the other side, saying it is constitutional.

The President I think very accurately and very correctly has made his point clear. His number one priority is the security of the United States of America. The people of the United States of America come first. The security of those people is an inherent obligation not only of the President of the United States as Commander in Chief,

but the security of this Nation and the security of the people of this Nation is an inherent obligation of everyone sitting in the United States Congress or the United States Senate or in any public office, or working for the government. Their number one priority is the citizens of the United States and the protection of the citizens of the United States.

Let me give just a little history. Many people are surprised by the history of these tribunals. This history started in the Revolutionary War. Military tribunals were held at the very beginning of this country in the Revolutionary War. There were spies that were caught behind U.S. lines during the Revolutionary War, military tribunals in 1776. President Lincoln's assassination, 1865, a military tribunal; military tribunals right there under the assassination under President Lincoln, or because of President Lincoln's assassination.

World War II, Japanese officers who failed to prevent their troops from committing atrocities during World War II, those Japanese officers were subject to a military tribunal. That tribunal was taken to the United States Supreme Court, and it was found constitutional.

Nazi saboteurs who landed on the coast of the United States in 1942 with the intent to destroy industrial facilities. Those military tribunals also had as part of the punishment death penalties which were carried out against these saboteurs. The United States Supreme Court also found that military tribunal was constitutional.

There is history in this country. This is not a precedent-setting event. Military tribunals are a necessity.

Now let us talk about why are they necessary. What are some of the reasons that we have to have them? I think today, I have to tell the Members, I have to give credit to the editorial today in the Wall Street Journal. In one editorial, I think the Wall Street Journal set out probably as clear a picture as I have seen in this debate as to the justification for the military tribunals.

I am not going to read the editorial to Members, but I will talk about and discuss certain elements of that editorial.

They talk about, of course, the recent cases that have pertained to acts of terrorism: the first attack on the World Trade Center, the bombings of the U.S. embassies in Africa. The Wall Street Journal talks about the good news about these trials; and by the way, they were held in Federal courts. The good news about these trials was they managed to get convictions. The bad news was that they were protracted, long trials, expensive trials, and very dangerous trials to the participants, meaning the jurors, the judges, the court reporters.

Everyone that had everything to do with the government side of the business was under a threat of danger. In fact, it says, some of those judges involved in those cases still have security measures taken on their behalf to protect them as a result of holding those trials.

Now, think for a moment, and this is not in the Wall Street Journal editorial, but think for a moment on these military tribunals. Let us just take out of the air, let us say we capture some al Qaeda members. Say we capture 100 of them. That is not unreasonable. There are thousands of them.

Let us say 100 of them are captured and brought to the United States. Where are Members going to find 100 additional Federal judges, 100 Federal courthouses, that can be cordoned off, blocked off, checked every day for anthrax, checked for bombs? Where are we going to find a courthouse where we can get a jury that is willing to sit, a jury deciding on al Qaeda, when we know we do not have every one in our custody; when they are constantly reminded in this trial of what happened in New York City on the acts of terrorism?

Where are we going to find, without hampering and deadlocking the rest of the Federal court system, where are we going to get all of these judges to decide on this? Then what do you do, provide those judges with lifetime round-the-clock security for the rest of their lives?

□ 2245

That is why an option of a military tribunal which is constitutional, which allows the defendant a fair and full trial, which allows the defendant legal counsel, which allows the defendant the same rights of food and shelter and a nondiscrimination allowed to any other prisoner in the United States, that is one of the reasons these military tribunals make sense.

Let us go on, because the issue you have heard a lot of, "secret," and, boy, do they play up on the word "secret." Oh, my gosh. Secret. You cannot have a secret hearing. Well, wait a minute. Sometimes it is necessary to have a secret hearing because there are a lot of people that would like to find out exactly what we know about their organizations, their terrorist organizations.

For example, they say in here in the Wall Street Journal, they talk about that the World Trade Center trial, remember that trial a few months ago, in fact, the defendants were sentenced I think the day or 2 days after the September 11 bombing or act of terror. They talk about what was revealed in the first trial which was held in open court, not in a secret hearing.

This testimony that was open to the public including the al Qaeda network, the testimony in the first World Trade Center trial included lengthy testi-

mony about the structure and the stability of the twin towers.

So, in other words, these twin towers, the World Trade Centers, the stability and the structural makeup of those towers was discussed in open court in the first World Trade Center, so that the people that were interested in taking down the towers could figure out why a bomb in the basement did not bring it down, but what would in fact be able to bring it down based on the structure weaknesses and the stability. That was in open court.

Do you think that is something we ought to be discussing in an open court? In other words, daring them to try it again and providing them, as the Wall Street Journal says, it is almost like giving out your troop movement. You are engaged in a war. We do not want to hold it secret from the enemy where our troops are going to be, so we better disclose our troop movements before we go into it. That is exactly what we are concerned about. The confidential information. How we found out about these al Qaeda. How we arrested them. What are our resources? Who are our sources of information? What kind of satellite intervention, what kind of interception did we use?

All of those secrets could be forced to be revealed in an open court setting. So what we have proposed is a military tribunal. And while a tribunal would allow facts like that to be held in secret, it would not deny the defendant a fair and full trial. It would fall within the bounds of constitutionality, and we can bet that any conviction taken out there will certainly go to the United States Supreme Court on the question of constitutionality. And I can assure you that the prosecutors, the United States of America, the people of the United States of America, do not want a trial that is going to be found unconstitutional. They do want to stay within the bounds of the Constitution. But they also want the priority, while staying within those bounds, that the priority should be homeland security, that we need to install just a little common sense.

Do not buy into some of the defense bar on this thing. Let me proceed.

In the embassy bombing, remember our embassies that got bombed? Government Exhibit 1677-T was al Qaeda terror manual. By entering the manual into evidence, the United States was telling al Qaeda that it knew its operating procedures and inviting it to change course. That was bad enough during peacetime, but in the middle of the war against terrorism it is akin to disclosing troop movements.

Speedy justice. Talk about the speed of these trials. Can you have a trial that is held on a faster basis without it being declared unconstitutional? Yes, you have to take certain precautions. You have to make sure the defendant is assured the right of counsel. You have

to make sure the trial is held so it gives a full and fair trial to the defendant. But once you meet those standards of the Constitution, there is nothing in the Constitution that requires these trials be prolonged month after month after month, and that is exactly what happened. With the experiment we had in trying the first bombing of the World Trade Center, that is exactly what happened in that trial and the subsequent bombings of the embassies. Let us talk about it.

Speedy justice is also not a hallmark of civilian courts. The first World Trade Center trial took 6 months, in 1993 to 1994. Six months of locking off that courthouse. Six months of trying to keep secret who the jurors were, who the judges were, who the court clerks were, who the security guards were. As I said before, the security for the judges especially continues to this date on many of these cases.

A second trial lasted 4 months in 1997, a second trial dealing with the World Trade Center. A third trial, the blind sheik, took 8 months in 1995, 8 months of daily trial in the Federal Court Center. And the embassy bombing trial last spring lasted 3 months. That is the one where the sentencing took place September 12 in a Federal courthouse a few blocks north of the World Trade Centers.

Now, the Wall Street Journal says, it brings it to the fact that all these trials were held under heavy security and great risk to the participants. Federal courthouses are heavily trafficked public buildings in dense urban areas, and thus difficult to protect. Effective security requires more than installing metal detectors or closing off adjacent streets.

A military base is the safest venue for terrorist trials, but even that security is not a simple matter. It took a year to prepare a camp in the Netherlands for a trial of those accused of bringing down Pan Am Flight 103.

So the Wall Street Journal goes on further and says, look, from a practical viewpoint it does not make sense to hold these trials or tribunals or have trials in Federal courts in the middle of a populated center. It makes sense for the protection of the population around that courthouse, for the protection of the people working in that courthouse, it makes sense to have these trials, considering the backgrounds of these individuals and the allegations against them, to have these trials on a military base.

Now the military base does not prevent legal counsel from representing their client, does not prevent them from going on the base. The defendant will be able to have military counsel. But it does protect society. Again, some people are confused. Some people are beginning to adopt the politically correct thinking of whatever the liberal defense bar, in some cases, not all

members of the defense bar, whatever they want we better satisfy them. Even though we know it is constitutional, even though we know the jeopardy that we are placing other American citizens in, we better have it down at the Federal courthouse. You know why they will push hard on that, some defense attorneys, especially the defense attorneys that will represent the members of the al Qaeda, because they know under pressure the United States will probably fold and make a plea bargain for their clients.

The more you can force the government to disclose military secrets like satellites, who the names of their spies are, the more you can force the United States to hold a trial in a publicly populated area, the more pressure you are putting on the government to do a plea bargain. That is exactly why you will see these points pushed with such vengeance by the defending attorneys.

Same thing with the juror safety. The usual rules in civilian terrorist trials is anonymity for the jurors. But it is hard to believe that the jurors are going to consider that adequate protection after September 11. Judges are even more at risk.

Two Federal judges, as I mentioned earlier, two Federal judges in New York remain under tight security to this day, long after the end of those terror trials.

The larger point here, and I think this is very, very important for our discussion this evening, the larger point here is that military tribunals are not some "Big Brother" invasion past the normal rules of justice. In other words, what is being said, this is not an invasion of the rules of the Constitution, this is not a violation of the civil liberties of American citizens. In fact, it protects the civil liberties of American citizens. In fact, it is about the home security of the United States of America, about the security for every man, woman and child within this country that are American citizens, or even visitors who are not American citizens but residing in this country.

This is not an invasion of rights. This is not an effort by the President of the United States to somehow abscond with the Constitution of the United States. It is his inherent obligation and our inherent obligation to conduct these in such a way that we protect the home security of this Nation while still giving a fair and full trial to the defendant, which can be realized under a military tribunal.

Let me go back to the Wall Street Journal. The larger point here is that military tribunals are not some Big Brother invasion across the normal rules of justice. They are a common-sense and historically well-established way to cope with the unusual demands of war against terrorism. As recently as 1996, the Clinton administration rejected Sudan's offer to turn over bin

Laden because it did not think it had enough evidence to convict him in a military court. A military tribunal would have been very handy at that point in time because of the pressures that would have been applied by, frankly, the defense attorneys working in this case.

Now, the Defense Department, we would expect here in the next few days, would have probably many more specifics in regard to these military tribunals. What I am saying to my colleagues tonight is before you jump on the bandwagon of criticizing these military tribunals, do a couple of things. Number one, use common sense. And when you are thinking about common sense, think about, number one, are we protecting the Constitution? Common sense would say, well, is there some history to it? The answer would be yes. We have had military tribunals throughout the history of this country, starting with the Revolutionary War, as a result of the Lincoln assassination, as a result of two or three acts in World War II. We have a history of military tribunals.

Common sense says, okay, there is a history. The facts points out there is a history. Is it constitutional? Common sense again says look at the facts. The Supreme Court on two separate occasions has answered that very direct question and the answer has been yes, they are constitutional. Use some common sense about the security of the people that will be involved in the trial. How can you guarantee the security of some regular Joe or regular Jane down there and say, hey, we want you to serve on the jury against one of these people that we think was connected with the terrorism acts of September 11, do not worry about your security?

What are you going to do with these judges? Protect them for the rest of their lives, or jury for the rest of their lives? Think about the logistics. Think about common sense.

Does it make a lot of sense to have these trials at the Federal courthouse in downtown Denver or in New York City, in downtown New York City, around populated centers? Or does it make more common sense because it is constitutional to do it, to hold it out on a military base where you allow the defendant still a fair and full trial and the right to counsel?

I think it is so important as we discuss there that you not sign on to this argument that on its face military tribunals make no sense; that it is a move by the Bush administration to somehow subvert the Constitution.

In fact, it is my belief that a lot of the arguments against military tribunals today are in fact not based on real objection to military tribunals, but instead designed as a political weapon against the Attorney General. That in fact they are designed to try, and

somehow because President Bush is so popular today, that somehow the way to try and dent Bush's popularity is to go after his Attorney General. And so military tribunals use the sensitive words like secretive and lack of rights and unconstitutional. I think my comments showed you tonight, one, the reason for secrecy and it does not deny a fair trial to the defendant. Two, the fact it is constitutional. Three, the common sense needs to have it at a military base. Those all point out that the arguments being used by the other side really in most cases are being fictitious and more directed at trying to ruin the credibility of an Attorney General in an effort to get at the President.

Because when you sit down with most Americans and you say let us talk about security, let us talk about the Constitution, let us talk about the fairness of these trials, let us talk about the history of these trials, you will find agreement. Most Americans are concerned about the security of this Nation. Every American is concerned because it may be them someday.

□ 2300

Every American is concerned that a fair trial be held there, including our United States Supreme Court; and do not believe for one minute that the United States Supreme Court is going to look the other way on a trial that does not allow the defendant a fair trial. That is not going to happen. They would throw it out in a heartbeat, and this is not what we want. We want a fair trial, but we want security for America. Homeland security has to be our number one policy here while staying within the bounds of the Constitution, which we do with military tribunals.

Let me spend my last few minutes on some other facts, and that is, we have heard about these detentions across the country. Once again, a wide distortion of the facts. Currently in the United States of America, remember that these deportations, these are people in violation of some law.

I heard a lawyer tonight on TV who was representing a student whose visa was expired, and he was deeply offended by the fact that this person was detained and questioned by immigration. He is in violation. He should have not been here. He should have gone back to his own country. He was invited as a guest, as a student of this country. His student visa expires, he gets caught, and his lawyer shows up saying, oh my, the wolves are picking on my client.

I do not know why his client is still in the United States of America. I do not know why they do not send him back. Once he is released, they should kick him out of the country. His visa has expired. We have got to enforce our

border policies. I am not saying lock down the borders. I never have, but the laws we have, we have got to enforce.

These detentions, there are 20,000 people as we speak, 20,000 plus people as I speak this evening, in immigration detention across this country. We have heard that we have got, oh, probably 5 percent, 600 or 1,000, people in detention for various violations of the law as a result of the September 11 incident, and those people are being questioned.

The distortion of facts is they would have us believe that these people's names cannot be revealed. The government's not going to give out their names. Why should we? We should not give out their names. All we do is provide the al Qaeda network and other people who do not hold the best interests of the United States of America in their heart, we provide them information of exactly what we are doing.

We cannot deny one of the detainees, one of the people who is being held in detention. They have every right to tell their attorney or to disclose their own name. So their name can be disclosed. We are not just going to do it for them. They can do it if they wish. Their attorney can come out tomorrow morning, have a press conference and say John Jones right here is being detained; he wants everybody to know his name. They are allowed to do that. Do not buy into this distortion that people are being detained and nobody will ever know their names. They will, if those people choose to have their names known.

I think it is important to remember of those 600-and-some-odd people that are being detained, over a hundred of them are being detained on serious Federal charges. We cannot play games here. This is a very serious threat to the United States of America, and I do not have to say it twice because everybody in this room, everybody in this room saw what happened on September 11. We witnessed it. I do not have to play games here.

We better be serious about the investigation of these people. We better not let a few threats, oh, my gosh, you are hurting their feelings, we better put that aside. We have got the security of the United States of America to worry about, and we can count on the fact that these terrorists will strike again. With good investigative work that I would add is constitutional, with good investigative work that I would add is fair, with good investigative work that has common sense to it, we can prevent a lot of these future terrorist acts.

Do not buy into this politically correct theory that any kind of aggressive action by the investigative agencies is somehow a violation of privacy or somehow unconstitutional. All we are doing is asking for it. It is like getting in a fistfight and putting your fists down and saying maybe it is unfair for me to defend myself because you do not

hit as fast as I do, so maybe I ought to put my fist down.

That is an analogy. We should not put our guard down. This is a time when we ought to have our guard up, and we ought to use every tool that is constitutional and every tool that allows common sense, frankly; and that is a lot of what this is about, to protect the security of the people of this Nation. We cannot allow these acts of aggression to occur again, if at all we can stop it ahead of time. That is what we need to do in this country.

I ask my colleagues, listen to these detentions; and by the way, as they listen to these interviews that are being requested, they are not required and we have heard people say, well, it is race profiling because the government has asked people who are visiting this country, they are not asking citizens of this country, they are asking people who are visiting from foreign countries who are visiting, who are guests of the United States of America, they are asking them to voluntarily, not mandatory, they are not being arrested, they are not being detained. The government, the President, our leadership has said, look, you are from the Middle East, you are from these countries, you are visiting our country, could you help us, do you have anything you could tell us, would you come down and talk to us. And you never know, what may not seem important to you is very important to us to try and prevent future acts of terrorism.

These people are not being detained against their will. They are asked voluntarily to come in. Somebody said the other day we are race profiling; all you are doing is asking people of Afghan descent or people from Afghanistan or Arab people or people of Middle East descent to come in.

Well, geez, let me tell my colleagues something. I mentioned earlier I used to be a cop, and once in a while we would be called to the high school for a fight, and guess who we asked questions of when we got to the high school, the students. Now, some would say, well, now wait a minute you better ask the other people, you are just picking on the students. I heard that a lot. You are just picking on the students. Who do you think knows about the fight? It is a student fight. Maybe, maybe the students know the most about it. So we always would ask the students questions.

It is the same thing here. I am just concerned as I have heard the news in the last few days that the further away we get from September 11 the more some people are buying into this argument that some how the United States should continue to proceed with its hands handcuffed behind it; that the United States should not have an advantage, not an unfair advantage, but any kind of advantage.

We had one person suggest at the beginning of the war that maybe we were

a bully because we had high-tech weapons. We do not need to pile guilt upon ourselves. We are not the party that started this fight. We are the party that is going to end it, but we are not the party that started this.

As a party, we have a fundamental responsibility not to handcuff our hands behind our back, not to intentionally disadvantage ourselves so that we poke our chin out at the enemy so they can pop it once again.

So I ask all of my colleagues, please give this consideration. My colleagues should always ask if it is constitutional, but the moment they find out it is and there is precedent for it, which there is in all of the cases which I have mentioned this evening, then proceed to the next point: Does it make common sense? Does it defend the interests of the people of the United States? Does it help prevent future terrorist actions?

It is time to get tough. It is time to roll up our shirt sleeves and say we have had enough of this. We are going to go out, and we are going to stop terrorism once and for all, and that is exactly what our President and his administration is intending on doing, and that is exactly what we should do as Members of the United States Congress. We should support our President, and we should support the Attorney General and our Vice President and Condoleezza Rice and the team and we should go out and do everything we can to do our part in stopping terrorism against the citizens of the United States and against all people of the world.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DEFAZIO (at the request of Mr. GEPHARDT) for today on account of personal business.

Mrs. ROUKEMA (at the request of Mr. ARMEY) for today and the balance of the week on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LYNCH) to revise and extend their remarks and include extraneous material:)

Mr. BONIOR, for 5 minutes, today.

Mr. LYNCH, for 5 minutes, today.

Mrs. MALONEY of New York, for 5 minutes, today.

Mr. PALONE, for 5 minutes, today.

Mr. DAVIS of Illinois, for 5 minutes, today.

(The following Members (at the request of Mr. CANTOR) to revise and extend their remarks and include extraneous material:)

Mr. GANSKE, for 5 minutes, December 5.

Mr. PENCE, for 5 minutes, today.

Mr. GEKAS, for 5 minutes, December 5 and 6.

Mrs. JO ANN DAVIS of Virginia, for 5 minutes, December 5.

Mrs. MORELLA, for 5 minutes, December 5.

ENROLLED BILLS SIGNED

Mr. Trandahl, Clerk of the House, reported and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 717. An act to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculopharyngeal, distal, and Emery-Dreifuss muscular dystrophies.

H.R. 1766. An act to designate the facility of the United States Postal Service located at 4270 John Marr Drive in Annandale, Virginia, as the "Stan Parris Post Office building".

H.R. 2261. An act to designate the facility of the United States Postal Service located at 2853 Candler Road in Decatur, Georgia, as the "Earl T. Shinhoster Post Office".

H.R. 2291. An act to extend the authorization of the Drug-Free Communities Support Program for an additional 5 years, to authorize a National Community Antidrug Coalition Institute, and for other purposes.

H.R. 2299. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

H.R. 2454. An act to designate the facility of the United States Postal Service located at 5472 Crenshaw Boulevard in Los Angeles, California, as the "Congressman Julian C. Dixon Post Office".

H.J. Res. 71. Joint resolution, amending title 36, United States Code, to designate September 11 as Patriot Day.

ADJOURNMENT

Mr. MCINNIS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 8 minutes p.m.), the House adjourned until tomorrow, Wednesday, December 5, 2001, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

4689. A communication from the President of the United States, transmitting authorization of transfers from the Emergency Response Fund for emergency recovery and response and national security activities; (H. Doc. No. 107-153); to the Committee on Appropriations and ordered to be printed.

4695. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 14-174, "Chief Financial Officer Establishment Reprogramming During Non-Control Years Technical Temporary Amendment Act of 2001" received December 3, 2001, pursuant to D.C. Code section 1-233(c)(1); to the Committee on Government Reform.

4696. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 14-173, "Sentencing Reform Technical Amendment Temporary Act of 2001" received December 3, 2001, pursuant to D.C. Code section 1-233(c)(1); to the Committee on Government Reform.

4697. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 14-172, "Redevelopment Land Agency-RLA Revitalization Corporation Transfer Temporary Act of 2001" received December 3, 2001, pursuant to D.C. Code section 1-233(c)(1); to the Committee on Government Reform.

4698. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 14-169, "Citizens with Mental Retardation Substituted Consent for Health Care Decisions Temporary Amendment Act of 2001" received December 3, 2001, pursuant to D.C. Code section 1-233(c)(1); to the Committee on Government Reform.

4699. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 14-170, "Closing of a Portion of F Street, N.W., S.O. 99-70, Act of 2001" received December 3, 2001, pursuant to D.C. Code section 1-233(c)(1); to the Committee on Government Reform.

4700. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operating Regulation; Bayou Lafourche, LA [CGD08-01-032] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4701. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Depart-

ment's final rule—Drawbridge Operation Regulations: New Rochelle Harbor, NY [CGD01-01-195] (RIN: 2115-AE47) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4702. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations: Hutchinson River, Eastchester Creek, NY [CGD01-01-182] (RIN: 2115-AE47) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4703. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operating Regulation; Inner Harbor Navigation Canal, LA [CGD08-01-037] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4704. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations: Newtown Creek, Dutch Kills, English Kills and their tributaries, NY [CGD01-01-176] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4705. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations; Southern Branch of the Elizabeth River, Atlantic Intracoastal Waterway, Chesapeake, Virginia [CGD05-01-065] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4706. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations; SR 84 Bridge, South Fork of the New River, mile 4.4, Ft Lauderdale, Broward County, Florida [CGD07-01-127] (RIN: 2115-AE47) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4707. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Certification of Navigation Lights for Uninspected Commercial Vessels and Recreational Vessels [USCG-1999-6580] (RIN: 2115-AF70) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4708. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. (EMBRAER) Model EMB-120 Series Airplanes [Docket No. 2001-NM-298-AD; Amendment 39-12465; AD 2001-20-17] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4709. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. (EMBRAER) Model EMB-135 and EMB-145 Series Airplanes [Docket No. 2000-NM-321-AD; Amendment 39-12436; AD 2001-18-10] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C.

801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4710. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; McDonnell Douglas Model DC-9 Series Airplanes and MD-88 Airplanes [Docket No. 2001-NM-264-AD; Amendment 39-12463; AD 2001-20-15] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4711. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Raytheon Model Beech 400A Series Airplanes [Docket No. 99-NM-157-AD; Amendment 39-12455; AD 2001-20-07] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4712. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Fairchild Aircraft, Inc. Models SA226 and SA227 Series Airplanes [Docket No. 2000-CE-28-AD; Amendment 39-12462; AD 2001-20-14] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4713. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Gulfstream Model G-V Series Airplanes [Docket No. 2001-NM-305-AD; Amendment 39-12477; AD 2001-21-06] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4714. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; General Electric Company T58 and CT58 Series Turboshift Engines [Docket No. 99-NE-13-AD; Amendment 39-12432; AD 2001-18-06] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4715. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Enstrom Helicopter Corporation Model F-28, F-28A, F-28C, F-28F, 280, 280C, 280F, and 280FX Helicopters [Docket No. 2001-SW-28-AD; Amendment 39-12479; AD 2001-22-01] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4716. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—IFR Altitudes; Miscellaneous Amendments [Docket No. 30271; Amdt. No. 431] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4717. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Amendment to Time of Designation for Restricted Area R-4403; Gainesville, MS [Docket No. FAA 2001-10527, Airspace Docket No. 01-ASW-10] (RIN: 2120-AA66) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4718. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Air-

worthiness Directives; Robinson Helicopter Company Model R44 Helicopters [Docket No. 2000-SW-67-AD; Amendment 39-12466; AD 2001-20-18] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4719. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Eurocopter France Model SA.315B, SA.316C, SA 3180, SA 318B, SA 318C, SA.319B, SE.3160, and SA.316B Helicopters [Docket No. 2001-SW-36-AD; Amendment 39-12467; AD 2001-18-51] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4720. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Sikorsky Aircraft Corporation Model S-76B and S-76C Helicopters [Docket No. 2001-SW-01-AD; Amendment 39-12134; AD 2001-03-51] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4721. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Agusta Model AB412 Helicopters [Docket No. 2001-SW-22-AD; Amendment 39-12425; AD 2001-17-33] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4722. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule—Airworthiness Directives; Eurocopter France Model AS350B, B1, B2, B3, BA, D, D1 and AS355E, F, F1, F2, and N Helicopters [Docket No. 2000-SW-47-AD; Amendment 39-12424; AD 2001-17-32] (RIN: 2120-AA64) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

A bill to provide for the conveyance of Forest Service facilities and lands comprising the Five Mile Regional Learning Center in the State of California to the Clovis Unified School District, to authorize a new special use permit regarding the continued use of un conveyed lands comprising the Center, and for other purposes; to the Committee on Resources.

By Mr. RANGEL (for himself, Mr. NADLER, Mrs. MALONEY of New York, Mr. SERRANO, Mr. TOWNS, Mr. HINCHEY, Mrs. MCCARTHY of New York, and Mr. MCNULTY):

H.R. 3402. A bill to provide tax incentives for the recovery of businesses in the City of New York which were impacted by the September 11, 2001, terrorist attacks; to the Committee on Ways and Means.

By Mr. WEINER:

H.R. 3403. A bill to direct the Secretary of Transportation to issue a final regulation prohibiting certain aircraft departing from John F. Kennedy Airport in Queens County, New York, from flying over the Rockaway Peninsula in Queens County, New York; to the Committee on Transportation and Infrastructure.

By Mr. GRAHAM (for himself, Mr. GOSS, and Mr. HYDE):

H.J. Res. 75. A joint resolution regarding the monitoring of weapons development in Iraq, as required by United Nations Security Council Resolution 687 (April 3, 1991); to the Committee on International Relations.

By Mr. HYDE (for himself, Mr. LANTOS, Mr. GILMAN, Mr. ACKERMAN, Mr. WATTS of Oklahoma, Mr. WYNN, Mr. MCNULTY, Mr. DEUTSCH, Ms. BERKLEY, Mr. WEINER, Mr. BERMAN, Mr. ENGEL, Mr. HASTINGS of Florida, Mr. WAXMAN, Mr. NADLER, Mr. CROWLEY, Ms. ROS-LEHTINEN, Mr. CANTOR, Mr. FLAKE, Mr. LEACH, Ms. SCHAKOWSKY, Mr. KING, Mr. ROTHMAN, Mr. WEXLER, Mr. SHERMAN, Mrs. LOWEY, Mr. SMITH of New Jersey, Mr. CARDIN, Mr. REYNOLDS, Mr. KIRK, Mr. GRUCCI, Mr. WALSH, Mr. BLUNT, Mr. CHABOT, Mr. SOUDER, Mr. BURTON of Indiana, Mr. HORN, Mrs. KELLY, Mrs. WILSON, Ms. HARMAN, Mr. BASS, Mr. DAN MILLER of Florida, Mr. FILNER, Mrs. JO ANN DAVIS of Virginia, Mr. BOEHLERT, Mr. STEARNS, Mr. FERGUSON, Mr. DEAL of Georgia, Mr. COX, Mr. WELDON of Pennsylvania, Mr. RANGEL, Mrs. NAPOLITANO, Mr. DIAZ-BALART, Mr. FOLEY, and Mr. FRELINGHUYSEN):

H. Con. Res. 280. Concurrent resolution expressing solidarity with Israel in the fight against terrorism; to the Committee on International Relations.

By Mr. ADERHOLT (for himself, Mr. GOSS, Mr. WOLF, Mr. SIMMONS, Mr. BACHUS, Mr. CALLAHAN, Mr. CRAMER, Mr. EVERETT, Mr. HILLIARD, and Mr. RILEY):

H. Con. Res. 281. Concurrent resolution honoring the ultimate sacrifice made by Johnny Micheal Spann, the first American killed in combat during the war against ter-

rorism in Afghanistan, and pledging continued support for members of the Armed Forces; to the Committee on Intelligence (Permanent Select).

By Mr. NUSSLE:

H. Res. 301. A resolution designating majority membership on certain standing committees of the House; considered and agreed to.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

AMENDMENTS

Under Clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 3005

OFFERED BY: MR. MANZULLO

AMENDMENT NO. 1: Page 55, insert the following after line 2 and redesignate succeeding sections accordingly:

SEC. 9. ASSISTANT USTR FOR SMALL BUSINESS.

(a) ESTABLISHMENT OF POSITION.—Section 141(c) of the Trade Act of 1974 (19 U.S.C. 2171(c)) is amended by adding at the end the following new paragraph:

“(6)(A) There is established in the Office the position of Assistant United States Trade Representative for Small Business. The Assistant United States Trade Representative for Small Business shall be appointed by the United States Trade Representative.

“(B) The primary function of the Assistant United States Trade Representative for Small Business shall be to promote the trade interests of small businesses, to remove foreign trade barriers that impede small business exporters, and to enforce existing trade agreements beneficial to small businesses. The Assistant United States Trade Representative for Small Business shall be a vigorous advocate on behalf of small businesses. In carrying out that advocacy function, the Assistant United States Trade Representative for Small Business shall conduct meetings throughout the United States on a regular basis in order to solicit views and recommendations from small business exporters in the formulation of trade policy. The Assistant United States Trade Representative for Small Business shall perform such other functions as the United States Trade Representative may direct.

“(C) The Assistant United States Trade Representative for Small Business shall be paid at the level of a member of the Senior Executive Service with equivalent time and service.”.

Page 4, line 17, strike “10(2)” and insert “11(2)”.

Page 19, line 2, strike “10(2)” and insert “11(2)”.

Page 22, line 10, strike “10(2)” and insert “11(2)”.

EXTENSIONS OF REMARKS

TRIBUTE TO TRAVIS HAYWARD

HON. BOB SCHAFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SCHAFER. Mr. Speaker, I rise to recognize Mr. Travis Hayward of Ft. Collins, Colorado. Travis looked to the needs of our nation's children by organizing a toy and book drive to benefit those affected by the September 11th terrorist attacks. For this, Mr. Speaker, the United States Congress should commend him.

Travis donated toys and books to the East Harlem Tutorial Program after his elementary school teacher asked her students to donate one stuffed animal to the program. Travis thought this was a good start, but wanted Colorado students to give more. Through a valiant effort, Travis organized his peers to participate in this program. Travis believes a simple stuffed animal could make a difference to a suffering child because it gives them something to hug when they are upset. With the help of his family, Travis hopes to collect 220 stuffed animals and books.

In a recent edition of *The Coloradoan*, Travis' mother, Pat Hayward, said, "We know there are many ways that the community is getting involved, but this is just one of our ways of connecting. We wanted to do a kid-to-kid thing." Travis' dedication and empathy toward children in need epitomizes the compassion of America's youth.

As a citizen of Colorado's Fourth Congressional District, Travis Hayward is truly an amazing, young role model. He not only makes his community proud, but also his state and country. I ask the House to join me in extending its warmest congratulations to Mr. Travis Hayward.

IN HONOR OF SERGEANT SAMUEL JEFFERSON

HON. ROBERT MENENDEZ

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to honor and acknowledge the many accomplishments of Sergeant Samuel Jefferson of the Jersey City Police Department. Throughout his career, he worked tirelessly to enhance the safety and well-being of the residents of Jersey City, New Jersey.

A 22-year veterans of the Jersey City Police Department, Sergeant Jefferson has enjoyed a dynamic and extensive law enforcement career. Sergeant Jefferson joined the Jersey City Police Department 1979, and was quickly promoted to the rank of Detective after assignments in the North District Division and the

Radio Room. As a Detective, he spent countless hours working on cases in the Hudson County Prosecutors Homicide Division, the Welfare Investigation Unit, and the Warrant Squad. In 1990, he assumed the rank of Sergeant and was assigned to the Patrol Division. From 1991 until his retirement, Sergeant Jefferson worked in the Jersey City Policy Department's Internal Affairs Division.

Prior to his law enforcement career, Sergeant Jefferson was a decorated United States Marine. While in the Marines, he was the recipient of the Purple Heart, the Vietnam Combat Cross, the Combat Infantry Badge, and the South Vietnam Medal.

A Jersey City native, Sergeant Jefferson graduated from Lincoln High School. Currently, he enrolled at New Jersey City University and completing requirements for a BA in Criminal Justice.

Sergeant Jefferson and his wife Denise have three children and two grandchildren.

Today, I ask my colleagues to join me in honoring Sergeant Samuel Jefferson for his dedicated service on behalf of the residents of Jersey City.

TRIBUTE TO ST. LOUIS CATHOLIC CHURCH 75TH ANNIVERSARY CELEBRATION

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BONIOR. Mr. Speaker, today I rise to recognize the St. Louis Catholic Church, which celebrated its 75th Anniversary on Sunday, September 16, 2001. Truly a milestone occasion, this celebration gives testament to the outstanding dedication and commitment of the entire church and community.

Established with the generous donation of four and a half acres by Louis and Mathilda Charbeneau in 1926, the parish of St. Louis began humbly with worship services in a temporary church and a Gym-Church until its final move to Crocker Boulevard. Decades later, with much prayer, sacrifice and hard work, the parish of the St. Louis Catholic Church continues to provide love, care and concern for the entire community.

Active with many organizations, including the Parish Council, Men's Club, Ladies Circle, Senior Club and the Music Ministry, members demonstrate outstanding dedication to community involvement. With Stewardship and Worship Commissions, a Youth Group, and Religious Education for all ages, St. Louis Catholic Church is committed to building sound religious education and service for all its members. Additionally, parishioners have worked hard through the years to reach out to the entire community with charitable services under MCREST and the St. Vincent de Paul

Society, as well as serving meals at the Salvation Army. With a devotion to religious education, church activities, and official services, this community will continue to move forward in the mission to improve the lives of people through faith and God.

Although history and time have changed the parish, the spirit of the church has remained strong. I would like to personally congratulate the St. Louis Catholic Church on their 75th Anniversary, and I urge my colleagues to join me in recognizing them on this landmark occasion.

NATIONAL PEARL HARBOR REMEMBRANCE DAY (S. CON. RES. 44)

SPEECH OF

HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 27, 2001

Mrs. MINK of Hawaii. Mr. Speaker, I rise today in strong support of S. Con. Res. 44, which calls for a National Pearl Harbor Remembrance Day in celebration of the 60th anniversary of the December 7, 1941 attack on Pearl Harbor. S. Con. Res. 44 reminds us of the thousands of lives lost that bleak December morning when the Japanese Imperial Navy launched a sneak attack on America. S. Con. Res. 44 is a fitting tribute in remembrance of the lives lost that day and of the more than 12,000 members of the Pearl Harbor Survivors Association to whom this Day is also dedicated.

President Franklin Delano Roosevelt said December 7, 1941 was "A day that will live in infamy" and to this very day we remember Pearl Harbor for the thousands of lives that were lost tragically that morning.

Today, Americans old and young find themselves united by the two tragic attacks against this country, 60 years apart. The events of September 11 have presented many with first hand experience of the shocking and frightening realities of a terrorist attack. December 7, 1941 was no less an act of terror and treachery as was September 11, 2001.

Each year on December 7 thousands of people journey to Pearl Harbor, to pay tribute to those who lost their lives on that day. The USS Arizona Memorial sits in Pearl Harbor as a final resting place for more than 900 of the 1,177 men who lost their lives that fateful day in Pearl Harbor. Twelve ships were sunk or beached and nine others were damaged.

Families of deceased members of the crews of the ships lost on December 7, 1941, come to Pearl Harbor to place ashes in the hull of the Arizona memorial or have them scattered in the harbor, tightening the bond of valor and sacrifice for all time.

But December 7, 1941, is much more than just a tragic day in American history. The

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

December 4, 2001

bombing of Pearl Harbor thrust the United States into World War II, galvanizing our country to fight for freedom in two continents from which America emerged as an international leader.

In the end 16,112,566 went to fight in WWII and 405,399 lost their lives in battle.

The bombing of Pearl Harbor on December 7, 1941, brought war to the doorsteps of America and drastically challenged our resolve as a nation. It is fitting that we commemorate the 60th anniversary by declaring December 7, 2001, as National Pearl Harbor Remembrance Day, not only as a reminder of the sacrifices thousands made that this Nation could triumph, but to reflect upon the spirit that continues to sustain us as we face new challenges today in a very dangerous world.

TRIBUTE TO CLIFFORD E.
LAMPMAN

HON. GARY G. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. GARY G. MILLER of California. Mr. Speaker, it is with deep regret that I rise to pay tribute to Clifford Erle Lampman, who passed away on October 28, 2001, leaving the cities that he served in California to mourn the loss of a respected business associate and friend.

After his honorable discharge from the United States Marine Corps, he graduated from the University of North Dakota and Denver University with civil engineering degrees. He obtained his Master's degree in Structural Engineering at the University of Southern California and attended Loyola Law School in Los Angeles, California. With the support of his wife, Gwen, he eventually established his own business, Lampman and Associates. Mr. Lampman's expertise in consulting and engineering soon opened doors to contracts with many California cities. Major projects that he successfully completed include the Alameda Corridor Railroad Lowering for Huntington Park and a massive three bridge project for the city of Corona. At the time of his passing, he was working for the city of Placentia as an executive advisor to the first railroad-lowering project in Orange County, known as the Orange Gateway Railroad Lowering Project.

Family, friends and business associates described Mr. Lampman as a visionary, charismatic leader, an inspirational optimist and a devout Christian who opened his heart and home to those in need of support, guidance and prayer. Four brothers and sisters, his wife, Gwen, seven children, nine grandchildren and one great-grandchild survive him, all who will experience a void that was once filled by his loving personality.

Mr. Speaker, I ask that this 107th Congress join me in celebrating the life and legacy of Mr. Clifford Erle Lampman.

EXTENSIONS OF REMARKS

IN HONOR OF AUTHUR EDWARD
UNZUETA

HON. GRACE F. NAPOLITANO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mrs. NAPOLITANO. Mr. Speaker, I rise today to honor and salute a heroic WWII Navy veteran and a forty-six year resident of the 34th district, Authur Edward Unzueta. Authur represents the best of what it means to be an American; an individual devoted to both family and country. He served his country courageously and it is because of countless veterans like him that we are able to enjoy the freedoms we do today.

Arthur has had a distinguished naval career in service to his country achieving the rank of Gunner's Mate Third Class UNSR. His awards include, the Navy Good Conduct Medal for exhibiting outstanding performance and conduct during three years of continuous active enlisted service. He was also awarded the Asiatic-Pacific Campaign Medal with one silver and four bronze campaign stars for service in the Asiatic-Pacific Theatre and the World War II Victory Medal for service in the United States Armed Forces during the period 1941-1946. In addition, he earned the Philippine Liberation Ribbon, the Philippine Presidential Unit Citation and the American Campaign Medal for service in the American Theatre during WWII. After three years, two months and six days of dedicated service, Arthur was honorably discharged from the United States Navy in January 19, 1946.

The selfless attitude that characterized Arthur during his time in the military is evident in his devotion to his family and home. A resident of the 34th district since 1955, Arthur is the proud parent of three, Gary, Sally and Paula and devoted husband of fifty-three years to Patricia. Today Arthur takes pleasure in his retirement from a long employment at Owen's Illinois, a glass and china manufacturing company, surrounded by his four grandchildren, five great-grandchildren and his two beloved boxers.

Arthur is a model American citizen and one I am proud and honored to represent. His bravery and courage have earned him our most heartfelt appreciation and respect. Please join me in thanking Arthur for his service to our country, dedication to the community and devotion to family and home. He remains an example to us all of a true American.

TRIBUTE TO ADVENTIST CHURCH
SCHOOLS

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SCHAFFER. Mr. Speaker, I rise today to recognize the children of the Adventist Church Schools of Colorado. These children are donating two dollars each to support the children in Afghanistan and victims of the September 11th terrorist attacks. For this, Mr.

23907

Speaker, the United States Congress should commend them.

The children in the Colorado division of the Adventist Church Schools have responded to President Bush's call to have America's youth donate one dollar to the children of Afghanistan. Moreover, they are giving an additional dollar to support the children of New York City. There are twenty-one schools in Colorado participating in this program. The money raised will significantly help those in need.

In recognizing these children, Pat Chapman, of the Rocky Mountain Conference of Seventh-day Adventists, said, "The program will benefit a lot of children in Afghanistan, as well, as many children in New York." These exemplary children are excellent role models for our country.

The children in the Colorado division of the Adventist Church Schools are committed to helping in this time of tragedy. They are an example of the dedication and piety of America's youth. I ask the House to join me in extending our warmest congratulations to the children of the Adventist Church Schools of Colorado for their honorable efforts.

IN HONOR OF DEPUTY CHIEF ROBERT
MARTIN OF THE JERSEY
CITY POLICE DEPARTMENT

HON. ROBERT MENENDEZ

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to pay tribute to Deputy Chief Robert Martin of the Jersey City Police Department, for his outstanding law enforcement career and years of dedicated service on behalf of the residents of Jersey City.

A veteran of the Jersey City Police Department, Robert Martin excelled as a law enforcement officer. He joined the force in 1973 and was assigned to the 5th Precinct and South District Divisions. In 1979, he was promoted to the rank of Sergeant and worked in the Bureau of Supervision. As Sergeant, Robert Martin assumed responsibilities that included heading up the Investigation Division's Street Crime Unit and the Special Investigations Unit. In overseeing the operations of these two units, Robert Martin was responsible for police investigations related to robbery, organized crime, and narcotics. While heading up the Special Investigations Unit, Mr. Martin was promoted to the rank of Lieutenant and eventually assumed the rank of Captain. As a result of his unyielding work ethic, in 1991, Robert Martin was appointed as Chief of Investigations for the Hudson County Prosecutors Office. Upon returning to the Jersey City Police Department in 1997, he was promoted to Deputy Chief.

A graduate of Bergen Community College and Jersey City State College, Deputy Chief Martin also attended the F.B.I. National Academy in Quantico, Virginia, and has a Master's Degree from Seton Hall University.

I would like to extend my gratitude to Chief Deputy Robert Martin for all he has done to ensure the safety and well-being of those individuals residing in New Jersey's 13th Congressional District.

Today, I ask my colleagues to join me in honoring Deputy Chief Robert Martin for keeping our communities safe and for being an excellent role model and civic leader for the residents of Jersey City.

TRIBUTE TO INDUSTRIAL OFFICE
WORKERS LOCAL UNION 889 60TH
ANNIVERSARY CELEBRATION

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BONIOR. Mr. Speaker, today I rise to recognize the Industrial Office Workers Local Union 889, who will celebrate its 60th Anniversary on Friday, September 21, 2001. Truly a milestone occasion, 2001 marks 60 years of outstanding dedication and commitment of the organization and its members.

Established in 1941, Local 889 was the first office and clerical amalgamated local in the United Auto Workers. Located in the city of Warren since 1957, the offices of Local 889 have spanned from Mound Road to Dequindre Road, and decades later, with hard work, sacrifice and dedication, Local 889 continues to provide a center of solidarity and activism for the entire community.

With 1,600 active members and more than 2,300 retired workers, Local 889's expansive membership includes Daimler Chrysler office and clerical workers of all Chrysler plants in the metropolitan area, units at Delta Dental, Detroit Marriott, Detroit Medical Center, as well as Union Friendly Systems, Washington Township, M.C.C.S.E. Family Court, Juvenile Court, Specialized Offices, and Animal Control of Macomb County. With Local 889 International Representatives serving at the International Union and Region I of the U.A.W., the loyalty and outstanding leadership members have truly brought this organization to new heights.

Active with many organizations, Local 889 has worked hard through the years to reach out to its surrounding community with Community Action Programs, the Women's Committee, and so many recreational activities for all ages. With its Educational Session, Civil Rights, and Leadership Development programs, Local 889 has proven its commitment to promoting civic education and service for its entire community. Additionally, Local 889 has truly led the way in press and publication, as award winners from the Labor Union Press Association for quarterly issues of the Local 889 White Collar Newspaper as well as winners of 13 Marshall Recipient Awards since 1994 from the joint Chrysler-UAW National Training Center.

Although history and time have changed the Local, the spirit of Local 889 has remained strong. I would like to personally congratulate Local 889 on their 60th Anniversary, and I urge my colleagues to join me in recognizing them on this landmark occasion.

EXTENSIONS OF REMARKS

CONGRATULATIONS TO CAPTAIN
JEROME BALIUKAS

HON. GARY G. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. GARY G. MILLER of California. Mr. Speaker, I rise today to congratulate Captain Jerome Baliukas for his untiring service to the United States Naval Reserve. On 8 December 2001, he will end a successful two year tour as Commanding Officer of the Naval Strike and Air Warfare Center (NSAWC 0194) at Naval Air Station (NAS) Fallon, Nevada.

Captain Baliukas was born 31 March 1952 in Miami Beach, Florida. He attended Florida International University and the University of Miami in Coral Gables, Florida where he graduated in 1974 with a Bachelor Degree in Forensic Science and a degree in Criminal Juris Prudence. He reported to Pensacola, Florida for Aviation Officer Candidate School and was commissioned an Ensign in June of 1975. Captain Baliukas was designated a Naval Aviator in Beeville, Texas in July 1976.

Orders followed to F-4 transition training at VF-121 in NAS Miramar, California. He then reported for Fleet Operational Training with Fighter Squadron One Fifty Four (VF-154), as a "Black Knight." He was then designated for Landing Signal Officer Training and completed LSO School in Pensacola, Florida. In addition, he held the positions of Power Plants Branch Officer, Aircraft Division Officer, Assistant Safety Officer, and Assistant Operations Officer, in addition to completing Naval Fighter Weapons School.

Following his fleet tour, Captain Baliukas was assigned to Fighter Squadron One Hundred Twenty-One Fleet Replacement Training Squadron as an F-4 instructor and Training Landing Signal Officer. In addition, he was designated to head the Tactics Training Department and the Weapons Training Department. While attached to VF-121 he was also assigned to the Aircraft Acceptance and Carrier Suitability of the F-4S, where he assisted in the fleet transition from F-4J/N to F-4S while delivering 26 fleet ready aircraft to NAF Atsugi, Japan. Captain Baliukas was then assigned to Fighter Squadron One Hundred Twenty-Four for F-14 transition and assignment as an instructor and Training Landing Signal Officer. He then rotated back to the fleet as an Airwing Landing Signal Officer with Carrier Airwing Two at NAS Miramar where he made two more additional Westpac Tours.

Captain Baliukas affiliated with VF-302 in 1984, as a "Stallion." He held numerous positions of responsibility including Department Head tours as Maintenance and Operations Officer. He served as the Squadron Executive Officer from 1991 to 1993. After the disestablishment of Carrier Air Wing Thirty, he was selected to become the Executive Officer and Commanding Officer of the "Hunters" of VF-201 at NAS Dallas and NAS Ft. Worth, Texas from 1994 to 1997. In 1997 Captain Baliukas was selected to join the staff of NSAWC 0287 as a Tactics Instructor and Evaluator. He be-

December 4, 2001

came Executive Officer of the NSAWC unit in October 1999. During his career, he has accumulated over 3,700 flight hours in tactical jet aircraft and has completed over 680 day and night aircraft carrier landings.

Captain Baliukas is a captain and flight instructor for American Airlines and currently flies the Boeing B737-800 series aircraft. He and his wife Kelley reside in Yuma, Arizona.

Again, Mr. Speaker, I congratulate Captain Baliukas for his dedicated service to the United States Naval Reserves and sincerely wish him well in his future naval career.

CHESANING HIGH SCHOOL
VARSITY FOOTBALL TEAM

HON. DAVE CAMP

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. CAMP. Mr. Speaker, I rise today to pay tribute to the Chesaning High School Varsity Football Team, who recently won the 2001 Michigan Division 4 state title. In their heart-stopping championship game played at the Silverdome, located in Pontiac, Michigan, the Chesaning Indians defeated the Orchard Lake St. Mary's Eagles 14-7 in overtime.

Led by Head Coach Jim Szappan and Assistant Coaches Steve Tithof, Dan Yates, Scott Menard, Gary Gerken, Mike McGough, and Joe Bogar, members of the 2001 Chesaning Indians include: Jacob Smith (1), Steve Korf (2), Tyler Alden (3), Justin Schneider (5), AJ Guerrero (6), Matt Breier (7), Jason Strachota (8), Tracey Baryo (9), Chris Anderson (11), Matt Ferry (12), Brent Bassham (17), Jacob Righi (20), Gordon McKinnon (22), Mark Jungerheld (24), Craig Welsenberger (32), Chris Barancik (33), Jason Lentz (40), Paul Tithof (41), Jason Croucher (42), Andrew Hasse (50), Joshua Gosselin (52), Brent Conklin (53), D. Shawn Plonsky (54), Jarod Hughes (55), Dan Reed (56), Juanito Escamilla (57), Jonathan Bishop (58), Nicholas D. Weigold (59), Jacob Devereaux (61), Adam Orth (62), Jacob Henige (63), Scott Schneider (68), Randy Coole (70), Justin Maxa (71), R. Michael Adelberg (75), Brandon Brainerd (80), Blake Cottrill (84), and Dennis Winkelman (99).

The dedication that these players put forth throughout the entire season is one of which the entire district can be proud. Their victory not only brought the team together in great spirit, but their family, friends, and community as well.

Once again, on behalf of the 4th Congressional District of Michigan, I would like to congratulate the coaches and members of the Chesaning High School Varsity Team on their achievement. I wish them the best in their future football seasons.

December 4, 2001

CONFERENCE REPORT ON H.R. 2299,
DEPARTMENT OF TRANSPORTATION
AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

SPEECH OF

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. MATSUI. Mr. Speaker, I rise today to express my most sincere appreciation to the Transportation Appropriations conferees for their outstanding work in preparing the FY 2002 Transportation Conference report. In recent years, Sacramento has become one of the fastest growing regions in the country. This sudden surge in population has led to massive traffic congestion and severe air quality problems. Ensuring that Sacramento's infrastructure can simultaneously accommodate this growth and improve the region's air quality is absolutely essential.

I am grateful for Chairman ROGER's and Ranking Member SABO's commitment to providing appropriate funding levels for several ongoing programs that are of vital importance to maximizing efficiency in the greater Sacramento region. These funds will provide much needed transportation options to lower-income individuals, improve the region's air quality and improve traffic flow in impacted corridors.

In addition, the inclusion of first time funding for the Interstate 5 Freeway Decking Project represents a tremendous boost for the Sacramento Riverfront Redevelopment Master Plan. Once complete, this decking project will allow the downtown Capitol Mall area to be reconnected with the waterfront, helping Sacramento to realize its long-term goal of linking its major recreational, entertainment and cultural districts with its major employment center.

The beneficial effects of these projects are endless. I could not be more pleased with the outcome of this conference report and remain grateful for the unwavering support of this committee.

CONDEMNATION OF HUMAN
CLONING

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SCHAFFER. Mr. Speaker, I rise today to express in the most serious terms my opposition to the recent acts of Advanced Cell Technology in Massachusetts to create the first cloned human embryo. Most scientific discoveries are a step forward for human kind, but ACT's announcement over the Thanksgiving holiday does not pose such promise. Instead, it signifies a sick and perverted experiment that will result in the destruction of hundreds of lives and the devaluing of all human life.

EXTENSIONS OF REMARKS

We all remember Dolly the sheep, the first cloned animal in the world. Well, Mr. Speaker, Dolly was the result of 277 attempts at creating a cloned sheep. Sheep numbers 1-276 didn't make it. They all died in different stages of development and were discarded. Do we want to allow such experimentation to be conducted on the human race? If we allow such a mad science to occur, we will be permitting the same kind of immoral practices as the human eugenics experiments in Nazi Germany.

Mr. Speaker, Congress must act now to ban human cloning before America becomes host to another holocaust. In July of this year, our colleagues in House acted in a timely and responsible manner to pass legislation banning human cloning. The bill passed in a bipartisan manner by more than 100 votes.

Since that time, Majority Leader of the opposing house has demonstrated an utter disregard for human life by preventing the bill from going forward at the other end of the Capitol. I now urge the majority leader of the other body to follow this House, the President and the will of the American people to bring H.R. 2505 to an immediate vote. The time is short as groups like ACT are pushing forward to create the first cloned human being. We must stop these crimes against humanity before it is too late.

IN HONOR OF TAMMY BLANCHARD

HON. ROBERT MENENDEZ

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to honor and pay tribute to Tammy Blanchard for winning an Emmy in her portrayal of the young Judy Garland in "Me and My Shadow: Life with Judy Garland." The Bayonne Public School System will recognize her outstanding accomplishments by declaring Wednesday, December 5, 2001, as "Tammy Blanchard Day." On December 5th, Ms. Blanchard will be honored during a fundraising party at Chandelier Restaurant in Bayonne, New Jersey. Proceeds from this event will benefit the Bayonne High School Vocal Music Program.

Tammy Blanchard has enjoyed an extensive and successful acting and modeling career that has included many awards and acclamations. She has appeared in numerous television commercials and has modeled for several teen magazines and catalogues. In addition to her acting role in "Me and My Shadow: Life with Judy Garland," Tammy Blanchard has also appeared in episodes of "Guiding Light" and "Law and Order." Future projects include acting parts in "The Promise," scheduled to be in movie theaters April, 2002, and the upcoming Lifetime television movie, "We Were the Mulvaneys."

A native of Bayonne, New Jersey, Tammy Blanchard is a 1994 graduate of Bayonne High School. She continues to reside in Bayonne, sharing a house with her mother, Ms. Patricia Rettig, and her brothers, William Blanchard III and Thomas Walters.

23909

In light of her many accomplishments, I would like to extend my personal congratulations and my warmest regards to Tammy Blanchard for her many achievements.

Today, I ask my colleagues to join me in honoring Tammy Blanchard for her magnificent acting career and commitment to helping assist students in the Bayonne Public School System.

TRIBUTE TO DR. GENNARO J.
DIMASO "2001 MAN OF THE
YEAR" COLUMBUS DAY CELEBRATION

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BONIOR. Mr. Speaker, each year the Italian American community celebrates Columbus Day, with festivities including a weekend of food, music, and fun, as well as an annual Columbus Day Parade and Banquet. With organizations and committees dedicated to promoting and preserving the Italian-American heritage through language, culture, music, and social events, the Columbus Day Committee is no exception. Honoring distinguished Italian-Americans who have shown outstanding service in their local communities, each year the Columbus Day Committee selects individuals who demonstrate these qualities. On Sunday, October 7, as the families and friends gathered together at their annual Columbus Day Banquet, they recognized Dr. Gennaro J. DiMaso as their "2001 Man of the Year".

As past president of the St. John Guild and recipient of the Guild's Lifetime Achievement Award, Dr. Gennaro J. DiMaso has demonstrated outstanding dedication and commitment to both the Italian and American communities. Dr. DiMaso has truly dedicated his time and efforts to the care of generations of children. With an unconventional, but warm-hearted approach, Dr. DiMaso, "the doctor in blue jeans" has devoted his life and profession to providing patients with the highest standards of quality health care. Understanding that the "only treasure on Earth we have are kids", he has worked tirelessly for 44 years to meet the needs of his young patients, and never refused care to an impoverished child.

Dr. DiMaso instilled in his young eastside patients the importance of hard work and commitment to the community. As a young boy, he dreamed of becoming a doctor and helping others while he worked with his father to sell vegetables in their Brooklyn neighborhood, growing up in an area where going to high school, let alone medical school, was unheard of. He has passed along this tradition of perseverance and community service to his four children and six grandchildren.

I applaud the 2001 Columbus Day Committee and Dr. DiMaso for their leadership, commitment, and service, and I urge my colleagues to join me in saluting them for their exemplary years of leadership and service.

TRIBUTE TO SUE ELLEN PANITCH

HON. JOHN W. OLVER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. OLVER. Mr. Speaker, I rise to pay tribute to Sue Ellen Panitch of Holyoke, Massachusetts for her outstanding contributions to her community. Since 1965, Ms. Panitch has been somewhat of a "super-volunteer" in Holyoke, having served on numerous boards and commissions, including the Conservation Commission, the Holyoke Community College Foundation, The Therapeutic Equestrian Center, The Future Begins Here, the Council of Human Understanding and the Holyoke Taxpayers Association.

Sue Ellen began her long career as a volunteer at the gift shop at Providence Hospital, and continues to this day to be one of Holyoke's greatest civic champions. Just last month, through Sue Ellen's efforts, the "911 Fund," created by the Holyoke Firefighters union—Local 1693, became eligible to receive a portion of the proceeds raised at the 2002 The Future Begins Here charity event. The 911 Fund benefits victims of the September 11 terrorist attacks and their families.

Ms. Panitch's dedication to creating a better community has been so remarkable that the Holyoke Rotary Club recently honored her with its prestigious William G. Dwight Award. I can't think of a more deserving recipient of this award, and I hope that Sue Ellen will continue to contribute so selflessly to her city. Holyoke is a much better place due to her life's work. Thank you Sue Ellen Panitch.

INTRODUCTION OF THE CALIFORNIA FIVE MILE REGIONAL LEARNING CENTER TRANSFER ACT

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. RADANOVICH. Mr. Speaker, today I am pleased to introduce legislation to transfer 27.1 acres of National Forest Service property from the Stanislaus Forest to the Clovis Unified School District. By so doing, this legislation will permit the school district to continue to operate the Five Mile Regional Learning Center on this National Forest land and, more to the point, it will now allow the school district to fund vitally necessary capital improvements to the Learning Center facilities. Without this legislation, these improvements and non-federal expenditures would not be allowed and the Learning Center could not continue due to dilapidation.

This legislation, therefore, should be considered non-controversial and an exercise in cooperative and effective local, state and federal government relations.

The Five Mile Regional Learning Center is an Outdoor Environmental Education School that benefits youth from all over the state of California. Classes range from forest to raptor studies with an emphasis on natural resource

conservation. In addition to the environmental education program the school district offers course work on character development, team building, and individualized challenge activities such as high ropes. During the summer the site is used by a variety of groups, including Educators, DeMolay, Girl Scouts, basketball camps and school leadership students. In addition, a number of counties in conjunction with local and state agencies bring "At risk kids" to the program's Life's Alternatives Involving Risks (LAIR) Adventure Academy.

The Regional Learning Center serves 138 schools from approximately 60 school districts in California. Approximately 14,000 students participated in this educational program last year. Counties served include: Contra Costa, El Dorado, Fresno, Madera, Marin, Merced, Sacramento, San Francisco, San Joaquin, San Luis Obispo, Stanislaus, Toulumne, and Tulare. It operated three basketball camps that reached nearly 1,000 boys and girls. DeMolay, Fresno North LDS, and Four Square Church account for another 400 people using the facility. A project is in development that would utilize the LAIR area as an Elderhostel site focusing on living during the Gold Rush days.

The Five Mile Regional Learning Center is a Forest Service Administrative site located in the Mi Wok Ranger District, Stanislaus Forest. The site includes bartacks, a mess hall, classrooms, a gymnasium and shop buildings. This site is 27.1 acres.

Approximately 100 additional acres adjacent to the National Forest are used as part of the comprehensive conservation/education program for trails, campsites, ballfields, bird mew sites, bird blinds, and a tree nursery.

The 120 acre Five Mile Regional Learning Center has been operated by the Clovis Unified School District since 1989. Prior to that the Fresno County Office of Education starting in 1969 operated the project.

While the Five Mile Regional Learning Center is located on National Forest Land, the federal government plays no role in the operation or maintenance of the facilities used by the program or in delivery of the educational program. The National Forest Service merely permits the use of these facilities and lands to the Clovis Unified School District, and monitors the program to ensure that permit requirements are adhered to.

The buildings and structures that are located on the 27.1 acres of main property have been in existence since the early 1960's. However, the Forest Service has not funded or appropriated monies to maintain or operate these buildings. According to Forest Service documents the "Regional Learning Center facility has outlived its life by years and if it were not for the efforts of the Clovis Unified School District, the buildings would be in a state of disrepair useable to no one."

In addition, Stanislaus National Forest Supervisor Ben Del Villar has stated to the Clovis Unified School District, in correspondence, "We believe that your acquisition of the learning center would be in the best interest of the public and the Forest Service."

Without transfer of ownership the Clovis Unified School District is prohibited from spending its money on capital improvements to ensure that these facilities do not fall into disrepair to the extent that they would be unusable.

The Clovis Unified School District has on average spent more than \$1 million per year over the last 12 years on operation and maintenance.

In addition to the ongoing commitment of more than \$1 million per year in operation costs, the Clovis Unified School District is willing to invest \$5 million over 5 years in capital improvements and renovations to the existing facilities.

The legislation authorizes a new Special Use permit that would essentially continue the authorization for Clovis to use the adjacent 100 or so acres presently used but on which no structures in need of capital improvement exist.

The federal costs of this transfer are administrative-only and negligible to the value that the school district will be spending to increase the value of the property and run this important educational program for the children of California.

RECOGNITION OF NATALIE AURAND OF MIFFLIN, PENNSYLVANIA

HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SHUSTER. Mr. Speaker, I rise today to recognize Ms. Natalie Aurand, a resident of my district from Mifflin County, Pennsylvania. The Future Farmers of America recently awarded Natalie the American Degree, their highest honor, at the organization's 74th National Convention in Louisville, Kentucky. Natalie, the daughter of Mr. & Mrs. Edwin Aurand, is a fourth generation Mifflin County Farmer and a very active member of the Big Valley FFA Chapter. She is the first person from her chapter to receive an American Degree in 17 years.

Prior to receiving her American Degree, Natalie earned her Greenhand, Chapter, and Keystone degrees by completing supervised agriculture experience projects in Beef, Swine, and Sheep finishing, Farm Hand Worker, and Home Garden. She is an extremely industrious and involved individual, having held several offices within her FFA Chapter. She continues to be active in FFA and participates in the organization's various county, state, and national events. She is currently attending Delaware Valley College where she is majoring in Agricultural Education.

Mr. Speaker, I am sure you will join me in congratulating Natalie on her accomplishment and her extraordinary service to the FFA. She is truly an outstanding individual and I wish her well in her future endeavors.

TRIBUTE TO FIRST NATIONAL BANK OF LAS ANIMAS

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SCHAFFER. Mr. Speaker, I rise today to recognize the First National Bank of Las

Animas, Colorado. Last month, First Bank celebrated its 100th year of business.

First National received its original charter on November 26, 1901, by the U.S. Comptroller of Currency. The history of First National can be traced to 1875 when it was then named Bent County Bank. At the time, it was the only bank between Pueblo, Colorado and Garden City, Kansas. Mr. Speaker, I congratulate the bank for its longstanding presence and exemplary service to the community of eastern Colorado.

First National Bank has long been a foundation of capitalism and commerce in Bent County. Opening with only \$50,000 in capital, the bank has grown to over \$102 million in assets. First National Bank has been a fixture in the community and is a key reason why Las Animas continues to be one of the strongest economic centers in eastern Colorado.

As a company located in Colorado's Fourth Congressional District, First National Bank is a source of pride for the community of Bent County and all people of Colorado. Throughout the course of history the bank has helped many Coloradans. It is with honor and pride I wish First National a happy 100th Birthday. I ask the House to join me in extending wholehearted congratulations to First National Bank of Las Animas, Colorado.

IN HONOR OF CATHERINE E. TODD

HON. ROBERT MENENDEZ

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MENENDEZ. Mr. Speaker, I rise today to honor Catherine Todd for her years of service on behalf of public housing residents in Hudson County, New Jersey. On Friday, December 7, 2001, the Jersey City Tenant Affairs Board will honor Ms. Todd at their December Board Meeting. This tribute will take place at the Montgomery Gardens housing complex in Jersey City, New Jersey.

For nearly 50 years, Catherine Todd has worked to improve the standard of living for public housing residents in Hudson County. Since 1978, she has served as the Chairperson of the Montgomery Gardens Tenant Management Corporation in Jersey City. As Chairperson, she supervises the entire Montgomery Gardens Tenant Management staff and manages their operating budget. During her tenure as Chairperson, she has initiated a day care center service and developed an afterschool program for neighborhood children.

As a result of her extensive experience in the public housing sector, Catherine Todd has served as a consultant to the U.S. Department of Housing and Urban Development and numerous other resident management associations. Currently, she serves as the Resident Management Coordinator for the Newark Housing Authority and continues to offer advice and guidance to various resident management firms.

A graduate of Ferris High School, Catherine Todd is also an alumnus of Hudson County Community College.

Today, I ask my colleagues to join me in honoring Catherine Todd for her years of dis-

EXTENSIONS OF REMARKS

tinguished service on behalf of public housing residents in Hudson County, New Jersey.

HONORING FREDERICK P. AGUIRRE

HON. LORETTA SANCHEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Ms. SANCHEZ. Mr. Speaker, today I rise to honor an outstanding citizen of Orange County, Mr. Frederick P. Aguirre who has recently been honored by Orange County's United Way for his outstanding service in education to the Latino community. Mr. Aguirre has a strong sense of civic duty and is dedicated to the Latino community, to our country's veterans, and to education.

A graduate of UCLA Law School, he is a co-founder of the Hispanic Bar Association of Orange County. Currently, he serves on the Hispanic Advisory Committee of the Orange County District Attorney's office.

His support for education spans across all levels. He was a mentor through the "Stay in School Program" that provides tutoring to at-risk students in the Santa Ana Unified School District. He has been a speaker at elementary schools, middle schools, high schools, and at several colleges. He re-established the Placentia chapter of the League of United Latin American Citizens (LULAC), a group that provides scholarships for Hispanic youth and encourages civic participation through citizenship classes and voting. In 1994, he became a member of the Corporate Development committee of the Hispanic Education Endowment Fund. In addition, he organized and re-incorporated Latino Advocates for Education, Inc. a nonprofit organization that promotes educational excellence among our Latino students and increases quality instruction and administration in schools.

His exemplary achievements in the community are also noteworthy. As a member of the Board of Directors of the Alzheimer's Association of Orange County, he founded the Multi Ethnic Community Advisory Board. He was also a member and Chairman of the Board of the Community Advisory Board of Placentia Linda Hospital. In 1994, he organized a program offering free legal services at the Cathy Torrez Learning Center in Placentia.

In addition, he has been active in recognizing U.S. veterans. Since 1998, he has organized a Veteran's Day conference at Santa Ana College in Santa Ana, CA. These events have grown in scope each year. The most recent, the 5th Annual Veteran's Day Celebration and Scholarship Program, honored over 100 living Mexican-American World War II veterans and their families. Over 3,000 people attended, including Governor Gray Davis.

I am proud to recognize Mr. Frederick P. Aguirre for his outstanding service to the Orange County community, to education and to the Latino community. His efforts have truly touched people's lives and have had a positive impact on our community.

RECOGNIZING THE PHYSICIANS, NURSES, AND HEALTH CARE PROVIDERS OF INOVA FAIRFAX HOSPITAL

HON. TOM DAVIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. DAVIS of Virginia. Mr. Speaker, I rise today to recognize the fine work of the physicians, nurses and other health care providers at Inova Fairfax Hospital in response to the recent cases of inhalation anthrax that befell workers at the Brentwood postal facility. Two employees of this facility, Mr. Leroy Richmond and an unnamed colleague, sought treatment at Inova Fairfax for what ultimately proved to be inhalation anthrax. For both gentlemen, the close attention and astute diagnoses of Drs. Cecele Murphy and Susan Bersoff-Matcha were literally the difference between life and death.

Physicians, nurses and other health care providers represent the difference between life and death for many, many patients with myriad conditions every day. What was special about this instance was that both doctors were dealing with a rare disease that affords little, if any, room for error. Early diagnosis of anthrax is essential in giving a patient the chance to survive—a task made all the more difficult because early symptoms of anthrax are not easily distinguishable from the flu or other common maladies. In addition, at the point when Mr. Richmond presented at the emergency room, the extent to which postal workers were at risk for exposure was not fully understood. Cast against a backdrop of profound public fear, with numerous worried patients believing they displayed signs of anthrax, the actions of Drs. Murphy and Bersoff-Matcha are all the more impressive.

Quick and accurate decisions such as those made by Dr. Murphy, Dr. Bersoff-Matcha, the nurses and staff of Inova Fairfax Hospital will be required to minimize casualties in any future bioterrorism attacks. In the anthrax attacks—the first biological assault of our new war on terrorism—these individuals have provided an outstanding example for others to follow.

TRIBUTE TO FLAGLER FFA AGRONOMY TEAM

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SCHAFFER. Mr. Speaker, I rise today to recognize the Flagler, Colorado chapter of the Future Farmers of America. The Flagler team recently attended the 74th National FFA Convention and placed fifth in the Agronomy Career Development competition.

The members of the team—Jake Michal, Nathan McCaffrey, Kyle Einspahr, BJ New, and David Wieser—were the first representatives from Colorado to compete in this event. Despite being newcomers to the competition, the team was able to persevere with an outstanding finish at this year's convention.

The FFA is dedicated to making a positive difference in the lives of young people by developing their potential for premier leadership, personal growth and career success through agricultural education. With a 74-year history, the FFA has been an integral part in continuing America's great tradition as a leader in agriculture production.

The Flagler chapter of the Future Farmers of America is a source of pride for the community of Flagler and all people of Colorado. The team has shown great strength and fortitude by placing in the top five of all teams competing. I ask the House to join me in extending wholehearted congratulations to the Flagler chapter of the Future Farmers of America team.

TRIBUTE TO DR. ROSE BELLANCA
"2001 WOMAN OF THE YEAR" CO-
LUMBUS DAY CELEBRATION

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BONIOR. Mr. Speaker, each year the Italian American community celebrates Columbus Day, with festivities including a weekend of food, music, and fun, as well as an annual Columbus Day Parade and Banquet. With organizations and committees dedicated to promoting and preserving the Italian-American heritage through language, culture, music, and social events, the Columbus Day Committee is no exception. Honoring distinguished Italian-Americans who have shown outstanding service in their local communities, each year the Columbus Day Committee selects individuals who demonstrate these qualities. On Sunday, October 7, as the families and friends gathered together at their annual Columbus Day Banquet, they recognized Dr. Rose Bellanca their "2001 Woman of the Year".

Demonstrating outstanding dedication and commitment to her students, her colleagues, and her community, Dr. Rose Bellanca has always been an active and enthusiastic supporter of education and advancement. Beginning her teaching career in 1973 at Fitzgerald High School in Macomb County, a short nine years later she was the first woman serving as the Director of Vocational-Technical Education in Macomb County while working for the Chipewa Valley School District. Her hard work and relentless pursuit for excellence in education led her to become Assistant to the President of Macomb Community College, where she served as Interim Vice President for Student and Community Relations and later Vice President for Planning and Development. Today, as Provost of Macomb Community College, her strong focus on students continues to be her priority, and her hard work and innovative ideas continue to make her a leader in educational advancement.

Faithfully committed to promoting her Italian American heritage as well, Dr. Bellanca is also an active member of the American Italian Professional and Business Women's Club and the Americans of Italian Origin Society. She has received the Macomb County Woman of Distinction Award by the Girl Scouts of Macomb

County, as she is truly a role model for young women and young Italian American women. A devoted mother and wife of 30 years, a professional, and a friend, Dr. Bellanca truly is this year's "Woman of the Year".

I applaud the 2001 Columbus Day Committee and Dr. Bellanca for their leadership, commitment, and service, and I urge my colleagues to join me in saluting them for their exemplary years, of leadership and service.

CONFERENCE REPORT ON H.R. 2299,
DEPARTMENT OF TRANSPORTATION
AND RELATED AGENCIES
APPROPRIATIONS ACT, 2002

SPEECH OF

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. BEREUTER. Mr. Speaker, this Member rises in support of the conference report for H.R. 2299, the Transportation appropriations bill for fiscal year 2002.

This Member would like to commend the distinguished gentleman from Kentucky (Mr. ROGERS), the Chairman of the Transportation Appropriations Subcommittee, and the distinguished gentleman from Minnesota (Mr. SABO), the ranking member of the Subcommittee for their hard work in bringing this conference report to the Floor.

Mr. Speaker, this Member certainly recognizes the severe budget constraints under which the full Appropriations Committee and the Transportation Appropriations Subcommittee operated. In light of these constraints, this Member is grateful and pleased that this legislation includes funding for several important projects of interest to the State of Nebraska.

This Member is particularly pleased that this appropriations bill includes \$1.5 million for preliminary work leading to the construction of bridges in Plattsmouth and Sarpy County to replace two obsolete and deteriorating bridges. The request for these funds was made by this Member as well as the distinguished gentleman from Nebraska (Mr. TERRY) and the distinguished gentlemen from Iowa (Mr. GANSKE and Mr. BOSWELL).

The agreement leading to the funding was the result of intensive discussions and represents the consensus of city, county and state officials as well as the affected Members of Congress. The construction of these replacement bridges (a Plattsmouth U.S. 34 bridge and State Highway 370 bridge in Bellevue) will result in increased safety and improved economic development in the area. Clearly, the bridge projects would benefit both counties and the surrounding region.

This Member is also pleased that the conference report includes \$4 million for Nebraska's Intelligent Transportation System (ITS). This funding, which was requested by this Member and the distinguished gentleman from Nebraska (Mr. OSBORNE), is to be used to facilitate travel efficiencies and increased safety within the state.

The Nebraska Department of Roads has identified numerous opportunities where ITS

could be used to assist urban and rural transportation. For instance, the proposed Statewide Joint Operations Center would provide a unifying element allowing ITS components to share information and function as an intermodal transportation system. Among its many functions, the Joint Operations Center will facilitate rural and statewide maintenance vehicle fleet management, roadway management and roadway maintenance conditions. Overall, the practical effect will be to save lives, time and money.

This Member is also pleased that the conference report includes \$1 million for a Highway 66 bypass south of Louisville, Nebraska. This project, which has the support of the Louisville mayor and city council as well as the Cass County commissioners, would provide significant safety and economic development benefits for the area.

The conference report also includes \$325,000 requested by this Member for the construction of the 1.7-mile Lewis & Clark bicycle and pedestrian trail on State Spur 26E right-of-way, which connects Ponca State Park and the Missouri National Recreational River Corridor to the City of Ponca. This trail will play an especially important role as the area prepares for the bicentennial of the Lewis and Clark Corps of Discovery expedition and the significant increase in tourism which it will help generate. The approaching bicentennial represents a significant national opportunity and it is crucial that communities such as Ponca have the resources necessary to prepare for this significant commemoration.

The trail will provide the infrastructure necessary to improve the quality of life by providing pedestrian and bicycle access between Ponca and the Ponca State Park and increases the potential for economic benefits in the surrounding region. The trail addresses serious safety issues by providing a separate off-road facility for bicyclists and pedestrians.

It is certainly important to note that this conference report includes \$1.6 million for the Antelope Valley Overpass in Lincoln, Nebraska. This bridge is an integral piece of a comprehensive plan to revitalize downtown Lincoln that has emerged from a partnership between the City, the State of Nebraska, and the University of Nebraska-Lincoln. The funds would assist with the design and right-of-way phase of a bridge that would span railroad tracks. This funding will supplement the \$5,625,000 which this Member had successfully sought in the 1998 TEA-21 legislation.

In addition, the conference report includes \$200,000 to study the feasibility and fiscal impact of the passenger rail project between Lincoln and Omaha, Nebraska. The metropolitan areas of Omaha and Lincoln are becoming increasingly integrated. The fringes get closer together every year and the inter-city highway commuter traffic is increasing significantly. The growing congestion will only get worse in the coming years. A far-sighted approach is necessary to address the needs of commuters and others using the corridor. The proposed study is a necessary component in this process. It would examine such important issues as travel patterns, ridership potential for rail service and cost evaluations.

Adequate funding is clearly needed to make this study and the overall project a reality. A

feasible transportation alternative for the corridor would hold the promise of increased economic development, improved air quality and safety and decreased congestion.

The conference report also includes \$1 million for preliminary engineering for the replacement of U.S. Highway 81 bridge at Yankton between Nebraska and South Dakota. This funding will be helpful in replacing an important bridge across the Missouri River. This funding supplements the \$1.125 million this Member successfully sought in the 1998 TEA-21 legislation.

Finally, this conference includes \$1.1 million for rail research to be performed jointly by UN-L and Marshall University in West Virginia. The funding will be used for safety research projects in the areas of human factors, equipment defects, and train control methods.

The University of Nebraska-Lincoln is well qualified to conduct this research. It has the necessary expertise in the area of transportation safety to provide meaningful research which will improve railroad safety. In addition, the nation's two largest railroads have a significant presence in Nebraska (one has its corporate and working headquarters in Omaha) and the state currently is traversed by the busiest railroad corridor in the world which move vast amounts of western coal to much of the rest of the nation. This funding will greatly contribute to safer rail operations throughout the country.

Mr. Speaker, in conclusion, this Member supports the conference report for H.R. 2299 and urges his colleagues to approve it.

THE INTRODUCTION OF THE NEW YORK RECOVERY FROM TERRORISM ACT

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. RANGEL. Mr. Speaker, today I introduce legislation to provide tax incentives for the revitalization of New York City, and in particular, Lower Manhattan.

We all know of the terrible events of September 11, 2001, the awful loss of life, the heroism in the face of adversity, and the physical devastation. This was an attack not solely on New York, but on America. In the weeks following the tragedy, Lower Manhattan has suffered greatly and the economy of New York City has been struck hard, it really is America that has been struck.

I cannot begin to say how much New Yorkers are grateful for the heartfelt response of their fellow Americans and people from all over the world. The prayers, the charity, and the promises of government support have all made an enormous difference in the ability of New York to begin to respond to and recover from the crisis. As one America we have responded to this dastardly attack in Afghanistan; across America; and, in New York.

Through this unity I believe that Congress should provide the tools necessary for New York to fully recover from the attacks and assure that the vitality of Lower Manhattan be sustained.

Lower Manhattan in 1624 was the first part of then New Amsterdam settled by Europeans. It has always been the heart of New York. It has been the entry point for millions of immigrants. Beginning in the 18th century and into the 21st century it has been the heart of finance in America and today the financial center of the world.

Unfortunately, the impact of the attack on the World Trade Center has altered the character of Lower Manhattan. Many businesses have had to temporarily move out of the area. It is unclear if they will return. Many businesses depending on the traffic in the area are suffering. Many other businesses are contemplating a move out of Lower Manhattan.

The City across the five boroughs has suffered as well. Revenues for the city and state governments are down significantly. Public institutions such as hospitals are suffering financially. Projects once thought possible are now on hold.

Funds provided through FEMA will help considerably. The appropriations Congress will provide in the supplemental bill enacted after the attacks will also help. Nevertheless, there are still unmet needs and uncertainty that must be resolved.

That is why I have introduced this legislation to provide tax incentives for New York's recovery. I am very pleased that my colleague from New York, Mr. HOUGHTON, has introduced H.R. 3373, which also provides tax incentives for New York's recovery. I have cosponsored the bill. I am introducing this bill because it offers alternatives to H.R. 3373 and will allow New York Members to support varying means to speed the City's recovery. It will also allow Congress to choose the most effective and efficient provisions for the recovery.

The provisions of this bill, are for the most part, included in the Stimulus Bill reported by the Senate Finance Committee. Two of the provisions would have been amendments to the Finance Committee bill had it been considered on the Senate floor.

The bill proposes the following:

A 20 percent wage credit to employers for the first \$6,000 paid per year to employees working in Lower Manhattan from September 11, 2001 to December 31, 2004. The credit is also available for wages paid employees by companies who were operating in Lower Manhattan on September 11, 2001, and have subsequently moved to another part of New York City.

An increase in the state cap for tax exempt private purpose bonds to \$12.5 billion for projects in New York City. The first \$7 billion of the increased cap must be used in Lower Manhattan.

A limited liberalization of the ability of issuers of tax exempt debt to advance refund existing debt. New York City, the Port Authority, the Metropolitan Transit Authority, the Municipal Water Authority and nonprofit hospitals would be able to advance refund bonds that had previously been issued to advance refund bonds where the original bonds had been deemed.

A special provision to allow taxpayers who lost property in Lower Manhattan as a result of the attacks to be able to expense the remaining basis in the lost property carried over to replacement property as the result of insur-

ance payments where the replacement property is located in New York City.

A one time \$5,000 nonrefundable tax credit for residents of Lower Manhattan (with no more than \$5,000 credit per residence). The credit would be phased out for those residents with incomes in excess of \$150,000.

I urge my colleagues, both from New York and the remainder of the nation to join together and help New York recover.

The nation will never be the same as it was before September 11. The relationship between New York and the rest of the nation will forever be altered by the attack on the World Trade Center. We are bound together as never before. Together we will rebuild.

PRICE-ANDERSON REAUTHORIZATION ACT OF 2001

SPEECH OF

HON. W.J. "BILLY" TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. TAUZIN. Mr. Speaker, in my previous remarks on this important legislation, I failed to note the important role that the Bush Administration has played in helping us get H.R. 2983 to the House floor. In particular, the Department of Energy's constructive guidance has been a real asset to us. In the course of our discussions with DOE, we have been told that the Administration has a number of concerns about the legislation, as reflected in the statement of Administration position. We will of course work closely with the Department to ensure that these concerns are addressed as the process moves forward.

TRIBUTE TO THE POETRY OF MISS SHEILA BRIDGES

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. TRAFICANT. Mr. Speaker, the following was written by one of my constituents, Miss Sheila Bridges. Her poetry is a tribute to our nation, which is still standing strong and proud.

STILL STANDING

(By Sheila L. Bridges)

America, America, Young and shy, growing oh so high, yet not too high, but still standing!

America, America, they hit You once, they hit You twice, but You are still standing!

America, America, they used their words of anger, hate and pain and did not forget their sticks and stones, but You are still standing!

America, America, some called and asked You to fight, live, stay, finance and/or on their shores with one hand and they ordered, told You to get out with the other hand, but You are still standing!

America, America, help me please; so You called and ask American's to stand and/or fight; each in their own way for

a better land and safer, brighter future, but You are still standing!

America, America, Red, White and Blue; They tore You, They burned You, They spit on You, and They stepped on You too; but You are still standing!

America, America, the Young Little Eagle of the sky; put one wing on Her children and Their other wing on Your children; oh so quiet and shy, yet do not think, You can and will push Her around; because through it all, not too bold and not too high; She is still standing!

America, America, they threaten to germ, gas and bomb You while They work to destroy You; but You are still standing!

America, America, ever great nation fell due to internal problems, We have more than our share, yet united We stand, divided We fall; but Thank GOD, ABOVE, You are still Standing!

America, America, let the world stand and think; Whom will They turn and/or run to, when They need aid and help if You are not there; and then wake up and say "Thank-you" to the HIGHEST, HIGHER POWER: That ever Nation of the world has His blood and seed in this, our, their nation called the United States of America; whose still standing!

America, America, "Thank-You for being there for Us and Oh yes, for the Them around the world too and for still standing!"

America, America, young and shy; "Please do not die and through it all Thank GOD and then You for still standing!"

America, America, not just standing by; war or peace what shall it be; fight today, in order that We will and can stand tomorrow; but for now, still standing!

America, America, Standing oh so high; with her Mommy, Her Daddy, Her Aunt and Uncle Nations saying, Yelling; "let Me help protect My Brothers, Sisters and Cousins too. * * * Mom, Dad, Aunt and Uncle Nations; You taught Me well and now We All are still standing!"

America, America, still standing, strong, tiered, afraid, concerned, kind, gentle and extended, yet not alone; thus, I first Thank Our GOD; then My lucky star; My Fairy Godmother and all that is fair, honest, just, clean and right; that I, We can still say "America, America, You are still standing!"

H.R. 2983, THE PRICE-ANDERSON REAUTHORIZATION ACT OF 2001

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BARTON of Texas. Mr. Speaker, in my previous remarks on H.R. 2983, the Price-Anderson Reauthorization Act of 2001, I stated that \$187 million had been paid out in response to the accident at Three Mile Island. In fact, approximately \$70 million has been paid out to date, and this amount is well within the plant's primary insurance policy required by the Price-Anderson Act.

TRADE PROMOTION

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. OXLEY. Mr. Speaker, this week, the House is scheduled to vote on Trade Promotion Authority legislation. Granting the President this authority once again is one of the most important actions that we can take to strengthen the U.S. economy and promote global prosperity. The attack on the World Trade Center was a symbolic assault on the free and open capital markets that underpin development throughout the world. By approving TPA, we can reaffirm our commitment to a free and open international global economy that will lift living standards across the world. I commend to your attention this Wall Street Journal article of November 29 by the Chairman and Chief Executive Officer of Goldman Sachs, Henry Paulson, Jr., entitled "Congress Should Put Trade on the Fast Track."

CONGRESS SHOULD PUT TRADE ON THE FAST TRACK

(By Henry M. Paulson, Jr.)

The House of Representatives will soon vote on the question of granting the president Trade Promotion Authority, also known as fast-track approval. Some in Congress have argued that now is not the time to take up legislation that has encountered such fierce protectionist opposition in recent years. But in the wake of the terrorist attacks of Sept. 11 and the current economic slowdown, it is all the more important that Congress move quickly to approve this vital measure.

This bipartisan action would inspire confidence in global capital markets. It would allow America to be seen as continuing to lead the open trade and globalization that has been so vital to the prosperity of both developed and developing countries. And it would send a powerful message that the president and Congress speak with one voice, and are committed to advancing freer trade as part of the war on terror. Indeed, approval of TPA would signal that the U.S. is not only seeking a military coalition, but an economic one.

The benefits of trade hardly need illuminating. America's exports accounted for approximately one-third of our extraordinary economic growth over the past decade, and exports now support over 12 million American jobs (nearly three million more than a decade ago). Jobs supported by exports typically pay 13% to 18% more than comparable employment.

Trade brings real economic benefits to the U.S. The North American Free Trade Agreement, and the completion of the previous round of trade negotiations (the Uruguay Round), now generate annual income gains of \$1,300 to \$2,000 for the average American family of four. Trade is also fundamental to economic growth in the developing world. A recent World Bank study shows that nations open to trade grow 3.5 times faster than nations closed to trade. The recent experience of countries such as South Korea, China and Chile underscore that trade is a pathway to prosperity.

Trade is a two-way street, and imports also benefit the U.S. They provide consumers with more choices and lower prices on a wide variety of goods. Imports also force our in-

dustries to constantly improve and innovate in order to remain competitive with foreign exporters.

I confess to being a bit mystified by all of the controversy about extending such a common-sense power to the president. TPA simply says that when the executive branch completes negotiations on a trade agreement and submits it to Congress for approval, that Congress cannot amend the agreement. It must simply vote yes or no.

This is standard procedure in other types of negotiations. Union negotiators don't reach agreements with management and then allow all their members to amend and debate. And as I know from 27 years in investment banking, mergers and acquisitions would never be consummated if, once negotiated, rather than being sent to a corporate board of directors for approval, they were sent to be restructured.

The most obvious aspect of the war on terror is clearly military action. But we can't forget the economic component, and primarily the gains we reap from globalization. Let's not forget that it continues to be those countries most closed to trade that are prime breeding grounds for terrorists. Moreover, to truly wage and win this war, our political unity and military power must be fortified by the strength of our economies.

Those economies are increasingly at risk. Global prosperity is threatened not only by the specter of terrorism itself, but by the slump that was depending before the Sept. 11. Worse, it is during periods of economic distress that pressure to revert to economic nationalism and protectionism are the greatest. This is a recipe for disaster, and it must be resisted through bold and decisive action.

The two necessary actions are clear; a fiscal, consumer-oriented stimulus package and TPA. Congress is well on its way to passing a stimulus package, and should take care to keep it directed at consumers. Although trade won't provide the sort of immediate boost to the economy that a stimulus package will, trade will have greater long-term impact.

While each of the previous five presidents has been granted this authority, it lapsed in 1994. During the seven years the U.S. has been without this trade authority, other countries have moved ahead without us. Since 1990, the European Union completed negotiations on 20 free trade agreements, and is currently negotiating 15 more. Mexico now has eight agreements with 32 countries. Today out of 130 preferential trade agreements and investment agreements in the world, the U.S. is a party to only three.

This means our exporters encounter higher tariffs—if not closed markets—in other countries. Our own consumers face higher prices and fewer choices. And the U.S. sits on the sidelines as the rules of the game are set on everything from e-commerce to agriculture.

Passing TPA is the first, all-important step to restoring U.S. leadership. It will allow us to move quickly on several fronts. We can complete negotiations for free trade agreements with Chile and Singapore, build vital support for the proposed Free Trade Area of the Americas and, most important, lead a drive for a new round of global trade negotiations.

The stakes are enormous and there has never been a time in our recent history when American leadership has been needed more. TPA can be a key part of that leadership, building confidence in the global marketplace by clearly signaling that the process of globalization will continue with renewed vigor. It will enhance our economic position

in the world and strengthen our national security. The time for Congress to act is now.

PAYING TRIBUTE TO RUSTY CRICK

HON. SCOTT MCINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MCINNIS. Mr. Speaker, I would like to take this opportunity to congratulate Rusty Crick for his outstanding accomplishments at Mesa State College in Grand Junction, CO—a prestigious college in my District. Rusty has recently reached the impressive total of five hundred wins as the head volleyball team coach. He has coached the Mavericks for over twenty years and his accomplishment is testimony to his fine coaching abilities.

Rusty began playing volleyball while serving in the Air Force. After playing for several years, he moved on to coaching the base's men's and women's teams. In 1976, Rusty moved to Grand Junction, Colorado where he was stationed as an Air force recruiter. It was then that Rusty began coaching the Mesa State women's volleyball team. In 1982, he was promoted to the coveted head coach position, a title he has held since that time.

His accomplishments as coach are impressive. He has amassed eight RMAC championships, is second in overall victories for Colorado college volleyball coaches, and the team is ninth in overall state victories. His latest goal is for the sport of college volleyball is to obtain similar national recognition that other popular sports enjoy in the country.

Mr. Speaker, it is a great privilege to recognize Rusty Crick and congratulate him on his accomplishments. His dedication to Mesa State and the sport of volleyball has brought great credit to himself, Mesa State, and the community of Grand Junction. Keep up the good work Rusty and we look forward to watching the Mavericks in another winning season.

TRIBUTE TO ALAN BRAND: CEO OF NARCO FREEDOM, INC.

HON. JOSÉ E. SERRANO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SERRANO. Mr. Speaker, I rise today to pay tribute to Narco Freedom, Inc. and to its Chief Executive Officer, Mr. Alan Brand, an innovative leader and steadfast humanitarian. Narco Freedom, Inc. is a Bronx-based organization that for 30 years has provided New Yorkers with a network of first-rate drug treatment and health related services. I am honored to acknowledge them on their 30th anniversary.

As CEO of Narco Freedom, Inc., Alan Brand developed a revolutionary comprehensive continuum of care that supports the recovery of thousands of drug addicts. Programs developed and reared under Mr. Brand's leadership not only aid recovery from drug addictions, but foster successful daily living skills, social skills,

EXTENSIONS OF REMARKS

and mental health. Once an individual has overcome an addiction with the help of Narco Freedom, Inc., he or she will receive continued support through after-addiction treatment in order to gain or regain a higher quality of life. These addicts' families also receive support from Narco Freedom's extensive programs because often they too must rebuild their lives during and after recovery. Mr. Brand's dedication to the advancement of substance abuse treatment and to providing health services to other groups in great need led him to spearhead the only HIV Social Needs managed care plan in New York State. Mr. Brand has developed a variety of treatment plans that are geared towards specific groups of individuals. Some aid women and their children, while others focus on people who are suffering from HIV or AIDS in conjunction with a drug abuse problem. His foresight and determination allow him to set new standards when devising treatment plans.

For three decades, Narco Freedom, Inc. has helped people get off and stay off drugs and supported recovering addicts and their families with a network of programs dealing with various mental and physical health issues. The majority of Narco Freedom's clients have two major strikes against them; they are addicted to drugs and they are poor. People with the financial means to undergo the best drug treatment programs are often treated with more sympathy than poor addicts who society tends to view as "hopeless." Narco Freedom has hope for these individuals and instills hope in them via intense programs. Many of these programs were engineered or strengthened by the efforts of Mr. Alan Brand. However, the devotion and expertise of Narco Freedom's superb staff, make the great work that they do possible. A great deal of patience and an acute understanding of effective drug treatment have made this team so successful.

I ask my colleagues to join me today in honoring Narco Freedom, Inc. for 30 years of outstanding service and its CEO, Mr. Alan Brand, for expertly guiding this great organization to even more success. I would also like to thank the entire Narco Freedom team for saving and improving so many lives.

RACIAL PROFILING

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. TRAFICANT. Mr. Speaker, on Tuesday, June 6, I inserted the letter of Gerald Beulah, Jr., to the Boardman Police Department. This letter regarded "racial profiling" by the Boardman Police Department.

Today I would like to insert the response to Mr. Beulah's letter by the Boardman Police Department.

HOUSE OF REPRESENTATIVES,
Washington, DC, June 14, 2001.

Mr. JEFFREY L. PATTERSON,
Chief of Police, Boardman Township Police Department, Youngstown, OH.

DEAR MR. PATTERSON: Thank you for your response to Mr. Gerald Beulah regarding his racial profiling case. I received a copy of your response, and it will be submitted into the Congressional Record.

Please understand that this problem will not be resolved simply by submitting your response into the Record. The fact still remains that Mr. Beulah was pulled over a total of four times, and was never issued a citation. As former Sheriff of Mahoning County, I am very well aware of the perceptions that the public has about officers of the law. I am also aware of the fact that racial profiling does, in fact, exist in many cities across the country. However, as Sheriff, I always demanded that my officers convey professionalism and respect to all the citizens of the Mahoning Valley, and as the Representative of the 17th Congressional District, I am demanding the same of you and your officers. Anything less is unacceptable and will not be tolerated.

Again, thank you for your letter, and I hope that you will continue to look into Mr. Beulah's case so that the same incident does not occur again. Should you have any questions or concerns, please do not hesitate to contact my office.

Sincerely,

JAMES A. TRAFICANT, JR.,
Member of Congress.

BOARDMAN TOWNSHIP
POLICE DEPARTMENT,
Boardman, OH, June 4, 2001.

Mr. GERALD BEULAH, Jr.,
Youngstown, OH.

DEAR MR. BEULAH: I received your letter last Tuesday afternoon and immediately initiated an inquiry into the issues you raised. I am writing to advise you of my preliminary findings and to invite you to meet with me or my staff to discuss your concerns in greater detail.

First, let me say that yours is the only allegation of "racial profiling" by Boardman police I have received in the nearly six months I have been chief of police here. From the portions of the Robert Mangino and Dan Ryan shows on WKBN-AM Radio 570 I heard, or that were relayed to me by others, there did not seem to be any widespread perception among the callers that African-Americans were particularly subject to unfair treatment by my officers. Nor have I received any complaints from citizens since these programs aired, nor have I been contacted by any other members of the media or by any community organizations on this issue.

Since receiving your letter, I have checked some of the more readily accessible statistics for indications of disproportionate representation of African-Americans among those cited by Boardman police for traffic violations. While I am aware that the data on citations issued does not represent all those persons who have been stopped by officers but not cited, nonetheless I believe the proportional representation is relevant to the issue. Last year, more than three-quarters (77 percent) of those cited were white, and less than one-quarter (23 percent) were African-American. To place those numbers in context, I refer you to the most recent Census data, which shows that Mahoning County as a whole is about 16 percent African-American, and the city of Youngstown—our nearest and largest neighboring community—is about 44 percent African-American. I have used those figures rather than the Census data for Boardman Township (2.4 percent African-American) because I believe they more closely represent the demographics of those who travel our streets and highways, due to the presence of several heavily-utilized routes as well as the high-density retail and commercial development within our jurisdiction.

However, I don't dispute that the perception of "racial profiling" exists within both the minority community and society at large, not only here in Boardman and the Mahoning Valley, but throughout the U.S. And this perception has been given credence from anecdotal evidence in reports of systematic race-based enforcement by the New Jersey State Police, among others, although valid statistical data on the problem has proven difficult to gather and analyze. We, as law enforcement professionals, are truly troubled by both the perception and—to the extent it exists—the practice of racial profiling. In response, both the International Association of Chiefs of Police (IACP) and the Ohio Association of Chiefs of Police (OACP), as well as chiefs' and sheriffs' organizations in other states, have developed model policies and training curricula to address the issue. State legislatures have proposed or adopted laws requiring policies and data collection, and the U.S. Department of Justice has taken action against not only the Los Angeles Police Department, but also, in our area, Pittsburgh and Steubenville police.

I assure you, as Boardman's police chief, I have been—and will continue to be—alert for any indications of discriminatory practices by my organization or any of its members. I believe I have an experienced, educated, and enlightened management staff, and a corps of intelligent, well-trained, and highly motivated police officers, all of them professionals dedicated to serving their community. Nonetheless, I routinely monitor statistical data, read arrest reports, review official transactions of all kinds, and pay attention to informal conversations and offhand remarks for indicators of discriminatory conduct. I also receive frequent feedback from the public on the performance of my agency and individual officers through correspondence, phone calls, and personal contacts. Thus far—other than your letter—I have had no cause for concern.

However, prior to your letter, we had already undertaken some proactive steps to further ensure that discriminatory conduct is neither practiced nor condoned by Boardman police. In March of this year, every Boardman police officer was required to watch a 16-minute training video jointly produced by the OACP, the Buckeye Sheriffs Association, and the Ohio State Highway Patrol, to reinforce the unacceptability of racial profiling. We have also been reviewing and revising our policies to explicitly prohibit discriminatory profiling of any kind. Among the draft provisions are the following policy statements:

Racial or bias-based profiling of any kind is totally unacceptable and will not be condoned. The department will utilize various management tools to ensure that racial or other prejudice is not used by officers in deciding whether to take official action.

Officers are expected to enforce the traffic laws when violations are observed, and to stop and detain motorists or pedestrians when there is reasonable suspicion that they have committed, are committing, or are about to commit a criminal act.

Officers are prohibited from stopping, detaining, searching, or arresting anyone on the basis of discriminatory profiling. This policy does not prohibit officers from stopping or detaining individuals who reasonably match the description of a specific suspect in connection with a specific crime, when race, gender, ethnic origin, or age are among the identifying attributes in the suspect's description.

I am sorry your contacts with Boardman police have not all been positive ones, but I am pleased you have had positive experiences as well. I sincerely hope I have adequately addressed your overall concerns. If you would like an investigation into any specific incident, please don't hesitate to contact me for an appointment. By law, such investigations must be handled through the proper procedures, and are not made public until they are concluded.

As Mr. Mangino read your letter aloud on his Friday program, and Congressman Traficant has taken it for inclusion in the Congressional Record and distribution to other law enforcement agencies in the 17th Congressional District, I have taken the liberty of sharing a copy of this response with them.

Sincerely,

JEFFREY L. PATTERSON,
Chief of Police.

PAYING TRIBUTE TO JOAN SINDLER

HON. SCOTT MCINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. MCINNIS. Mr. Speaker, I would like to take this opportunity to recognize Joan Sindler and thank her for her dedication to our educational system. She has contributed much of her time and effort to the Skyline Elementary Parent Teacher Organization as well as to other educational programs. She was recently named the Parent of the Year by the Colorado Association of Gifted and Talented and her efforts certainly deserve the praise and admiration of this body.

In addition to serving on the PTO, Joan has also been a member of the Accountability committee and the School Improvement committee. Perhaps the majority of her time is consumed by contributing a great deal of effort to the Colorado Gifted and Talented Enrichment (GATE) program in Canon City. As a member of GATE, Joan is involved in attending monthly meetings and assists with district events and special projects that ensure the continuing operation of the program.

Mr. Speaker, it is a great privilege to honor Joan Sindler and recognize her contributions to the educational system. Through people like Joan, children can rely on a quality education that focuses on their special needs and desires to excel in their education. Joan's dedication has brought great credit to herself, her family and her community and I would like to congratulate her for being named Parent of the Year.

PARMA HEIGHTS CHRISTIAN ACADEMY

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. KUCINICH. Mr. Speaker, I rise today to honor Parma Heights Christian Academy, which has been named a 2000–2001 Blue Ribbon School of Excellence by the U.S. Department of Education.

Parma Heights Christian Academy is the only private Christian school in the nation to receive the Blue Ribbon School of Excellence Award this year. In all, only 264 schools in the country earned this prestigious award this year. Blue Ribbon Schools are considered to be models of both excellence and equity where educational excellence for all students is a high priority. Parma Heights Christian Academy had to demonstrate its effectiveness in meeting local, state and national educational goals and had to successfully complete a rigorous application process. Blue Ribbon Schools must offer instructional programs that meet the highest academic standards, have supportive and learning-centered school environments, and demonstrate student outcome results that are significantly above average.

Parma Heights Christian Academy is an outstanding school that is well deserving of this national recognition. Its academic programs and environment will serve as a model for schools across the country. My fellow colleagues, please join me in congratulating the students, teachers and administration of Parma Heights Christian Academy for their commitment to excellence.

HONORING MR. CHESTER WILLIAMS OF STATESBORO UPON HIS 90TH BIRTHDAY

HON. JACK KINGSTON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. KINGSTON. Mr. Speaker, I am pleased to honor Mr. Chester Williams of Statesboro, GA on the occasion of his 90th birthday. Chester has truly led a remarkable life, and I am proud to be able to celebrate his accomplishments with you today.

Chester Williams was born on December 4, 1911 in Stapleton, GA. He earned a bachelor's degree in education from Georgia Teachers College in 1935 and a masters from the University of Georgia in 1950. Throughout his career, he has served as headmaster at four Georgia high schools; they include Reidsville High School, Folkston High School, North Habersham High School, and Metter High School. In addition he served as president of the District High School Principals' Association. Through his life as an educator, Chester has been able to expose young people to the benefits of a strong system of values and a well-rounded life. He continues to maintain daily interactions with the students from Georgia Southern University.

Mr. Williams was also a Lieutenant in the US Naval Reserve, seeing active duty in the Atlantic and Pacific War theaters. During this time he was a recognition and gunnery officer on the USS General W.G. Hann. Williams was a four-sport athlete and letterman at South Georgia Teacher's College, which is now Georgia Southern University. He is best known for earning all conference honors as a basketball guard in 1931 and 1932. He was also a member of the track team for three years, competing in the vault, high jump, and high hurdle events. In 1991 Mr. Williams was inducted into the Georgia Southern University Sports Hall of Fame.

Mr. Williams served as Speaker of the House in the Georgia Silver Haired Legislature from 1978 to 1981 and four years as a Small Claims Court magistrate judge. He and his wife currently reside in Statesboro, Georgia where he continues to serve on the city's zoning board. He is also a charter member of the Snooky's Restaurant Political Action Committee. Snooky's is Mr. Williams favorite place to eat breakfast, which is evidenced by the fact that he eats their sausage biscuit and grits every morning he is in Statesboro. He has his own special table in the restaurant. Friends come by every morning to tell him hello and receive one of his world famous hugs. Snooky's is located directly across the street from Georgia Southern University and was the location of Mr. Williams 90th birthday party today.

Certainly, Mr. Chester Williams has been a wonderful leader and role model to the many individuals he has touched throughout his life. He has demonstrated the enduring principles of education, health, patriotism, service, and leadership. It is my honor to commend the outstanding life of model citizen Chester Williams and thank him for all that he has done for the State of Georgia.

CLEAN DIAMOND TRADE ACT

SPEECH OF

HON. EVA M. CLAYTON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 27, 2001

Mrs. CLAYTON. Mr. Speaker, I am pleased to rise in support of H.R. 2722. This is good legislation whose time is long past due.

I want to recognize the leadership of the gentleman from Ohio (Mr. HALL) and that of the gentleman from Virginia (Mr. WOLF), and also to compliment the gentleman from New York (Mr. HOUGHTON) for his leadership in the Committee on Ways and Means, and the gentleman from California (Mr. MATSUI) for his leadership in the Committee on Ways and Means.

I participated last April, along with five other Members, in a Congressional fact-finding trip to Botswana led by the gentleman from New Jersey (Mr. PAYNE) and the gentleman from Louisiana (Mr. JEFFERSON). Those who accompanied us on that particular delegation trip also included the gentlewoman from Indiana (Ms. CARSON) and the gentlewoman from Texas (Ms. JACKSON-LEE).

Today, I rise in support of this legislation to see how we can indeed rule out the conflict diamonds, the trade system that finances conflict, and the great devastation that is currently happening throughout regions of Africa. As part of our trip to Botswana, we examined first-hand the "secure" diamond industry in Africa and saw in this process how legitimate diamonds are being used in Botswana and other countries in that area. I was pleased to learn that Botswana, through a combination of democratic leadership and its seamless and secure diamond industry, is able to utilize clean diamonds to educate its people, to provide some of the African continent's strongest efforts in the fight against HIV-AIDS pan-

demic, and to undergird the country's overall economic and social development.

In Botswana, we met with President Mogae and members of his Cabinet. Since then, President Mogae has come to this country because he, too, wants a distinction to be made between clean diamonds and conflict diamonds. During his visit, President Mogae met with Congressional leaders in the House and Senate, Secretary Powell, and members of the Administration to express Botswana's commitment to keeping its diamond industry secure and its strong support for an international agreement on diamond certification through the Kimberley process. President Mogae has been part of the U.N., writing part of their resolution, and has made a statement to that effect that Botswana wants to be part of a clean diamond industry, and wants to be part of the force that makes this distinction.

I am pleased that this legislation is indeed focused on ending diamonds' financing of conflicts in Africa and other parts of the world. It is vitally important, Mr. Speaker, for well-intentioned legislation, such as H.R. 2722, to recognize and safeguard African nations, such as Botswana, which have secure and legitimate diamond industries, and which have no relationship to atrocities and conflicts in other nations on this continent.

I raise this point because it is important, Mr. Speaker. It is for this reason that through the leadership of Congressmen JEFFERSON, PAYNE, and RANGEL, we have worked with the distinguished author of H.R. 2722, Mr. HOUGHTON, to insert specific language recognizing that the provisions of this bill should not harm legitimate diamond-producing countries.

The good intention of this legislation also acknowledges those people who are following the law, and indeed, trying to do the right thing.

Again, I want to compliment everyone involved in this legislation. This legislation is long overdue and has been brought to bear at a time when we know that not only the conflict in Africa but now conflict in other parts of the world is being financed by diamonds. So hopefully this legislation would not only curtail, as the gentleman from Virginia (Mr. WOLF) said, the loss of lives, the lives of thousands of persons, not only killing them but killing in other parts of the country. I want to thank all the persons involved in this, and I urge my colleagues to pass this legislation that we all should be proud of.

CONFERENCE REPORT ON H.R. 2299, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

SPEECH OF

HON. JOSÉ SERRANO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. SERRANO. Mr. Speaker, I rise in strong support of the conference report to accompany H.R. 2299, a bill making appropriations for the Department of Transportation and related federal agencies for fiscal year 2002.

At the outset, I want to thank our Chairman, the gentleman from Kentucky, (Mr. ROGERS)

and our Ranking Democrat, the gentleman from Minnesota (Mr. SABO) for bringing to the floor a good conference report.

This legislation provides almost \$59.6 billion for the Transportation Department and related agencies. Significant expenditures include \$32.9 billion for the Federal Highway Administration; \$13 billion for the Federal Aviation Administration; \$6.7 billion for the Federal Transit Administration; and \$5 billion for the Coast Guard.

This year's bill also includes \$750,000 for one of my priorities, which is the eventual construction of a continuous greenway along the entire 23 miles of the Bronx River. It also includes \$2 million for the Federal Avenue Subway. I also would like to thank the Chairman and Ranking Member for reinstating the \$20 million for the Pennsylvania Station Redevelopment Project. This money will be used to redevelop Pennsylvania Station, which involves renovating the James Farley Post Office building into a train station and commercial center.

Being a regular rider of Amtrak, I am glad that the conferees provided the requested funding level. Amtrak is an important system of transportation for the Bronx and New York City, especially after the horrendous events of September 11.

Finally, Mr. Speaker I am pleased that the conferees were able to work out a resolution regarding trucks from Mexico coming to this country in a manner that seems to satisfy all sides.

Mr. Speaker, I urge my colleagues to support the conference report.

KAZAKHSTAN'S DICTATOR MUST CLEAN UP HIS ACT

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Ms. ROS-LEHTINEN. Mr. Speaker, I understand that the corrupt and repressive dictator of Kazakhstan, Nursultan Nazarbayev, plans to visit Washington early next year in search of U.S. approval and a dampening of the Administration's criticism of the Nazarbayev regime's deplorable human rights record. Following the tragic events of September 11th, Nazarbayev promised to "support action against terrorism by all available means." He made it clear to a reporter that this support would include military bases and the use of Kazakhstan's air space.

Yet, Russia's ITAR-TASS news agency reported that Kazakhstan's Minister of Defense, Sap Topakbayev, stated on November 8 that Kazakhstan was not planning to set up any airfields for the U.S. Air Force on its territory. ITAR-TASS went on to quote Topakbayev as saying that "after the tragic events in the United States, any contact with the Americans raises many questions." If Mr. Nazarbayev is to be granted meetings at the White House, he should at the very least be pressed to provide an unambiguous commitment to support the war on terrorism.

In addition, Moscow's Centre TV on February 17, 2001, accused the Nazarbayev regime of illegally selling weapons to "criminal regimes." Centre TV reported that among the

sales were the advanced Russian-made S-300 air defense system and heavy tanks. Although Centre TV did not name the countries receiving arms from Kazakhstan, Britain's Guardian reported on August 14, 2001 that the S-300's may have ended up in Sudan. In any event, the United States has had many run-ins with the Nazarbayev regime over arms sales. Early last year, for example, Kazakhstan sold forty MIG fighters to North Korea. And on June 4, 1997, the Washington Times reported that the U.S. had protested plans by Kazakhstan to sell advanced air defense missiles to Iran. So there is a disturbing pattern of arms sales to rogue states and no known commitment by Nazarbayev to end them. He needs to make such a commitment, and now!

Finally, It has come to my attention that on September 14, 2001 the Swiss Federal Department of Justice made available to the U.S. Department of Justice the findings of a lengthy investigation of corruption involving President Nursultan Nazarbayev of Kazakhstan, a former director of Mobil Oil, Mr. J. Bryan Williams, and a senior official of the Geneva-based bank Credit Agricole Indosuez. According to Swiss press reports, the Swiss investigation into money laundering and other corrupt activities has established the existence of a bribery chain set up in the 1990's by James Giffen, a U.S. businessman who reportedly acted as a mediator between several oil companies and officials of the government of Kazakhstan, including President Nazarbayev. The U.S. Department of Justice has been investigating Giffen's activities since last year.

I would thus urge President Bush not to host someone whose regime has been condemned by leading human rights organizations, has trafficked in arms with rogue states, has been ambiguous in its support of the war on terrorism, and is under investigation by both Swiss and U.S. law enforcement agencies. Further, a priority objective of U.S. policy should be to insist that Mr. Nazarbayev clean up his act.

LET PRIVATEERS TROLL FOR BIN LADEN

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. PAUL. Mr. Speaker, I recommend my colleagues read the attached article "Let Privateers Troll for Bin Laden" by Larry Sechrest, a research fellow at the Independent Institute in Oakland, California, and a professor of economics at Sul Ross State University. Professor Sechrest documents the role privateers played in the war against pirates who plagued America in the early days of the Republic. These privateers often operated with letters of marque and reprisal granted by the United States Congress.

Professor Sechrest points out that privateers could be an effective tool in the war against terrorism. Today's terrorists have much in common with the pirates of days gone by. Like

the pirates of old, today's terrorists are private groups seeking to attack the United States government and threaten the lives, liberty, and property of United States citizens. The only difference is that while pirates sought financial gains, terrorists seek to advance ideological and political agendas through violence.

Like the pirates who once terrorized the high seas, terrorists today are also difficult to apprehend using traditional military means. We have seen that bombs and missiles can effectively and efficiently knock out the military capability, economy and technological infrastructure of an enemy nation that harbors terrorists. However, recent events also seem to suggest that traditional military force is not as effective in bringing lawless terrorists to justice.

When a terrorist stronghold has been destroyed by military power, terrorists simply may move to another base before military forces locate them. It is for these reasons that I believe the drafters of the Constitution would counsel in favor of issuing letters of marque and reprisal against the terrorists responsible for the September 11 attacks.

Secretary of Defense Rumsfeld recently acknowledged the role that private parties, when provided sufficient incentives by government, can play in bringing terrorists to justice. Now is the time for Congress to ensure President Bush can take advantage of every effective and constitutional means of fighting the war on terrorism. This is why I have introduced the Air Piracy Reprisal and Capture Act of 2001 (HR 3074) and the September 11 Marque and Reprisal Act of 2001 (HR 3076). The Air Piracy Reprisal and Capture Act of 2001 updates the federal definition of "piracy" to include acts committed in the skies. The September 11 Marque and Reprisal Act of 2001 provides Congressional authorization for the President to issue letters of marque and reprisal to appropriate parties to seize the person and property of Osama bin Laden and any other individuals responsible for the terrorist attacks of September 11. I encourage my colleagues to read Professor Sechrest's article on the effectiveness of privateers, and to help ensure President Bush can take advantage of every available tool to capture and punish terrorists by cosponsoring my Air Piracy Reprisal and Capture Act and the September 11 Marque and Reprisal Act.

LET PRIVATEERS TROLL FOR BIN LADEN

(by Larry J. Sechrest)

In the wake of the Sept. 11th attacks, a group of American businessmen has decided to enlist the profit motive to bring the perpetrators to justice. Headed by Edward Lozzi of Beverly Hills, California, the group intends to offer a bounty of \$1 billion—that's billion with a "b"—to any private citizens who will capture Osama bin Laden and his associates, dead or alive.

Paying private citizens to achieve military objectives seems novel but is hardly untried. Recall Ross Perot's successful use of private forces to retrieve his employees from the clutches of fundamentalist Muslims in Iran in 1979.

We are all familiar with bail bondsmen, who employ bounty hunters to catch bail-jumping fugitives. Less familiar are two U.S.

companies, Military Professional Resources Inc. and Vinnell Corporation, which provide military services to governments and other organizations worldwide.

Historically, private citizens arming private ships, appropriately called "privateers," played an important role in the American Revolution. Eight hundred privateers aided the seceding colonists' cause, while the British employed 700, despite having a huge government navy.

During the War of 1812, 526 American vessels were commissioned as privateers. This was not piracy, because the privateers were licensed by their own governments and the ships were bonded to ensure that their captains followed the accepted laws of the sea, including the humane treatment of those who were taken prisoner. Congress granted privateers "letters of marque and reprisal," under the authority of Article I, Section 8 of the U.S. Constitution.

Originally, privateering was a method of restitution for merchants or shipowners who had been wronged by a citizen of a foreign country. Privateers captured the ships flying the flag of the wrongdoers' nation and sailed them to a friendly port, where a neutral admiralty court decided whether the seizure was just. Wrongful seizures resulted in the forfeiture of the privateers' bond to the owners of the seized ship.

If the seizure was, just, the ship and cargo were sold at auction, with the bulk of the proceeds going to the privateer's owners and crew. The crews were volunteers who shared in the profits, and the investors viewed the venture as remunerative—albeit risky.

Privateering soon evolved into a potent means of warfare. Self-interest encouraged privateers to capture as many enemy ships as possible, and to do it quickly. Were privateers successful in inflicting serious losses on the enemy? Emphatically, yes. Between 1793 and 1797, the British lost 2,266 vessels, the majority taken by French privateers.

During the War of the League of Augsburg (1689-1697) French privateers captured 3,384 English or Dutch merchant ships and 162 warships, and during the War of 1812, 1,750 British ships were subdued or destroyed by American privateers. Those American privateers struck so much fear in Britain that Lloyd's of London ceased offering maritime insurance except at ruinously high premiums. No wonder Thomas Jefferson said, "Every possible encouragement should be given to privateering in time of war."

If privateering was so successful, why has it disappeared? Precisely because it worked so well. Government naval officers resented the competitive advantage privateers possessed, and powerful nations with large government navies did not want to be challenged on the seas by smaller nations that opted for the less-costly alternative—private ships of war.

In sum, the armed forces of the U.S. government are not the only option for President Bush to defeat bin Laden, his al Qaeda network, and "every terrorist group with a global reach." The U.S. military is not necessarily even the best option.

Let's bring back the spirit of the privateers. By letting profits and justice once more go hand-in-hand, victims and their champions can have an abundance of both, rather than a paucity of either.

IN REMEMBRANCE OF NANCY
FORD

HON. JIM DAVIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. DAVIS of Florida. Mr. Speaker, I rise in remembrance of Nancy Ford, a Tampa businesswoman whose legacy in promoting women's rights, supporting the arts and bringing our Tampa Bay community together will not soon be forgotten by the countless friends, family and admirers she has left behind.

Nancy's contributions to Tampa Bay women are immeasurable. After breaking through the glass ceiling herself, Nancy helped pave the way for other women. She helped start the Tower Club, Tampa's first private business group to admit women, and she founded the Athena Society and the Florida Women's Network-professional women's networking and leadership organizations.

Nancy's accomplishments do not end there. As Chairwoman of the Florida Gulf Symphony's board of directors, member of the Arts Council of Hillsborough County and head of the committee that negotiated a merger of the Tampa Philharmonic and the St. Petersburg Symphony, Nancy Ford played a pivotal role in shaping the development of Tampa's art society.

Nancy's devotion to her causes has left an indelible mark on Tampa Bay. Through her countless volunteer hours for local charities, her work with University of South Florida's Medical Center and her role as co-founder of the Children's Cancer Center, Nancy made a difference in our community. Nancy Ford's vision and wisdom inspire us not just to do great things but also to develop lasting institutions that will carry on her ideas and work for generations to come.

On behalf of the people of Tampa Bay, I would like to extend my heartfelt sympathies to Nancy's family.

TRIBUTE TO FERNANDO FERRER

HON. JOSÉ E. SERRANO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SERRANO. Mr. Speaker, I rise today to pay tribute to a great leader and political figure. Bronx Borough President Fernando Ferrer has dedicated his life to serving the community and has been recognized nationally for revitalizing the Bronx.

I have known Mr. Ferrer, or Freddy as I know him, for 30 years and have been continuously impressed by his vigor and political expertise. Freddy was elected to his first term as borough president in 1987 with an overwhelming 87 percent of the public vote. To illustrate Freddy's outstanding leadership and how much Bronxites trust him, ten years and three terms later, he was reelected yet again with 87 percent of the public vote.

Mr. Speaker, it has been a pleasure to work with Freddy Ferrer throughout the years to continue and intensify the restoration of the

EXTENSIONS OF REMARKS

Bronx. From the moment he took office, Freddy began implementing a new, higher set of standards by which to run the borough. These changes, such as his strict code of ethics for his staff, have made it easier to make necessary changes throughout the Bronx.

Among Freddy's long list of accomplishments, he led the Bronx to winning the prestigious National Civic League's All-American City Award in 1997 and the Crown Community Award presented by American City and County magazine in 1999. The New York State Department of Health statistics show that between 1995 and 1999, 4,110 fewer individuals were unemployed. During that period, the number of AIDS cases in the Bronx dropped by nearly 50%, and homicides decreased by roughly 23 percent. Since 1990, the Bronx has received 2.5 billion dollars worth of new construction. From new businesses to new housing developments, Bronx residents have been able to witness their community grow before their very eyes. Freddy orchestrated the nation's most comprehensive housing revival when nearly 64,000 new and rehabilitated residences became available in the Bronx. This surge of structural progress and the resurgence of local businesses have been pivotal in rejuvenating the spirit of the Bronx. Along with the legendary Yankee Stadium, which Freddy and myself strove to keep in the Bronx, our borough president has become an undeniable part of Bronx history.

Mr. Speaker, Freddy's roots are in the Bronx and he has not strayed from the borough. He was born there, attended primary and secondary school there, and attended the New York University at its Bronx campus. He and his distinguished wife, Aramina, raised their daughter, Carlina, in the Bronx as well. This fall, Freddy ran for New York City mayor, and in doing so, brought a new vision for all of our communities. Freddy's entire campaign, especially when he eloquently expressed his visions for the city in debates and speeches, made us all very proud.

I ask my colleagues to join me in honoring Mr. Fernando Ferrer for over 20 years of remarkable and innovative service to the people of the Bronx.

H.R. 3280, TO LOWER THE TIME OF CONTINUOUS ACTIVE DUTY REQUIRED TO RECEIVE LEVEL I BASIC ALLOWANCE OF HOUSING

HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mrs. MINK of Hawaii. Mr. Speaker, over 57,000 members of the Reserves and National Guard have been called to active duty. Each week the military calls up more soldiers to help in our struggle against terrorism. They leave their civilian jobs and families to help defend our country.

From the day they begin their active duty, members of the National Guard and Reserves must deal with the difficult challenge of paying their bills and extra living expenses while serving their country.

To help ease this burden, soldiers placed on active duty are entitled to a Basic Allowance

of Housing, which pays for their housing costs. Soldiers receive it when they do not live on a military base. The exact amount depends on grade, dependency status, and geographic location.

If members of the National Guard and Reserves serve less than 140 days, they receive Level II Basic Allowance of Housing. If they serve more than 140 days, they receive Level I Basic Allowance of Housing.

Level II Basic Allowance of Housing is similar to the Level I Basic Allowance of Housing, but it does not include adjustments for expensive housing markets, such as Honolulu or New York City.

This policy hurts soldiers placed on short tours of duty in expensive housing markets. For example, an O-1 officer in Honolulu will receive \$410.70 per month under Level II. Under Level I, that same soldier would receive \$953.00.

The current law costs soldiers hundreds of dollars every month. Soldiers should not have to wait 140 days before receiving the Level I Basic Allowance of Housing.

On November 13, 2001, I introduced H.R. 3280 to correct this. It will reduce the number of active duty days required for the Level I Basic Allowance of Housing from 140 to 60 days.

We ask members of the National Guard and Reserves to serve without hesitation to defend our nation. We must ensure that all soldiers in the military are paid enough money to cover their housing costs.

I urge my colleagues to join with me and support H.R. 3280.

TRIBUTE TO CATHY MAGUIRE

HON. BRAD SHERMAN

OF CALIFORNIA

HON. HENRY A. WAXMAN

OF CALIFORNIA

HON. ADAM B. SCHIFF

OF CALIFORNIA

HON. ELTON GALLEGLY

OF CALIFORNIA

HON. XAVIER BECERRA

OF CALIFORNIA

HON. HOWARD P. "BUCK" McKEON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. SHERMAN. Mr. Speaker, we rise today to pay tribute to Cathy Maguire as she completes her tenure as Chairman of the Valley Industry and Commerce Association (VICA).

Fifty-two years ago, when VICA was founded, the San Fernando Valley was a predominantly rural and agricultural area north of Los Angeles; today, the Valley is a vital part of our nation's second-largest metropolitan area—thanks in part to the leadership of VICA.

Since Cathy Maguire was elected Chairman of VICA in 1999, the Valley business community has benefitted from having a tenacious, committed and vocal advocate with representation at all levels of government from L.A. City Hall to Capitol Hill.

Cathy Maguire has led two delegations of business leaders to our nation's capitol to meet with United States Senators, Members of Congress, Cabinet Secretaries and senior staff of both the Clintons and Bush Administrations.

VICA has taken a leadership role on Social Security reform, small business development, aviation and airports, water quality and reliability, a patient's bill of rights and telecommunications issues under the keen leadership of Cathy Maguire.

As California faced an energy crisis this year, VICA played an important role in discussing solutions with the Administration as well as with our colleagues in Congress—working to ensure that California had reliable, affordable supplies of energy.

And while our nation mourned the losses of September 11, 2001, VICA and its Chairman have worked to minimize the impacts on Southern California's economy, convening the region's first Economic Impacts Summit and advocating in Washington on behalf of an economic stimulus for local businesses impacted by the tragic events.

Mr. Speaker and distinguished colleagues, please join us in honoring Cathy Maguire for her leadership and accomplishments as Chairman of the Valley Industry and Commerce Association.

PERSONAL EXPLANATION

HON. XAVIER BECERRA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. BECERRA. Mr. Speaker, on Friday, November 30, 2001, I was unable to cast my floor vote on roll call number 465, on Agreeing to the Conference Report for H.R. 2299, Transportation and Related Agencies Appropriations for FY 2002.

Had I been present for the vote, I would have voted "aye" on roll call vote 465.

A PROCLAMATION RECOGNIZING DAVID PEOPLES

HON. ROBERT W. NEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Mr. NEY. Mr. Speaker, Whereas, David Peoples serves as a Police Officer in the state of Ohio; and

Whereas, Mr. Peoples has been named "Police Officer of the Month" by the National Law Enforcer's Memorial Fund for his unmatched service to his community; and;

Whereas, Mr. Peoples is helpful, honest, active, hardworking and dedicated to both his department and law enforcement; and,

Whereas, Mr. Peoples has received the "Exceptional Service Medal," the "Life Saving Medal" and the "Silver Torch" for his efforts in saving and protecting the citizens of Ohio;

Therefore, I ask that my colleagues join me in recognizing David Peoples for his commitment and dedication to making lives better in our area. I am honored to call him a constituent.

HOMELAND EMERGENCY RE- SPONSE OPERATIONS (HERO) ACT

HON. JANE HARMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 4, 2001

Ms. HARMAN. Mr. Speaker, five years ago, Tim Grimmond, the Police Chief of El Segundo, a small town in my district, came to me with a little problem called "public safety radio interoperability."

Basically, he explained, police departments are organized by city and county jurisdictions. Criminals are not.

And the radios carried by the police in El Segundo were not always compatible with the radios carried by the L.A. County sheriffs or police departments in neighboring towns like Redondo and Manhattan Beach.

As a result, law enforcement agencies pursuing a suspect couldn't talk to each other on the radio. They sometimes resorted to hand signals out car windows to communicate. Or they used a jerry-rigged system of radio-patching and multiple radios to make it work.

The problem was not with the equipment. The problem was the shortage of spectrum—the airwaves used for radio and TV.

Police and fire departments had not been allocated enough of the spectrum for their radios to be interoperable.

In response to Chief Grimmond's concerns, I introduced legislation that directed the FCC to license unused frequencies to public safety agencies. This bill became law.

The same year, Congress took another major step towards interoperability. It directed the FCC to allocate to public safety users 24 megahertz of spectrum licensed to analog television stations. Congress set a deadline of 2006 for that transition.

Unfortunately, that law also left a big loophole. It said the TV stations don't have to move to new spectrum until 85 percent of the household have a TV that can receive digital TV signals.

Currently, only 1 percent of homes in the U.S. meet that criteria.

So unless we act now, public safety agencies will *never* be able to use the spectrum that Congress promised them back in 1997.

That means * * * fire departments will continue to have problems talking at the scenes of major fires. Police and sheriff's departments chasing a suspect across city and county jurisdictions will still not be able to communicate by radio. Police officers on the beat will still worry about hitting a "dead spot" where their radios don't work because of interference or poor signal penetration.

The HERO Act that I and my colleagues, Rep. WELDON of PA, Mr. GILMAN, Mr. MORAN of VA, Mr. MCINTYRE, BALLENGER, and Mr. FRELINGHUYSEN are introducing here today eliminates that 85 percent threshold requirement—but only for channels 63, 64, 68 and 69, which the FCC allocated to public safety at Congress' direction in 1997.

Our bill directs the FCC to assign the frequencies Congress promised to public safety agencies *by the end of 2006*.

This legislation is supported virtually every public safety and municipal organization, including * * *.

The International Association of Fire Chiefs, the International Association of Fire Fighters, and the Congressional Fire Services Institute; the International Association of Chiefs of Police and the Major County Sheriff's Association; the National League of Cities, the National Governors' Association and the National Association of Counties; the Association of Public-Safety Communications Officials-International (APCO) and the International Association of Arson Investigators.

Attached to this statement are letters of support for the legislation.

They all agree: Public safety needs this spectrum. And Congress should keep its commitment.

CONGRESSIONAL FIRE SERVICES

INSTITUTE,

Washington, DC, November 28, 2001.

Hon. JANE HARMAN,

Cannon House Office Building, Washington, DC.

DEAR CONGRESSWOMAN HARMAN: As Chair of the Congressional Fire Services Institute's National Advisory Committee, I extend to you the support of the committee for the Homeland Emergency Response Operations Network Act.

Composed of 40 national fire and emergency services organizations, the NAC provides counsel to CFSI on public safety issues. Among the organizations that serve on this committee are the International Association of Arson Investigators, International Association of Fire Chiefs, International Association of Fire Fighters, International Fire Service Training Association, International Society of Fire Service Instructors, National Fire Protection Association, National Volunteer Fire Council, and the North American Fire Training Directors. These are the associations that represent the interest of our 1.2 million first responders.

Following the release of the Public Safety Wireless Advisory Committee report in 1996, CFSI has worked aggressively in support of the report's recommendations. First and foremost is the set aside of 24 megahertz of broadcast spectrum for public safety use. This spectrum will address an immediate need of public safety, clearing the way for interoperable wireless communication systems.

Following the terrorists attacks on September 11th, the need for this spectrum has become a top priority for public safety. We can no longer afford to run the risk of responding to large-scale disasters without interoperable communication systems. Otherwise, we will jeopardize the lives of all first responders at the scene. Congress needs to remove the 85 percent exemption on penetration of digital television receivers and any other exemptions, and hold firm on the previously set 2006 deadline in the best interest of public safety!

I look forward to working with you, Congressman Curt Weldon and all other federal legislators who will offer their support for this legislation.

Sincerely,

DENNIS COMPTON,
Chair, National Advisory Committee.

ASSOCIATION OF PUBLIC-SAFETY

COMMUNICATIONS

OFFICIALS INTERNATIONAL, INC.,

December 3, 2001.

Hon. JANE HARMAN,

U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE HARMAN: On behalf of the Association of Public-Safety Communication Officials-International, Inc and its

15,000 members, I want to thank you for introducing legislation to address the serious radio spectrum issues facing our nation's police, fire, EMS, and other public safety agencies. Your proposed legislation would establish a firm date for clearing television broadcast stations from spectrum allocated for public safety radio systems pursuant to a 1997 Congressional mandate.

The tragic events of September 11, 2001, demonstrated yet again that public safety personnel all too often lack access to sufficient radio spectrum to provide effective and interoperable communications when responding to emergencies. On a day-to-day basis, public safety personnel from different agencies and jurisdictions are often unable to communicate at emergency scenes, usually because spectrum shortages have forced them to operate their radio systems over different, incompatible frequency bands. In many metropolitan areas, public safety personnel also confront dangerous radio frequency congestion, again due to the inadequacy of public safety spectrum allocations.

These problems, and proposed solutions, were documented by the Public Safety Wireless Advisory Committee (PSWAC) in a report dated September 11, 1996. Among PSWAC's recommendations was that approximately 25 MHz of new radio spectrum be made available for public safety within five years. Congress required such an allocation in the Balanced Budget Act of 1997, and the FCC responded with a specific spectrum allocation in 1998. However, when terrorists attacked the World Trade Center and the Pentagon exactly five years after the PSWAC report, public safety personnel responding to those horrific events were still unable to use the newly allocated spectrum. The difficulty is that the spectrum remains blocked by ongoing television broadcast operations in much of the nation (including New York and Washington).

The legislation that you are offering will establish a firm date for television stations to vacate spectrum already allocated for public safety. If adopted, the legislation will open the door for state and local governments to plan, fund, and even construct the new radio systems they need, confident that the necessary radio spectrum will be available for use on a specific date. We hope that your colleagues in Congress will give this matter immediate and favorable consideration.

Sincerely,

GLEN NASH,
President.

MAJOR COUNTY SHERIFFS' ASSOCIATION,
Minneapolis, MN, December 3, 2001.

Hon. JANE HARMAN,
U.S. House of Representatives, Washington, DC.

DEAR CONGRESSWOMAN HARMAN: The members of the Major County Sheriffs' Association and other public safety organizations in the United States continue to be in urgent need of additional radio spectrum to safely perform their mission critical duties.

In response to that need, in 1997 the Congress directed the FCC to make 24 MHz of spectrum (currently TV Channels 63, 64, 68, 69) available for use by public safety. Unfortunately the legislation was linked to transition of TV stations in those channels from analog to digital signals and there is no date-certain deadline by which public safety will be able to use this spectrum.

We are in support of legislation to be known as "THE HOMELAND AND EMERGENCY RESPONSE OPERATIONS (H.E.R.O.) ACT" that would require current TV Broadcast Incumbents on those channels

to vacate that spectrum for use by public safety no later than December 31, 2006.

We appreciate the efforts of you and your colleagues in Congress who will be introducing this legislation that is so urgently needed by law enforcement agencies throughout the United States.

Respectfully,

S/PATRICK D. MCGOWAN,
President.

INTERNATIONAL ASSOCIATION OF CHIEFS
OF POLICE,
Alexandria, VA, December 3, 2001.

Hon. JANE HARMAN,
U.S. House of Representatives, Cannon House
Office Building, Washington, DC.

DEAR REPRESENTATIVE HARMAN: On behalf of the International Association of Chiefs of Police (IACP), I am writing to express our support for the Homeland and Emergency Response Operations (H.E.R.O.) Act. As you know, the IACP is the world oldest and largest association of law enforcement executives with more than 18,000 members in 100 countries.

As you are aware, law enforcement and other public safety organizations in the United States are in critical need of additional radio spectrum to safely perform their mission critical duties. In response to that need, in 1997 Congress directed the Federal Communications Commission (FCC) to make 24 MHz of spectrum (currently used by television channels 63, 64, 68, 69) available for use by public safety. Unfortunately, the legislation was linked to the transition of television stations on those channels from analog to digital signal and there is no specific deadline by which this spectrum will be available for public safety use.

The public safety community, including the IACP, has repeatedly called on the FCC to assign this much needed spectrum to public safety in order to achieve critical interoperability in communications between agencies. For example, the agencies that responded to the terrorist attack on the Pentagon were unable to communicate with each other because they lacked the required spectrum for interoperable radio communications. Consequently, the IACP strongly supports the H.E.R.O. Act, which would require current television stations using those channels to vacate the spectrum for use by public safety no later than December 31, 2006.

We appreciate the efforts of you and your colleagues in Congress who will be introducing this legislation that is so urgently needed by law enforcement agencies throughout the United States.

Sincerely,

WILLIAM B. BERGER,
President.

INTERNATIONAL ASSOCIATION
OF FIRE CHIEFS,
Fairfax, VA, November 30, 2001.

Hon. JANE HARMAN,
U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE HARMAN: The International Association of Fire Chiefs and, indeed, America's fire and emergency service, fully supports the Homeland Emergency Response Operations (HERO) Act to provide for the expected and increased assignment of spectrum for public safety.

In 1996 the Public Safety Wireless Advisory Committee reported to Congress on the needs for additional spectrum for public safety. In 1997 Congress responded to one of the recommendations by mandating that the Federal Communications Commission (FCC) allocate 24 MHz of spectrum for the exclusive use of public safety from the 700 MHz band

occupied by television channels 60-69. The FCC complied; channels 63, 64, 68 and 69 have been reserved for use by public safety agencies. The FCC has promulgated rules for the 700 MHz public safety band which, when implemented, will provide much needed additional spectrum for both voice and data communication, and improve interoperability among 700 MHz band users.

These very positive developments are contingent on television stations vacating this spectrum by 2006—a provision in the 1997 Balanced Budget Act. The major barrier is a provision in that same law that allows stations to keep their analog channels beyond 2006 until at least 85% of the households in the relevant market have access to digital television signals. The problem, in short, is that there is no time certain for clearing the band for public safety. Neither public safety agencies nor radio equipment manufacturers can proceed until there is certainty. The benefits of this new spectrum will not be available to public safety until this current uncertainty is rectified.

The HERO Act addresses the issue of band clearing by providing a date certain that this spectrum will be available for public safety. This is consistent with the original intent of Congress to provide public safety with the key element of command and control—communications. Enhanced communications capability will clearly enable America's fire and emergency service to better deal with large scale incidents, natural disasters and acts of terrorism.

Very truly yours,
CHIEF JOHN M. BUCKMAN,
President.

NATIONAL ASSOCIATION OF COUNTIES,
December 3, 2001.

Hon. JANE HARMAN,
U.S. House of Representatives, Cannon House
Office Bldg., Washington, DC.

DEAR REPRESENTATIVE HARMAN: On behalf of the National Association of Counties (NACo), I would like to commend you, and Representative Curt Weldon, for developing the, "Homeland Emergency Response Operations (HERO) Act."

The HERO Act is fully consistent with NACo's policy on releasing the 700 MHz band for public safety purposes, which reads as follows:

"Improve Public Safety and Emergency Management Communications: Increase interoperability for both voice and data, release additional spectrum in the 700 MHz band for public safety and emergency management use, and eliminate interference problems in public safety communications."

NACo believes it is critical that the 700 MHz band be made available at a date certain. This would facilitate counties making appropriate plans for utilization of the spectrum, develop solutions to the interoperability challenges for both voice and data, and allow the private sector to provide the technologies and equipment necessary to make for efficient utilization of the spectrum.

Clearly the events of September 11th bring into focus the important role interoperability has in disaster response and making this spectrum available will enhance our ability to carry out our role as "first responders".

Thank you for your leadership.

Sincerely,
JAVIER GONZALES,
President,
National Association of Counties
Commissioner, Santa Fe, NM.

23922

INTERNATIONAL ASSOCIATION OF ARSON
INVESTIGATORS, INC.,
St. Louis, MO, November 30, 2001.

Hon. JANE HARMAN,
*U.S. House of Representatives, Cannon House
Office Building, Washington, DC.*

DEAR CONGRESSWOMAN HARMAN: The International Association of Arson Investigators

EXTENSIONS OF REMARKS

is pleased to endorse the "Homeland Emergency Response Operations Network Act".

This vital legislation is long overdue. Expedited assignment of the 761-776 and 794-806 megahertz to public safety use will provide much needed additional radio spectrum for America's emergency responders.

December 4, 2001

As one of the nation's major fire service groups we look forward to standing with you at next week's press conference. Following introduction we would be honored to work to seek passage of this important measure.

Sincerely,

STEPHEN P. AUSTIN,
Director of Governmental Relations.

SENATE—Wednesday, December 5, 2001

The Senate met at 9:30 a.m. and was called to order by the Honorable HILLARY RODHAM CLINTON, a Senator from the State of New York.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, Sovereign of this Nation and Lord of our lives, in each period of history, You have blessed us with great leaders who have exemplified love for You and dedication to our country. Today we celebrate such a man. Thank You for Senator STROM THURMOND.

We join with all Americans in celebrating his 99th birthday. You have blessed him to be a blessing to his beloved South Carolina and to the Nation as a whole.

Thank You for the enrichment of our lives by this man. He has shown us the courage of firm convictions, the patriotism of love for this Nation, and devotion and true commitment to the Senate. We praise You for the personal ways he has inspired each of us. He is an affirmer who spurs us on with words of encouragement. Your Spirit of caring and concern for individuals shines through this remarkable man.

Gracious God, bless the Senator with the assurance of Your love and of our affirmation. Through our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable HILLARY RODHAM CLINTON led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,

Washington, DC, December 5, 2001.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HILLARY RODHAM CLINTON, a Senator from the State of New York, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mrs. CLINTON thereupon assumed the chair as Acting President pro tempore.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

SCHEDULE

Mr. REID. Madam President, this morning the Senate will resume consideration of the Railroad Retirement Act. Senator NICKLES will be recognized to make a point of order against the Daschle substitute amendment. Then Senator BAUCUS will be recognized to move to waive the Budget Act. There will be 30 minutes for debate on the motion to waive followed by a vote at approximately 10 a.m. If the Budget Act is waived, the Daschle substitute amendment will be agreed to and the Senate will vote on final passage of the act.

Following disposition of the Railroad Retirement Act, there will be 60 minutes of debate on the motion to proceed to the farm bill followed by a vote on the cloture motion to proceed to the bill.

MEASURE PLACED ON THE CALENDAR—S. 1765

Mr. REID. Madam President, I understand that S. 1765 is at the desk and is due for its second reading.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. REID. Madam President, I ask that S. 1765 be read for a second time, and I then will object to any further proceedings at this time on this legislation.

The ACTING PRESIDENT pro tempore. The clerk will report the bill by title.

The legislative clerk read as follows:
A bill (S. 1765) to improve the ability of the United States to prepare for and respond to biological threat or attack.

The ACTING PRESIDENT pro tempore. Objection having been heard, the bill will be placed on the calendar.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 10, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 10) to provide for pension reform, and for other purposes.

Pending:

Daschle (for Hatch/Baucus) amendment No. 2170, in the nature of a substitute

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

Mr. DASCHLE. Madam President, I will reserve some of my leader time to make a short statement as we wait to complete our work on the railroad retirement bill.

TERRORISM IN THE MIDDLE EAST

Mr. DASCHLE. Madam President, when our country was attacked on September 11, countless countries came forth to express condolences, to condemn those heinous attacks and to make clear that they stood with America in our time of trouble. The statements were a welcome reassurance from the family of nations that we would not be standing alone in the campaign against terror.

I come to the floor today to send my condolences to the families of the 26 Israelis killed in this weekend's attacks in Jerusalem and Haifa, to send my prayers to the scores more who were injured, to condemn in the strongest terms those attacks—and the attack that occurred just this morning, and to reassure our friends in Israel that just as they stood with us, we stand with them.

Like people all over the world, I went to bed on Saturday deeply shaken by the horrifying images from Jerusalem.

Not only were the attacks timed to occur during busiest time of the week in an area frequented by young people, but a second bomb was intended to maim and kill emergency response workers trying to assist the victims. It is some small measure of consolation that the second bomb didn't kill anyone. Still, it is hard to imagine a more inhumane plan; hard to imagine, that is, until I woke up Sunday morning, and heard reports of the second attack—in Haifa. In this case, a suicide bomber boarded a bus full of innocent people just starting their work week.

These coordinated bombings marked the deadliest terrorist attacks in the history of the State of Israel.

For the past 15 months, the United States, Europe, and moderate Arab states have called on Chairman Arafat to use his authority to put an end to this violence. At times we have heard helpful words, but we have not yet seen decisive action. Even this morning,

after 2 days of international pressure to stop such violence, we hear of another suicide bombing in Jerusalem.

Terrorists have used the territories as a haven to plan and organize their murderous assaults, to build their bombs and recruit their suicide bombers. Instead of cracking down on this violence, Chairman Arafat has seemed all too willing to use it as a negotiating tool.

Such a strategy is more than cynical. It is dangerous, and it stands in stark contrast to the Oslo process that brought the region so close to a comprehensive peace just one year ago.

After Jerusalem and Haifa, Chairman Arafat's words alone are not enough. Symbolic actions—rounding up the usual suspects only to let them go again—is not enough.

Concrete steps to bring the planners of this weekend's attacks to justice are just a starting point. The world also expects—in fact, the world demands—that Chairman Arafat crack down on the organizations that harbor and support these terrorists.

We have already begun to hear a litany of reasons why it is difficult for Chairman Arafat to do what has to be done.

He is not responsible for the attacks, we are told.

He is not capable of controlling the terrorists. No one is, we are told.

We are also told that Israel's response hinders the Palestinian Authority's ability to move against the terrorists.

None of these excuses will stop the violence. And none is acceptable.

Time has run out. We are at the point where Chairman Arafat's lack of action against terrorists is a question not of capability, but of will. Only if he chooses to act decisively can he put this perception to rest.

If not, he will confirm the worst fears of the international community that he is unable and unwilling to confront terror.

Without concrete action, Israel will be left with no choice but continue to defend itself.

The suicide bombings in Jerusalem in Haifa ended 26 innocent lives, but they also ended something else.

They ended any patience the world has for excuses and inaction on the part of Chairman Arafat and the Palestinian Authority.

It is time for them to prove that they have both the ability and the will to stop the bloodshed. It is time for them to join the family of nations and work to end the specter of global terrorism.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NICKLES. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Continued

AMENDMENT NO. 2170

Mr. NICKLES. Madam President, I make a point of order that the Daschle amendment No. 2170 violates section 302(f) of the Congressional Budget Act.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Oklahoma is recognized to raise a point of order.

Under the previous order, the Senator from Montana is recognized to make a motion to waive the point of order.

Mr. BAUCUS. Madam President, I move to waive the relevant section of the Budget Act, and I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second?

Mr. BAUCUS. I withdraw the request, Madam President.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. Under the previous order, there will now be 30 minutes of debate to be equally divided between the Senator from Montana and the Senator from Oklahoma or their designees.

The Senator from Oklahoma.

Mr. NICKLES. Madam President, for the information of our colleagues, it is anticipated we will be voting at 10 o'clock. We may try to shorten that somewhat. It is anticipated we will have two votes, one on a motion to waive a Budget Act point of order, as entered by Senator BAUCUS, and also on final passage of the Railroad Retirement Act. I notify our colleagues that probably in the next 20 minutes or so we will be voting on these two measures, for them to plan accordingly.

I make a budget point of order because we didn't have any funding. The \$15 billion in outlays we are getting ready to pass was not in the budget. Granted, this bill has a lot of support. It had a lot of support when we passed the budget, but it was not included. It was not included in the House budget. It was not included in the Senate budget.

We had a budget. The budget we agreed upon said we were going to have so much in spending. This was not part of it. So we have to waive the budget if we are going to pass it, or a budget point of order lies, or else we are just breaking the budget.

The reason I raise this point is that Congress in the last several months has been, in my opinion, pretty irresponsible. We have had spending grow dramatically, and yet many people are saying it is not enough. Some people are saying, because of the disaster on September 11, we need a lot more

money for this and for that. Some of us need to kind of total it up. I don't think we have totaled it up. Spending is growing dramatically.

I looked at the amount of money we spent in fiscal year 2000, last year. It was \$584 billion in total discretionary spending. In 2001, the year we just completed, it was 640. That was a 9.6-percent increase for domestic spending. For nondefense spending, that was 14-percent growth over the previous year.

That is a big increase. Nondefense spending last year, the year we just completed in September, grew at 14 percent.

President Bush's budget said let's have spending grow, total discretionary spending, up to \$679 billion. That was a 6-percent increase. After the disaster of September 11, we had a bipartisan agreement to get the budget agreed to of \$686 billion. In addition to that, President Bush agreed to the \$40 billion, money for New York, for Virginia, for defense. That was an additional \$40 billion. Add the \$40 billion to the \$686 billion; that is \$726 billion. That is a growth in outlays of 13.3 percent. And that is still not enough. It doesn't include the \$15.3 billion we are talking about that will be required outlays for railroad retirement. If you add that together, that is another 15.6 percent.

Somebody said that doesn't count because we have scorekeeping. We said we are going to put language in here: don't count it. The fact is, you are going to have outstanding publicly held debt that is going to grow by \$15.3 billion as a result of this bill. The fact is, we will be borrowing that \$15.3 billion; Treasury will borrow additional money. It is not coming out of the surplus. It is not even coming out of Social Security. It is coming out of publicly held debt. We are going to borrow more money, and we are paying about \$1 billion per year every year, maybe every year forever, to pay for this bill.

The 10-year cost in interest expense is going to be about \$10 billion. Our colleagues should know that. The amount of outstanding publicly held debt as a result of passage of this bill will be growing. I think people have not looked at that.

Then there are a few other items in the mill. When we take up the DOD appropriations bill, I understand Senator BYRD has an amendment to add an additional \$15 billion for homeland defense and other things on top of it. We haven't considered that yet, but that is in the mill.

We have already passed airline assistance. I didn't add that. That had outlays of about \$5 or \$6 billion, loan guarantees for up to another 10. We don't know how that will score. It depends on how many will default. But there is additional exposure there as well.

We have a stimulus package that was reported out of the Finance Committee, two-thirds of which was spending, mostly outlays. Some of it was for unemployment compensation, some of it for cash payments to people who didn't pay taxes. But the net result of that stimulus bill that passed out of the Finance Committee and that we considered on the floor was about an additional \$50 billion in outlays.

We have an agriculture bill we will be considering probably later today. It has additional outlays. And we have a victims compensation fund that was part of the airline bailout bill that no one knows, no one in the genius of this body who authorized and passed that legislation, how much it is going to cost. It could cost billions of dollars. We don't know how much the insurance companies are going to pay. We don't know what kinds of rewards are going to be made to the survivors and to the victims of the September 11 disaster. It could cost billions. Congress legislated that little package. I was part of the negotiations in the final hours. No one has a clue how much it is going to cost. It could be in the multibillions of dollars.

My point is, if you add all these numbers, we may be looking at spending growth in the 20- or 24-percent range. It is as if there is no budget whatsoever.

I raise a budget point of order. That is why we have a budget. A budget doesn't do any good if you are not going to use a point of order. Unfortunately, in many cases people in the Budget Committee haven't felt inclined to use it. We waive budgets in cases of national emergency. I supported the \$40 billion that was included. We believed that was a national emergency. We were attacked. Let's give money for defense of our country to go after those persons who attacked the United States. I am all for that. Let's assist people who need the help in New York and Virginia and Pennsylvania. We supported that. We waived the budget to do it.

Maybe we will waive the budget to do railroad retirement. I expect we probably will. The special interest groups have everybody on board this bill regardless of how much it costs, regardless if it may bankrupt the fund. The railroad retirees and their own accountants say the trust fund balance goes down to almost 1 year of payments in several years, almost bankrupting the fund.

How does it do that? It greatly increases benefits, and it cuts payroll taxes. It leaves Uncle Sam as still guaranteeing the benefits. I would be all in favor of the railroads and the employees making whatever kind of deal they want to make for their benefits. If it is more generous than any other retirement plan in America, so be it, as long as they don't ask for taxpayers to guarantee it and pay it.

Unfortunately, they are asking for both. They want one of the most generous retirement benefits in the country: 100 percent retirement at age 60, 100 percent survivor benefits. That is great. But they also want us to pay for it if the fund goes broke, and even their own projections have it almost going broke. Then to say now, yes, and we want to waive the budget—the budget doesn't count?

If we are going to have a budget, let's use it. Let's abide by it. Let's have unanimous votes if we are going to waive it for cases of national emergency. This is not a national emergency. That is the reason I made the budget point of order. I urge my colleagues to support it.

I don't want to see our colleagues on the floor next year, or maybe even a month from now, saying: Where did the budget surplus go? We are now in deficits. Where did it go? It must have been those Republicans. They passed a tax cut. That tax cut, in the first year, was \$37 billion.

Let's see, I totaled up \$40 billion for emergency spending, \$15 billion for airlines, \$15 billion for railroads, and \$15 billion that Senator BYRD is trying to pass. No telling how much spending will be in the so-called stimulus package. When you add it up, there is going to be much more of a spending problem than a tax cut problem.

My colleagues may say: Wait a minute, did I vote to waive the budget? Did I vote for that extra spending?

This is deficit spending. We are going to borrow an additional \$15 billion. We are going to have to waive the budget to do so. I urge my colleagues to vote "no" on the motion to waive the budget point of order.

The ACTING PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. Madam President, I yield such time as the Senator from Delaware desires.

The ACTING PRESIDENT pro tempore. The Senator from Delaware is recognized.

Mr. CARPER. Madam President, I agree with my friend from Oklahoma on several of the comments he just made. We can ill afford, even in the environment in which we live today, to forget about fiscal restraint and the responsibility to manage our finances, not only in the short term but in the long-term. But it is not just spending that we need to watch. It is also the nature of the tax cuts that we have adopted and the ones we are considering adopting as part of the economic stimulus package.

Let me take a somewhat different approach to the legislation before us, for which we are now considering the step of waiving the Budget Act. I thank Senator BAUCUS for bringing the measure to the floor. I thank our leader for bringing this measure to the floor. I sa-

lute Senator HATCH and others who have introduced the legislation, which I have cosponsored. I am not aware of anywhere in the Federal Government where we have a private sector type of pension plan. The railroad retirement is somewhat difficult to understand. Let me take a minute and contemplate what it is and what it is not.

The railroad retirement, which provides retirement benefits for hundreds of thousands of railroaders and their survivors, is a two-tier plan. Tier 1 deals with Social Security benefits, or reflects and mirrors Social Security benefits. We are not talking about addressing or dealing with those. Tier 2 is a pension plan that goes beyond Social Security benefits. Most people who work in the private sector in this country realize Social Security benefits. They also have a pension plan, in many cases, from their own employer. Those employers contribute to those plans. The employees contribute to their employer's pension plan established for them. Most employers, private sector employers and, frankly, most public sector employers around the country who have pension plans—the moneys that go into those plans are invested, but they are not invested exclusively in securities issued by the U.S. Treasury.

Tier 2 of the railroad retirement plan is different because the moneys that are contributed by the employers—the railroad companies—and moneys contributed by employees of those railroads to the pension fund, the trust fund, are invested only in securities issued by the U.S. Treasury. Many States and local governments have changed the way they invest their pension moneys. They have invested now in equities, corporate stocks, and other investment options because the yield there is greater and they are able to provide better benefits and reduce their contribution into their pension fund.

The question before us in this bill is, Should we provide the same kind of flexibility for railroad companies and railroad retirees when contributing to their tier 2 pension plans? Should we give them the same flexibility that is enjoyed by other employers throughout the country? I believe we should. The question also is, In doing that, does that somehow cause an outlay by the Federal Government? We still work in the Federal Government under a cash basis of accounting. Most companies and, in fact, almost all State and local governments use the accrual form of accounting. If we use an accrual form of accounting, my guess is we would not be debating whether or not this is actually a \$15 billion cash outlay. I think the point would be moot. But we still use the cash basis, so that is the law under which we operate.

Having said that, we are not talking about the need to spend another \$15 billion to build roads. We are not talking

about another \$15 billion to provide better health care. We are not talking about another \$15 billion to provide better environmental protection. We are talking about a step here that says to the folks who oversee tier 2 pension funds contributed to by employers—the railroad companies—and the railroad employees: You don't have to just invest the money in your trust fund in U.S. Treasury obligations. You can invest in other kinds of investments, such as securities, which would provide a greater yield, and then that anticipated yield, which has been proven over history, that greater yield will enable that pension fund to provide better benefits to railroad retirees and to their survivors.

That anticipated greater yield—again, proven historically—would enable the railroad companies, the employers, and the employees—particularly the railroad employers—to reduce their contribution somewhat. That is what this is all about. And because of an anachronism, we are forced to go through this procedure of waiving the budget law and the extraordinary procedure yesterday of directing the spending.

This is a good measure. When we think it through and we look at the numbers and the requirement for the railroad companies, the employers, to increase their contribution, if the tier 2 fund does run out of money, this is a measure that is responsible. I want to say to those who brought it to the floor, on behalf of the hundreds of thousands of railroad employees and pensioners and survivors, thank you for taking this step for them and the companies for whom they work. I say to the chairman of the Finance Committee, thank you again for bringing the measure to the floor and for yielding this time to me today.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mr. GRAMM. How much time do we have on our side?

The ACTING PRESIDENT pro tempore. Six minutes.

Mr. GRAMM. Madam President, let me first congratulate the Senator from Oklahoma. I think what has happened basically is that we have seen a very impressive lobbying effort where the railroads have gotten together with the unions and divided up \$15 billion, which is the only barrier between the taxpayer and massive injection of Federal funds into the railroad retirement program. And basically this has been lobbied as some movement toward private investment in railroad retirement.

The Senator from Oklahoma and I both support private investment, but the problem is that under the cloak of investing this \$15 billion, as the actuaries of railroad retirement show very clearly, under this bill, \$15 billion plus all the interest earned on all the in-

vestments made will be pillaged over the next 17 years as that money is taken out and miraculously divided exactly equally between the railroads and the railroad retirees.

The railroads have lobbied hard for the bill because they say they cannot pay 16.1-percent payroll taxes. They can't afford it. Yet under this bill, in 19 years, they are going to be moving toward paying 22-percent payroll taxes because they will have depleted the trust fund. Does anybody believe they can or will pay 22-percent payroll taxes in 19 years? Does anybody believe the railroads are not going to be before the Congress saying they will be driven into bankruptcy, and they will have to shut down every railroad in America if they are forced to pay a 22-percent payroll tax? But that is what is required to keep this program solvent, after you pillage \$15 billion.

I thank the Senator from Oklahoma. This has been an uphill battle. Americans love bipartisanship and they love consensus. Those are wonderful things, but they are very dangerous things. What we have had is the railroads and the labor unions getting together, each having their affection attracted because they each get \$7.5 billion, but what we have really seen is a consensus against the taxpayers' interest. The Senator from Oklahoma has been courageous in standing up and pointing out that this emperor has no clothing. I congratulate him for that. We are going to have one final vote before the bill is passed, and that is a point of order.

The telltale sign of the problem with this bill is not just that \$15 billion is divided up between the railroads and the railway unions. It is that in making the transfer this year, we are going to increase the deficit by \$15.3 billion. We have a budget that gives us some power in trying to prevent these things from happening. If we were offsetting the \$15.3 billion in some other way, there would be no budget point of order, but there is a budget point of order because we are violating the budget.

The final vote we are going to have is the vote on whether or not we are going to enforce the budget. I have to say, we have already started to see a partisan debate where many of our colleagues are saying we have a deficit because of the tax cut. Today on this bill, we are going to raise the deficit by 40 percent of the impact of the entire tax cut for this year. In fact, we are approaching the point where we will have increased spending \$100 billion above the budget this year.

If somebody votes to waive the budget point of order and says, we do not care about the budget, the sky is the limit, we can spend anything we want to spend and this is a popular thing to spend it on, then I hope they will not be out arguing that they are very concerned about the deficit.

You cannot have it both ways. You cannot be for adding \$15 billion to the deficit and be concerned about the deficit. You cannot be for increasing the deficit on one day and blaming somebody else for it on the other.

I thank our colleague for his leadership. I intend to vote against waiving the budget point of order. I hope my colleagues will as well.

I yield the floor.

The PRESIDING OFFICER (Mr. CARPER). The Senator from Montana.

Mr. BAUCUS. Mr. President, I will be brief. We have had these arguments and made our points many times. It is important to put all of this in perspective. There is a lot of arcane budget language discussion here. A lot of that is very important. There is an important reason for having budgets.

Cutting through all the technical budget arcane language and green eyeshade stuff, very simply the situation is this: The railroad retirement trust fund has built up a large balance. The question is what we should do about that.

We have decided in this legislation that the balance should be reduced by lowering the taxes the railroad companies have to pay—and they are extraordinarily high taxes today—and also increasing survivor benefits, for example, and the early retirement age which conforms with current practices in other industries.

The charge is made that the balance will be too low, and that is going to jeopardize the budget, it is going to jeopardize the trust fund.

The fact is this legislation provides for many safeguards; there are actuarial reports, financial statements, and reports to the contrary. The actuary himself has said at no time, even under this legislation, will the balance in the trust fund be at such a level that it jeopardizes the fund or payments to the beneficiaries or cause undue strain on the railroad companies. That is the actuary's projection. He makes that projection for the next 75 years.

Those of us in Congress have a hard time trying to predict what the economic situation is going to be 10 years from now. That is pretty hard to predict. What we are talking about with this legislation is at least 20 years from now, because that is when the trust fund is going to be dipping down to a lower level than is the case today. We have all kinds of oversight reports required by the legislation to make sure the trust fund is safe.

The Senator from Oklahoma says we have to borrow \$15 billion. That is technically true, but that is a wash because the trust fund will receive \$15 billion in assets. We have unified accounting in this case, so as a practical matter, that has virtually no effect on the budget.

Also, with respect to the trust fund, it is a wash, too, because some of those

securities will be private securities as opposed to public securities.

Altogether, this is a bill that has been worked on for a long time. Seventy-four Members of the Senate cosponsored this legislation. We considered the bill last year in the Finance Committee. Over 20 amendments were offered. The House has passed this legislation twice, both times by very large margins. If this point of order is not waived, if this technicality is not waived, then there will be no bill passed and this bill is going to die.

Mr. REID. Will the Senator yield 2 minutes to the Senator from Nevada?

Mr. BAUCUS. Absolutely.

Mr. REID. Mr. President, this legislation is sponsored by Senators BAUCUS and HATCH. If there were ever two people who are fiscally conservative, it is Senators BAUCUS and HATCH. I do not need anything else other than to know they are the ones who are pushing this legislation to make me very comfortable with every vote I have taken.

I publicly commend and applaud Senators BAUCUS and HATCH for their leadership on this issue. We have gone a long way the last few days under their leadership. Everyone should feel very good about waiving the Budget Act. Remember, we are being asked to do this by two of the most fiscally conservative people we have in the Senate—Senators BAUCUS and HATCH.

Mr. BAUCUS. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, how much time is remaining?

The PRESIDING OFFICER. Fifty-three seconds.

Mr. NICKLES. Mr. President, I want to clarify a few points. This \$15 billion transfer in the outstanding publicly held debt is not a wash. That is \$15 billion added to the deficit, added to national debt. We are going to have to borrow about \$1 billion a year, maybe forever, to pay for this. The Senator from Montana said this legislation makes benefits conform with the norm. It is not the norm in the private sector pension benefits to get a 100-percent pension benefit at age 60. That is not the norm. Nor is it the norm to have survivor benefits equal 100 percent. That is not the norm. They are very generous benefits.

I do not begrudge them having generous benefits. I just do not want to have taxpayers pay for them when and if the fund goes broke, and even under their projections it almost goes broke. Why? Because we increase benefits and cut the taxes and also we keep the Federal guarantee, and we have to waive the Budget Act to do it.

We did not put this money in the budget. We should have. I urge my colleagues not to waive the budget act provisions.

I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Montana has 4½ minutes remaining.

Mr. BAUCUS. Mr. President, I am not going to use all my time. We have had a very good debate on this bill. I strongly urge Members to vote to waive the point of order because this is a very sound, fiscally responsible bill. I know Senators will be very proud in voting for this legislation.

The PRESIDING OFFICER. The Senator yields back his time.

All time having expired, the question is on agreeing to the motion to waive section 302(f) of the Congressional Budget Act of 1974 in relation to amendment No. 2170. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Connecticut (Mr. LIEBERMAN) is absent attending a funeral.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 80, nays 19, as follows:

[Rollcall Vote No. 350 Leg.]

NOT VOTING—1

Lieberman

The PRESIDING OFFICER. On this vote, the yeas are 80, the nays are 19. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to. The point of order falls.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order the amendment No. 2170 is agreed to.

Mr. SMITH of Oregon. Mr. President, I rise today in strong support of legislation to reform the Railroad Retirement system. Reform legislation has 75 cosponsors in the Senate and I am proud to be one of them. Over the past 65 years, Railroad Retirement has provided a safe guarantee of benefits to railworkers and their families. In order to keep these benefits secure, both management and labor have endeavored to come up with an agreement that would strengthen the Railroad Retirement system, and I believe that this legislation, The Railroad Retirement and Survivors' Improvement Act has done just that.

This legislation represents a balanced benefits package that together with phased-in tax cuts can provide and ensure the financial integrity of the Railroad Trust fund. This bill introduces sound investment techniques into the effort to make better use of resources built up by railway employees many who live in my home State of Oregon.

The legislation relies upon a number of features to ensure the fund will meet its benefit obligations to retirees:

Fund Reserves. The legislation maintains four to six years worth of benefits in reserve as a safety margin.

Automatic Tax Adjustment. Tax rates on employers and employees will be adjusted automatically in an effort to maintain a fund balance sufficient to pay between four and six years of benefits.

Asset Management. Assets will be managed much like private pension funds, providing the opportunity to earn higher rates of return than the current 6 percent rate of return. Higher returns will provide additional funds for benefit payments and reduce the need for high payroll taxes.

I have been particularly worried about the plight of widows and widowers of retired railroad employees. Under current law, their monthly checks actually decline by two-thirds when a spouse dies. I believe this trust fund can do better by these widows and widowers and am happy that this legislation calls for the surviving spouse to receive 100 percent of what the retired employee was entitled to. Almost 50,000 retirees will be affected by this provision.

Further, this legislation allows the industry to reduce the burdensome payroll tax it now carries to provide benefits. A three percentage point drop in payroll taxes is phased in over three years. The payroll tax was a very real disincentive to hiring employees or replacing retirees and it frees up capital for other expenditures.

I am sure that the relatively swift passage of this reform legislation is

welcome by those in the Railroad industry and urge all my colleagues, including the 75 cosponsors of this bill in the Senate, to continue to give it strong backing to ensure these needed improvements are enacted and beneficiaries see these desperately-needed changes.

CONGRATULATING SENATOR STROM THURMOND ON HIS BIRTHDAY

Mr. DASCHLE. Mr. President, this is a historic day in the Senate's history. Our colleague, the senior Senator from South Carolina, is celebrating his 99th birthday today. Bob Dole used to say that he followed STROM THURMOND very carefully; whatever he ate Bob Dole would eat. I have taken on that practice myself.

I congratulate Senator THURMOND on his 99th birthday today and wish him well. We are delighted to serve with him and honored that he is here with us today. We congratulate him on a very special occasion, not only in his life but in the life of the Senate as well.

(Applause, Senators rising.)

Mr. THURMOND. I love all of you men, but you women even more.

Mr. LOTT. Mr. President, I observe Senator THURMOND's microphone was not on at that moment. I do want to observe also on this very happy 99th birthday, he is looking rather dapper today. He asked if perhaps the tie was a little too bright, and I said, no, it was befitting of him on this special occasion.

We all extend our birthday wishes and very best wishes for the future to Senator THURMOND. He has been an example and an inspiration to all of us. He has been a tremendous servant for the people of South Carolina. I have known very few people in my life more dedicated to their job and to the people they represent. We are just so very proud of Senator THURMOND and extend him our very best wishes. Thank you, sir.

(Applause, Senators rising.)

Mr. THURMOND. Thank you very much. I want to thank all of you. I appreciate every one of you, especially you ladies. You're all good looking. God bless you.

(Applause, Senators rising.)

Mr. BYRD. Mr. President, with great pleasure, I wish the happiest of birthdays to the senior Senator from South Carolina. It was 99 years ago today that STROM THURMOND was born in Edgefield, SC.

Ninety-nine years old, what a feat. That makes him old enough to be my big brother!

When he was born, December 5, 1902, the Wright brothers had not yet made their historic flight at Kitty Hawk. He

has lived to see men walking on the Moon and American space vessels exploring the far reaches of our galaxy.

When he was born, Theodore Roosevelt was President of the United States. Since then we have had 16 more Presidents.

When he was born, the Kaiser still ruled in Germany. Since then, that country has seen the rise and fall of the Weimar Republic, the rise and fall of Nazi Germany, a divided Germany, and now a united Germany.

When he was born, the Czar still ruled in Russia. Since then, that country has experienced the Russian Revolution, the Bolshevik government, the Communist government, the Soviet empire, and now Russia again.

Almost as intriguing has been the extraordinary career of our remarkable colleague. During the same time period, he has been a teacher, an athletic coach, an educational administrator, a lawyer, a state legislator, and a circuit court judge.

He won his first elective office, County Superintendent, the same year that Herbert Hoover won his first elective office, 1928. He was a soldier in World War II, where he took part in the D-Day invasion of Normandy. He was a presidential nominee in 1948 and the governor of his beloved State of South Carolina from 1947 to 1951. He has been a Democrat, a Dixiecrat, and a Republican. Most of all he is a great American.

All of this would have been more than enough experiences and achievements in one lifetime for most mortals. But, incredibly, STROM THURMOND's greatest days were still ahead of him.

In 1954, he won his first election to the U.S. Senate as a write-in candidate—making him the only person in history to be elected to the Senate as a write-in candidate. He has now become the longest-serving Senator in history, and the oldest person ever to have served in the Senate.

But it is more than longevity that has made STROM THURMOND an extraordinary Senator. As chairman of the Senate Armed Services Committee and chairman of the Senate Judiciary Committee, he has fought for a stronger military to keep our country free, and he has fought for tougher anti-crime laws to make our streets safer. As President pro tempore of the Senate, he brought dignity, style, and a southern refinement to this important position.

For these and other achievements, he has had high schools, state and federal buildings, as well as streets, dams, and town squares named in his honor. A few years ago (1991), the Senate designated room S-238 here in the U.S. Capitol as the "Strom Thurmond Room" "in recognition of the selfless and dedicated service" that he has "provided . . . to our Nation and its people."

On this, his 99th birthday, I wish to say what a privilege and an honor it

has been to have served with this remarkable man for all these years.

He has always been an outstanding legislator, a Southern gentleman, and foremost, a good and dear friend.

Happy birthday, Senator. God Bless you.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Continued

The PRESIDING OFFICER. The cloture motion is vitiated and the clerk will read the bill for the third time.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. Under the previous order, the bill having been read the third time, the question is, Shall the bill pass?

Mr. BAUCUS. Mr. President I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is sufficient second.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from Connecticut (Mr. LIEBERMAN) is absent attending a funeral.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 90, nays 9, as follows:

[Rollcall Vote No. 351 Leg.]

NOT VOTING—1

Lieberman

The bill (H.R. 10) was passed.

Mr. BAUCUS. Mr. President, I move to reconsider the vote.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the title amendment be agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The title amendment was agreed to.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I thank all those who worked so assiduously, thoughtfully, and carefully on this bill. There are lots of people I could commend. Two people I particularly commend are on my staff: Tom Klouda and Alan Cohen, who are sitting at my left. They know this issue inside and out and have been of invaluable service to me personally. I just want them to know how much I appreciate their very fine work. They have done a great job.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. NELSON of Florida). The Senator from West Virginia.

Mr. ROCKEFELLER. Mr. President, I ask unanimous consent to address the Chamber as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT REQUEST— H.R. 1291

Mr. ROCKEFELLER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 194, S. 1088; further, that the Rockefeller-Specter substitute amendment at the desk be agreed to, the committee-reported substitute amendment be agreed to, as amended, the bill be read a third time, that the Veterans Affairs Committee be discharged from further consideration of H.R. 1291, the Senate proceed to its immediate consideration, that all after the enacting clause be stricken, the text of S. 1088, as amended, be inserted in lieu thereof, the bill be read a third time and passed, the title amendment be agreed to, S. 1088 be returned to the calendar, and any statements related thereto be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Mr. MCCONNELL. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ROCKEFELLER. Mr. President, I must say that I am mystified as to why there would be an objection to proceeding to consideration of this bill. I realize that the objecting Senator is not the one holding up passage of this important piece of veterans legislation. But as the hold is anonymous, I would ask whichever one of the Senators

across the aisle is holding the bill to please come and speak to me to let me know the nature of the objection. As far as I know, the Committee's Ranking Member also has no idea who has objected to the bill. This bill was voted unanimously out of Committee and is completely lacking in controversy.

More specifically this bill makes significant enhancements to educational benefits for veterans and their families. The original GI Bill allowed a generation of soldiers returning from World War II to create the booming post-war economy, and, in fact, the prosperity that we enjoy today. Today's Montgomery GI Bill, MGIB, modeled after the original GI Bill, provides a valuable recruitment and retention tool for the Armed Services and begins to repay veterans for the service they have given to our Nation. As a transition benefit, it allows veterans to gain the skills they need to adjust productively to civilian life.

I am very pleased that the legislation would increase the MGIB basic monthly benefit by \$50 per month this year, \$100 in 2002, and \$150 in 2003. I am even more proud that this bill also takes the next evolutionary step to keep pace with the careers and education that today's veterans require. As our colleagues know, many servicemembers leave the military with skills that place them in demand for careers in the technology sector. But even these veterans may require coursework to convert their military skills to civilian careers. The bill would allow veterans to use their Montgomery GI Bill educational benefits to pay for short-term, high technology courses that would allow veterans to earn the credentials they need to gain entry to today's civilian-sector careers.

Currently, the MGIB provides a basic monthly benefit of \$672 for 36 months of education. This payment structure is designed to assist veterans pursuing traditional four-year degrees at universities. However, in today's fast paced, high-tech economy, traditional degrees may not always be the best option. Many veterans are pursuing forms of nontraditional training, such as short-term courses that lead to certification in a technical field. In certain fields, these certifications are a prerequisite to employment.

These courses often last just a few weeks or months, and can cost many thousands of dollars. The way MGIB is paid out in monthly disbursements is not suited to this course structure. For example, MGIB would pay only \$1,344 for a two-month course that could cost as much as \$10,000.

The percentage of veterans who actually use the MGIB benefits they have earned and paid for is startlingly low—45% of eligible veterans, according to VA's Program Evaluation of the Montgomery GI Bill published in April 2000—despite almost full enrollment in

the program by servicemembers. By increasing the flexibility of the MGIB program, we will permit more veterans to take advantage of these benefits. We should give veterans the right to choose whatever kind of educational program will be best for them.

This legislation would modify the payment method to accommodate the compressed schedule of the courses. Specifically, it would allow veterans to receive an accelerated payment equal to 60 percent of the cost of the program. This is comparable to VA's MGIB benefit for flight training, for which VA reimburses 60 percent of the costs. The dollar value of the accelerated payment would then be deducted from the veteran's remaining entitlement. This provision would also allow courses offered by these providers to be covered by MGIB.

A provision that is extremely important right now would preserve educational benefits for those that must leave their studies to serve on active duty in support of the National Emergency declared in response to the events of September 11th. This provision would restore educational entitlements for recipients of the Montgomery GI Bill, Veterans Educational Assistance Program, VEAP, and Dependent's Educational Allowance, DEA, for regular servicemembers and reservists who are called up for active duty and who are forced to relocate or take on extra work because of their participation in support of the National Emergency. Their ability to complete their education should not be compromised because they were called up in our fight against terrorism.

The bill would also increase the Dependent's Educational Allowance for dependents and eligible spouses of veterans to \$690 from \$588. This program primarily provides for the children whose education would be impeded because of the disability or death of a parent due to a service-related condition. In addition, unremarried surviving spouses of veterans are generally eligible for the educational allowance in order to assist them in preparing to support themselves and their families at the standard-of-living level that the veteran could have been expected to provide for his or her family but for the service-connected disability or death. As we send troops into harm's way, it is entirely appropriate that we ensure that their families' futures are secure.

The bill also enhances home loan programs. VA provides a guaranty to mortgage lenders rather than a direct home loan to servicemembers and veterans. A VA guaranty allows a veteran to buy a home valued at up to four times the guaranty amount. The price of homes in major metropolitan areas has increased significantly in the last several years, yet the VA guaranty amount has not been increased since 1994.

This bill would increase the home loan guaranty amount to support a loan of up to \$252,700, keeping pace with FHA loan guaranties. It would also extend for 4 years the authority for housing loan guaranties for members of the Selected Reserve, currently set to expire in 2007. Reservists must serve 6 years in order to become eligible for a VA-guaranteed loan. In order for the home loan to be used as a recruiting incentive now, the benefit must be authorized beyond 6 years.

Another provision of the bill would correct an unintended exclusion of certain Gulf War veterans from eligibility for service-connected benefits. Our efforts to explain symptoms reported by many troops returning from the 1991 Gulf War have been frustrated by inconclusive scientific data and by poor military record keeping during the conflict. In 1994, Congress passed the Persian Gulf War Veterans' Benefits Act to provide compensation to certain Gulf War veterans disabled by "undiagnosed illnesses" for which no other causes could be identified.

Since then, changes in medical terminology have led many Gulf War veterans to receive diagnoses for chronic conditions without known cause—such as chronic fatigue syndrome and fibromyalgia—which VA has interpreted as precluding them from eligibility for benefits. Section 202 of the Committee bill would correct this unintended exclusion by expanding service connection to "poorly defined chronic multisymptom illnesses of unknown etiology, regardless of diagnosis," characterized by the symptoms already listed in VA regulations.

Because scientific research has still determined neither the cause of veterans' symptoms nor the long-term health consequences of Gulf War-era exposures, and because the Department of Defense recently expanded its estimates of who might have been exposed to nerve agents, this section also extends the presumptive period for benefits for Gulf War veterans for 10 more years.

This bill would also remove the arbitrary 30-year limit for manifestation of Agent Orange-related respiratory cancers in Vietnam veterans. Current law only provides a presumption in Vietnam veterans for respiratory cancer if the disease manifested within 30 years of their service in Vietnam. The most recent National Academy of Sciences report confirmed that there is no scientific basis for assuming that cancers linked to dioxin exposure would occur with a specific window of time. This provision would eliminate the 30-year limit and allow future claims for Vietnam veterans' respiratory cancers, irrespective of the date of manifestation of the disease.

As you can tell, these are important provisions. But they are also not opposed by anyone, as far as I can see. So

why would someone block their passage? What further adds to my confusion is that a very similar scenario played out just a few weeks ago, with the very delayed passage of legislation to improve programs to homeless veterans. As America honored its veterans on Veterans Day, a member of the Senate was blocking legislation to help those who have put their lives on the line defending this country but who have fallen on hard times.

How is it, at a time when our Nation is at war and the resounding call of patriotism rings in our ears a Senator or Senators is playing penny ante partisan politics with legislation to help veterans, servicemembers and their dependents? Everyone is now flying the American flag. It is time that we act to honor those who carried it into battle.

Again, I request that whomever has placed a hold on this bill please come to speak to me I look forward to working with this colleague to resolve whatever impediments there are to Senate passage of this bill.

UNANIMOUS CONSENT REQUEST— H.R. 2716

Mr. WELLSTONE. Mr. President, I thank my colleague, Senator ROCKEFELLER, who is chair of the Veterans' Committee for his work. As a member of the committee, I am very proud to support his request.

I say to the Senator from West Virginia, he has outlined, in this legislation passed out of the committee, a set of benefits that are so important to veterans. Yet it is being blocked by an anonymous hold.

I also now ask unanimous consent—this is another piece of legislation that I worked on together with Senator ROCKEFELLER—that the Senate proceed to the immediate consideration of Calendar No. 201, H.R. 2716; that the Rockefeller-Specter substitute amendment be agreed to; the act, as amended, be read a third time and passed, the motion to reconsider be laid upon the table, and that any statements related thereto be printed in the RECORD.

The PRESIDING OFFICER. Is there an objection?

Mr. BURNS. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Minnesota.

Mr. WELLSTONE. Mr. President, this is legislation that didn't just come up yesterday. It is something any number of us have worked on for the last year and a half, 2 years—LANE EVANS and CHRIS SMITH from the House, Senators ROCKEFELLER, SPECTER, myself. This is a passion for me, focusing on homeless veterans. I think about a third of the adult males of this country who are homeless are veterans.

It is a scandal what we do with this legislation, which passed out of our committee 21 to 0 or thereabouts, a

unanimous vote. It may have been a voice vote but a unanimous vote by the committee. What this amendment does is it provides services for veterans who are struggling with PTSD, addiction. Many of these veterans are Vietnam veterans. I used to spend a lot of time organizing the street people. This was long before I ran for the Senate. Many of them were veterans. Many of them were Vietnam veterans.

This legislation provides job training assistance. It also enables veterans to try one-stop shop places where veterans can get the help they need and tries to move people into affordable housing.

There is an anonymous hold. I went through this on this veterans homeless bill four or five times before Thanksgiving. I know the Senator from Montana himself is not the one who objects. This is an anonymous hold.

My hold is not anonymous. I announced yesterday, I have a hold on every single piece of legislation, every resolution that is nonemergency. We do a lot by unanimous consent in the Senate. We have unlimited debate. I love the Senate for that reason. We have unlimited amendments. I love the Senate for that reason.

One of the ways we get a lot done is we work this through committees. We massage it. We get everybody together and get consensus and we pass bills by unanimous consent.

Since this is an anonymous hold, my hold is not anonymous. I have a public hold on every piece of legislation now from the other side until this passes. I had to do that before Thanksgiving. I have to do it again.

This did not come up just yesterday. We have been working on this matter for the last couple of years. Anybody who objects can come out here and object. We can debate it. I will say to my colleagues that this is truly reprehensible.

It is not just the playing games. I use my leverage to fight for what I believe. In this particular case I am going to fight for veterans. I am proud to do so. It has been among the most meaningful work I have ever done as a Senator.

I am not a veteran. I was very involved in the war against the Vietnam war. When I was elected to the Senate, I had some contact with veterans but not much. I was a college teacher in Northfield, MN. I knew some of the veterans but not well.

I especially didn't understand a lot of the World War II veterans. I didn't know them. The best thing that has ever happened to me—I am not being melodramatic—as a Senator is that I have learned a lot. I have grown as a person. I have had to be with a lot of people who don't see the world the same way I do, which is good. Veterans have been my teachers. There are so many issues I have worked with for veterans. This one I feel especially

strongly about. It goes back to my community organizing days when a lot of poor people were homeless and many of them were veterans.

I know a lot of these veterans. They come to our office in Minnesota. You will be at a meeting with some of the veterans and guys who are struggling with PTSD. They can't sit that long. They will get up every 10 minutes. They will leave, and then they will come back. They are really struggling. So are a lot of other veterans.

Don't you think it is a scandal that so many homeless people today in our country are veterans and many of them Vietnam vets? Don't you think it is a scandal that there is an anonymous hold on its consideration on the floor of the Senate?

I was asked yesterday by a journalist whether or not the Senate's former majority leader, TRENT LOTT, violated his word. Absolutely not. We went through this before Thanksgiving. Everybody wanted to get this bill through dealing with the Internet and taxes or not taxes. The agreement was that the bill I had would go through and so then I took the hold off other legislation.

Now we have something that has come back from the House, we preconferenced it, and Representatives CHRIS SMITH and LANE EVANS worked hard on that. It is a better version. I love working with other people. Now we have this anonymous hold.

There are three issues here. No. 1, I thought we were doing some reform here on anonymous holds. I don't know what in the world is happening. Something has broken down because, obviously, people continue to do it. That is No. 1.

Second is the substance. I don't really know what the objection can be to this legislation. I don't know why a Senator would be opposed to getting more resources and providing more help to veterans who are homeless. I don't understand it, but I would like to see somebody come out and debate it.

Third, I was asked about the motivation. One more time, I have no idea what the motivation is. I don't know what is going on here politically. But I will say this. I can promise my colleagues that no other legislation is going to move unless it is an emergency. My hold is not anonymous. No resolutions, no other legislation. Pretty soon, I might even get to nominations in a day or two. That is what I will do until this passes.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. KYL. Mr. President, I ask unanimous consent to speak for no more than 5 minutes on the subject of a column I will talk about.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WELLSTONE. Mr. President, I ask unanimous consent to follow Senator KYL.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENT BUSH'S SECURITY MEASURES

Mr. KYL. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a column in the December 5 edition of the Arizona Republic, the primary newspaper in my hometown, Phoenix, written by Robert Robb.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CRITICS OF BUSH SECURITY MEASURES FORGET WE'RE AT WAR

A democracy at war remains a democracy. That means that the government's policies, including the conduct of the war, remain appropriate subjects for discussion and debate.

To underscore that point, and highlight the contrast with the fascist enemy, Winston Churchill continued the practice of the prime minister standing for questions before Parliament during World War II.

As Churchill put it in his war memoirs: "(A)t no time was the right of criticism impaired. Nearly always the critics respected the national interest."

Churchill's description connotes a higher standard of conduct than ordinarily pertains in a democracy for those who criticize war policies, to be careful about facts and fair about issues, to check the customary political hyperbole, grandstanding and posturing.

The critics of the Bush administration's war policies are beginning to fail this higher standard.

This is, in part, because President Bush failed to ask for a formal declaration of war against al-Qaida, the Taliban and other specified terrorist organizations.

The bombs falling in Afghanistan should have settled the question. But without a formal declaration, there are still those who want to treat this as a law-enforcement action, rather than as a war.

But a war it is, and it has a domestic as well as foreign front.

Enemies of the United States entered the country, stole airplanes and killed thousands of Americans. The government believes that there are other enemies still in the United States who plan to commit similar acts of violence.

One of the war fronts is finding and incapacitating those enemies living within.

Critics now casually and routinely depict the efforts of the Bush administration to do so as an assault on civil liberties.

There were reasons to object to certain provisions of the anti-terrorism legislation, and, indeed, I so objected.

But the actual powers granted the government by the legislation are routinely mischaracterized in the public debate. More importantly, the general charge that the Bush administration is trampling on civil liberties is irresponsible hyperbole not justified by the record to date.

The administration has detained a handful of people as material witnesses, as permitted by the grand jury laws. It is detaining a larger number on suspected immigration law violations.

Clearly, the administration is selectively enforcing long-neglected immigration laws. But enforcing a law isn't trampling on civil rights just because enforcement previously has been lax.

The Bush administration has been roundly criticized for wanting to ask questions of young men from Middle Eastern countries. Given that all of the hijackers were of a similar background, as are overwhelmingly the members of al-Qaida, that's a perfectly sensible desire.

These interviews are voluntary at a time of war. The adverse reaction to them is more revealing of the character of the critics than of the administration.

Then there are the potential military tribunals for foreign combatants. Under President Bush's executive order, he must personally designate someone for such a trial. A military tribunal would consider evidence with probative value, although classified information could be reviewed in camera, or in a judge's private office. Defendants would have procedural rights and an attorney.

We are at war. Having such a mechanism in place may be important to protect the security of the United States. Having the option poses no threat to civil liberties. Whether such tribunals adequately protect defendant rights and fairly administer justice can only be ascertained in practice.

Senate Judiciary Chairman Patrick Leahy, D-Vt., is going to bring Attorney General John Ashcroft before his committee to answer inflated civil rights concerns. This is supposedly part of Congress' vaunted oversight function, which receives no mention in the Constitution.

Meanwhile, Leahy is neglecting the clear constitutional duty to act on judicial nominations.

Leahy would better serve the nation by bringing some judges before his committee for confirmation, rather than trying to unfairly put Ashcroft in the dock.

Mr. KYL. Mr. President, I wanted to insert this column in the RECORD not only because the author is one of the best writers from my hometown newspaper, and frequently has very wise things to say, but also because his column is right on point for something that has been troubling me. The title is "Critics of Bush Security Measures Forget We Are at War."

The point he is trying to make is that in this question of deciding how we are going to make Americans more secure from terrorist attack, some people are getting carried away in the expression of concerns about the civil rights or due process rights of people who might be the subject of military commissions or other investigations by our law enforcement or military people in connection with this war on terrorism.

I think he makes a good point. His essential point is that it is not a zero sum game, that we can both provide for the security of our citizens on the one hand and, on the other hand, ensure that American citizens will always have their due process rights, and even for those who are not American citizens, who become the equivalent of prisoners of war, and that the United States, through procedures developed for the military commissions, will treat them fairly. I think that is a very legitimate point to make.

The Attorney General is going to be before the Judiciary Committee, and

he will be asked to respond to a lot of questions about how he is handling his investigations and how the military commissions will work. I note that the President's order to the Defense Department to develop the procedures for military commissions has not yet resulted in the rules and regulations, and rules of evidence and procedures, and so on, at least as far as I know. So it is premature to criticize those rules.

In the Judiciary Committee yesterday we heard from two eminent law professors, who I am sure would be happy to be called liberal in their political ideology: Laurence Tribe, with whom I have worked and for whom I have a lot of respect; and Cass Sunstein; as well as two Republican witnesses, both with significant experience in this area. All four agreed this was the kind of circumstance that justified the creation of military commissions and, indeed, that such commissions were constitutional. The two more liberal professors said they would make some changes around the margins. But nobody questioned the authority of the United States of America to set up these tribunals in order to take care of those people who might be captured, particularly in the Afghanistan situation, or said it would not be appropriate to try to bring them to justice under our article III court system in the United States.

I point that out to ask my colleagues to look at this column. I think it is very well written. It makes the point of what we need to be considering when we characterize the issue as a zero sum game, which it is not. We don't need to deprive anybody of appropriate civil liberties at the same time we are ensuring the security of the United States and its citizens from terrorist attacks.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. REID. Will the Senator withhold for a unanimous consent request?

Mr. WELLSTONE. Yes.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that the previous order with respect to the debate time prior to the cloture vote on the motion to proceed to S. 1731 be changed to reflect that the time begin at 11:45 a.m. today, and that the time until 11:45 a.m. be a period of morning business with Senators permitted to speak therein for up to 5 minutes each, with the remaining provisions of the previous order remaining in effect.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I thank the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

MENTAL ILLNESS DISCRIMINATION

Mr. WELLSTONE. Mr. President, when I was speaking about the homeless veterans, many who struggled, I wanted to bring colleagues up to date about the whole issue of discrimination against people who are struggling with mental illness.

It is difficult to believe that in the year 2001 there is a whole class of citizens—probably well over 20 percent of the families in this country have a loved one who struggles with mental illness—certainly, all of us know someone who does—and they face discrimination. There still is a tremendous stigma attached to people who struggle with mental illness. I remember testimony from a doctor who said that when someone is in a hospital and they have had surgery for cancer and they have had chemotherapy or radiation treatments and they come home, neighbors gather around and give them support. Do you know what. That is exactly the way it should be.

Often, if it is somebody who struggles with mental illness and they get out of a hospital, you don't see neighbors gathering around and saying we want to support you. It is still considered by too many to be a moral failing, even though it is a brain disease.

There was an editorial today—and I will not read from it because I think Senator DOMENICI will—from the L.A. Times that is so powerful, calling for parity and ending the discrimination for this brain disease.

Unfortunately, this discrimination is reflected in the coverage. What we have right now in so many health care plans around the United States of America, if you or your loved one—and, again, I am so sorry I don't have the figures with me. Just take suicide among young people. Suicide kills more young people than cancer and about six, seven, or eight other terrible diseases we all hear about.

Suicide in Minnesota is the second leading cause of death in young people. Nationwide it is the third. Your son or daughter is severely depressed and you need help. You are told you have a few days in the hospital, and that is it. You can have some outpatient visits outside the hospital, but just a few days, and that is it. Also, the copays and deductibles are very high; in other words, what you have to pay before there is any coverage or the percentage you have to pay.

It is completely different if your child has diabetes or a heart condition or a broken ankle. We would not do that to people. We would not say: OK, you struggle with this disease, diabetes; you are in the hospital a few days and then you are out or you can only see your doctor so many times and there is no more coverage.

Even in our Medicare system, which I want us to change as well—by the way,

the highest percentage population of suicide is with the elderly. People do not realize that. All too often we say: Oh, well, if I was 80 and I was having a hard time walking, I would be depressed, too. It is incredible the way we trivialize this illness and the way we discriminate.

Do my colleagues know that in our Medicare program, if one goes under part B to see a doctor for a physical illness, it is a 20-percent copay. If you struggle with depression and go to see someone for help, it is a 50-percent copay. That is blatant discrimination. That should end.

Senator DOMENICI and I—I thank him for his work; it has been an honor to work with him—bring this bill to the floor. There has never been a hearing in the House of Representatives on the problem of discrimination. We offered an amendment to the Labor-HHS appropriations bill. We had 66 Senators who signed on, and it passed out of the HELP Committee 21 to 0. We passed it. Then it went to the conference committee.

I am speaking for myself, not for Senator DOMENICI or any other Senator. It is clear what is going on. We are in a fierce fight, but it is one of these fights that is not as open and public as one would want. Robert Pear wrote an update about this issue in the New York Times today. Thank goodness.

Overall it is hard to get the public's attention on this issue. There is a fierce fight going on. The insurance industry has gone to a couple of people in the House and has basically said: Kill it. Thanks to the work of PATRICK KENNEDY, MARGE ROUKEMA, and others in the House, I believe there are around 250 House Members who have signed a letter saying: Keep this in the conference committee, pass it, end the discrimination.

If we ended the discrimination, it would be civil rights. We would end the discrimination in treatment for people who struggle with this illness. Believe me, I say to my colleagues, it is an illness. It is for real.

Second, if there is money in the plans, the care will follow the money, and a lot of kids will get help rather than winding up incarcerated. A lot of people will get help rather than winding up homeless. A lot of adults will get help rather than winding up in prison. A lot of people will not miss as many days at work and be more productive and families will be better off. There will be fewer problems. This is the thing to do. It is the right thing to do.

The CBO says it will cost 1 percent increase in premiums. That is it. Not to mention the \$70 billion David Satcher, our Surgeon General, said we spend as a result of our failure to provide the treatment for people. Mr. President, \$70 billion over 5 years is

\$350 billion. It is not only morally the right thing to do, it is economically the right thing to do. It is 2001. We should have done this 100 years ago.

The insurance industry marches on Washington, DC, every day, and they put the word out, they put the fix in: Kill it in conference.

I have come to the Chamber of the Senate today to ask my colleagues to please be strong and hang in there. Senators HARKIN and SPECTER are our key leaders. Hold the line. I have come here to appeal to House Members to not kill this bill, and I have come to appeal to the White House: We need your help. This is the perfect example of compassionate conservatism. It is a matter of ending the discrimination.

Kay Jameson, who has written some brilliant books and just won a McArthur Foundation Genius Award—she deserves it—has written that the gap between what we know and what we do is lethal. The tragedy to all this is that these illnesses—I mentioned depression as one example; I could mention many others as well—are diagnosable and treatable, in fact, with a far greater success rate than many of the physical illnesses.

My wife Sheila and I started going to some gatherings with an organization called SAVE which was started by Al and Mary Ann Kluzner in Minnesota. Al Kluzner is a Republican. I hope Mary is not. I am teasing.

The point is, this illness does not know any political party boundaries. It does not know any economic boundaries. SAVE is an organization of family members who lost loved ones to suicide. One feels that it is their own fault where all the evidence shows this is a brain disease. It used to be it was maybe 50 people coming together, and sometimes now the gatherings are 300 and 400 people. This is all about making sure they get the help. This is all about making sure that the illness is treated. This is all about preventing suicide. This is all about dealing with a broad range of mental illnesses that affect adults and children throughout our country, and yet we have this discrimination. We do not even tell the plans they have to provide the coverage. I want to. We just say if you have mental health coverage, treat it the same as physical health. There should be no discrimination.

This insurance industry has tried to put the fix in and stop this in conference committee.

I am still hoping we can get the support from the White House. I am still hoping we can pass this legislation because the consequences are so tragic if we fail to pass it.

Mr. President, I will stop, otherwise I will go on for hours. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WELLSTONE). Without objection, it is so ordered.

COMPREHENSIVE ENERGY POLICY

Mr. MURKOWSKI. Mr. President, it is my understanding that the majority will be introducing a comprehensive energy bill this morning or perhaps early this afternoon. I want to make my views known on that because it represents a departure from tradition in the Senate of bipartisanship within the Energy and Natural Resources Committee.

I believe we can anticipate the Democratic leader and the chairman of the Committee on Energy and Natural Resources will be introducing their bill this afternoon. This will not have any input from the minority.

I am pleased, on the one hand, to see finally some acknowledgment by the other side of the aisle that energy is important to our Nation's security and it should be a priority of this Congress. I think it is also important to note—and I ask unanimous consent that the recent poll of the Ipsos-Reid Group be printed in the RECORD—76 percent of Americans have indicated energy should be taken up as the No. 1 priority of this body.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CITIZENS FOR REAL ENERGY SOLUTIONS

ENERGY POLL SUMMARY—NOVEMBER 14, 2001

95 percent of Americans believe it is "very" or "somewhat important" for the government act on energy issues. Only "security" is a higher priority than energy among voters today.

72 percent believe that energy issues are a higher priority than before the September 11 attacks and the war on terrorism, including 70% of Democrats. This means 72 percent of people think energy is a higher priority than it was when the House passed HR 4 by a wide, bipartisan margin. (240-189, with 36 Democrats voting in favor)

86 percent think "decreasing dependence on foreign oil and gas is important to national security"

Two-thirds (67%) of those surveyed agree that opening ANWR can be done in an environmentally sensitive manner. 53% of Democrats believe it.

Of those who have "read, seen, or heard anything about the Bush Administration's National Energy Policy," supporters outnumber opponents by an overwhelming 60 percent to 26 percent.

And finally, 73 percent of those we polled—including a majority of Democrats—find President Bush's repeated calls for the Senate to pass energy legislation to be sufficient reason to act.

[The surveys were conducted by Ipsos-Reid, an international public opinion and market research firm, from Oct. 5—Nov. 10 and from Nov. 9-12, 2001. These polls were based on randomly selected samples of 532 and 733 adult Americans, respectively. With samples

of these sizes, the results are considered accurate to within ± 4.3 percentage points and ± 3.7 percentage points respectively.

Mr. MURKOWSKI. While there is some satisfaction in seeing that the majority has agreed to prioritize energy, on the other hand I am absolutely dismayed at the partisan nature in which this bill was put together and the extraordinary means taken to remove the bill from the committee's jurisdiction.

I am going to spend my time today talking about the process rather than the substance since neither I nor most of the other members of the Committee on Energy and Natural Resources were afforded the opportunity to see this legislation until it was introduced. I find it rather disappointing and I guess somewhat humorous that so much fanfare has been linked to this bill's introduction when in fact it is the second time this year alone we have had a similar occurrence. The leadership has taken over the responsibility of the committees of jurisdiction and basically proposed to introduce legislation that does not reflect the input of the minority. This was done first in the Finance Committee on the stimulus bill.

I am a member of the Finance Committee, and I participated in the effort where the majority leader and the chairman of the committee basically introduced their version of stimulus and we found we had no input in it so we were at a stalemate. Now we see where we are on stimulus today. We are negotiating with basically the authority of the majority of two over the minority of one. We are not going to have opportunities to amend or even hardly be heard on our views, which I think is unreasonable, unhealthy, and undemocratic, but this is what was done as well in the Energy and Natural Resources Committee.

There is no question the need for a comprehensive energy policy is a critical and pressing issue for this Nation and for this institution. At the beginning of this Congress, I sought out my colleagues on the other side of the aisle and did what we could to get together to introduce comprehensive energy legislation. I think we tried to reflect their interests in the bipartisan and traditional way the committee worked. S. 388 and S. 389, which were the Murkowski-Breaux bipartisan bills, while not perfect, met the requirement and remain the only bipartisan comprehensive energy measure introduced in the Senate. I did not think and I still refuse to accept that the energy needs of this Nation should be a partisan issue, but evidently those on the other side believe they have a better energy bill and can do it better without us.

The PRESIDING OFFICER (Mr. NELSON of Florida). Under the previous order, the Senator from Alaska has only a few seconds remaining. Under the previous order, at 11:45 a.m., other business will intervene.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I be allowed 7 minutes to finish.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, energy should not be a partisan issue. For over 3 months, our Committee on Energy and Natural Resources has been effectively dissolved. The committee was closed while this document was put together behind closed doors, with no input from the minority.

The Democratic leader has selected his deputies and their special interests, whatever agreements were arrived at in deference to the Senate and the committee rules, blatantly bypassing the committee of jurisdiction.

I ask unanimous consent that a release from the chairman of the committee dated October 9 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

From: Jeff Bingaman, Chairman, Senate Committee on Energy and Natural Resources.

ENERGY COMMITTEE SUSPENDS MARK-UPS; WILL PROPOSE COMPREHENSIVE AND BALANCED ENERGY LEGISLATION TO MAJORITY LEADER

At the request of the Senate Majority Leader Tom Daschle, Senate Energy & Natural Resources Committee Chairman Jeff Bingaman today suspended any further mark-up of energy legislation for this session of Congress. Instead, the Chairman will propose comprehensive and balanced energy legislation that can be added by the Majority Leader to the Senate Calendar for potential action prior to adjournment.

Noted Bingaman, It has become increasingly clear to the Majority Leader and to me that much of what we are doing in our committee is starting to encroach on the jurisdictions of many other committees. Additionally, with the few weeks remaining in this session, it is now obvious to all how difficult it is going to be for these various committees to finish their work on energy-related provisions.

Finally, and perhaps most importantly, Bingaman said, the Senate's leadership sincerely wants to avoid quarrelsome, divisive votes in committee. At a time when Americans all over the world are pulling together with a sense of oneness and purpose, Congress has an obligation at the moment to avoid those contentious issues that divide, rather than unite, us.

Bingaman will continue to consult and build consensus with members of his committee, with other committee chairs and with other Senators as he finalizes a proposal to present to the Majority Leader.

Mr. MURKOWSKI. The letter says:

At the request of Senate Majority Leader Tom Daschle, Senate Energy and Natural Resources Committee Chairman Jeff Bingaman today suspended any further markup of energy legislation for this session of Congress.

Now that is pretty blatant, in my opinion, taking the authority away from the committee. So much for the legislative process, the value of the committee process, or the interests of

this Nation and our fellow citizens. So much for the majority leader and the chairman of the Energy Committee defending the Standing Rules of the Senate and the rules of the Committee on Energy and Natural Resources.

Why was this extraordinary action taken? According to a press release, as I have indicated, the Democratic leader made this decision because he wanted to avoid, "quarrelsome, divisive votes in the committee." The fact is we had the votes in the committee to pass it out, and it was generally known. It was known by the chairman, it was known by the majority leader, and it was known by the majority.

One of the purposes of the committee is to test various proposals to provide the Senate with consideration and a recommendation. Our distinguished President pro tempore, Senator BYRD, noted in his remarks on the history of the Senate that the use of committees in legislative bodies predated the first Congress. There are records of joint committees of the House of Lords and the House of Commons in the English Parliament in the 1340s. This history is especially instructive when he discusses the reforms that have occurred, especially those that opened the committee process and limited the autocratic power of committee chairs.

Senator BYRD's discussion of these reforms in the 1970 Legislative Reorganization Act is particularly relevant. He quoted William White's description in the Senate committee in the mid-1990s as "an imperious force. Its chairman, unless he is weak and irresolute, is, in effect, an emperor."

The 1970 reforms were intended to curb that power and open the process. The majority of the committee were given the power to call a meeting if the chairman refused, and I obviously have not gone to that extent.

Later reforms opened our business meetings, with a few exceptions, to the public. Rule 16-3: to fix regular bi-weekly or monthly meeting days for the transaction of business before the committee. Further, the committee shall meet on the third Wednesday of each month while Congress is in session for the purpose of conducting business. Neither the Standing Rules of the Senate nor the committee rules provide an exception for the Democratic leader to abolish committees or order them to cease activities whenever there is a likelihood that there may be a bipartisan action that would conflict with his particular agenda.

Those rules, according to the Democratic leader, now do not apply to the Committee on Energy and Natural Resources. I ask why. The reason is clear. We have the votes, so he is not going to let us vote. Apparently whenever it is convenient to the Democratic leader, the rules of the Senate can now be suspended and the rights of members of standing committees of the Senate can

be abandoned. The majority of the members of the Committee on Energy and Natural Resources have been ready, willing, and able to complete action on a comprehensive bill.

Yes, there would be votes on amendments. What is wrong with that? Some would pass and some would fail. I have always been prepared to live with the results to bring a bill to the Senate, but at least there would be debate in public and an opportunity for all Members to participate. I believe virtually all the members of the committee share that view.

Since the Democratic leader closed the committee, there has not been a single business meeting on energy and, in fact, there have been no business meetings at all. It is a sad state of affairs when the authorizing committee is precluded.

This abuse of the legislative process is outrageous. This concentrated action by the leadership to deny the committee members the opportunity to advise the Senate is reprehensible. The majority leader has abolished one of the standing committees of the Senate and crafted partisan legislation behind closed doors with special interests without a whimper from the press. It is abundantly clear now this has been the strategy all along and that all rhetoric about national energy security and bipartisanship has been empty talk, devoid of any substance. We can write the Democratic speech now as the leader pleads with colleagues not to offer divisive amendments.

We hear the partisan calls: We wanted to move an energy bill, but some Members insisted on offering amendments that he did not like, amendments that should have been dealt with in committee. We can probably imagine the editorials now, castigating Republicans for not accepting whatever may be in the proposal that it is about to be unveiled.

We need an energy policy in this country. This Nation deserves better than this travesty. The American public deserves a fair, honest, and open debate on this critical issue. We need conservation, we need efficiencies. We need additional research. We need development. We need to deal with our infrastructure and our domestic supply for developing and refining transportation and transmission. We certainly need to provide for the security of our energy supplies.

Maybe we are now at the stage where the country will have to live with a take-it-or-leave-it package, cobbled together in some back room by the Democratic leader. But this Nation deserves better. The Members of both sides of the aisle who serve on the Energy and Natural Resources Committee deserve better. We deserve the opportunity to debate, discuss, and vote. This is an institution that did not fear and should not fear debate.

I brought the nuclear waste legislation to the floor in an open and fully transparent process last Congress. I don't think the distinguished Democratic whip, my good friend, the senator from Nevada, would accuse me of being other than up front and honest with him. Although we disagreed on the subject, I was always willing to talk openly. This is the way the Senate should work.

What has happened here is that not only have the views of the minority of the committee been silenced but the views of the Members, as well. I am certain the majority leader will take steps on the Senate floor to further restrict amendments.

One of the interesting things about this is the elastic bipartisanship on this, the comity of the Senate that normally would have Senators consult with their colleagues whose States are affected by a given measure are also falling victim to the Democratic leader's assault on the institution. I understand included in the legislation put forward by the Democratic leader are provisions dealing with the development and transportation of natural gas owned by the State of Alaska. These provisions were again developed behind closed doors without consultation to either the Senators or the Governor of our State.

Finally, make no mistake about it. While I support opening the gas line from Alaska, I am not here in the Chamber criticizing the companies, which is what many of our Democratic friends have done. As a consequence, I will have far more to say about the majority leader's proposal once we are given the courtesy of seeing it. Unfortunately, its introduction comes with a heavy price of the Senate and the Committee on Energy and Natural Resources.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONRAD. Mr. President, is the time running on the one-hour provided for debate on the agriculture bill?

The PRESIDING OFFICER. It has not yet begun to run.

Mr. CONRAD. When will that begin?

AGRICULTURAL, CONSERVATION, AND RURAL ENHANCEMENT ACT OF 2001—MOTION TO PROCEED

The PRESIDING OFFICER. Under the previous order, there is now 1 hour of debate, evenly divided between the leaders or their designees prior to a

vote on the motion to invoke cloture on the motion to proceed to the consideration of S. 1731.

Who yields time?

Mr. CONRAD. Mr. President, I note the chairman of the Agriculture Committee is here. I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa, the chairman of the Agriculture Committee.

Mr. HARKIN. Mr. President, we have 1 hour equally divided; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HARKIN. Mr. President, I look forward to the vote on cloture. I hope it will be an overwhelming vote. I hope we can move on this bill right away, today. Time is wasting, as they say. The clock is ticking. We are here. We are in Washington. We are ready to do business. I believe we have a good bill. I believe we have a very good, well-balanced farm bill. It is a 5-year farm bill. We have reported it out of committee. We are ready to bring it to the floor and have it open for amendments that Senators might offer.

It is a 5-year bill. It is a comprehensive bill. I think it provides greater improvements to the farm commodity and income protection programs. We are strong on conservation, rural economic development, agricultural trade and research has a good provision.

I will have more to say about my distinguished ranking member, Senator LUGAR, and the great work he has done on agricultural research.

We have nutrition assistance programs, we have a new title dealing with energy, and of course credit titles and forestry titles. It is a comprehensive farm bill. I know a lot of the press tends to focus only on commodities. Commodities, obviously, are an important part of the farm bill. However, this farm bill covers other areas across the United States which I will talk more about.

I thank the ranking Republican member of our committee, Senator LUGAR, former distinguished chairman of the Senate Agriculture Committee. I very much enjoyed working with him and his staff, developing this bill. I can say without any hesitation that we have had a very high level of cooperation and a bipartisan working relationship and collaboration in writing this bill. In fact, all but one of the titles of this bill represents a bipartisan agreement. All titles of this bill passed in our committee with bipartisan votes.

That shows we did, in fact, work closely together. We did have a vote on the commodity title and even there, there was a bipartisan vote. To be sure, it was not the same as on the other titles, but we voted to uphold the committee's commodity title.

Again, as an indication of the broad-based support that we had in the committee for the bill, even though there were some who may have wanted to

change the commodity title we reported the bill out on a voice vote, which is in practical effect unanimous.

Let me point out the legislation is within our committee's budget limitations for the new farm bill. We were allowed by the Budget Committee \$7.35 billion for fiscal 2002, and \$73.5 billion for the 10 years, above the baseline. The bill has been scored within those limitations.

I hope we can move forward and work our way through this bill. As I said, we are ready to consider amendments. I am hopeful—and I say this with all due respect to Senators. I know people may want to have amendments to this that they feel strongly about. I myself in the past have felt strongly about amendments to farm bills when they have come to the floor. But the important point is to move the bill forward and not slow down the farm bill. We should have amendments, debate them in a timely fashion, vote on them, and move on.

I am hopeful we can reach meaningful time agreements on the amendments that will be offered to this bill. Of course, I believe it is a good bill as it came out of the committee. But I understand there will be some who may want to offer amendments.

Why act now? Why not wait until next year. We have heard some talk about waiting until next year for a farm bill. Frankly, farmers around the country need to know what the farm program is going to be, and they need to know soon.

A lot of farmers are going to be going to the bankers right after the first of the year to get the money they need for their crops, to put in their crops. What is the banker going to say? "What is the program going to be? What can you count on?"

How are the farmers going to fill out the paperwork to go into the banker to get the money they need to plant crops if they have no idea what the program is going to be?

That is why it is so important that we finish this legislation and give a clear signal to the agricultural community and the agricultural credit community just what we are going to have for next year.

The other reason is—and I will be repeating this data over and over again as we go through the debate on the farm bill—that there really is a crisis in rural America, since soon after the 1996 farm bill was passed.

In 1996, we had net farm income of \$55 billion nationally. Since that time, net farm income has fallen to an average of \$46.3 billion, a decline of nearly 16 percent.

Had it not been for the sizeable Government payments from the farm bill and the additional payments that we in the Congress have made in that period, which includes about \$30 billion in additional emergency payments over

those years, if we had not had those payments, net farm income would have fallen to less than \$30 billion on average.

Thus, had it not been for the Congress coming in every year on an ad hoc basis, the market-generated net returns to farmers would have been only 54 percent of what we had in 1996. That is why it is so critical we move ahead and get this legislation passed.

Commodity programs are only part of the reason to move ahead. Several of USDA's critical conservation programs are simply out of money. The Wetlands Reserve Program, the Farmland Protection Program, and the Wildlife Habitat Incentives Program are all out of money. I say to those who are interested in conservation and want to promote and provide for conservation, we need the money now, not next year. That is because many of these programs have to be funded on a continual basis.

Take the Wildlife Habitat Incentives Program, for example. That is not something that should be just stopped and then started. The Wetlands Reserve Program is not a program that can be kept in abeyance for 9 or 12 months, and then just be started again without real negative consequences. These are conservation programs that need continual infusions of money for the protection of our endangered lands and endangered species.

The Environmental Quality Incentives Program—the EQIP—to defray conservation cost of crop and livestock producers, is far short of the resources needed. It is not out of money just now, but the funding is inadequate for the need out there. This bill substantially increases funding.

However, if we do not pass the legislation soon, the USDA will not be able to carry out the conservation programs adequately during the present fiscal year. Also, the bill will help provide very important and much needed new help in the areas of rural economic development, agricultural trade, research, credit, nutrition, and renewable energy. So we need to move ahead without delay.

At some point later on I will take the time to go through the bill and talk about the different commodity and other programs covered in the bill, all the various aspects that are in the bill, but I do not believe that is necessary right now. We are coming up to a cloture vote. I basically wanted to take the floor to say why it is so necessary we move ahead and not delay this bill any longer. We have a huge decrease in net farm income. We have to address that.

We have to let the bankers and the farmers know what kind of program they can count on next year. But, again, if we do not move this bill soon, farmers will be going to the banks and seeking credit for the crops they are

going to be putting in without knowing what to expect in the farm program. That is why we need to move on this legislation right now.

In addition, we need to move on the bill to make sure we keep the funding stream going for our necessary conservation programs.

Mr. President, I want to again publicly thank my good friend and ranking member of the Senate Committee on Agriculture, Nutrition and Forestry, Senator LUGAR. He was chairman for more than six years. He was a great steward of the committee. He did a great job guiding, directing, and leading the Agriculture Committee. I am proud to follow in his footsteps as chairman of the Agriculture Committee.

I again thank him and his staff for all the working relationships that we have had in developing this farm bill and in all the other work we have been doing on the Agriculture Committee. I want to thank Senator LUGAR for that great working relationship.

With that, I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I yield myself as many minutes as are required.

I deeply appreciate the thoughtful comments of my colleague, the chairman of our committee. Let me reiterate the importance of what he has said on the bipartisan cooperation on major titles. He has touched upon them. I shall do so again because each represents superb staff work and work by Senators to achieve virtually unanimous results: The rural development title, the research title, the energy title, the forestry title, the trade title, the credit title, and the conservation title.

With regard to research and nutrition, during the course of the debate and events and the will of the Senate to continue with this bill, I would want to say more. I believe we can improve both of those areas very substantially. We can do so through substantial change in the commodity section. So there will be an offset to do that.

But giving credit where credit is due, a substantial number of titles are reasonably settled and I think will meet with the favor of the vast majority of Senators.

The debate we are having during this hour is on a motion to invoke cloture so that we can proceed to the Agriculture bill today. Therefore, that is the issue on which the Senate needs to focus. The question is, Why today? What is the compelling need to proceed to this legislation?

First of all, most Americans who are presently watching television, if they are not on the C-SPAN channel watching this debate, are watching developments on the war in Afghanistan. They

are watching a gripping drama in which Americans are at risk.

There is, in my judgment, a compelling need for us to be discussing the defense budget and issues that are involved with terrorism, whether they involve a continuation of the insurance industry, for example, or other aspects of the war. We are in a war.

This has been the case really throughout this strange preoccupation with the Agriculture bill. I say "strange" because the Agriculture legislation we now have on the books does not expire until next September 30—over 9 months from now. During that period of time, so-called AMTA payments—fixed payments—will be made to all the farmers who are in the program. A seventh year of payments will occur automatically. So will loan deficiency payments to farmers who have the row crops that are covered by the loan deficiency program. In short, the stable safety net that has been sought remains, plus very large, fixed payments. None of that changes during the coming months.

Parenthetically, there is a need, I suppose, to discuss the defense budget and to do so in line with things which have occurred in our American economy since the first thoughts about a new farm bill began.

For example, at the time the Senate and House Budget Committees began to formulate the resolution last year, I note from the chart that was prepared by OMB that the surplus was estimated at \$313 billion for the fiscal year commencing October 1. As a matter of fact, I recall that the President of the United States, during the State of the Union Address, discussed surpluses in the future that might approximate \$3 trillion—if one extrapolated further, as much as \$5 trillion—and suggested how responsibly the Congress might allocate that money. That was February. But by May, there were at least some signs of a weakening economy seen by the same persons who prepared the chart.

I look at it here. We now know officially that a recession occurred, or started, in March. But this was being picked up by the budget officials. They then estimated in May that the surplus would be only \$304 billion, only incrementally down from the estimate of \$313 billion. But we went on recess in August. Things had changed abruptly by the time we returned on Labor Day. By then it was \$176 billion for the fiscal year commencing October 1.

Then, in the post-September 11 period, the first time the authorities had another chance to take a look at this, \$176 billion had evaporated, and it was down to \$52 billion—just double digits—some distance from \$313 billion barely 8 months before.

The head of OMB in an address to the Press Club last week gave the very bleak news that for the next 3 years—

not just for the year immediately ahead of us—there will be deficits in the Federal accounts—not \$313 billion of surplus, or the \$176 billion, or even the \$52 billion, but red figures.

The entire farm bill debate in Congress has proceeded almost as if we were in a different world from the one in which there is war, recession, and deficits.

Senators with a straight face have said: We were told in the Budget Committee a long time ago that there was \$73.5 billion above the current baseline—\$100 billion—allocated to agriculture over a 10-year period of time. By golly, we are going to claim it. You can have a war, you can have a recession, and you can have deficits, but that additional \$73.5 billion remains inviolate above any other priorities of the country.

Post-September 11, some Senators who held that point of view became nervous. They said: At some point people may begin to make estimates that it is gone and that there is no money. But harking back to the budget resolution, there is the additional \$73.5 billion, and ignoring reality, or whatever may transpire now, not for just the next year but for 3 years down the trail, if we do not pass a farm bill—and in a hurry—somebody may question whether the \$73.5 billion is there.

Indeed, most Americans question it. We have an extraordinary “Alice in Wonderland” quality about the agriculture debate in which people with blinders on ignore the rest of the world, but I think at their peril.

One reason all of this has accelerated is that my distinguished colleague, the majority leader, the distinguished member of our committee, Senator DASCHLE—seemed to want to accelerate the farm bill, and wanted to see a bill on the floor. He was not alone. It was suggested by others that Senators who are moving into reelection phases in various farm States did not want to go home without not only discussing it but passing it, nailing down that additional \$73.5 billion whether it is there or not. Furthermore, their political judgment was there would be liabilities if they did not succeed in that quest.

Each Senator has to be the best judge of his reelection prospects. I don't fault anybody who believes they need to proceed to a farm bill and spend as much money as the law will allow. And maybe that will help that Senator. But I doubt it. I doubt it simply because the political facts of life are that this time the American people are looking in on the debate. One reason they usually don't look in on these debates is they are very complex issues. Most Senators would be hard pressed to go through a glossary of agriculture terms that are a part of these bills. So they do not try. They do not want to be embarrassed by indicating they really do not understand what this is all about.

But I think they will by the time this debate and the discussion of it is concluded.

If I were a Senator running for reelection, I would not want to vote for cloture today. I would not want to put any stamp on a bill coming out of the Agriculture Committee. It contains, in its commodities section, bad policy, which will be harmful to agriculture, not helpful.

I think the exception, perhaps, is my distinguished friend from Iowa, Senator GRASSLEY. I understand the distinguished Senator from Arkansas, Mrs. LINCOLN's family may collect some payments from these programs. But I receive payments from the programs. The Lugar stock farm ranks No. 22 in Marion County in terms of the payments received. How do I know? Because the Environmental Working Group has a Web site. The Wall Street Journal introduced the country to this just last week. If you are curious, you can go into that Web site and find out, down to the dollar, how much every farmer in your State has received during the period of 1996 to 2000. It will be a revelation.

Let me just discuss the politics that seems to drive the issue today. One prominent farmer in my State, who was named in an article that the Associated Press picked up, having taken a look at this Web site, was found to have received almost \$2.9 million in farm payments in the last 5 years. That came as a shock to my constituents in Indiana who are not farmers. Worse still, this farmer criticized my stand. He said: LUGAR is way off base; he wants to limit these payments.

At the time, he had it wrong. He thought I wanted to limit the payments to \$1 million, say. He said that \$1 million does not go as far as it used to go. This was shocking. People wrote in to the papers, and they had no idea that farmers were receiving subsidies, farm payments—these very programs we are discussing—to the tune of, say, an average of \$500,000 or \$600,000 a year in our State. We do not have farms that are that large. This particular farmer was identified as having only 12,000 acres, dwarfed by many farms farther to the west of us.

So this started an interesting debate. The Indianapolis Star has written very strong editorials in favor of the comprehensive bill that I prepared for the Agriculture Committee debate. The other papers in Indiana have, by and large, chimed in. This is not a lonely quest. I think I have the majority behind me. I certainly do of those who favor conservation and who are deeply interested in the environment and those resources, of people who are poor and want to make certain the Food Stamp Program works at a time of recession and unemployment, of people who are interested in research, not only at Purdue University but any-

where else where they know the cutting edge of agriculture is not more payments to farmers but research that gives us some hope of feeding the world as well as ourselves.

In the course of all of this discussion of who is getting subsidies, some unusual figures have come up. If it is the will of the Senate that we must discuss this for a long time, I will have a lot of those. It will be exciting, I think, for friends and neighbors to know who is receiving what. But let me just give you a capsule summary.

Eight percent of the farmers of this country identified as having commercial farms—single digit 8—receive 47 percent of all the payments. It is a very concentrated sort of payment schedule. There is another group known as intermediate farmers. These are farmers who have roughly 300 to 800 acres—a harder time on that amount of acreage. These folks receive about 35 percent of the payments. So you add that to the 47 percent, and that takes care of over four-fifths of the payments. We have accounted for, say, only 20 percent of the farms in this country.

I never heard one of these debates before without many Senators rising to address the Chair and pointing out that farmers in their States are desperate, the weather has failed again, the floods, the rains, a lack of any trade initiative that seems to make any difference, and rock-bottom prices, about the lowest that one has ever seen.

In due course, if necessary, I will cite chapter and verse from USDA's very fine publication in which they explain why prices are low and why they remain low. I will explain why the bill that Senators may or may not wish to debate will drive them lower still. The bill the Senate will have passed will stomp down prices. They will have no hope of ever getting up. This may not concern Senators who will say, after all, the bill provides for fixed payments anyway. It does not matter how low the price goes. That is irrelevant, although it is useful in a debate to point out that agricultural policy has failed and prices go low. Of course, they go low because the very policies give incentives, strong incentives, to plant and produce more every year.

We have very efficient farmers in this country who produce, say, an incremental bushel of corn for much less than the loan rate of \$1.89. I point this out just for the sake of the debate. Every bushel of corn I produce on my farm this year—and it would be true of anybody else—is going to get at least \$1.89. That is not the market price. That is irrelevant to the argument except in terms of the Federal payments that have to be made. The taxpayers pick up the difference between that \$1.89 and wherever the market price went.

Yet these policies are going to drive the market price down further. The

taxpayer exposure is higher, thus the need for the additional \$73.5 billion for 10 years—a perpetual price crisis for agriculture without relief predicted by the very definition of the bill.

Let me just point out that if, in fact, we were in an income crisis situation, that might temper my remarks. But quite to the contrary, the Secretary of Agriculture pointed out for our last agriculture debate in August—and this is coming to pass—that net cash income to farmers this year, 2001, will be \$60.8 billion. That compares to \$57.5 billion last year, \$55.7 the year before, \$54.8 billion the year before that, and even in the record year of 1996, that the chairman has cited, net cash income of \$57.6 billion, about \$3 billion less than this year.

This is the all-time high. We never had such large net cash income as this year. The skeptics will say: Aha, but \$20 billion of that comes from Federal payments, not the market. You bet. Given the policies we have that drive down prices every year, more loan deficiency payments are almost bound to come, plus the fact we took action, as the Presiding Officer will recall, in August to send another \$5.5 billion as an emergency tranche, as we have the previous 3 years.

Some farmers will say we need to have certainty with this bill because each year the Senate votes for more money. Do you believe for a moment, given the political competition in this body, there will not be somebody on the floor of the Senate next June, July, August, suggesting we have a crisis at hand and, by golly, we ought to send more money on top of the fixed payments as we have done the previous 3 years? That is the nature of the debate we are having today.

The fact is, farm income is at a record level. We have a situation in which we are at war, and we have need for money to pay for the war. We have a recession in which we have deficits around us. A prudent person, seeing we have a farm bill on the books that is going to pay fixed payments plus loan deficiencies, would say: This is not the time for the debate. That is what I say.

I hope Senators will not move to proceed to this bill and will not vote for cloture on the motion to proceed. I think it would be a mistake.

Having said that, if that mistake is made, let me mention to the distinguished chairman that, indeed, we will try to remedy the bill in a big way. I have a comprehensive commodity title, a lot to say about enhancing nutrition, a lot to say about conservation and research. Furthermore, finally, we will get to reform of the sugar program and reform of the peanut program and big reform of the dairy program. This bill has an egregious dairy section, and Senators are already quoted as being dismayed to proceed. It creates in a big way a consumer problem throughout

America. But this time something very sensitive, the price of milk, goes up for everybody. That really is unacceptable.

Other Senators may also have amendments. This is a list of those we already prepared on the bill I gave to the Agriculture Committee. These are not figments of the imagination. The amendments are drafted and the talking points are ready. I hope it will be an educational experience Senators will enjoy and, furthermore, that they will vote with me and reform this bill.

Let me conclude by saying I do hope we will get to the defense bill quickly. I take the time I have on the floor to say that I noted with some concern—perhaps there will be an explanation for this—in the release coming from the Defense Appropriations Subcommittee, a note that it provides \$357 million for former Soviet Union threat reduction, the Nunn-Lugar program, a cut of \$46 million from the budget request.

I find that to be inexplicable. At a time in which our President and President Putin are talking about reduction of nuclear weapons, in which the fundamental thrust of the war is to keep weapons and materials of mass destruction from terrorist cells, I am dismayed. I want to get to that debate. I think that is serious with regard to the world, with regard to our security. That is a real issue.

In due course, we will discuss the subsidies. Senators will have parochial interests, I understand that. But I hope we can hold it to a dull roar. I hope there will be some proportion given the deficits of the next 3 years, not a 10-year program but a 5-year program which the Senate did adopt but which we still have to work on in conference, if we come to that point prematurely.

For all these reasons, I hope the Senate will vote no on cloture, that we will get on to the serious business that really faces the country in its defense, and that other issues such as this we may be able to work out more amicably in the Agriculture Committee or elsewhere in the ensuing weeks.

I yield the floor.

The PRESIDING OFFICER (Mr. CORZINE). The Senator from Texas.

Mr. GRAMM. Mr. President, I take this opportunity to congratulate the distinguished Senator from Indiana. It has been my privilege to serve with him now going into my 18th year. I have always admired him. I have always thought he was the one reasonable, sane leadership voice on agriculture in the Senate. I take a little bit of the time I have this morning to say that.

I am not going to get into the merits or demerits of the American farm program or this bill. I can sum up my own feelings by simply saying that America's farm program would make an old commissar from the Soviet Union puke.

It is a program which is an embarrassment to logic and reason. It chronically encourages overproduction. It hurts the best farmers the most. It has no socially redeeming value, and America would benefit greatly if we could eliminate the great bulk of the farm program.

I would say, in sort of the ultimate insult to everything that many Members of this body claim to believe in, we literally have a program in this bill that builds upon an idea where we drive up the price of milk consumed by children, many of whom are from poor families, to pay more subsidies to people in the dairy industry who on average have assets of over \$800,000.

How that can be justified defies imagination. Yet we constantly are engaged in debating compacts which are really conspiracies against trade. In this bill, we solve the problem by just giving a whole bunch of money to everybody.

I don't want to debate the demerits of the farm program or this bill. I want to make several points.

First of all, it is December. In the last 25 years, we have not often been in session on December 5. We have work to do on serious issues. We are at war with terrorism. We have an economy that desperately needs attention. We have a handful of appropriations bills that have to be passed. Senator LUGAR raised the need to debate Defense appropriations. God knows, while we are still feeling the shock of the last terrorist attack, knowing there may be another, that is the business of the Senate.

The economy is in a recession, or at least we have had a negative quarter of economic growth, and almost certainly we will have another one. We ought to be debating a stimulus package. We have a very real problem with terrorist acts and their impact on insurance. We ought to be dealing with that issue.

Instead we are dealing with extraneous matters in what is a political agenda, sort of a political one-upmanship effort.

What are we doing talking about a farm bill that does not even expire for a few more months? What is this about on December 5? Does anybody really believe there is any possibility whatsoever, any chance that this bill could be finished before we adjourn? Does anybody really believe that?

If we were mean spirited—and, of course, we are not—but if we were mean spirited, we would let you get on this bill and make you stay on it awhile. But nobody has any intention of staying on it.

This is all a political one-upmanship to try to bring up a bunch of extraneous issues that supposedly have some political saliency. My own view is we need to get on with the pressing business of the country. We are going to get paid every day next year. This bill

doesn't expire for a few more months. Let's set it aside, go to the Defense appropriations bill, finish these appropriations bills, and make a decision on if we can pass a decent stimulus package. If we can, we should; if we can't, we should forget about it.

Can we deal with the terrorist threats and the insurance implications of them? We ought to do those things and finish our business.

But why are we bringing up a farm bill which is way over budget, which I think the President will veto? There is only one reason. It is political. I don't think it makes any sense.

We have some people on our side of the aisle who want to bring this up because they want to offer amendments to it. We don't have anybody, as far as I know, on our side of the aisle who is for the bill as it is now. The point is, we have all next year to offer amendments. I hope we can deny cloture on bringing this bill up and get on with the business of the country.

I am not getting mail here—none of my colleagues are—so I have probably 200,000 first class letters. And I will bet you not one of them says: Stop what you are doing; stop fighting this war; stop worrying about the economy, and raise the price of milk. I don't think America is concerned about the farm program right now. The current farm program is going to be in effect for a few more months. But they are concerned about a lot of work we have not done.

This is a political stall, in my opinion. We ought to get on with the business of the country.

I thank the Senator for yielding.

Mr. CONRAD. Mr. President, farmers would have been stunned to have heard the speech of the Senator from Texas, because in his world the economics of what happens to farmers just doesn't matter. But to hundreds of thousands of farm families, the economic downturn started for them 5 years ago. They have been in a constant recession. In some cases, they have been in a depression for 5 years.

The Senator from Texas says it doesn't matter, you don't need to do the bill now because the farm bill does not run out for 9 months. That is really not the case. Effectively, this farm bill expired 4 years ago because that is when we started writing disaster assistance packages for agriculture because prices were the lowest they had been in 50 years. So, effectively, the farm bill that is the underlying law was altered 4 years ago and each and every year since because of the disastrous conditions that exist for American farmers today.

When the Senator from Texas says this bill is over budget, that is false. This bill is not one penny over budget. If he really believes what he says, come out here and bring a budget point of order against this bill and let's see the

ruling that will flow from that. He won't do it because the fact is that this bill is not over budget by one thin dime.

The reason we need to write a new farm bill, and do it now, is that American agriculture is in deep crisis. This says it very well. On this chart is the crop farm index: Prices received and prices paid by farmers from 1990 through 2002. The green line on the chart is the prices that farmers receive. The red line is what they pay to produce those commodities. Just looking at it, one can see there was a rough balance until the last farm bill was written. Then the commodity prices farmers received collapsed. The prices they paid to produce those commodities continued to increase—especially with the energy runup we experienced earlier this year. The result is an enormous gap between the prices that farmers are paid and what they pay to produce these commodities.

Again, we have the lowest prices in real terms in 50 years. On top of that, in the month of October, when the new price index came out, we saw the biggest 1-month decline in the prices that farmers receive in 91 years. The records have only been kept for 91 years. So what we have seen is the biggest monthly decline of the prices going to farmers in the entire history of the commodity index.

The harsh reality is that American agriculture is in deep trouble. When I talked to the farm group leader and I asked him what would happen if this farm bill did not pass with the additional resources that have been provided for in the budget, he said it would be a race to the auctioneer. He was right because that is what we confront in rural America today.

One key reason for that is our major competitors, the Europeans, are supporting their producers at levels much higher than ours. The most recent numbers show this. This is the European Union and the amount of support they provide per acre to their producers: \$313 an acre of support. We provide \$38 an acre of support. In other words, they are outgunning us nearly 10 to 1 in support for their producers. It is no wonder American agriculture is in crisis. It is no wonder that if they don't get a safety rope, if they don't get something to assist them through these difficult times, we will see literally tens of thousands of farm families forced off the land. That is the economic reality.

It doesn't stop there. When we look at the world agricultural export subsidies, this is what we find. This bar chart shows who accounts for world agricultural export subsidies. The blue part of this pie is Europe. They account for 84 percent of all the world's agricultural export subsidies. This little piece of the pie, this red chunk, is the United States, which is 3 percent.

We are being outgunned here 28 to 1. The deck is stacked against our producers. The playing field is not level.

It is no wonder, therefore, that our producers are in deep financial trouble. They are saying to us: We need to know now what the rules are going to be before we plant the next crop. We need you to tell us of what the farm program is going to consist. That is why there is urgency today. It has nothing to do with political one-upmanship, as claimed by the Senator from Texas. It has to do with urgent economic necessity.

The fact is, despite the budget increase, farm support funding is projected to decline under this bill. You will hear a lot of talk on the floor that there has been this big increase, there has been an increase over the so-called baseline. That is the red line on this chart. The baseline is the funding that would flow from current farm law. You can see that this bill provides more funding than that baseline. That is true. What is missing is not what Congress has been providing to American farmers the last 4 years. It hasn't been the baseline. No. We responded to the crisis by every year passing an economic disaster package to help our producers. And this farm bill will provide less assistance than farmers have been getting the last 4 years. That is a fact.

Over the life of this bill, you can see—that is the green line—the support will be in decline. As I said, it is less support than farmers have actually been getting in each of the last 4 years because of the economic disaster packages Congress has passed in response to the economic emergency that exists all across rural America.

When we look at the Senate bill versus the House bill on commodity program funding for the first 5 years of this bill, we see on this chart that the Senate bill is somewhat more than the House bill, about \$2 billion more—\$27.1 billion versus \$25.1 billion. If we compare the Senate and House bill on conservation program funding, we see on this chart that the Senate bill is \$8.4 billion versus \$6.8 billion in the House bill. So there is more for conservation, which I think the overwhelming majority of the American people support.

On this chart, on nutrition programs, over the 10-year life of the legislation, again, the Senate bill has somewhat more—\$5.6 billion over 10 years versus \$3.6 billion in the House bill—money for the basic feeding programs of the Federal Government because we know in an economic downturn more people need food assistance. America is a compassionate nation and one that responds to the needs of its people.

I urge my colleagues to vote to allow us to proceed to this bill so the Senate can work its will on farm policy, so we have a chance for people to vote. There will be amendments, no doubt, to improve this bill. We will have a chance

to fix the dairy policy that the Senator from Texas criticized. I don't think any of us wants the results he described. We are going to have a chance to fix that, and negotiations are underway to fix that, and it will be fixed. But it won't happen unless we get to the bill. It won't happen unless we have a chance to debate, discuss, and amend. That is what the cloture motion is all about—to give the Senate a chance to act. Rural America needs it. Our farmers need it. They are in a desperate struggle for economic survival. They are up against the European Union, our major competitors, who are spending \$90 billion a year to support their producers—far more than the United States. It is no wonder we are in economic trouble. I urge our colleagues to vote to proceed to this bill.

I recognize the chairman of the Senate Agriculture Committee, who has done an absolutely superb job in getting this bill to the floor. There is no more difficult challenge than writing a farm bill. The Senator from Iowa has done a brilliant job. Let me also recognize the ranking member who, while we disagree on farm policy, is one of the most thoughtful Members of this body and somebody we all respect.

My hat is off to the chairman of this committee for what is I think one of the most productive performances of any member this year in getting this bill to the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, how much time do we have remaining on our side?

The PRESIDING OFFICER. Seven minutes and 40 seconds.

Mr. HARKIN. Mr. President, I thank my friend from North Dakota for his kind words, and I respond in kind by thanking our distinguished chairman of the Budget Committee for being not only a valuable member of the Agriculture Committee, but for his leadership. The Budget Committee allotted us \$73.5 billion. I also thank him for continuing to point out the dire state of agriculture today.

When I first spoke, I pointed out that if you discount the added money the Congress is providing every year for agriculture, our net income right now to farmers is 54 percent of what it was in 1996.

The leader of the Budget Committee has continually brought to our attention that we have to make sure we get this bill done this year to provide for the farm economy of this country the amount of money that was allocated to us because our farmers and our rural communities need that money.

Rural America is in trouble. Thank God we have good advocates such as Senator CONRAD from North Dakota who fights for rural America, who understands we do not have as many people in rural America as in the big cities

in California, New York, and other States. The work people do in rural America is what keeps this country going. We cannot afford any longer to have them on that downward track that the Senator from North Dakota pointed out on his chart.

I thank the Senator from North Dakota for being a great leader on our Budget Committee and for providing these funds and making sure we meet our obligations. I thank him very much.

I yield whatever time he may need to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. WELLSTONE. Mr. President, I need only a few minutes. I am in the mood for thanking all three Senators. I, too, thank Senator CONRAD. Every time I talk to agriculture people in northwest Minnesota, I talk about Senator CONRAD's work and the fact we need to pass this bill now. We have the budget money. It is critically important.

Frankly, time is not neutral. As I have said before, I have seen more broken dreams, broken lives, and broken families in rural America than I ever wanted to. This is for real. I thank the Senator from North Dakota very much for his work.

I say to my colleague from Iowa, it is a modern miracle this bill came out of committee with strong support. The Senator from Iowa had to deal with a lot of different perspectives.

I forget the figures, but we received an announcement the other day that net farm income will be a couple billion dollars a year, a little over \$3 billion a year if we pass this bill. I saw it somewhere. That is what it is about: Trying to get farmers leverage to get a price but focus on the environmental credits and CRP and focus on the energy section.

People are so excited about renewable energy, economic development, and nutrition. I thank both Senator LUGAR and Senator HARKIN for their leadership. Senator LUGAR has done a great job of being so outspoken and so tenacious about the importance of nutrition programs. This has made a safety net for many vulnerable families in this country and many children. This bill has the right balance. We have been doing an awful lot of negotiation on dairy, and I believe we are getting there.

If part of the importance of legislating is to bring people together, I think the Chair of this committee, Senator HARKIN, has done a masterful job. I cannot say I agree with every provision in this bill.

Mr. HARKIN. I have to say to my friend from Minnesota, I do not agree perhaps with every provision in this bill either. This is a balanced bill. We have to balance a lot of different interests in this bill.

I thank my friend from Minnesota for his service on the Agriculture Committee. Minnesota is very lucky to have both Senators on the Agriculture Committee. We appreciate that.

I point out to my friend from Minnesota, the factory study showed there would be an increased average of \$3.2 billion annually.

Mr. WELLSTONE. That is what I was saying. That is net.

Mr. HARKIN. Net farm income.

Mr. WELLSTONE. That is important. I certainly hope Senators will vote to proceed to this bill. We need to move on and get this work done. I thank the Senator.

Mr. HARKIN. Mr. President, I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I understand I have 15 seconds remaining. I will be brief.

As Senators prepare for this vote, they must know that if they vote for cloture, we are stuck; we are on agriculture and that will continue indefinitely unless there is unanimous consent to leave it. I ask my colleagues to vote against cloture. The vote on this is no.

Mr. HARKIN. Mr. President, we should vote for cloture. Let us get on with the farm bill. Let us have the amendments. Let us have time agreements. Let us move on. Let us send a signal to rural America that we are going to be there for them in their hour of need. I ask Senators to vote for cloture.

I yield back the remainder of my time.

CLOTURE MOTION

The PRESIDING OFFICER. Time is yielded back. Under the previous order, pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will state.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate on the motion to proceed to Calendar No. 237, S. 1731, the farm bill:

Tom Harkin, Tim Johnson, Bill Nelson, Harry Reid, Byron Dorgan, Fritz Hollings, Richard J. Durbin, Paul Wellstone, Kent Conrad, Tom Daschle, Debbie Stabenow, Tom Carper, Barbara Mikulski, Evan Bayh, Ron Wyden, Ben Nelson, Jean Carnahan, Patty Murray.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that the debate on the motion to proceed to S. 1731, an act to strengthen the safety net for agricultural producers, to enhance resource conservation for rural development, provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant

food and fiber, and for other purposes, shall be brought to a close? The yeas and nays are required under the rule. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from Connecticut (Mr. LIEBERMAN) is absent attending a funeral.

The PRESIDING OFFICER (Ms. STABENOW). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 73, nays 26, as follows:

[Rollcall Vote No. 352 Leg.]

YEAS—73

Akaka	Dayton	Lott
Allard	Dodd	Mikulski
Baucus	Dorgan	Miller
Bayh	Durbin	Murray
Biden	Edwards	Nelson (NE)
Bingaman	Feingold	Reed
Bond	Feinstein	Reid
Boxer	Fitzgerald	Roberts
Breaux	Grassley	Rockefeller
Brownback	Harkin	Santorum
Burns	Helms	Sarbanes
Byrd	Hollings	Schumer
Campbell	Hutchinson	Sessions
Cantwell	Hutchison	Shelby
Carnahan	Inhofe	Smith (OR)
Carper	Inouye	Snowe
Cleland	Jeffords	Specter
Clinton	Johnson	Stabenow
Cochran	Kennedy	Stevens
Collins	Kerry	Thomas
Conrad	Kohl	Torricelli
Corzine	Landrieu	Wellstone
Craig	Leahy	Wyden
Crapo	Levin	
Daschle	Lincoln	

NAYS—26

Allen	Graham	Murkowski
Bennett	Gramm	Nelson (FL)
Bunning	Gregg	Nickles
Chafee	Hagel	Smith (NH)
DeWine	Hatch	Thompson
Domenici	Kyl	Thurmond
Ensign	Lugar	Voinovich
Enzi	McCaain	Warner
Frist	McConnell	

NOT VOTING—1

Lieberman

The PRESIDING OFFICER. On this vote the yeas are 73, the nays are 26. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The Senator from Iowa.

Mr. HARKIN. Madam President, I appreciate the overwhelming support that we had from the Senate for moving to the Agriculture bill. However, with the rules that we are operating under, that was just a vote on cloture on the motion to proceed. Now I understand that we have 30 hours, under the rules of the Senate, before we have a vote on the motion to proceed.

With that overwhelming vote on cloture, I hope we might collapse that 30 hours. There is no need for that 30 hours. We might as well have the vote on the motion to proceed and get to the bill and let's start having amendments and move this bill expeditiously. I see no reason we have to have 30 hours of debate right now. We ought to move to the bill and let's have the amendments.

With that, I suggest the absence of a quorum.

The PRESIDING OFFICER. Will the Senator withhold his quorum call request?

Mr. HARKIN. I withhold it.

The PRESIDING OFFICER. The Senator from Florida.

TERRORISM INSURANCE

Mr. NELSON of Florida. Madam President, I would like, while we have a lull on the farm bill, to take this opportunity to speak on a subject that is very near and dear to my heart: What we are going to be doing as a nation to address the fact that, as a result of terrorist acts, there may be a lack of terrorism insurance on January 1. That is not only for commercial lines of insurance, which would be businesses such as shopping centers and office buildings, but it could also affect homeowners and automobile owners. Since September 11, businesses and consumers have suffered great economic losses, and we are reading about those repercussions every day. So I would like to address this very sensitive topic as we come into the closing days of this session.

The insurance industry is now saying the clock is running out for those businesses that want terrorism insurance because 70 percent of reinsurance policies—that is, insurance on insurance, or, in industry terminology, reinsurance—70 percent of those reinsurance policies expire after December 31, and many insurance companies are threatening to cancel policies or to exclude terrorism coverage.

We simply can't let that happen. Congress must act to make sure that insurance is available and affordable. It is the responsible thing to do. The problem is that there are so many different ideas on how to do it.

I served for six years as Florida's elected Insurance Commissioner and State Treasurer. During that time, we experienced a major catastrophe—Hurricane Andrew. This natural disaster, with insurance losses totaling \$16 billion, proved to be the most costliest in the history of this country. The private market was so paralyzed from this event that nurturing it back to life proved extremely daunting. Insurance companies were not offering new home owners policies; to the contrary, they were trying to flee the State of Florida and were cancelling policies for those who remained in the State of Florida. Fortunately, by establishing a private pooling mechanism, and carefully monitoring rate increases, we were able to reinvigorate and stabilize the market. Accordingly, in the waning days of this session, I would like to offer some of my experience as guidance as we proceed.

Let me give you an example of what is happening just to set the stage as to how serious this is right now.

The ISO, the Insurance Services Organization, which files policy provisions for many insurers, has announced

that it is asking for terrorism exclusions in insurance policies across the nation.

That should be the first warning sign. But there are other warning signs.

For example, I will read from the Chicago Tribune of October 28. Listen to this:

The world's leading insurers, led by Lloyd's of London, a collective name of 108 insurance-writing syndicates, said this month that commercial property premiums would rise by more than 80 percent.

That is the Chicago Tribune.

Then listen to a report that was sent out by Lloyd's of London. I quote from the investor newsletter of Lloyd's of London,

Members of Lloyd's of London: Names may now have a historic opportunity for property underwriting following the sharp rise in premiums in the aftermath of the American catastrophe.

That newsletter added that premiums were at "a level where very large profits are possible."

If there is any doubt about some of the shock to the system right now because of what is happening with rate increases, let me point out that the Wall Street Journal reported that insurance companies are already raising premiums by 100 percent or more on some lines of commercial insurance coverage.

These accounts were presented by the Consumer Federation of America's insurance expert, Bob Hunter, at a press conference earlier today.

Bob Hunter also talked about a big reinsurance company, one of the giants in Germany, named Alliance. Alliance has announced increases of 20 to 50 percent, and in some cases increases may reach 200 percent.

Another example hits close to home for all of our Senators in the Northeast corridor:

It is reported that the cost of insuring Giants Stadium in New Jersey's Meadow Lands for terrorism is now being increased from \$700,000 to \$3.5 million.

That is a fivefold increase. That is a 500-percent increase.

If that were not enough, the CEO of Zurich Financial Services, which is another one of the major giants from Europe which does business through subsidiaries here in the United States, told a gathering of insurers, on November 27, with respect to the terrorist attacks of September 11:

The industry needed it to operate efficiently. The players who are strong in a responsible manner and are aggressive will be the winners of the next 15 years.

What we saw in Florida with insurance rate increases after Hurricane Andrew seems to be occurring again this time on a national scale with huge increases in commercial insurance rates.

That is why we must act.

I understand that there are all kinds of barriers to progress on this issue—people are trying to rewrite the tort laws

of this country and thus you have a fight that has gone on almost as long as the Republic on this issue. If this continues, it is possible that we will not be able to pass anything in the next week. I am trying to understand what would be the consequence. Will the market respond? But I don't think that is the responsible thing. I think the responsible thing for us to do is enact a piece of legislation and get it signed into law.

But I want to say to my colleagues that from all of my experience with insurance, as we deal with terrorism insurance we must be ever-mindful of consumer safeguards:

Therefore, any bill that we would enact must have three fundamental protections for the consumer.

I think the bill has to have three protections for consumers: No. 1, commercial insurers must offer coverage for the risk of terrorism on all policies.

In other words, an insurance company could not clearly say they will cover your little two-story office building but not cover your 20-story office building. They cannot cherry-pick. There has to be mandatory coverage for all on terrorism risk. No. 2, the insurance company cannot cancel the terrorism insurance unless it is in the normal course of business, such as somebody did not pay their premiums. And No. 3, because we not only have to make terrorism insurance available, we have to make it affordable.

Commercial consumers cannot afford these kinds of price increases. They cannot afford a 500-percent increase. They cannot afford a 200-percent increase. They cannot afford what Lloyds of London was saying was an 80-percent increase, particularly not if the legislation we pass here is going to have the Federal Government picking up most of the terrorism risk.

So I clearly advise all my colleagues in the Senate, the third protection is that there has to be a reasonable amount of rate increase, and what it can be has to be limited. I have suggested it be in the range of about 3 percent, which would produce an additional \$6 billion of premium, and that the \$6 billion of premium associated with the terrorism risk not being mixed with all the other premiums like on fire and theft. Our legislation should require insurers to specify the price for terrorism coverage as a separate line item on the policy.

If we do not carefully monitor proposed rate increases, the insurance companies are going to file whatever they want in an increase with 50 State insurance departments. Then those insurance commissioners, who are trying to do a good job, are going to put their actuaries to work to see if this is a reasonable filing.

How do they determine if it is reasonable and not excessive and non-discriminatory, which is usually the

statutory standard for reviewing a rate increase? They have to have data and they have to have experience. We do not have any of that in our 50 State insurance departments. Thus, what will happen is, whatever the rate hike is that is filed, the insurance departments of the 50 States will not be able to say that it is excessive, and they will not be able to prevail in a court of law or in an administrative court of law. As a result, the practical effect will be that the insurance rate hike that is filed will, in fact, be in effect. And it would be 2 or 3 years before you could ever start to overturn it.

What is worse, there are 10 States whose law says that an insurance company cannot file a rate until it is approved by the insurance commissioner. The legislation that is being contemplated to be passed in this body would say, this Federal legislation will supersede the State law, so that, in effect, the rate hike takes effect immediately even though the State law says, in those 10 States, that the insurance commissioner has to approve it first.

That is a pretty high-stakes ball game. We simply cannot afford for this to go on. So what I am going to continue to urge, as I have privately—this is my first public statement on this, save for an interview I had last week with the Washington Post and save for the testimony I gave to the Banking Committee and as a member of the Commerce Committee when I had the opportunity to express my thoughts there—but so much more is known now as to see what is starting to happen in these last few days of this session. This is what we are confronting.

Simply, if we do not watch it, we are going to allow to pass through this Chamber, and be accepted by the House, a piece of legislation that, in order to take care of the problem of the lack of terrorism insurance, will then allow the rates to go sky-high, rates, I submit respectfully to all of my colleagues, that will not be able to be affordable, particularly by homeowners and by automobile owners.

Even though the bills being contemplated say this is primarily for commercial insurance, they also say, at the option of the insurance company, for personal lines of insurance, such as for automobiles and homes, they can opt into it. What homeowners' insurance company, if it has homes, for example, in the neighborhood of a nuclear power plant, is not going to opt in to this kind of protection?

So what I am saying is, you better watch out. We are about to vote for something that is about to mandate huge rate hikes. The Senate and the House of Representatives do not normally handle this stuff because ever since the 1940s in the McCarran-Ferguson Act, we transferred that ability to regulate insurance to the 50 States.

Thus, we are not familiar with the facts of rate-making and the experience and data as to what is excessive in rate increases. We had better watch it.

From the insurance companies' standpoint, let me tell you, I do think they need protection. They cannot simply be asked to accept the terrorism risk. There is not an insurance company in the world that wants to accept that risk. So in this Senator's personal opinion, I believe there is a role for the Federal Government as a backstop for the insurance industry accepting this huge potential risk.

If we are fortunate, if our intelligence apparatus is working, then we will be fortunate not to have other significant terrorism losses. But there is that uncertainty on the basis of what we experienced on September the 11th, what we experienced back in the early 1990s when they tried to blow up the World Trade Center, what we have seen with regard to the Timothy McVeighs of the world and the Oklahoma Federal building, and so forth.

So there is that element of terrorist risk where I do believe insurance companies need to be partnered with the Federal Government in helping assume that risk.

We better watch out about the potential price hikes. We know the property and casualty insurers are going to be paying about \$50 billion in claims from September 11. That is a huge payout. But let's remember that the companies are going to recover a lot of those insurance losses they have paid out in tax breaks where they can carry forward those losses and offset them against gains.

Remember, this is an insurance industry. This is an industry that has been very fortunate to be financially flush with cash. In the property and casualty field, there is a surplus to the tune of in excess of \$300 billion. In the reinsurance world of just those companies that reinsure, there is a surplus in the range of \$125 billion. Their problem is not a lack of cash; it is the uncertainty of the quantifying and the pricing and the spreading of the risk of future terrorist attacks.

In time, I believe, just as we have seen in Florida in the aftermath of that catastrophic hurricane that disrupted the entire homeowners marketplace, you will see the marketplace—along with the strengthened security that we are now imposing, fortunately, in this Nation, and our war against terrorism—I think in time that will solve the problem. In the interim, we are going to have legislation in the next few days in front of this body.

Remember the three items we ought to look for, for the protection of the consumer: No. 1, that there be mandatory coverage for terrorism, that they can't red-line and say, I will select your skyscraper but not your skyscraper; No. 2, that they cannot willy-

nilly just cancel the terrorism coverage; and No. 3, that there be a reasonable amount of rate increases proportionate to the risk the insurance industry is picking up, given the fact that the Federal Government will be picking up most of the risk, and not let this be an excuse for rate hikes that ultimately will affect the economic engine of this country. If insurance becomes unaffordable, the economic engine of this country cannot operate because of the need to have the protection against these acts of terror.

I am grateful for the time to speak on a subject that is very important to this country. I thank the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. BOND. Madam President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF EUGENE SCALIA

Mr. BOND. Madam President, I rise today to express my very strong support for the embattled nomination of Eugene Scalia to be Solicitor of Labor. I am extremely frustrated, as many of us are on this side, by the other side's unwillingness to bring this nomination to the floor for a vote.

Mr. Scalia has been cleared by the HELP Committee and is now languishing in limbo with the session fast drawing to a conclusion and the window for acting starting to close. There are no good reasons for holding up this nomination, for refusing to bring it to the floor.

May I be permitted to state the obvious? The debate is not about Eugene Scalia's qualifications, experience, intelligence, dedication, compassion, or any other attribute we would normally consider to determine if a candidate should be confirmed. He meets everyone's definition of what this position requires. Even those who have opposed his nomination are quick to admit he possesses the skills and the experience that Solicitors of Labor typically have.

It seems to me the only basis on which Mr. Scalia is being blocked is that those on the other side did not agree with the results of last year's election on two levels and with some of the actions this Senate has already taken. First they do not like the fact that George Bush emerged as the new President, and some are trying to do anything in their power to frustrate and impede his administration from pursuing its agenda.

Secondly, because Mr. Scalia's father is one of the Justices of the Supreme Court who was in the majority decision which found for George Bush in Florida, they are using their disagreement with Justice Scalia as a reason to block the confirmation of his son.

Both of these reasons are shameful, and they should have no place in this consideration.

The opponents of Mr. Scalia have raised other arguments which are equally without merit and specious. One of these is that Mr. Scalia is not qualified for this role because the Solicitor of Labor must serve as the people's lawyer and take up the cause of those whom the labor laws and regulations are intended to protect and, because Mr. Scalia has represented employers, he is on the wrong side of the equation. That argument fails on a number of grounds.

First, the Solicitor of Labor answers to the Secretary of Labor. The Solicitor's role is to advise the Secretary about the arguments surrounding the Department's actions and her decisions. This is the role this position has played regardless of the administration or party in power. While it is an important position, it is not at all the policy-oriented position that Mr. Scalia's opponents make it out to be. The notion that the Solicitor of Labor is the people's lawyer is a straw man argument invented for the sole reason of creating a fictional standard that Mr. Scalia's opponents think he fails to meet because he has spent his career representing employers in labor issues.

The second reason this argument fails is that it does not recognize the substance of Mr. Scalia's work. Even under this fictional standard, Mr. Scalia would qualify. A large part of Mr. Scalia's career in labor law has been spent advising his clients, the employers, on how to comply with the law and steering them away from mistreating their employees under the law. In other words, his career has been focused on helping employers treat their employees better in accordance with the laws passed by this body. Thus, he has indeed taken up the cause of those whom the labor laws are intended to protect.

Another unsupportable argument against Mr. Scalia has to do with his involvement in the OSHA ergonomics regulation debacle. I know something about that matter. We in the Small Business Committee spent a good deal of time working on that issue. Mr. Scalia represented employers on this issue and thus was on the side that ultimately prevailed when both Houses of Congress, by bipartisan margins, invalidated that regulation last March. May I remind fellow Senators that the vote was 56 to 44, with every single Republican and 6 Democrats supporting the resolution of disapproval. Why should this be held against him, when he agreed with the position we took by a 56-to-44 vote margin? This was a resounding victory, perhaps one of the biggest for those of us on this side of the aisle on the labor issue.

The fact that Mr. Scalia was right in his arguments should be to his credit. It should be an indication that he understands what the limits of government are, what the limits on govern-

ment should be, and if the Department goes too far, it should be reined in.

I don't need to go through the long list of reasons we won that vote. It should be clear that we would not have won with such an impressive margin if that rule had not been so horribly flawed. Are we willing to say that because the Clinton administration OSHA put an egregiously flawed regulation forward, we are not going to confirm Eugene Scalia to be Solicitor of Labor because he agreed with the majority in both Houses and the President that it should be repealed?

While all these arguments and discussions about Mr. Scalia's merits unequivocally support confirming him, they obscure one of the hidden truths about him. He genuinely cares for the people whom he represents and will approach the position of Solicitor of Labor ever mindful of those who rely on the Department of Labor for protection.

Since his confirmation hearing and the subsequent vote approving him in committee, we have received a letter from a woman whose case he took pro bono—at no charge—which illustrates this point and conclusively demonstrates the caliber of person Eugene Scalia is. It is a short letter. I will read excerpts from it, and then ask unanimous consent that the full text be printed in the RECORD.

The letter is from Ms. Cecilia Madan. It begins: I am a deaf, Hispanic immigrant and a single mother, working full-time to support my daughter. And I have information about Eugene Scalia's handling of a labor employment matter involving me.

She describes how, in 1998, her work environment became increasingly hostile, abusive, and difficult for her to bear. In seeking legal assistance, she learned she could file an action under civil rights laws, the Americans with Disabilities Act, or the DC Human Rights Act. But every lawyer she consulted told her that even if they were willing to take the case on a contingent fee basis, she would have to pay a substantial retainer upfront. She simply did not have it. She could only afford their consultation fees.

Then she writes:

Then a friend of mine recommended that I try the "pro-bono" program at Gibson, Dunn & Crutcher, and Mr. Scalia in particular. My brother called for me, to see if I could have an appointment. I was so worried that Mr. Scalia might be too busy and turn me away (after all, I had never heard of him before)! But he agreed to an appointment immediately. At our meeting, Mr. Scalia was so kind, and thoughtful, and patient; he even asked to see a picture of my daughter! I fear I must have rambled a great deal when I told my story, but he didn't seem to mind at all. Our meeting lasted a long time, but he didn't ask for a consultation fee or a retainer, and he told me that he and his law firm would take my case "pro bono." He said that he didn't think a lawsuit (which could take a long time) would be necessary, because often

these matters could be resolved through "firm negotiations," which he was fully willing to undertake for me. He made every effort to reassure me, saying that he and his associate would do everything they could to "resolve this." He seemed to sense my extreme anxiety and tried his best to calm my fears. I was able to walk away with confidence and hope.

The negotiations went on for several weeks, but they were tremendously successful—much more than I had even hoped for. "Firm negotiations" is right: The employer agreed to just about everything I had asked for, and "my lawyers(!)" got the employer to agree to things I hadn't even thought to ask for!

Not only did he and his associate negotiate around the employment problems I was facing right then, they took great care to look ahead and watch out for my future interests.

A few months later, when I was able to get a new job, with a different employer (as a result of the settlement Mr. Scalia got for me), I was impressed to receive brief word from him saying that he had heard of my new job and hoped that my daughter and I were well. . . .

She concludes her letter this way:

Throughout my ordeal, Mr. Scalia went out of his way to help. He seemed especially . . . concerned about not making things worse for me on the job, while he was vigorously defending my rights with my employer. Even though he had never seen me before and even though I could never pay him, simple justice is what he wanted for this employee and worked hard to get, and that is what he got for me. I am so grateful to him for his efforts as my lawyer. . . .

I ask unanimous consent that the full text of the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 9, 2001.

[Re nomination of Mr. Eugene Scalia to be Solicitor of Labor.]

Hon. EDWARD M. KENNEDY,
*Chairman, Committee on Health, Education,
Labor and Pensions, Dirksen Senate Office
Building, Washington, DC.*

DEAR MR. CHAIRMAN: I am a deaf, Hispanic immigrant and a single mother, working full-time to support my young daughter, and I have information (which I hope will be helpful in considering Mr. Eugene Scalia's nomination to be Solicitor of Labor) about his handling of a labor/employment matter involving me.

I began full-time work in 1991 for a local employer. By 1998, the work environment there had become increasingly hostile towards me, abusive, and difficult for me to bear, and I was terrified that I would lose my job. In desperation (I was heavily in debt and living from paycheck to paycheck, just to make ends meet), I went to several labor-lawyers in the area, who advised that me I could file lawsuits under the 1964 Civil Rights Act, the D.C. Human Rights Act, and the Americans with Disabilities Act, based on the facts of my employment situation, on the grounds of my ethnicity/race, my sex, my hearing disability, a medically-diagnosed chronic condition I was suffering from and under treatment for at the time, and my marital/family status. Unfortunately, all of these lawyers—even those who said that they could take the case on a contingency-fee basis—insisted on my paying them a substantial retainer up front, and I had no

money to pay them any more than their consultation fees.

Then a friend of mine recommended that I try the "pro-bono" program at Gibson Dunn & Crutcher, and Mr. Scalia in particular. My brother called for me, to see if I could have an appointment. I was so worried that Mr. Scalia might be too busy and turn me away (after all, I had never heard of him before)! But he agreed to an appointment immediately. At our meeting, Mr. Scalia was so kind, and thoughtful, and patient; he even asked to see a picture of my daughter! I fear I must have rambled a great deal when I told my story, but he didn't seem to mind at all. Our meeting lasted a long time, but he didn't ask for a consultation fee or a retainer, and he told me that he and his law firm would take my case "pro bono." He said that he didn't think a lawsuit (which could take a long time) would be necessary, because often these matters could be resolved through "firm negotiations," which he was fully willing to undertake for me. He made every effort to reassure me, saying that he and his associate would do everything they could to "resolve this." He seemed to sense my extreme anxiety and tried his best to calm my fears. I was able to walk away with confidence and hope.

The negotiations went on for several weeks, but they were tremendously successful—much more than I had even hoped for. "Firm negotiations" is right: The employer agreed to just about everything I had asked for, and "my lawyers(!)" got the employer to agree to things I hadn't even thought to ask for! Not only did he and his associate negotiate around the employment problems that I was facing right then, they took great care to look ahead and watch out for my future interests.

A few months later, when I was able to get a new job, with a different employer (as a result of the settlement Mr. Scalia got for me), I was impressed to receive brief word from him saying that he had heard of my new job and hoped that my daughter and I were well. We sure are . . . thanks in such great part to him!

Throughout my ordeal, Mr. Scalia went out of his way to help. He seemed especially to be concerned about not making things worse for me on the job, while he was vigorously defending my rights with my employer. Even though he had never seen me before and even though he knew I could never pay him, simple justice is what he wanted for this employee and worked hard to get, and that is what he got for me. I am so very grateful to him for his efforts as my lawyer. And I hope you soon will give other people in the workforce the opportunity to have him as their lawyer, as Solicitor of Labor.

Please let me know if you need more information or if I may help Mr. Scalia's nomination in any way.

Sincerely,

CECILIA MADAN.

Mr. BOND. I think this simple letter speaks volumes about Mr. Scalia and the type of person and the type of lawyer he is. It is a clear statement of the values he upholds and the positive impact he believes he can have as a lawyer. This is the person President Bush has chosen to be his Solicitor of Labor. I truly and honestly believe the President could not have found a better candidate, or one who is better qualified, better trained, and better motivated. I am thrilled that Mr. Scalia is willing

to accept the responsibilities of public service, and I implore the majority leader to bring this nomination to the floor for a vote before we adjourn.

Every shameful day he remains unconfirmed is another day the Secretary of Labor and America's employees do not benefit from his abilities and compassion.

I yield the floor.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. EDWARDS). The clerk will call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, as we are in preparation for a debate on farm legislation, I want to call to the attention of the Senate a very useful and, in fact, remarkable publication called "Food and Agricultural Policy, Taking Stock for the New Century," published by the U.S. Department of Agriculture this summer to state the views of the Department, and to offer data for Senators and members of the public as we began the farm debate.

I want to quote extensively from chapter 3, entitled "Farm Sector Policy" because I believe it gives a very good outline of USDA's opinions on farm policy as it has progressed in our country, and as we hope it may progress through constructive debate on this bill.

Mr. President, the chapter begins by saying that:

If farmers and farm families all across the country share the same goals and face the same challenges and opportunities, fashioning farm policy today would be straightforward. And, indeed, that is the way it must have seemed in the 1930s, when farm families depended mainly on farm earnings and grew crops and livestock on much the same acreage as their neighbors. Then, policy had a more focused objective—helping to reduce the wide income disparity between farm families and their urban counterparts—and a "one-size-fits-all" approach was more appropriate. Supporting field crop prices provided widespread assistance, since most farmers grew some field crops, and helped stabilize the entire sector. The farm sector and all of agriculture are vastly different today, as is much of rural America. Yet our farm policy retains vestiges of the New Deal programs and reflects a time of greater homogeneity across American farms and farm households.

Today, the farm sector is diverse beyond the imagination of those who framed the New Deal legislation. On average, farm family incomes no longer lag, but rather surpass those of other U.S. households.

That, I found, Mr. President, to be a remarkable statement, counterintuitive to much of the debate we have on the subject. I will mention again:

On average, farm family incomes no longer lag, but rather surpass those of U.S. households. Most farms are run by people whose principal occupation is not farming. Markets

have changed, too. Domestic demand alone is no longer sufficient to absorb what American farmers can produce. Demand by well-fed Americans grows slowly, with population growth. The promise of new, much-faster growing markets lies overseas, in countries where economic prosperity is emerging for larger numbers of people.

As a result, the United States must consider its farm policy in an international setting, helping farmers stay competitive while pressing for unfettered access to global markets. At the same time, Americans' expectations with respect to food have moved well beyond assurance of adequate quantities to include quality, safety, convenience, and many more attributes. And expectations now extend to environmental preservation and enhancement.

More than seven decades of farm policy have provided a rich, full experience upon which to draw as we contemplate appropriate 21st century policies for our industry. The view of policies and programs across their history has proved very instructive, providing invaluable lessons which, at very minimum, can help us avoid the obvious mistakes of the past. History shows us that growth in farm household income was largely due to rapid improvements in productivity, supported by a strong research base, along with better opportunities to market products, including export markets and off-farm employment opportunities.

Many of the program approaches since the 1930s proved not to work well, or not at all, produced unexpected and unwanted consequences, became far costlier than expected, and have been continually modified over time in the long succession of farm laws. Some major and still highly relevant lessons learned include: History has shown that supporting prices is self-defeating. Supporting prices is self-defeating. Government attempts to hold prices above those determined by commercial markets have simply made matters worse time after time. Artificially higher prices encourage even more uneeded output from the most efficient producers. At the same time, they discourage utilization, consequently pushing surpluses higher and prices lower. Costs to taxpayers grew until the point was reached where something had to be done. All too often, that turned out to be finding ways to restrict output.

The second lesson, Mr. President, of the USDA book is supply controls proved unworkable, too.

These usually involved restricting the amount of land farmed in attempts to reduce output. But the remaining land was farmed more intensively, and supply rarely was cut enough to boost prices to politically satisfactory levels. The programs were costly to taxpayers and consumers and the unused resources were a drag on overall economic performance. But, perhaps the most important of all, limiting our acreage was a signal to our competitors in other countries to expand theirs, and we lost market share that is always difficult to recapture.

The third lesson of the farm bill is stock holding and reserve plans distort markets enormously.

Isolating commodity stocks from the market when supplies are abundant is attractive for its short-term price stimulus. But, because such stocks eventually must be returned to the market, they limit the recovery of prices in the future. Moreover, time after time, stocks have proved costly to maintain, distorted normal marketing pat-

terns, ceded advantage to competitors, and prove tempting targets for political tampering.

The fourth lesson is:

Program benefits invariably prove to be disparate, providing unintended (and unwanted) consequences. The rapidly changing farm sector structure produced a wide array of farm sizes and efficiencies. Many farms were low cost and the programs were of enormous benefit, enabling them to expand their operations. Others did not receive enough benefits to remain viable and thus were absorbed along the way. That situation still maintains to some extent today, even though we now have fewer farms.

The clarity of these lessons provided several emphatic turning points in national policy. The 1985 farm law proved to be one such point when, after long debate on fundamental philosophy, a more market-oriented approach was adopted. That market orientation was extended in the 1990 farm law, making a less intrusive and expensive role for government in farmer decisionmaking and in the operation of the markets.

The Federal Agricultural Improvement and Reform Act of 1996—

A law that currently we have in place—

proved to be historic in that it removed much of the decades-old program structure, provided unparalleled farmer decision-making, flexibility through "decoupled" benefits, and set a new example throughout the world for providing domestic farm sector support.

While that approach is arguably still the least distorting of markets and resource use, its direct payments—

These are the so-called AMTA payments, Mr. President—

do share some unintended effects with price support programs, namely the artificial inflation of farmland prices. The effect clearly has been exacerbated by the size of payments in recent years, some \$28 billion in the last 4 years above the amount provided in the 1996 law.

While the rise in land prices creates wealth for some, it works to the disadvantage of others. Direct government transfers distort real estate markets, keeping land prices artificially high when commodity prices are low, as we are seeing today. Higher land prices for consecutive years of large program support make it more difficult for beginning farmers by increasing capital requirements. This inflation also makes it more costly for existing farms to expand to achieve size economies, either by purchasing or renting additional acres (since land rents move in tandem with prices). Higher land values do benefit local tax authorities and the collateral base of farm lenders, but add directly to production expenses through higher interest and rental costs. Since the land charge is such an important component of a farmers' total cost, sustained increases in land prices and rents have a decidedly adverse effect on the competitiveness of our farmers in the marketplace compared with those in other exporting countries, a cause of growing concern in recent years.

To come to the nub of the problem, the farm sector chapter says:

Squaring Today's Realities With Policies. Because of their historical evolution, current program benefits still are largely directed to specific commodity producers, resulting in only 40 percent of farms being recipients.

That is a remarkable figure. After all is said and done and the payments are

made, only 40 percent of farmers receive anything; 60 percent receive nothing, a fairly large majority.

And, there still is no direct relationship between receiving benefits and the financial status of the farm. The most financially disadvantaged segment of farmers today is the low-income, low-wealth group.

And this is defined in appendix 1 of this book. Essentially, the book points out that there are commercial farms, intermediate farms, rural residence farms, and then they are distributed by size and income.

In any event, the most low-income, low-wealth group comprises 6 percent of farms, had an average household income of \$9,500, and received less than 1 percent of the direct payments in 1999.

In contrast, 47 percent of payments went to large commercial farms, which contributed nearly half of program commodity production and had household incomes of \$135,000.

These are families, obviously, that are middle class, upper middle class, and they received half of the payments.

Our current broad-scale, commodity-oriented approach to farm support does not recognize existing wide differences in production costs, marketing approaches, or overall management capabilities that delineate competitive and noncompetitive operations. It thus is impossible to provide enough income support for intermediate farms without overly stimulating production by the lower cost, large-scale commercial producers. Even though many intermediate farms and rural residence farms receive some program benefits, only one in four generated enough revenue to cover economic costs. Even more problematic is the inability of these farms to improve their cost efficiency at the same pace as larger commercial operations, whose investment in new technologies and ability to expand are aided by program benefits.

Another unintended consequence of current programs stems from the increasing disconnect between land ownership and farm operation. While program benefits were intended to help farm operators, most support eventually accrues mainly to landowners in the shortrun through rising rental rates and, in the longer term, through capitalization and to land values.

Land prices in recent years have been relatively robust, especially in areas producing program commodities, despite concerns about low commodity prices and the future direction of farm programs.

For many farm operators, renting land is a key strategy to expand the size of business in order to capture the size economics, as evidenced by the fact that 42 percent of farmers rented land in 1999.

Clearly, operators farming mostly rented acreage may receive little benefit from the program. The impact of income from any source, including program benefits on land values, depends on whether that income is viewed as permanent or transitory. The degree of certainty that the income will continue in the future and even though production flexibility contract payments were intended as transitory when authorized by the 1996 farm bill, subsequent emergency assistance and a 70-year history of Government involvement in agriculture have reaffirmed expectation that support will continue in the future.

Indeed, Mr. President, in both the bills offered by the House of Representatives and by the Agriculture Committee of the Senate, the so-called AMTA payments continue throughout the entirety of the bills.

There was no expectation that they would be phased out as in the 1996 farm bill, no anticipation that they would be transitory. As a matter of fact, in both bills they are larger, and therefore the impact, which has been found in the chapter I am reading, the difficulty for farming, is likely to be exacerbated. The 1996 FAIR Act also continued the marketing loan program, another evolution of the old price support idea, but importantly modified to avoid government stockholding which proved so burdensome in times past.

Marketing loan payments effectively provide a large countercyclical component to farm income but distort markets by limiting the production response to falling market prices. The program guarantees a price for traditional program commodities: Food grains, feed grains, cotton, and oil seeds. As market prices have fallen below this guaranteed price, total marketing loan benefits have risen less than \$200 million in the 1997 crop to \$8 billion for the 1999 and \$7.3 billion to date for the 2000 year crops.

Since 1996, countercyclical marketing loan benefits have totaled about \$20 billion. While the current policy made large strides toward greater market orientation, a careful evaluation in the context of today's diverse farm structure and increasingly consumer-driven marketplace still reveals several misalignments among policy goals, program mechanisms, and outcome. Improvement could support more sustainable prosperity for farmers, agriculture, and rural communities without engendering long-term dependence on direct government support.

I will translate that in many ways to the debate we are now having. Essentially, the bill that is before the Senate as reported by the Agriculture Committee attempts not only to continue fixed payments for 10 years without accuracy, thus implying a perpetual agricultural crisis the last farm bill in 1996 had in mind, that essentially we would move toward more of a market economy and transition payments would go to certain farmers who have been in the business.

This has led to substantial debate in the last 5 years because essentially, as many have said, there are landowners receiving payments who are no longer farming at all. They literally are not in the business. The contract we made with farmers in the 1996 farm bill was that if one had a history of planting corn or wheat or cotton or rice—and eventually soybeans have entered in through a marketing loan situation—they receive money on the basis of that history. Thus a part of the distortion

that the USDA now points out: The payments are heavily loaded toward people who own land, but 42 percent of those who are actually in the fields this year rent land. They do not own it. Their rents are higher. As a result, their net income is lower.

The policy we have adopted essentially of the fixed payments plus the other aspects, the marketing loans, the other countercyclical situation, increase essentially the land values. If someone is a landholder, that is helpful. As the USDA publication points out, if one is a mortgage banker holding a note, the value of that land increasing is useful. But for young farmers coming into the business, this is potentially disastrous. There is very little entry. For those renting, 42 percent, certainly they have higher costs year by year.

Furthermore, as the USDA publication points out, all of this is occurring to the benefit of only 40 percent of farmers to begin with. The other three-fifths are out of the picture.

One of the interesting facets of farm debates is many farmers must surely believe they are benefiting from this. It is apparent that, really, for time immemorial, a minority of farmers have received any benefit. A substantial majority are not touched by this, certainly in terms of their income.

In addition, the farm policies, whatever their intent, have stimulated overproduction. As USDA points out, essentially the most efficient farmers, using the very best of research, using the best of machinery and equipment and seed, are able to produce a bushel of corn or a bushel of wheat for substantially less than their domestic competitors, fortunately for much less than almost all of their foreign competitors. Therein lies the advantage of the United States in terms of exports.

The problem comes, to take a very specific example of corn, as I mentioned earlier in the afternoon, the loan deficiency payment for a bushel of corn in Indiana and in many other locations is \$1.89. That figure was meant to be a floor. It was anticipated the price of corn would be more than \$1.89 and seldom would it reach \$1.89, but in the event that it did, a farmer could be certain of receiving \$1.89 regardless of what the market price might be. The taxpayers generally picked up the difference between the market price and the loan deficiency payment level, the loan rate at \$1.89.

But what if corn farmers who were very efficient find that they can produce additional bushels for much less than \$1.89 per bushel? The incentive obviously is to produce as much as possible because \$1.89 is guaranteed for every bushel, and if one is producing for less than that, it is a profit on every single additional bushel. That does not escape the attention of many of our most efficient farmers, and they

have increased their production. By and large, they have grown. Other competitors have not grown and, as the USDA points out, in many cases have either sold their properties or rented them to others who are able to obtain better results, I suspect.

This has led to a certain amount of decline in the number of farmers in the country. But as many farm statisticians have pointed out, in recent years the numbers of farms have grown in various sectors of our society, in large part because many Americans who are professionals in the city, or who simply wanted a rural life-style, purchased small farms or at least some acreage. They qualify under USDA standards as a farm situation if they have \$1,000 of sales. That is the cutoff point. Many do have \$1,000, and many maybe have \$10,000 worth of sales, but increasingly large numbers, hundreds of thousands of persons, have qualified as operating farms on that basis.

Seventy years ago, no one would have considered attempting to think through a farm bill that would be of assistance to all of these additional farmers. But as USDA points out, a majority of persons now obtain more of their income from something other than farming, even as they are classified as one of the 2.1 million farm situations in our country.

I mention that simply because in rhetoric in this debate, or at other times, about farm bills, a great deal is said about the plight of the small family farmer and saving that person. In fact, I would contend most of our farm bills have done a pretty good job of that. There literally is a pretty broad safety net but only if you are in certain types of farming; namely, the row crops—corn, wheat, soybeans, cotton, and rice. For instance, if you are a livestock farmer—hogs, cattle, sheep—these programs do not pertain to you at all.

Increasingly in our farm debates, we have been hearing Senators describe strawberries, cherries, peaches, nuts, and cranberries. These are sometimes known as niche crops, specialty crops, but clearly are not crops contemplated by farm bills. No money in these farm bills goes for these crops. That has not been very satisfying to most Senators who come from States with these constituents.

The situation now with the specialty crops is, Senators come to the floor and ask quite candidly: What is in this farm bill for us? We understand from the New Deal days onward, people in cotton, rice, corn, and wheat were taken care of; a safety net was there for them. But no one thought about us in those days. We are thinking about "us" now.

As a result, the Senate fields annually a large number of disaster bills. Somewhere in the United States of America, the weather is not good for

whoever is doing whatever they are doing. They point out that although corn growers or cotton growers are having their problems, the strawberry growers and others are also having a very tough time in other areas. Or the cranberry situation is a disaster.

As a result, the plea comes for disaster assistance payments to these farmers. The USDA, as a rule, has not been geared up to make these payments because there is no particular crop history or there is not a tradition of making the payments. As a result, the payments don't occur for a while because USDA must establish regulations as to who is eligible, how to verify this, and how to audit these situations. Nevertheless, as we have had the disaster bills or supplemental bills, each summer more and more Senators are finding the focus of these disaster bills is not very wide. This is also the case with the farm bill. The 40 percent who get the money are not 100 percent; the Senators who represent the other 60 percent say: What about us?

We have had hearings before the Agriculture Committee, and there are debates among people in the so-called specialty crops—fruits and vegetable and so forth. Some say: Leave us alone. You have pretty well mangled other markets. Supply and demand still pertains in what we are doing without government supports, without subsidies. As a result, there is risk but there is also reward. The market works for us. Don't gum it up.

On the other hand, many well-meaning Senators trying to help constituents are not prepared to take that for an answer. They visit with many farmers who have had genuine disasters caused by the weather or other problems, and they want relief for these constituents. Again and again, the disaster bills try to address all of these localized problems.

The so-called stimulus package offered to the Senate—which we are not considering for a variety of reasons, and which I gather is now grist for the mill, with the overall group discussing this in a bicameral way—had about \$6 billion worth of agricultural provisions in it. Many of them duplicate items in the farm bill we are now considering. Perhaps Senators were nervous that the farm bill would never get to them, and the urgency, at least as they saw it, was that the money in the stimulus package might be spent sooner. Perhaps so.

We found these same ideas popping up in the debate we had in August, when the Senate sent \$5.5 billion to farmers in the country, mostly to row crop producers, but with a debate on specialty crops and other things that ought to be covered to address their particular problems.

This simply reinforces what USDA has started in chapter 3 of its recent policy book; namely, one size doesn't

fit all. As a matter of fact, the number of farming operations in terms of size, scope, altogether the things they are doing, is so diverse, it is very difficult for any farm bill to encompass a majority, or even a small minority of operations, for that matter.

This is why, as we have this debate on the farm bill, I look forward to the opportunity to offer an amendment to the commodity section. I tried to look realistically as to what is occurring on American farms today. I am saying that in Federal policy, strawberries and cattle should be treated no differently than wheat.

In essence, we should take a look at the whole farm income. Each farmer must file with the Internal Revenue Service the proper returns that indicate all income generated on the farm. For many farms that are fairly diversified, that have income from cattle, from hogs, perhaps some from timber, perhaps some corn and soybeans, sometimes some wheat. In the South, more likely it is from cotton or rice, along with the livestock. In essence, we are saying, income earned from all agricultural production should be treated equally in federal farm policy.

Take the example of a farmer who receives \$100,000 a year in agricultural sales from all sources. Under the bill I presented to the Agriculture Committee, that farmer would declare that income, and he would receive a \$6,000 credit from the Federal Government (or 6 percent of that \$100,000) to be utilized in one of three ways. The \$6,000 could be used to purchase whole farm revenue insurance, guaranteeing 80 percent of the 5-year income to that farm; in other words, a genuine safety net created on the basis of the history of that operation. If the farmer has had \$100,000 of income 5 years in a row, obviously, the average is \$100,000, and the farmer would receive a \$6,000 government credit. This would buy an 80 percent whole farm revenue insurance policy, which means that in a case of a disaster or a downturn of income, that farmer is guaranteed at least \$80,000 of income. That premium would be paid for by the \$6,000.

Say the farmer has some money left over. He could utilize that then for a so-called farm savings account. A farmer puts the money from the Federal Government into this account and he matches it with an equivalent amount. At that point, that account remains for a rainy day purpose—once again, to stabilize farm income and to offer a genuine safety net. Or the farmer may use more sophisticated means of risk management. He also has the option to use the \$6,000 to purchase other risk management or marketing tools that are of equivalent value.

In essence, we recognize all of agriculture, all of America, all the diverse ways in which people make money. We offer a genuine market-oriented pro-

gram through a variety of risk management options (including whole farm revenue insurance) so that essentially no farmer could do worse than 80 percent of his annual income in any kind of disastrous year. We encourage savings accounts with a matching Government contribution, to increase the farmer's financial reserves and enhance the financial viability of the family farm. This has the virtue of being relatively inexpensive. That particular virtue has escaped the debate thus far altogether, in large part because Senators have competed with each other to provide more subsidies for more constituents. I understand that urge. But I have also suggested that this debate is occurring at a time in which it is prophesied by the Office of Management and Budget that we will have 3 years of Federal deficits.

One can say, after all, if we are doing deficit spending into deficits for all sorts of other things, the farmers ought to have their share of the deficit spending, too. But that is not the way this debate began. It began with the thought that we were going to have a \$300 trillion surplus for the coming year and, for that matter, for most of the years in the coming decade. I have argued earlier on that the outlays, in my judgment, lead to overproduction and lower prices, distorted land values, and make it tougher for young farmers, tenant farmers, and farmers that rent land.

But leaving aside that argument, I make the argument now that we do not have the money. We have not had the money for some time. It is obvious to everybody who has common sense outside the agricultural debate. But sometime it will dawn upon most Americans, and they will wonder what we are doing here.

Senators who rush back to their constituents and say, "I got \$173.5 billion in farm subsidies for you," may find some skeptics who will say, "Where was the money? Where did you find the money?"

The Senator may say, after all, the farmers deserve the same benefits as everybody else. There was not any money, but there will be someday. Surely, this thing will turn around. Maybe so, maybe not. My constituents in Indiana are wondering about this.

Two percent of us, and I include myself among this group in Indiana, actually are in the farming business. That is a declining number. But 98 percent are not. Maybe those of us who are in the 2 percent count upon the 98 percent never looking into this picture and wondering how in the world it is all formulated and why we are receiving money. But more and more of the 98 percent are looking into it.

What is occurring is not a mystery to editorial writers in Indiana. They write about it all the time. So do people in the Associated Press. So do people who

are local reporters. They are reporting how much money farmers are receiving in Indiana, county by county, by dollar.

This comes as a revolutionary surprise. Many farmers are able to explain—I try to do so, too—that these payments come because we have a farm program which was supposed to be a transition program. We were going to move from heavy subsidies to the market in a 7-year period of time in the last farm bill. These were transition payments. Other payments come, likewise, because of the loan deficiency payment business that I just explained. There is a floor price, really, for every bushel of corn, every bushel of soybeans.

Some payments come because of conservation and cooperation by farmers to do things that are very helpful as stewards of land and water. So there are good reasons for some of these payments. Most constituents understand that.

But they do find it difficult to understand why persons on Indiana farms that appear to be very prosperous receive hundreds of thousands of dollars from the Federal Government. They are wondering, have we missed something here? Was it the argument about the devastation of rural America, the loss of income of people, the loss of farms, young farmers coming in, and so on? And they wonder how are any of these persons helped in the process?

I am saying that these folks whom we intend to make beneficiaries are not in fact helped and have not been for some time.

Let me conclude this explanation with some principle that I found to be useful in an USDA publication, and I commend it to the attention of Senators because I think it offers a fairly good foundation for this debate on farm policy. As the debate continues, I want to return to other aspects that I found especially illuminating in the same publication, but I offer this, at least as some basis for an amendment I intend to offer in due course in the commodity section, which I believe will be constructive, which will be more fair, and which will clearly be less expensive, and which has at least some semblance of reality, considering the times we are in, fighting a war and recession and attempting to do common sense things as Senators.

I yield the floor.

Mrs. FEINSTEIN. Mr. President, I ask unanimous consent the Senator from North Dakota, Mr. DORGAN, be recognized immediately upon the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. FEINSTEIN. Mr. President, I rise to talk about the farm bill as it is presented to this Senate, and specifically the dairy part of that bill. I rise with the knowledge that some negotia-

tions are going on to see if that particular dairy program cannot be improved, at least improved from the position of California. The present bill, as drafted, before this body, is one, frankly, I cannot support. I cannot support it largely because of the dairy provisions.

I thought it might be helpful if I related my experiences. The problem is that some States have many small farms, 60 to 80 cows, and other States have larger farms. That is where the subsidies intermesh to really create a very difficult playing field for California. Essentially the provisions in the agriculture bill that is on the floor now would force consumers across the United States to pay \$1.8 billion more for milk each year. It would drive down essential income to dairy farmers who produce the milk contained in most of our Nation's dairy products.

California is the largest dairy State in the Nation. Last year, dairy farmers produced 32.2 billion pounds of milk. Over 19 percent plus of the Nation's supply comes from California. The industry is a \$4.3 billion industry in the State, and dairy is the largest part—most people do not know that—of what is a \$30 billion agricultural industry. We have 2,000 dairy farms in the State—2,100 to be exact. We lead the Nation in the total number of milk cows at 1.5 million. I often joke I wish they could vote. The California industry produces 122,000 jobs and contributes \$17.5 billion overall in the economy each year.

These are full-time, year-round jobs in agricultural counties that make up the heart of the great California central valley. Dairies provide jobs for farmers who grow and ship feed, for farmhands who milk the cows, for workers in the processing plants who make our famous California cheeses, and for packers, marketers, and many others. In fact, in the great San Joaquin Valley, one in every five jobs is dependent on the dairy industry. If California were a separate nation—I think most people do not know this—it would rank eighth in the world in milk production, fifth in the world in cheese production, and ninth in the world in butter production.

I want to make it clear that we are talking about California more than any other State when you talk dairy. So it is simply not possible to leave California out of any dairy equation.

I am aware that the dairy industry, particularly in the Northeast, needs government help. I want to make it clear that I can't support that help if it greatly disadvantages the dairy farmers in California.

I think the California Secretary of Agriculture put it best. I would like to quote from a letter dated December 3:

Consumers will see higher prices for fluid milk. In the Senate bill, it is 40 cents more a gallon for milk.

State law and economics dictate that California's dairy prices must bear a reasonable relationship to milk prices in neighboring regions.

California law, like it or not, ties us into any pooling agreement that might be made.

As fluid milk prices in surrounding states rise, California fluid milk prices would be increased in a corresponding manner. Unfortunately, the higher milk prices will force some consumers to switch to less expensive—and less nutritious—non-dairy alternatives. Dairy processors would be negatively impacted by this loss of fluid milk sales.

At the same time, California's dairy farmers will also lose under the Senate plan. Increases in fluid milk prices will undoubtedly lead to increased milk production. Once an area covers its needs for fluid milk, the additional milk goes for manufactured product such as cheese, milk powder, and butter. California is the leading producer of both milk powder and butter. California is the second largest producer of cheese, and in fact only 19 percent of California's milk production goes for fluid milk. By simultaneously stimulating production while dampening demand, the Senate plan strikes at the heart of California's dairy economy by severely depressing prices for manufactured dairy products.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CALIFORNIA DEPARTMENT OF FOOD
& AGRICULTURE,

Sacramento, CA, December 3, 2001.

Hon. DIANNE FEINSTEIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR FEINSTEIN: I recently wrote to you expressing concern about the proposed changes to the federal dairy system and its impact on California. While this proposal has changed since that letter, its impact remains negative for California's consumers and dairy producers.

The new plan, contained in S. 1731 as of this writing, would apply to only the federal order program. However, it would have enormous consequences to this state.

Consumers will see higher prices for fluid (drinking) milk. State law and economics dictate, that California's dairy prices must bear a reasonable relationship to milk prices in neighboring regions. As fluid milk prices in surrounding states rise, California fluid milk prices would be increased in a corresponding manner. Unfortunately, the higher milk prices will force some consumers to switch to less expensive—and less nutritious—non-dairy alternatives. Dairy processors would be negatively impacted by this loss of fluid milk sales.

At the same time, California's dairy farmers will also lose under the Senate plan. Increases in fluid milk prices will undoubtedly lead to increased milk production. Once an area covers its needs for fluid milk, the additional milk goes for manufactured product such as cheese, milk powder, and butter. California is the leading producer of both milk powder and butter. California is the second largest producer of cheese, and in fact only 19 percent of California's milk production goes for fluid milk. By simultaneously stimulating production while dampening demand, the Senate plan strikes at the heart of California's dairy economy by severely depressing prices for manufactured dairy products.

This is the case even though the Senate plan will primarily increase production in other parts of the country. Manufactured dairy products may be easily stored and transported. Accordingly, the markets for these products are nationwide so that even if increased production were limited to other regions, California's prices for its manufactured products will drop significantly.

The Alliance of Western Milk Producers estimate that over 9 years the bill would have the impact of reducing California dairy farmer's revenue by approximately \$1.5 billion. At the same time, California consumers would pay an additional \$1.5 billion in higher retail milk prices. The Alliance estimate seems reasonable using the analysis completed earlier by the University of Missouri's Food and Policy Research Institute. Our economists concur with these estimates.

Without question, dairy policy offers some of the most contentious issues in agriculture. The sole positive attribute of the Senate plan is that it has united California's dairy consumers, producers, and processors in opposition to the proposal. Whatever it does for the rest of the country, it is bad for our state.

I thank you and your staff for all of your efforts on behalf of Californians. If I may be of any assistance to you on this or any other matter, please do not hesitate to contact me. Sincerely,

WILLIAM (BILL) J. LYONS, JR.,
Secretary.

Mrs. FEINSTEIN. Mr. President, I said that California families under the Senate bill will pay 40 cents more per gallon of milk. That is according to the California Department of Food and Agriculture. That represents a net cost to the industry of \$1.5 billion over the 9 years of this bill.

Do we really want to make it more expensive for parents to provide calcium to their children? Do we want to deprive the elderly of nutrition that strengthens bones, fights cancers, stops osteoporosis? Do we want to make families cross milk off their grocery list because it costs too much? I don't think so.

For Californians, the legislation is a double-edged sword. Not only will a mother in Los Angeles be paying more every week at the grocery store, but a father who runs a dairy farm in Modesto will see his income slashed, if this bill becomes law. For one co-op, this represents a loss of \$71,000 per dairy farm.

The payment formula may be complicated and crafty, but the winners and losers are clear. California is targeted by this bill to be a loser.

Like other goods, a higher price established for fluid milk by law—not the market—will cause families to buy less, as I said, and cause suppliers to get an improper price signal to produce more. If there is too much drinking milk in the marketplace, it spills over to compete against milk used to produce cheese, butter, milk powder, and other dairy products.

Prices for milk are based on how the milk is used, which is referred to as "ultimate utilization." Since over 80 percent of the milk in California is

used to produce these dairy products, any excess milk will drive down the prices received by California dairy producers. Other States with small dairies can take advantage of government subsidies no matter what the milk goes for. But States such as California are excluded under their proposal because dairy farms have large herds. The average size of the 2,100 herds in California is 656 cows.

Again, this is an attempt to take money from California to give it to other States.

Dairy producers estimate they are going to lose \$1.5 billion over the next 9 years if the provisions in the Senate farm bill are enacted into law.

Let me read a couple of letters from California's dairyland.

Jim Tillison, Chief Operating Officer of The Alliance of Western Milk Producers, writes that the dairy program in the Farm Bill "is bad for California's consumers and it is bad for California's dairy farm families." He estimates, "the net loss of revenue from manufactured milk will decrease California dairy farm family income by \$1.5 billion over the next 9 years." The Alliance of Western Milk Producers is a trade association that represents California dairy cooperatives. Together, Alliance member cooperatives market approximately 50 percent of the milk produced in California both as raw milk and as processed dairy products.

Rachel Kaldor, Executive Director of the Dairy Institute of California, a state trade association representing the manufacturers of over 70 percent of the fluid, frozen, and cultured dairy products in California, writes, "any legislation which creates federal price floors, production limits and income redistribution—national pooling—is bad news for California."

In another letter, Gary Korsmeier, Chief Executive Officer of California Dairies Incorporated reports, "the milk prices for California farm milk used in cheese, butter, nonfat milk powder and other dairy products, would drop by \$2.9 billion dollars." Korsmeier predicts the average dairy farmer in the cooperative would lose \$71,000 per year. California Dairies Incorporated is a member of the Alliance of Western Milk Producers. Formed from the merger last year of three California dairy cooperatives, California Dairies' 700 members account for about 40 percent of California's milk production.

I could go on and on. I can talk about lower milk consumption, increased milk production, and dramatically increased government expenditures on the dairy program. I can talk about another layer of bureaucracy and exacerbation of regional disparities. I can talk about providing another chance to pit big producers against small producers and reduction in the percentage of producer income that is derived from the market. I can talk about contradicting congressional intent for the current program, setting up regional supply management boards, and increases in assessments on dairy producers.

The dairy program is a bad part of this farm bill.

I would like to read into the RECORD the agricultural groups that oppose the dairy provisions currently in this bill: California Farm Bureau Federation, Alliance of Western Milk Producers, Western United Dairymen, California Dairies Incorporated, Milk Producers Council of California, Montana Dairy Association, Dairy Producers of New Mexico, Idaho Dairymen's Association, Oregon Dairy Farmers Association, Texas Association of Dairymen, Utah Dairymen's Association, and the Washington State Dairy Federation.

It is not only California, it is a number of Western States that would be seriously impacted by the dairy provisions of this bill.

Let me say in conclusion that a national dairy policy that strikes at the heart of California's dairy industry and other Western State dairy farmers is not an option. I cannot support a farm bill that harms California. I hope the negotiations going on to try to come up with another formula to meet this concern are successful.

I thank the Chair, and I yield the floor.

Mr. President, I appreciate the unanimous consent agreement to recognize the Senator from North Dakota. But I also notice that he is not present at this time. I ask that the unanimous consent agreement be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas.

Mr. HUTCHINSON. Mr. President, I rise today to voice my strong support for the consideration of the passage of a farm bill this year. We have been discussing and debating and moving forward with a number of pieces of legislation, but, in my home State of Arkansas, there is no piece of legislation more important than the pending farm bill.

Two major issues that have been discussed are biosecurity and economic stimulus. For my State, the farm bill addresses both of these issues. I urge my colleagues to move forward with this legislation expeditiously.

I commend Chairman HARKIN for holding a markup this year and not bowing to those voices that said we should delay this.

While I do not claim that the Harkin bill is my preference on a number of issues, I am pleased that the Agriculture Committee worked so hard and so diligently in getting a bill out of committee this year. I hope the full Senate will now act expeditiously.

For rural America and for most of Arkansas, an economic stimulus package must be tied to agriculture. To talk about passing an economic stimulus package and not doing a farm bill, for the State of Arkansas simply does not make sense. For Arkansas, the two complement one another and are intricately related.

The agriculture industry in Arkansas has been in distress over the last few years due to a combination of high energy prices, low commodity prices and difficulties in opening up foreign markets to American goods.

Agriculture and agriculture-related activities account for a full 25 percent of my State's economy and provide \$5 billion in farm income. It is Arkansas's single largest industry. Farming is, in many ways, the lifeblood of my State. It is imperative that a new farm bill be passed this year, which is why many of us have worked so hard to push for the completion and passage of a farm bill while we are still in session this year.

Fewer and fewer farmers in my State are able to continue farming due to, not a recession, but a depression that the agricultural sector has experienced over the last few years. While the rest of the economy grew and benefitted during the late 1990s, agriculture was one of the very few industries that actually suffered during this time.

Let me share with my colleagues just a few of the statistical facts regarding the farm economy in my State over the last few years. These are Arkansas-specific numbers from the USDA.

In 1996, the price for rice was \$10.20 per hundredweight. For the year 2000, that price was \$5.70 per hundredweight. In 1996, for the entire rice crop production in Arkansas, the value was \$733 million. In the year 2000, the value of production had dropped to \$490 million.

Next, let me share the statistics on cotton. In 1996, the price was 71 cents a pound. In the year 2000, the price had dropped to 56 cents per pound. In 1996, the cotton crop value of production was \$555 million. By the year 2000, that had dropped to \$388 million.

In 1996, for wheat, the price was \$4.38 per bushel, but, in the year 2000, the price had dropped to \$2.40 per bushel. In terms of the value of production, in 1996, the wheat crop was valued at \$293 million; by the year 2000, it had dropped by more than half to \$142 million.

For soybeans, a major commodity crop in Arkansas, the price was \$7.34 per bushel in 1996; in the year 2000, the price had dropped to \$4.90 per bushel. In 1996, the value of production was \$824 million; in the year 2000, the value of production dropped to \$407 million.

Overall, the net farm income for agricultural production in my State has gone from about \$2 billion in 1996 to just over \$1.5 billion in the year 2000. That is a decline of nearly half a billion dollars. In a small rural State such as Arkansas, that impact is devastating.

It is my sincere hope that we can get a farm bill into conference, get it passed, and signed by the President this year.

There are few issues that are followed as closely or scrutinized as completely as agriculture policy. The Agri-

culture Committee was given the very great responsibility of creating a farm bill that will determine the direction of agriculture policy and the assistance available for farmers and rural communities over the next 5 years.

In committee, there were a lot of compromises that were reached. In a bill of this scope, with the impact it will have on rural America, it is never possible to please everyone. The goal of this farm bill, from the beginning, was to re-craft a failing policy and provide the assistance and certainty that our producers must have.

This policy is extremely important. In many cases, it will determine whether or not farmers in the State of Arkansas will be able to plant next year, and, in an even broader sense, it will determine if many of the hard-working farm families in Arkansas will be able to continue to work their land and make a living.

Over the past 4 years, rescuing the farm economy has cost over \$30 billion in emergency Federal farm aid. It is quite clear that our current farm policy is not working. It has been an ad hoc policy. We have been forced to address short-comings annually. The current policy has been devoid of certainty—creating instability in the farm economy across this country. It has resulted in farmers never really being sure of what Congress is going to do, and it has resulted in Congress having make ad hoc emergency assistance as needed from year to year.

It is imperative that we end the annual struggle where Congress must find money and make available large numbers of emergency funds to support our nation's farmers due to insufficient agricultural policies. We must recognize the needs of our farmers and address them.

My views, and the views of a few other Members, were made quite clear with the introduction of S. 1673. I still believe that the bipartisan compromises we came to in that bill would provide the type of assistance our farmers need while providing a healthy framework for agriculture policy in the future.

This is indeed a unique time in our Nation's history. Now, more than ever, our country is looking to its leaders for guidance and support. Our national security has been tested, and our economy is in need of a stimulus. Throughout all of this is the need for strong, comprehensive policies that reflect the needs and priorities of our country.

I do not need to tell this body that agriculture is one of these priorities and that a strong, responsible, and well-crafted farm bill will ensure the assistance our farmers and rural communities need while providing the stability and certainty they must have to continue over the next 5 to 10 years.

While I have been pleased with the steady progress we have made with the

farm bill over the last few weeks, I urge my colleagues to push hard to complete the consideration of the bill so we can provide for the needs of our nation's farmers.

Over the last few weeks there have been reports criticizing farm policy and criticizing the various farm bills. Despite these reports, I would argue that strong farm policies are absolutely essential to assure the safe, abundant, and affordable food supply we enjoy in this country. The farm policy of the past may not have been perfect, but it is that which has given the American people the safest, most abundant, and most affordable food supply in the world. Our farmers are, in fact, the best in the world. This is a testament to their hard work and their commitment to advancing agriculture. But their hard work must be joined by sound agriculture policy.

I realize the diversity of agriculture in different parts of this country. However, I also realize a farm bill is just that, it is a farm bill meant to reflect and address the needs of our agricultural communities. Numerous titles of this bill address key issues of rural America, but if farmers are not farming, what will happen to those communities then? What will happen to the seed dealers, the bankers, the car dealers, and a whole host of industries directly reliant upon the farm economy?

As you are all aware, there are numerous proposals out there to address the farm sector's needs. While I worry that the best possible policy might not emerge, I do believe we will make improvements to our current policy. I am firmly behind moving forward and completing a farm bill this year. It is a must for our farmers. I believe that, in the end, we will work to provide for the needs of our nation's producers.

In terms of trade, I agree with the Secretary of Agriculture, in her testimony before the Agriculture Committee, that expanding trade is an essential part of agriculture policy. I believe that aggressive action on this front will greatly benefit our producers and allow the United States to fully participate in the proliferation of trade agreements that are now emerging out of Latin America, Asia, and with our allies in the Middle East.

Agriculture trade can open up whole new markets and provide our country with new friends abroad who will be able to share in our wealth during prosperous times and come to our aid in times of need or tragedy.

However, trade also requires compliance with international agreements. While I have been critical of some of the provisions in past trade agreements, and will likely have misgivings about some future agreements, I understand the importance of the United States keeping its word.

As Senator CONRAD has pointed out in committee and on the floor with numerous charts, we don't support our

producers at nearly as high a level as our European competitors. Our farmers are at a strategic and competitive disadvantage. The way to fix this problem is with green box payments. Senator COCHRAN and Senator ROBERTS are to be commended. They have crafted a proposal in committee—and I assume will be offering it on the floor as well—providing the support our farmers need while remaining true to our obligations abroad. While there may be other proposals that are WTO compliant, few would provide the level and assurance of support that the Cochran-Roberts proposal would.

The greatest fear of many farmers and their lenders in my State is replicating a system where a farmer is not certain of the level of support they will receive from year to year. This has been the fatal flaw with our current policy. The rapid phase-out of the fixed, AMTA-style payments in the Senate version of the farm bill that came out of committee is very troubling. That style payment is one of the only true green box payments in the bill. If the WTO calls for lowering allowable amber box payments, these payments may be the only money allowable for safety net purposes.

While I support moving forward, I believe the assured levels of assistance in S. 1673, the House bill, and the Cochran-Roberts approach are, by far, more favorable than some of the other proposals circulating that would diminish these payments.

In addition to trade, conservation is a key component of the farm bill, as it should be. Our farmers and ranchers are stewards of our nation's natural resources. It is important that incentives be available that encourage and reward environmental stewardship. It is my belief that this is an important component of farm policy, but it is a component that must be balanced with other titles in the bill.

I strongly support the increased acreage for WRP in all of the proposals we have seen. CRP has also been an important program for Arkansas. In addition, the Wildlife Habitat Incentives Program has also been successful in promoting the health of wildlife in Arkansas. These are all good programs.

While I support these programs, I believe a balance must be struck. I agree with many of my colleagues that this is done by strengthening programs we know are successful, where we know our funding can be maximized to the benefit of the environment and the agricultural sector.

As we have learned from the last few years, a farm bill must provide a safety net for producers through a good commodity title. A sufficient commodity title is absolutely essential in providing the support needed by our country's farmers. Without these programs, our farmers would be at an incredible competitive disadvantage with our Eu-

ropean counterparts. Many of our farmers would simply be put out of business.

The farm bill must reflect the needs of our country's producers. It must also allow the Congress to avoid the costly ad hoc emergency spending that has characterized farm policy for a number of years.

Proper funding and allocation of these funds is essential in allowing our farmers to remain on their farms. Without farmers working the land, without the type of technical expertise present in our country's agricultural sector, we would not have the abundance of nutritious food we enjoy in this land.

Our farmers are indeed the best in the world. They are early adopters of new technology and enhanced growing techniques that allow them to increase production while reducing the environmental impact of agricultural activities. Much of these great strides forward have been the direct result of this nation's commitment to its farmers.

This Nation has its roots in its fertile soil. It is important that we remember that agriculture has been, and will continue to be, a source of great strength and security for our country.

I conclude by emphasizing to my colleagues just how important the farm bill this year is. It is an absolute must-have for our nation's farmers and rural communities. I hope we will move forward quickly and responsibly.

I yield the floor.

THE PRESIDING OFFICER (Mr. REED). The Senator from North Dakota.

Mr. DORGAN. Mr. President, are we in the postcloture period for debate?

THE PRESIDING OFFICER. Yes, we are.

Mr. DORGAN. Mr. President, we are now, as I understand it, in a 30-hour postcloture period following the cloture vote on whether we should proceed to consider the farm bill.

I don't quite understand this, frankly. We ought not to have had a vote on whether we should proceed to the farm bill. Of course, we should proceed to the farm bill. Who on Earth thinks we should not proceed to write a farm bill.

The current farm bill is a miserable failure. Not many people in the Senate have farmed under that farm bill, as a matter of fact. Those who have had to try to raise a family and operate a family farm under this current farm bill, Freedom to Farm, understand it is a miserable failure. The whole premise of the current farm bill was a failure.

The premise was, whatever happens in the marketplace, that is all fine and that is all farmers need to know. And if the marketplace collapses and farmers don't have support for their products and they go broke, God bless them; the country doesn't care. America will be farmed from California to Maine, and we will have giant agrifactories. We

will still get food on the grocery store counters. Under the philosophy of Freedom to Farm, family farmers are kind of like the little old diner left behind when the interstate highway comes through—kind of nice to talk about, nice to think about, nice to remember, but they are not part of today.

People who think that way couldn't be more wrong. The seed bed of family values in America has always come from family farms. It is the road to small towns and big cities and has nurtured and refreshed this country in many ways. Family farming ought not be out of fashion. It ought not be yesterday's policies. It ought to be what we aspire for tomorrow's food supply. Family farming ought to be an important part of this country.

Why do we need some special help for farmers? Why do we have a farm bill? That is a good question. In fact, the U.S. Department of Agriculture was created in the 1860s by Abraham Lincoln with nine employees. My feeling is we don't need a Department of Agriculture if the sole purpose is not to foster a network of families that farm this country. If our goal is not to foster a network of family producers for America's food supply, then I say put a padlock on USDA, turn the key, and get rid of it. We don't need it.

If the goal, however, is to foster a network of family food producers because we believe, both for social and economic purposes, it strengthens and enhances this country, then let's write a farm bill that does that. Let's write a farm bill that supports that. The current one does not. We haven't had one that supports that for a long while.

It is interesting, I come from western North Dakota, a very sparsely populated part of the country. We had a little dispute recently in western North Dakota with prairie dogs. I got right in the middle of the dispute. I can't stay out of a dispute like that, I guess, much to my detriment.

Here is the situation. It relates to what is happening in western North Dakota. We are in western North Dakota becoming a wilderness area. There is no Federal designation. We don't need one. We are fast losing people. My home county was 5,000 people when I left it. It is now 3,000 people. I left a small county in southwestern North Dakota. It is actually pretty big in geographic size. I left to go off to college. It was 5,000 people; now it is 3,000 people.

The adjoining county just south of the badlands in western North Dakota is Slope County, about the same size. Actually, it is almost as big as one of the small eastern States. It has 900 people; seven babies were born in that county last year. So I come from a part of the country that is losing population hand over fist. People are moving out, not in.

Family farmers and ranchers are not able to make a living so they leave. Their dreams are broken. All that they aspired to do to live on the land and make a living with their family, all those dreams are gone.

Then this past spring, the U.S. Park Service, which is also in western North Dakota, had a problem. Out in the badlands of North Dakota we had a little picnic area, and it belonged to the taxpayers and the Federal Government. It was our picnic area. The prairie dogs, furry little creatures, took over this picnic area. Prairie dogs are very much like rats except they have a button nose and furry on the tail, and they multiply quickly.

So the prairie dogs took over the picnic area. Our Federal Government sprang into action. They just sprang into action and did an environmental assessment—an “EA,” they called it. They did a finding of no significant impact—some sort of SNIFF; there are acronyms for these major things they do. They jumped right into action. You know what the conclusion was? If the prairie dogs have taken over the picnic area, then move the picnic area. It is a quarter of a million dollars to move the picnic area.

That doesn't make much sense to me. I said: Why don't you move the prairie dogs? We are not short of prairie dogs, we are short of people in western North Dakota. We are not short of prairie dogs; move them.

They said: We can't do that.

I said: When I was a kid, 14 years old, the rats took over our barn and my dad asked if we could have a program to get rid of the rats. And myself and two other 14-year-old boys very quickly pointed out to the rats that the dumping grounds for our town was about a mile away, and lo and behold we got rid of the rats.

I said: Hire three 14-year-old boys from western North Dakota to get rid of the prairie dogs, and it won't cost you very much. We will reclaim our picnic grounds.

I said: The point is, I am really interested that you are going through this machination with respect to prairie dogs and picnic areas, when I can't get anybody interested in the fact that our State in the western part and in most rural counties is systematically being depopulated. Family farmers are going broke, ranchers are going broke, people are moving out. We can't get anybody interested in what all that means and the consequences of it, but you have a few prairie dogs move into a picnic area and, by God, the whole Government has studies going on and they are going to spend money to move picnic grounds.

I said that is a strange set of priorities, in my judgment. I have gone off a bit, but in fact it is hard to get people interested in the real issues. The real issues in western North Dakota

are that family farms are losing their shirts. Ranchers have had a big struggle there and people are moving and nobody seems to care much. But they care about a few prairie dogs.

As an aside, I lost the issue. They moved the picnic grounds. Then, about a month later, after all this big controversy, I read in the newspaper that a guy from Oklahoma had invented a truck—he created a truck with a hose on the truck that had a vacuum attached to the hose, and he would stick the hose in prairie dog holes and suck them out of the holes. And it threw them into the back of this truck, which he had padded with mattresses so they didn't get hurt.

I said: That is an interesting approach—to suck the prairie dogs out of the holes and then throw them into this truck with mattresses and they didn't get hurt.

Then 2 weeks later, on the national news I saw that in Japan they were selling prairie dogs for \$250 apiece as pets. I am thinking to myself that here is a solution to a problem. Hire that guy from Oklahoma, suck those prairie dogs out of the holes, ship them to Japan, reduce our Federal trade deficit, save the taxpayers a quarter million dollars, and reclaim our picnic grounds. Of course, that was way too simple for the Park Service.

I digress a bit only to say this: When you get a prairie dog problem, you have the whole darn Government running to see what they can do about it. But when you have a problem with family farmers making a living, who invest all they have in the spring to plant a seed and get on the tractor to plant that seed, and then they hope beyond hope that the insects won't come, that it will rain enough—but not too much—so they won't have crop disease, that they won't have hail, and that if they are lucky, in the fall they will be able to get out there with a combine and harvest the grain and put it in a 2-ton truck, only to find out when they drive that truck with a load of wheat to the elevator, the elevator and grain trade will tell them: This food you produced doesn't have any value. This food you produced on your farm doesn't have value.

That family farmer on that farm scratches his head and says: What is this about? Our food has no value?

We have a world in which a half billion people go to bed every night with an ache in their belly because it hurts to be hungry, and we are told the food we produce in abundance has no value. Are we not connecting the dots somehow? Is something missing here? The farmer who is told his food has no value goes to the grocery store on the way home and picks up a box of puffed wheat, or puffed rice, or Rice Crispies, or shredded wheat. What they discover is that someone discovered that grain had value. It wasn't the person who

produced it, who risked their money to produce it. It was the person that puffed it, crisped it, crackled it, popped it, put it in the box, and sells it for 100 times what family farmers are getting who took all the risks to produce it. There is something fundamentally wrong there.

My point is this: We have struggled to write a farm policy that recognizes the value and the worth of family farmers to this country. Some say: Why are farmers different? Why don't you recognize the value and the worth of the person on Main Street who runs the hardware store, or the barber shop, for that matter? Well, the family farm is the only enterprise in our country that has the risks I have just described—planting a seed, borrowing all the money they can to plant the seed, and hope beyond hope that all the other circumstances that could completely wipe them out financially do not do that between when they plant the seed and when they harvest it; and then they go to the grain elevator with no understanding that their product is going to have any value at all. They are the only small enterprise that has all of those concurrent risks at the same time.

The question for this country about its security and about the nature of its economy is: Do we want to maintain a network of family producers producing our food or not? It is very simple. Europe has made that decision. Long ago, Europe decided it wants family producers to be producing food for Europe. Why? Because Europe has been hungry in its past and doesn't want to be hungry again. It believes food production by family units is a matter of national security for Europe. We ought to believe the same for the United States.

I grew up in a town of 300 people. When I was a boy, in my hometown, I would go on Saturday night to my hometown and it was full of cars. The barber shop was open until midnight. The barber was cutting hair there at all hours of the night on Saturday night. It was like a festival on Saturday evening in my hometown. That is not the case anymore. Family after family after family have gone broke—forced to leave the family farm because they could not make a living raising their grain and the livestock and selling them at prices that the grain trade and the exchanges provided.

Now, one might say that is just the way things are and there is really nothing you can do about that. Europe didn't decide that. They said: We want to maintain a network of family producers for our national security. We believe food security is critically important, and we want to maintain a network of family farm producers for that purpose. Go to Europe and to a small town in rural Europe on a Saturday night and see what you find. You will find that those small towns are alive,

as I described my small town was many decades ago. They are alive and thriving. Why? Because the blood vessels that create the economy of a small town come from family farms to these small communities and nourish those small communities.

In many ways, this debate is about values. What kind of an economy do we want? What do we cherish? What do we think is valuable about this country? It is always interesting to me that if you are big enough, strong enough, powerful enough, have enough resources, and you come to this Congress, I am telling you, people stand at attention and say, yes, sir; no, sir; what do you want, sir. I could give a lot of examples of that.

Tom Paxton wrote a song a long time ago, many decades ago when the Congress gave Chrysler Motors a bailout. Mr. Paxton, a great folk artist, wrote, "I Am Changing My Name to Chrysler." It is interesting, even as we now are struggling to get through a motion to proceed on a postcloture, 30-hour discussion, just to get to the farm bill to try to help those families out there, even as we do that, we have a package to try to stimulate the economy that comes over from the House of Representatives that says: Do you know how we do that? We give Ford a \$1 billion rebate check for the alternative minimum taxes they paid in the last 13 years. We give IBM a \$1.4 billion tax rebate check for the last 13 years. Maybe Mr. Paxton should write a new song called "I Am Changing My Name to Ford."

The point is this: The individual family farmers around this country don't have the kind of clout and power and opportunity to access their Government that some of the largest enterprises in this country do.

Family farms play an important role in our economy and in our culture. For social and economic reasons, I believe this country ought to want to foster and nurture a network of family farmers across this country producing America's food.

We can do it another way, and in some areas we do. In California, they have areas where one company milks 3,500 cows every day three times a day. God bless them, in my judgment. They have every right to do that.

I suggest we have a price support under the milk produced from about 100 cows and say: If you want to milk 120 or 3,020 cows, God bless you, but that is at your risk, not ours. We will provide a price support of the milk on the first 100 cows you milk. That is what we ought to do with respect to providing a safety net for family farmers.

Let me speak for a moment about the farm bill that was written in the Senate Agriculture Committee. Certainly it is not perfect. It is not exactly the bill I would write. I would prefer more

targeting in the bill to be more helpful to family-size farms.

This bill is sure a whole lot better than the underlying farm law. I was here when we debated Freedom to Farm, which I thought was a catastrophe and I voted against it, and I am pleased I did. I want to see somebody stand up in this Chamber and say how well Freedom to Farm has worked. It almost bankrupted a lot of family farmers except for the fact every single year we had to pass emergency legislation to fill the gaps between Freedom to Farm which was such a miserable Swiss cheese piece of legislation that really did not help family farmers at all.

When the Freedom to Farm bill was passed, we had high grain prices, and we had people around here thinking that it was going to last forever; we are always going to have high grain prices, so we will just give these farmers declining payments over 7 years, not with respect to what the current market prices are; we will just pay them, and things will be great.

It was an absurd proposition. The fact is, prices collapsed almost immediately, and they stayed down and they are down today.

The current, underlying farm law does not work at all. It is a miserable piece of public policy that should never have been enacted but was, and we have had to make the best of it by the end of each year passing some emergency legislation to respond to the needs that were unmet in Freedom to Farm.

The Senate Agriculture Committee has passed legislation that does a policy U-turn, and that policy U-turn says: Let us go back to at least some form of countercyclical help, getting help only when you need it. That makes good sense to me. That countercyclical help is the help that I hope will give family farmers a message from the U.S. Congress that says: You matter; you count; we want you as part of America's future.

Those Senators who come from farm country have had the same kind of calls I have had and the same experience as I have had. Some say: Those are anecdotes that are emotional but do not mean very much. They mean everything.

Arlo Schmidt was doing an auction sale in North Dakota. He was auctioning a farm that had gone broke. A little boy came up to Arlo at the end of the auction sale. He was about 8 or 9 years old, Arlo told me. The little boy was angry. He had tears in his eyes. He grabbed Arlo Schmidt around the leg, looked up at him and said accusingly: You sold my dad's tractor.

Arlo patted him on the shoulder to comfort him some, and the kid would have none of it. He said: I wanted to drive that tractor when I got big.

The point is, that little boy felt that he, too, wanted a chance to farm, but

his family lost their dream, and the result was an auction sale. Those auction sales all around the country, those poster sales of those broken farms reflect a failure of farm policy.

This is a hungry world. It is an enormously hungry world, and we produce food in such great abundance. The economic all-stars of food production are family farmers. There is something fundamentally wrong when we cannot make the connections between what we produce in great abundance and what the world needs.

As I speak today, there are tens of thousands of children who will die from hunger and hunger-related causes every hour, and nobody thinks much about that. I had a friend who was a singer many years ago who died in 1981. His name was Harry Chapin. He was a wonderful singer. He devoted one-half of the proceeds of his concerts every year to fight world hunger.

Harry Chapin used to say if every day 45,000 children die of hunger and hunger-related causes, it is not even in the newspaper; there is not even a news story about it. But if in New Jersey, 45,000 people died in one day, it would be headlines. The winds of hunger blow every minute, every hour, and every day, and it is not even newsworthy. We have family farmers with hopes and dreams to produce America's food and to produce food for the world only to be told that which they produce has no value. There is something dramatically wrong with that.

I will finish by saying this: I regret we are here today dealing with this bill. We should have been on this bill long ago. I especially regret we had to have a vote on a motion to proceed. We are having a debate on whether we are going to proceed to the agriculture bill.

I have the deepest respect for Senator LUGAR of Indiana. I listened to his speech. I could not disagree with him more. He knows I have spoken many times about the Nunn-Lugar program, for which I will have admiration forever for Senator LUGAR. What he has done in some areas is so wonderful and so important to this world. But in agriculture policy, I could not disagree with him more.

It is important for us to have aggressive debate about this so that the country gets the best of what all of us have to offer. I am hopeful at the end of the day that we will get past this postcloture debate, get on the bill, offer amendments, and get this bill done.

Today is Wednesday. We ought to finish this bill this week. We ought to have a final passage vote on Friday, go to conference next week, finish the conference report, and put it on President Bush's desk for signature at the end of next week. That is what we ought to do. I commit myself to doing that. I hope others will as well.

Today, let us make that commitment to America's families who are desperately trying to make a living and hold on to that dream of making the family farm work.

In this hungry world, especially at this time when we talk about security, food security, and contributing to the world's food supply by our country's economic all-stars, the family farmers, it is something that merits the attention and merits the writing of a good farm bill by the Congress, and it merits us doing that now, this week, and next week, and finishing that product so we can have the President sign it before the end of this year.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant bill clerk proceeded to call the roll.

Mr. THOMAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THOMAS. Mr. President, are we on the farm bill?

The PRESIDING OFFICER. We are on the motion to proceed to the farm bill.

Mr. THOMAS. Mr. President, I want to talk about the farm bill for a moment. I have been listening to my friend from North Dakota talk in general terms of where we ought to be and what we want to do for the world, but we have not talked about how we get there.

There ought to be some target, instead of talking about having food. That is great. The fact is, we are talking about a policy. Look at this bill. It was brought up to the Chamber this morning. There is a lot of detail in this legislation. What we need to be talking about and have been talking about but have not completed is a vision of where we want to go, what do we want agriculture and our food system to be in 10 or 15 years.

My colleagues talk about the politics of it, of course, and that is great. They can talk about distributing funds to everyone, and that is great. All of us want some safety net in agriculture, and we will work to do that, but we have to go beyond that and take a look at how we get there and what is the best way to do that.

Quite frankly, I have been involved in agriculture. My friend was talking about coming from a town of 300. I come from Wapiti, WY. That is not even a town; it is a post office.

I know a little about agriculture. That has been my life as well, a different kind of agriculture to be sure, and that is one of the issues. There are all kinds of agriculture with which we have to deal. The Bush administration took a look at it and they had a statement I thought was good. They believe

farm policy should ensure compatibility between domestic and trade objectives.

Have we talked about that? No, we have not. Support open markets. Did we talk about markets? No, we did not. Provide market-oriented farm safety net? I think all of us want to do that, not create undue uncertainty. These are the principles we ought to have as we move forward.

I am a member of the Agriculture Committee. I am a new member of the Agriculture Committee this year, as a matter of fact. The idea of finishing on Friday bothers me a little bit because this bill was jammed through the committee in time that most of us did not even have a chance to take a look at what was being proposed. It was brought up when we, quite frankly, ought to have been dealing with our economic stimulus package.

We ought to be dealing with doing the appropriations and those matters that really have impact. The farm bill does not expire until next August. I am one who thinks, yes, we ought to go for it after we get back in January so farmers will have some idea, before planting time, as to what they look forward to in the future. But the idea that we take something like this that hardly anyone in this whole place has looked at and pass it in 2 days is criminal, and I hope that does not happen.

I objected as we went through this bill a time or two simply because we have not had an opportunity to look at various complicated titles, and they are complicated. We were asked to deal with titles such as conservation, for example, in a markup in the morning when we did not even get the language until some of the staff got it at midnight the night before. I do not think that is a very responsible way to deal with a bill that is as important as this Agriculture bill. It is my opinion the committee moved much too quickly. We did not have an opportunity to find out what was in the particular title, whether it be marketing titles, competition titles, conservation titles, or commodity titles.

Did we have a chance to talk a little bit about the projected ideas and the proposals with people at home in the business? No, we did not. We did not even receive the language until midnight the night before the markup.

So I think we need to take a little time and look at all the aspects. Agriculture is a complicated industry everywhere. In every State, it is a little different. I am from Wyoming. Our largest activity, of course, is livestock, mostly cattle, some sheep, but we also have crops. Interestingly enough, our largest cash crop in Wyoming is sugar beets. So each of us is different. As we went through this in the committee, people were talking about cranberries, about cherries, about apples. That is okay, but it takes a little time to put

together a responsible kind of policy to deal with those issues.

During the time the committee was working on the bill, we never did get overall scoring. We never did get a real look at what it was going to cost. Indeed, after the committee was directly forced to deal with it before it was brought to the Senate, changes had to be made which we did not even have anything to do with. That is not the system I believe ought to be used in this place, especially when we are talking about something as complicated and far-reaching that impacts as many people as does a policy for farming.

As we went through the bill, the chairman would talk about a reconciliation process, that after we have waded through the first part of it we could come back and do it. We did not even get a chance to look at the reconciliation until it is now being considered. So I have to say that as interested as I am—and as I said, my own background is in agriculture. I have always been involved with agriculture, so I am very much interested in it, not only because of whom I represent in Wyoming but because I am personally very interested in a successful agriculture that has some opportunity to be market-oriented so we are producing those commodities that the market requests, so that we can build new markets overseas, which we have to do in order to have a program of that kind. So it is a complicated matter, and we really need to move on with that.

As I have said repeatedly, I asked for a little more time in the committee, but we did not get it so we will deal with it as we are, and there will be amendments we can take a look at. Quite frankly, we may be dealing with Defense appropriations before this is completed. We may be dealing with economic stimulus. In any event, we ought to be taking a look at where we want to be over time. We ought to promote the idea of family farms instead of the big corporate farms, of course, so that families can afford to stay on those farms and be effective. We need to find additional markets.

We produce more than we are going to consume. So in order to be an effective industry, we have to find markets and move there. I think we have to be very careful, as we are in this trade business, that the things we do will fit into trade, the so-called green box, the WTO, or the amber box. If we find we do not have these payments that fit into the WTO rules, then we have some difficulties in being able to do that.

I happen to think one of the most important issues we ought to look at is conservation. In my part of the world—and I think it may be even more important other places—people would like to see open space remain. One of the best ways to do that is to have successful agriculture, of course. We need to do that.

There are a great many things we must do and I think we can do. I think there is more emphasis on conservation, whether it is grasslands or whether it is timber or whether it is crop lands itself. These are the kinds of things we need to think about. We need to have a thoughtful bill which we have time to discuss and not jam through because of the political expediency of getting it done before this year is over. I do not think that is the best reason to come up with something that has not had the kind of consideration and thought we look forward to having.

Mr. President, how much time do I have?

The PRESIDING OFFICER. Under cloture, each Senator may speak up to 1 hour.

Mr. THOMPSON. Very well. I am not going to take up the 1 hour. I yield to my friend from Indiana.

Mr. LUGAR. May I respond to the distinguish Senator? In the event the Senator does not use his hour, if he were to yield the balance of that time to me, that would be helpful in the expedition of the debate. But the Senator should be prepared to utilize his full hour.

Mr. THOMPSON. No, I am not going to utilize the full hour.

The PRESIDING OFFICER. The Senator from Wyoming has yielded time to the Senator from Indiana.

Mr. LUGAR. Mr. President, the forum we are attempting to adopt is one in which a Senator yields time to me as manager of the bill as sort of a time bank. I will explain for all Members I am allotted only 1 hour under the rule. I can accumulate as much as 2 more hours by such allocation from Senators, which I seek to do simply to expedite the debate during those times when there are no other Senators present to speak.

In that event, will the Senator yield whatever time he has remaining when he completes his speech?

Mr. THOMPSON. I yield the remainder of my time to the Senator from Indiana.

Mr. LUGAR. I thank the Senator.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MILLER. Mr. President, I rise in support of the committee-passed farm bill and to express my hope that we can complete action on it quickly.

First, let me commend Chairman HARKIN and the majority leader for their fine work in meeting the needs of the Senators from different regions of this great and diverse country. We all have unique needs. It is not easy to address all of them and to bring them together. I thank the chairman, again, for his efforts to do so.

I think we have come up with a good farm bill, worthy of passage. This legislation provides a critical income safety net for American farmers. It includes an unprecedented \$20 billion increase in

conservation spending. It substantially increases allocations for nutrition, for rural development, and forestry programs. This bill meets the needs of our rural communities while remaining within the budget authority.

I am also pleased that the chairman has included an energy title in the legislation that provides incentives for alternative fuel technologies. The energy debate over the past few days only solidifies the need for further advancements in alternative fuels.

Let me take a moment to focus on a major reform that is in this bill, a major reform of the peanut program. In a place such as Washington, where talk of eliminating a program is as rare as spotting a whooping crane, we are now ready to eliminate the Depression-era peanut quota program from our Nation's \$4 billion peanut industry. That is worth repeating. Some may think they heard me incorrectly.

There is a provision in this bill to eliminate the old peanut quota system. For decades this system served the South well. For decades it provided economic security to some of our country's poorest areas and it guaranteed the domestic market a safe, high-quality source of peanuts.

But all of that changed when NAFTA and GATT were passed. These agreements effectively ended the peanut program as we know it. Trade protections for peanuts were ratcheted down. Imports gradually increased and farmers' quotas were reduced. In the 1996 farm bill, Congress had decided to require farmers to cover peanut program losses, making it a no-net-cost to the Government. That sounded good politically, but it failed to make peanuts more competitive on the world market and it certainly did not quell imports.

Peanut producers have faced up to this competitive reality. The vast majority are willing to finally give up a program that has served them well for more than 60 years. Yes, it is going to cost some money to compensate quota holders for their losses, but it would be unthinkable for the Government not to compensate farm families for their property. There has to be a bridge between the old system and the new system, and this bill gives us one. It makes that necessary transition and it does it in a fair way.

At a time when we are searching for the best ways to stimulate our economy, this farm bill is the greatest stimulus we can provide to rural America. It will give that economy an instant boost.

If we do not act, I can tell you what the scenario will be in Georgia and in other parts of this country. If we do not pass a farm bill now, local banks will make a fraction of their traditional farm loans. Farmers without financing will either get out of farming or declare bankruptcy. Who will suffer then? I will tell you who. Those farm-

ers, those families in fragile rural areas where the economy is driven by the feedstore and the family restaurant and the local car dealership.

With many textile plants and other industries leaving the rural South, these farmers have fewer and fewer places to turn. In rural Georgia, the challenge today is just to stay afloat. It is becoming tougher by the day. Our Nation's great prosperity over the past decade, unfortunately, has not always filtered down to these rural areas. We have failed to bring many of these communities along economically, and it shows.

We have spent a lot of time looking out for Wall Street, and well we should. Now it is time we look out for Main Street. We need to help places such as Moultrie, GA, and Driver, AR, and Seagraves, TX. Our Nation is focused on the September 11 attacks, and rightly so. But let us not forget that agriculture has been mired in a 5-year disaster, devastated by bad weather and bad prices. Almost every year in this body we have had to provide supplemental appropriations. We need this new farm bill to stop the cycle.

The time is now for a new farm bill. We must act before adjourning for the year. We cannot go home for Christmas with generous, bountiful gifts for certain segments of our economy but only ashes and switches for our farmers.

Mr. SANTORUM. Will the Senator yield for 1 minute?

Mr. MILLER. Yes.

Mr. SANTORUM. I just want to say to the Senator from Georgia, I congratulate you and commend you. For many years we have had battles in the peanut program between those who are peanut consumers in large consumption States and those who are producers, but you have stepped in and provided great leadership for your growers through this transition process. I am very privileged and pleased to join you in a truly unique situation. I think it has not been seen here since the peanut program was instituted. Those who are the consumers of peanuts and those who are the growers of peanuts have found common ground to work on a piece of legislation that will transition us into a whole new era in peanut production.

I commend the Senator for his great leadership from a great peanut-producing State, to help shepherd his growers into a much more market-oriented approach to growing peanuts. I commend the Senator for his great effort.

Mr. MILLER. I thank the Senator for his remarks. He is one who has studied this program closely in the past.

The PRESIDING OFFICER (Mr. NELSON of Nebraska). The Senator from Virginia.

Mr. ALLEN. Mr. President, I rise today to offer my concerns over the action of the Senate in proceeding to the

Farm Bill, notwithstanding the nice dialog between the Senator from Pennsylvania and my good friend from a fellow peanut-growing State, the Senator from Georgia, Mr. MILLER.

I understand the desire to make improvements in the existing farm bill. There should be improvements made. From what I can tell, the House-passed bill and the Senate-Agriculture-Committee-reported bill have several very worthy provisions.

No one can argue against the need for a strong farm bill. Indeed, it is a high priority, and I certainly will not disagree with that. In my home State, the Commonwealth of Virginia, agriculture accounts for a significant part of our diverse economy. Agriculture creates approximately 388,000 jobs in Virginia, which is about 10 percent of the total jobs statewide.

Virginia agriculture contributes about \$19.5 billion to Virginia's gross State product, or 11.2 percent of the total GSP.

Farms cover 8.8 million acres, or 34 percent of Virginia's total land area. There are 49,000 farms in Virginia. Most farms in Virginia are smaller farms, but there are 49,000 of them. Again, a strong farm bill is very important to Virginia.

I do applaud the work of the committee in drafting this bill. However, I have several concerns and I cannot agree with moving forward on this bill right now. Let me elaborate on these several concerns.

Number one, this is not the right time to deal with this bill. The current farm bill, with whatever flaws it may have and whatever improvements need to be made to that bill, does not expire until the end of fiscal year 2002, which is September 30 of next year. We are already several months into the fiscal year 2002. It is simply unfair to our hard-working men and women to make any changes to this legislation that may harm their income in the middle of the current year. They just finished the fall harvest and are now involved in planning, buying, and leasing for the next planting. It would be like lining up to kick a field goal and having the goalpost moved after you kick the ball. After you kick it, nobody is allowed to move the goalpost back. That simply would not be fair. It is a terrible way to make changes, whether it is in the peanut program in particular in Virginia or any other sort of program when farmers are making these decisions.

The second problem I have with this measure being brought up now is that Americans have much more pressing problems to deal with rather than changing a law that doesn't expire for another 10 or 11 months. We are at war. Financing this war is important, and making sure that the men and women in uniform have adequate compensation is important. It is important that

they have the armaments and the most technologically advanced equipment for protecting our interests at home and abroad. We need to be worrying about that and dealing with the crisis of terrorism. That must be dealt with now.

The Defense appropriations bill: We need to be dealing with proper funding for our Defense Department.

Overall appropriations: The Senate and the House have not completed work on all the fiscal year 2002 appropriations bills, yet we are considering a bill and a law that has not expired and will not expire until the end of fiscal year 2002.

Sometimes I may have a hard time getting used to the logic of the Federal Government—trying to change a bill that has 10 months of validity to it while not even taking care of bills that should have been financing our military or schools since the first of October. These are supposed to be 5-year farm bills. There is a logic to making this a four-year bill. There is a predictability that allows farmers to plan ahead and make investments so that they will grow the best crop possible to provide for their families. That bill doesn't expire until late next year, and here we are arguing that issue.

Meanwhile, we are in a war, and we are not dealing with the Defense Appropriations bill or the Labor-HHS Appropriations Bill. As far as I am concerned, these appropriations bills are some of the primary functions we serve as Members of Congress. The one thing we have to do each and every year is fund the government. We haven't completed that task yet. Those bills should have been completed before October of this year. Here we are fiddling around and debating a very important measure with important implications, but again not taking care of the things that are most timely.

We have emergency appropriations, and \$20 billion in appropriations still has to be finalized by Congress concerning response to the September 11 terrorist attacks. Congress has yet to spend the \$20 billion appropriated portion of the war on terrorism for emergency security, response, and recovery efforts. This issue should be on our plate right now for action rather than the farm bill.

Economic stimulus: We realize our economy has a great deal of consternation. Consumer confidence is low. Businesses are not investing. Jobs are being lost. An economic stimulus package, something that will help spur consumer spending and business investment and thereby the creation of more jobs rather than the loss of jobs—that should be a priority. That is a clear and pressing need for the people of America right now, not a law that expires in October of next year.

Getting hard-working Americans back to work is a priority. Our econ-

omy has lost thousands and thousands of jobs and these job losses are not unique to the airline or tourism industry, or even to New York or Virginia. They are felt in every corner of the country and in every industry. As the Senator from Georgia mentioned, we have lost a lot of textile jobs in the South. In Southside, VA, 2,300 jobs were just lost at VF Imagewear in the Henry County area—in the heart of Virginia.

The President's back-to-work package is a way to help those folks who are out of work—hopefully temporarily—with their health care as well as with their unemployment benefits. We need to help these people through tough times and most importantly, strengthen the economy to enable them to get back to work. That is a part of the stimulus package that I wish we were arguing, debating, and acting upon at this moment. But we are fiddling with this bill that doesn't expire until next year.

Nominees: The President ought to have his team in place. I know the Senator from Georgia at one time was an executive. They need their own team in place to respond and to effectuate their philosophy, to act upon the principles, promises and policies that they enunciated to the American people. Yet the President has not gotten the deserved attention to have his nominees for key administration positions—whether it is in the State Department, judicial arena, or in other areas.

I think the Government needs to have capable people to do the work of the Government. Senator BOND spoke on this matter earlier and I agree with his remarks.

Energy legislation: I very much agree on the need to pass comprehensive energy legislation that deals with both supply and demand issues. That is a positive aspect of this farm bill that the Senator from Georgia, Mr. MILLER, brought up. Fuel cells and new technologies are very important. We can't keep doing things the same old way. We need to have a diversity of fuels and not be so dependent on foreign oil. I would like to see us become more energy independent in this country so that we are not jerked around by monarchs or others in the Middle East for our reliance on oil, which matters a great deal for our economy, and clearly it matters to farmers. When diesel prices or gas prices are skyrocketing, they are put in quite a bind.

An energy bill, which has consisted been advocated by Senator MURKOWSKI of Alaska, is something we have been trying to deal with for this entire year. It is an important issue that has been dealt with in the House and deserves the Senates attention.

We are at war in Afghanistan. We also have a war on the homefront as well. We have become the target of domestic terrorism that is accurately described as war. We need to make sure

that in our homeland we have the right safety and security—not just abroad but here at home as well.

The farm bill, in my view, is not a piece of legislation that should be rushed into. I believe Senator CONRAD accurately portrayed why we may be pushing this legislation forward. He explained that issue very well. He said: "The money is in the budget now. If we do not use the money, it will very likely not be available next year." While what the Senate Budget Committee says may be true, it is not a good reason to rush through floor consideration on a piece of legislation as important as this one. The farm bill is an important matter. It merits time, consideration, and full debate on the floor. With all of the other priorities that the Senate really must consider prior to recess, it doesn't make sense to hold them up for the farm bill.

I am not a member of the Agriculture Committee and was therefore not able to offer amendments in the committee. I look forward to the opportunity to work with committee members and potentially offer amendments on the floor.

I also understand that the committee markup was not very open to amendments. While I am sure there was a significant amount of wonderful work done by the chairman on the bill, I know there are significant differences even within the Agriculture Committee. These differences are obvious even to someone who is not on the committee. Especially when you look at the number of competing bills introduced by committee members themselves. First there is the Harkin bill which was passed by the committee. There is a Lugar substitute, and the Cochran-Roberts substitute is a third measure. There is a fourth measure being considered, the House-passed bill, and the fifth is the Lincoln-Hutchinson bill.

I heard from people all across Virginia about many of the positive changes that several of these bills would make. However, I also heard from Virginia peanut farmers who have a different view than peanut farmers maybe in Oklahoma, or New Mexico, or Texas, or even the Empire State of the South, Georgia. That is my third concern. The peanut farmers in Virginia may very well go out of business with this measure as written. This new peanut program will hurt the income of hard-working Virginia peanut farmers.

In 1996, when the Federal Government last debated the farm bill, the target price was lowered from \$670 per ton down to the current level of \$610 per ton. This \$610-per-ton level is not due to expire until the end of fiscal year 2002—September 30, 2002.

These peanut-growing farmers in Virginia have sense and practicality. They have already entered into agreements for land. They have entered into agree-

ments for equipment leases as well as renting quota for the upcoming growing season. They will be planting in Virginia only about 5 to 6 months from now. That is simply the planting, and these farmers are certainly in the midst of preparation prior to planting right now.

This farm bill will change their revenue stream after they have already entered into contracts based upon the provisions in the current farm bill. People in the real world think that law doesn't expire until September 30 of 2002. They think that law is going to be there. They make decisions based on that law. Here we are debating changing the rules on them.

The bottom line is that it is simply not fair. It is not fair to our hard-working farmers who have to be dealing with a moving target.

I have been working on these issues with members of the committee and other concerned Senators and look forward to the opportunity to make some changes that will benefit the hard-working family of peanut growers in Virginia and, indeed, every farmer, regardless of crop throughout our country.

Virginia's peanut farms cannot withstand another 10-percent reduction in the price of peanuts as we saw back in 1996. This current farm bill, as proposed, will do just that and then some. Virginia has about 76,000 acres of peanuts and 4,000 peanut growing farmers. The crop brought in \$60 million to the State's economy last year. While these numbers may not look large to some Senators who have large corporate farms in their States, these peanut farms are the basis of many local rural communities, particularly in southeastern Virginia. And there are different types of peanuts. I am not going to name every one, but in Virginia we grow the jumbo—the nice, big peanuts. You may see the brands Whitley's or the Virginia Diner peanuts, the Hancock peanuts, the blanched peanuts. Those are Virginia-style or sometimes called Virginia-Carolina style peanuts—the jumbos, the big peanuts, not the small, little redskin peanuts or the Spanish peanuts, goobers, or runters. Those are all fine peanuts as well. You just have to eat two of them for every one of a Virginia peanut. They are probably just as great for peanut butter and candies.

Most of the States are different. Virginia grows this different type of peanut. While it is larger, it does get a lower yield per acre than you would with the smaller peanuts, and they also have a higher cost per acre. Our peanut farmers in Virginia risk having their revenue cut to a point where they will lose money on each pound that is produced. Again, it is a different peanut than is grown in other regions of the country. And while that raises our costs, it unfortunately does not often

equally raise the price that the farmer receives. So a tough situation now would just become disastrous if this measure became law in the middle of this year, or, for that matter, even after 2002.

The situation here is one where our economy would be affected. The farmers, in particular, who have purchased equipment, who have made leases on equipment, on implements, on fertilizer—I know the Presiding Officer understands because in his State they have a lot of good rural communities—if there is a good crop that brings in a good yield, sure, that helps the farmer, the implement dealer, those who sell feed or seed or fertilizer, but it also has an impact on the entire community with the money that comes into the businesses there, such as grocery stores and restaurants. It has a big impact on that economy through both direct and indirect means.

Having met this summer with a great deal of peanut growers in southeastern Virginia, it reminded me of when I saw the tobacco farmers just a few years ago, where they were trying to get the best yield per acre they could get and they were under attack by officious nannies from Washington, who are looking to reform somebody else's habit, and here are these communities wondering how they are going to survive. They are simply hard-working law abiding men and women trying to provide for their families. And these proposed changes don't only affect them—it affects their whole community. It is not a matter of humor nor to be taken lightly. Their livelihoods are at stake.

So I say, number one, this is not the right time to change the law before it expires. Let the law expire before you change these laws affecting these peanut farmers. Number two, we have much more pressing issues on which to be focusing our current attention and our brainpower, whether it is supporting our war effort, addressing our economy, getting people back to work or gaining energy independence. And number three, I think this would have a terrible impact on Virginia's peanut farmers and their communities.

I find it completely wrong for the Federal Government to change, at this time, a law that many good, decent, hard-working, law-abiding citizens have relied on. To do that would put a lot of people out of business. And any new law should take effect after the end of the current farm bill.

So with that, Mr. President, I thank you for your attention. I thank my colleagues for their attention. And I hope to be able to work with all of you in the months ahead to come up with a peanut program that is good for the taxpayers, and also one that allows Americans to enjoy the benefits of good, wholesome, nutritious peanuts as well, and takes into account fair practices as far as legislating up here. And

we should not change laws before they expire, especially when so many people have relied on those laws. I especially hope that Virginia peanuts will always be around for all of us to enjoy.

With that, under the provisions of rule XXII, I yield my remaining time to the ranking member of the committee, Senator LUGAR.

The PRESIDING OFFICER. The Senator has that right.

The Senator from Colorado.

Mr. ALLARD. Who controls the time?

The PRESIDING OFFICER. Under cloture, there is no control of time. Each Senator has a maximum of 1 hour.

Mr. ALLARD. One hour.

The PRESIDING OFFICER. One hour.

Mr. ALLARD. Mr. President, I thank you for recognizing me and giving me an opportunity to rise today to talk about the farm bill which the Senate is debating. I would also like to thank and commend the Ranking Member of the Agriculture Committee Senator LUGAR for his leadership during this debate. As a member of the Senate Agriculture Committee, I participated in the drafting of the bill which we are now about to consider. Also, when I was in the House of Representatives, some 5 years back, with the passage of the freedom to farm bill, I was on the Agriculture Committee on the House side.

I think this is a great opportunity for us to do some good things to help agriculture in this country. However, it is an opportunity to do the wrong thing. I do think we have to be careful about moving forward too quickly on some of this legislation without giving our farmers and our ranchers and the agricultural interests in our various States an opportunity to study what is in the bill to give us a full assessment of how it is going to impact businesses in their various States.

In the State of Colorado, agriculture is very important. We have always worked on trying to have a broad, diversified economy. So we have other industries and other sources that broaden out our economic base in the State.

For example, in Weld County, this is a county frequently recognized as one of the largest agricultural producing counties in the country, usually rated in the top 5, based on gross agricultural dollars that are brought in.

I have another county in northeastern Colorado that produces a lot of corn. It is one of the largest corn-producing counties in the country. Again, this varies a little bit depending on weather and how yields come out year to year. So certainly agriculture is important to the State of Colorado.

As a member of the State senate—I also served on the agriculture committee in that body—we continually worked to have a broad base.

In the State of Colorado, not only do we have some counties that contribute considerably to agriculture in the country, but they also add a lot of opportunity for other businesses in the State of Colorado to develop added value to those agricultural products.

We all want to do the right thing and help the agricultural economy. But everyone needs to have the opportunity to review the legislation to understand how it effects them. This is not the bill that was reported out of committee, however, nor the one which was introduced on November 27. So it has been a little difficult to determine what is exactly contained in this particular bill. Farmers in Colorado, as best I can figure out, would probably do best under the Cochran-Roberts proposal. But, again, we need more time, more opportunity to talk with farmers in the State of Colorado.

We certainly have different types of operations. Some of them that we have in Colorado are strictly ranching operations. We have a lot of wheat operations, irrigated agriculture—vegetables. We need time in our office to begin to assess how these various agricultural operations are going to be impacted by a bill as complicated as the farm bill that we are about to consider on the floor of the Senate.

This has been an interesting process to go through this past couple of months as we have attempted to draft a bill. I have been somewhat skeptical, as we drew to a conclusion to get a bill here to the floor. The current farm bill, the Freedom to Farm bill, does not expire until September 2002. Again, I do not fully understand why it is so important we push forward so quickly because I think input from our agricultural interests in our respective States is very important. If this goes through too quickly, they will be divorced of that opportunity to have their input to their Representatives so they can have an impact on the agricultural legislation.

I was a member of the House Agriculture Committee and supported the provisions contained within Freedom to Farm. I did not think it was necessary to rewrite the bill a year earlier. But here we are, ready to rewrite the farm bill.

It is complicated. As I stated, I have some problems and concerns about the legislation and how this bill moved forward. This has been a trying time for the Senate, for example, with the anthrax problems we have had in the Hart Building which has impacted some 50 of our colleagues. It has been difficult for them to get in touch with their records that are embargoed within the building. It has made it difficult for colleagues who have been on the Agriculture Committee—and I suspect it would have an impact on Members here on the floor—to evaluate what their positions are, as far as a major

piece of legislation such as the agriculture bill, without full access to their office resources and files.

So as we move forward in an expeditious manner, we put certain Members of this body at a disadvantage. We have to be sensitive to their needs and their desire to do the best job and represent their constituents.

In my office, we have been hosting several staffers of Senator CRAIG THOMAS. I am sure it has been difficult to continue to operate throughout this process. It is an unfortunate situation, and I am sure it has not helped the drafting of sound legislation.

As for the process with which the farm bill moved through the Senate Agriculture Committee, we were not receiving legislative language until about 1 to 2 a.m. in the morning on the same day of the bill markup. It was hardly sufficient time to fully analyze and assess its impacts.

Generally speaking, most of the titles were agreed to on a bipartisan basis. As the Chair knows, so many of these issues break out on a commodity basis and not on a partisan basis.

During the committee markup, I did support an alternative commodity title offered by my colleagues, Senators ROBERTS and COCHRAN. The fundamental component was the establishment of farm savings accounts.

Rather than continue to rely on Federal subsidies during bad times for farmers, many in Congress believe farmers and ranchers should have the opportunity to set up accounts to set aside income during the years in which their income is high so that they could then withdraw funds in years when their incomes are low. Unfortunately, this alternative was defeated in committee.

I see this provision becoming more important as we see the price of implements used in farming, for example, get more expensive. If you have a large farm operation, it is not unusual to see somebody spend \$100,000 for a tractor. I remember when I was a young lad working in the hay field, we had a large tractor. We spent \$4,000 or \$5,000 on it. When you have high costs on your implements, that means you have to accumulate savings over the years in order to be able to afford that tractor.

If you have a year when you have a good return on your commodity prices and the farm does well, you may end up with a considerable amount of income. But you find yourself as a farmer getting kicked into higher income tax brackets. So instead of being able to set that aside for investments that will help you be a better farmer and produce better in future years, you find you have to hand the dollars over to the Federal Government. So the idea of the farm savings accounts is, during those years when you have a lot of revenues coming in, you can set that aside for future years.

Then when you get into years when you don't have as much return on your crops, then you can carry those profits forward and distribute them out over the years. That has profound impact on farm operations today and is something that should be implemented.

I indicate my strong support for an upcoming amendment to be offered by Senators ROBERTS and COCHRAN. When putting a farm bill together, my philosophy is to let farmers do what they do best, and get the Government out of the farm. Unfortunately, the farm bill that came out of committee and which is now being considered does not do that. It moves us back towards more Government intervention and less towards free markets and free enterprise.

Senators ROBERTS and COCHRAN are to be commended for developing a sound alternative to that which came through the committee. This is a solid proposal they are going to introduce. It needs serious consideration by the Senate.

An important component of the farm bill is the research title. As a veterinarian, this is an area in which I believe strongly. If we are going to continue to have an abundant and safe food supply, we need to continue to fund our Nation's research priorities. I was able to include two provisions which I believe are extremely important.

The first allows for research on infectious animal disease research and extension to allow grants for developing programs for prevention and control methodologies for animal infectious diseases that impact trade, including vesicular stomatitis, bovine tuberculosis, transmissible spongiform encephalopathy, brucellosis and *E. coli* 0157:H7 infection, which is the pathogenic form of *E. coli* infections.

It also set aside laboratory tests for quicker detection of infected animals and the presence of diseases among herds, and prevention strategies, including vaccination programs.

This is becoming a smaller world. Not only do we need to be concerned about diseases that are naturally occurring, but we need to be aware and cognizant of the potential impact of diseases that don't occur. For example, we saw the profound impact of hoof and mouth disease in countries such as England and the devastating impact on the livestock industry in that country. We need to make sure that we have the research in place in this country where we can develop modern technologies and that will help protect the livestock industry.

The second provision I had put in the bill establishes research and extension grants for beef cattle genetics evaluation research. It provides that the USDA shall give priority to proposals to establish and coordinate priorities for genetic evaluation of domestic beef cattle.

It consolidates research efforts to reduce duplication of effort and maximize the return to the beef industry and also to streamline the process between the development and adoption of new genetic evaluation methodologies by the industry; and then to identify new traits and technologies for inclusion in genetic programs in order to reduce the cost of beef production to provide consumers with a high nutritional value, healthy and affordable protein source.

Research, in my view, is fundamental. It is extremely important that we have the research base there to continue to improve production in order to deal with infectious diseases that affect plants and animals and to help assure a high quality food supply.

I do think the people of this country have a great deal. They have the best quality food at the most reasonable price of any place in the world. That is something to be proud of. We need to do everything we possibly can to make sure that we maintain our position in the world.

A couple other provisions are in the bill. There are some attempts within the bill to deal with alternative fuels. It is something I have worked on. I established the renewable energy caucus. I believe that renewable fuels is certainly something we need to look at for energy independence instead of war dependence on energy sources particularly out of the Middle East. We need to look to agriculture to help us meet some of those energy needs.

I also have a provision in there to deal with cockfighting. It is an attempt to try and protect States rights. The State of Colorado, along with 46 other States, have all passed laws against cockfighting. We have three States that have not.

However, Mr. President, those states that have chosen to outlaw cockfighting have difficulty enforcing their own laws. As a result of a loophole in the Animal Welfare Act, which specifically excludes live birds from the interstate transport ban, individuals who are caught with fighting birds can avoid being detained by law enforcement by claiming that they are transporting the birds to a state in which cockfighting is legal. Game birds are the only animal for which this loophole exists and this is unfair to the states that have chosen not to allow cockfighting.

My attempt is just to make sure that we don't preempt the States in a way through this Federal loophole that they can't enforce the law they passed. This is an important provision—something I have worked on for almost 3 years. It was passed by a strong majority in the House Farm Bill and has been passed previously by the Senate. It is my hope that we are able to retain this language in the final version of the Farm Bill.

Mr. President, agriculture is important to this country. It is important to States such as mine and certainly important to the Senator who is presiding over the Senate at this particular time. I think we all have a common interest. We want to see our farmers and ranchers be able to stay in business, and we want them to be able to compete in a world market. We need to work to expand not only our international markets, but also our domestic markets. Sometimes that requires thinking beyond the box. It is a challenge for those of us who are looking at establishing the proper public policy that would allow our agricultural sector to continue to grow and prosper.

This is an important piece of legislation. I hope we don't rush it through to the point where we haven't given the various agricultural interests an opportunity to have their input as to what the final outcome of this bill will be.

I hope that we allow enough time for them to participate in the process. It is important that we do the right thing. We can do that if we allow plenty of opportunity for everybody to participate.

Mr. President, I yield the remaining time to the ranking member of the committee and look forward to working with him on this legislation.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I thank the distinguished Senator from Colorado for yielding that time. I thank him even more for his message. It has been a genuine pleasure to work with him on the Agriculture Committee in trying to formulate good legislation. I look forward to supporting the ideas he has presented this afternoon.

Mr. President, as a part of the background for our debate, we ought to consider carefully the status of the farm economy presently. Many views have been given, and they are earnest views of Senators and their States' particular agricultural interests.

Let me review a summary of where we stand at this particular point in the year 2001. Current USDA forecasts suggest that the underlying farm economy, exclusive of Government payments, is stronger this year than last. While U.S. agriculture continues to face the prospects of somewhat reduced income and outgoing structural change, many indicators remain favorable. The indicators that remain favorable are: Exports are up; asset values for agriculture throughout the country are up in the aggregate; debt levels are down; the rate of inflation for the overall economy, of course, has been down; interest rates are down; productivity and prices appear to be strengthening.

Clearly, in the soybean and corn markets, which I know the occupant of the chair watches, as I do, we have seen mercifully an upturn, after bottoming out. In any event, the price levels across the board for all crops appear to

be slightly stronger than last year. World markets are extremely important to us, and this is why we are all encouraged that export sales apparently will finally come in somewhere close to \$53.5 billion in 2001, as compared to \$49 billion a year ago, an increase of \$4.5 billion. They could grow to as much as \$54.5 billion in 2002, according to USDA's best projections. These levels are still below the record levels of 1996, often cited primarily in response to continuing problems in Asia, and production increases by competing exporters—many of them in Latin America.

Nevertheless, the sales appear to be increasing significantly. Year over year, forecasts of grain, poultry, and horticultural exports in 2002 will exceed 2001, largely due to increased volume. Exports to major U.S. markets in Asia and the Western Hemisphere are projected above 2001, even in spite of slowing economic growth or, in some cases, recession in those areas.

Overall farm income has this projection: The intermediate term economic outlook for agriculture is uncertain, as always. It is clear that many underlying farm economic conditions are stronger this year than last. Farm cash receipts could be near high record levels for 2001, and, indeed, earlier this morning I discussed this subject. We found figures from USDA that showed roughly \$60 billion of net cash income. This would be, in fact, a new all-time record for any year, including 1996.

Farm cash receipts have been driven largely by a 9-percent increase in livestock sales. Overall crop sales appear to be up about 3.1 percent. Gross cash income is up 4 percent and net cash income is up 5.7 percent over last year. The \$20 billion in payments from the Federal Government, including the AMTA payments, which we voted on in the summertime, come to \$20 billion less, in fact, than the \$23 billion that the Congress allocated last year. That is significant because the net cash income record was received, even though Government payments have come down this year by, apparently, something close to \$3 billion.

The projected increase in sales in 2001 will more than offset the modest decline in the Government payments and could boost cash income to \$239.3 billion, up significantly by \$9.2 billion from last year.

I mention all of this, Mr. President, not that these are figures that are likely to lead anyone to a false impression about agricultural prosperity but it seems to me important because this debate thus far has been about a necessity of having the farm bill passed during this calendar year. One of the reasons offered by some Members has been the gravity of the situation for many farmers. Each one of us has many such farms in our States that are not working well. But the overall picture is im-

portant. The overall picture is one of higher net cash income.

I found it to be extremely important to study the USDA tables on farm balance sheets. One of the factors of obvious debate that always seems counterintuitive to many who listen to them is that, each year, I and others have made the point that the total value of farms in America has been growing. By that I mean the estimates of the total value of farms, the equity, after all liabilities, real estate debt, or any other farm debt have been subtracted, is \$1.36 trillion. That is up from \$1.4 trillion last year.

In other words, the equity in farms in this country—the bottom line is there has been an increase of 3.2 percent. That is not unusual. Simply tracing back over the course of time, USDA points out that in 1995, the net equity in farms in America was \$815 billion.

In 1996, often cited as the high water mark in terms of farm prices and prosperity, farm values were \$848 billion, but in 1997, this went to \$887 billion, in 1998, to \$912 billion, and in 1999, to \$964 billion. Last year, it went to \$1.4 trillion, and this year it went to \$1.36 trillion.

Throughout this time, however—Senators wish to argue the ups and downs of agricultural prosperity or difficulty—the value of their farms went up every single year without exception. Many have asked: How can this be? I have tried to answer that question in earlier statements.

The programs we have adopted, for better or for worse, finally add up to more land value. They go essentially to landowners. That is capitalized in the land. They are able to borrow more on it, and they become more prosperous. The market value is higher because a stream of payments guaranteed by the Federal Government appears to be behind those values.

Some, without being spoiled sports, have raised the question of whether these land values have a reality to them that is solid for the future. They have not suggested a so-called bubble effect that land values, much like communication or telecommunications firms in our economy in the last 2 years, simply exceeded the potential for income streams that might come from them.

Nevertheless, it is difficult to argue that these land values, increasing each year, do not have built into them certain expectations of Federal policies that are very generous.

Perhaps over the course of the next 5 years, or in the case of the House bill the next 10 years, the general public in the United States; that is, taxpayers, everyone who is not a farmer, are prepared to make very large transfer payments of their moneys to those who are farmers and to do so in such a predictable way that anyone who owns land can anticipate that kind of flow. It

would have no relationship to whether or not there was an emergency. It simply is a guaranteed transfer of payment with the same certainty as a pension right or some other property right involved.

That is a judgment for Senators, Members of the House, and the President to make, and we all have our different views on this issue.

I have always wondered whether those who are not farmers understood the transfer that was occurring and the seeming permanence of that, as opposed to payments that came in emergencies.

Senators have risen throughout this debate and condemned the farm bill of 1996 as a terrible failure, pointing out that it is so bad that we are compelled as Senators to meet almost every summer and vote to send more money to farmers.

With some degree of political realism, I would say the compulsion for us to meet every summer to do this is probably being propelled much more by our own desires. To a certain degree, I have noted an amount of political competition in this—some persons purporting to be stronger friends of farmers than others, all believing we ought to be able to help out by sending more money in that direction. There has been no reticence on the part of Senators on both sides of the aisle to vote this money.

I predict, I think without being too far off the mark, that whatever kind of a farm bill we finally enact this time, there may be those among our number who will ask us each summer to come to the Chamber to vote more money, to supplement whatever it is we have done. In other words, I have never found in my experience in the Senate that the issue is ever settled. The emergencies occur every year and in many parts of the country and sometimes vary widely. Let me offer a reason why that is so. This is not a cynical reason. This is a reason rooted in the reality of my own experience.

One of the questions I frequently ask witnesses before the Agriculture Committee when we are having debates on programs or incomes is to give me an estimate of the return on invested capital that they obtained from their farm operation.

Most witnesses, even those who are fairly sophisticated, do not know. They really have not thought that problem through. They say that is almost irrelevant: My problem is keeping the farm alive, keeping the dairy operation alive. I do not know what the return on investment is; the problem is paying the banker and having enough capital to buy new equipment to be competitive.

I understand that, but it illustrates part of the problem. When I have had discussions with very prosperous farmers in Indiana, whom I respect for their

abilities and have learned a lot from them, their answer to that question is usually a 3 to 5-percent return on invested capital over several years. Some years it is much better, but some years it is close to a wash.

Some suggest, of course, that depends on how leveraged the farm is. If, in fact, a very valuable property has an almost equally valuable mortgage on it, the amount of equity that the farmer has in play is fairly small; therefore, any income fluctuation makes the return on income either go up or down very rapidly.

Let us say for the sake of argument that the farm has no debt. That has been essentially my case for many years, and my own experience has been roughly 4 percent on invested capital. When that figure arises in a forum that is not a farm meeting, many people raise the question: That is pretty low for a large enterprise over a long period of time. For example, many people who are skeptics about this would say you could have gotten a 6-percent return just by investing in U.S. Treasury bonds for 30 years during many recent periods. For that matter, prior to this lower interest rate period we are in now, you probably could have bought the bonds maybe even for 7, 8, or 9 percent at different times during this decade, with absolutely no risk economically, no risk from markets drying up abroad, no risk from the weather.

This raises the question: Why is \$1 trillion of American capital tied up in farms—which, indeed, it is—2 million such entities, at least with the definition of \$1,000 in sales?

The reason ultimately, in my case, as well with most people, is that we like what we are doing. Frequently, it is a family tradition. That is my case. My dad bought the farm 70 years ago. It is something very important to me as a person. It is more than simply a business enterprise. But I have to recognize there are alternative things I could do with the capital and probably do better than 4 percent. This 4 percent is anecdotal in a sense but not entirely.

If, in fact, as the distinguished chairman of the committee pointed out this morning, net farm income in this country for 2001 is 49.4 percent, and you factor that with a divisor of \$1.36 trillion for the value of real estate and so forth, you come to something like 4.8 percent. Taking a look at all of American agriculture, that net was earned on this amount.

So my experience is not too far away from the mainstream, which is comforting to know, but not for farmers generally because there is not much leeway.

I suggest the reason we have debates almost every year is a good number of farmers do not have any leeway. If farms that are fairly large and well managed do no better than 4 percent on average, and in some years 3 percent or

2 percent, situations that are not so well managed, do not have modern equipment, the research into seeds or planting processes, or have not done conservation work that has proper drainage, they are going to have problems meeting it at all every year; there is so little leeway.

Intuitively, we have known it even if we could not quantify it, and our policy has generally been, regardless of which farm bill I have been involved in, to save every family farmer. We have tried, in fact, to think through how there could be a safety net and ad hoc emergency payments and whatever was required. We have not succeeded, although, as I mentioned in an earlier debate today, we have stimulated a lot of people to come into farming, many of them in a small way. It is not a major income. So the numbers of farmers do not trail off as rapidly as they did at the turn of the century, 100 years ago, or all the way through the 1930s. Nevertheless, the concentration into about 170,000 large farms in this country is pronounced. These farms are doing the majority of the business, and about 600,000 farms in America plus or minus a few do about four-fifths of all we do.

Trying to fashion a farm policy, therefore, that fits these situations, these diverse situations, is virtually impossible. At the same time, we have tried—all of us have tried. The bottom line has been we have succeeded in good part, but the debate continues because farms that do not make very much on invested capital are in trouble every year.

I do not know the answer to that question. My guess is, in part, it is being answered by age. The average age of people who are farming increases. The people who come to the distinguished occupant of the chair and to me, who have, say, a 30-, 40-, 50-herd dairy situation, say: What are we going to do? I am 65, one farmer will say. I would like to retire. I would like to get a pension or my money out of this. The son who is about 40, it is very doubtful whether he wants to continue, whether there is enough for a livelihood at a middle-class level in our society, and they come to us and ask for counsel as to what to do. There is no good answer. It finally has to be a gut feeling on the part of that farmer.

The farm bill on which we are about to embark, if we adopt the bill passed by the Senate Agriculture Committee, in my judgment, makes the situation substantially worse. I do not paint this in disastrous hues. My own judgment is, regardless of what we do, this will not be an irrevocable disaster for the country, but I think some people will get hurt. Among those who will get hurt are probably the small, simply because most of the payments will go to the large. The payments will be much larger than they were before, so the large will be even more consolidated

and confirmed in their situations. Land values will continue to increase, maybe not to a bubble situation but clearly rising on the basis of not much behind them.

The return on capital is still pretty sketchy. If one were to take a look at this, such as the people at the stock market, it would be seen as a pretty precarious kind of investment, and based largely upon the general mood of the public as a whole. Since this prosperity would not have been based on the market necessarily but really on the basis of our political debate and public policy, that which is given can be taken away.

I have no idea what the mood of the Congress will be 2 or 3 years from now, if in fact we have sustained deficits for 3 years as the Director of OMB has prophesied we will. There is no farm program that is engraved forever. We can pass a bill that has 5 years' duration or 10, but each Congress can amend that very substantially and change it materially and must have the right to do so on the basis of whatever the crisis the country faces or its priorities then.

That is why I fear the idea of 5 or 10 years of very large fixed payments to 40 percent of farmers who are in the program as opposed to 60 percent who are not, based on nothing more than the fact that one has been a farmer in the past, whether they are farming now or not. It has some problems to it. They are not being glossed over. I think Senators must understand what they are doing.

Having heard a lot of criticism about fixed payments in the past, these so-called AMTA payments, I am astonished so many Senators are fully prepared to do more of it now really without any limitation. The bill I presented does have limitations. The 6 percent credit that one receives on the basis of all the total whole farm income is finally limited to only \$30,000 a farmer. The Senate Agriculture bill we are now considering could pay as much as \$500,000 to a single farm entity. In fairness to my chairman, Senator HARKIN, who has long believed there were problems in having such distortions, he readily admits in order to obtain a majority support in the committee, he acquiesced to those who wanted more. For all I know, those limits are still being raised, even as we speak, to accommodate the situations of particular crops.

This does not bode very well for the small family farm situation, or the saving of everyone, or the general ethic of the bill that is often presented that way, or even those particular cases of distress in the midst of the overall increasing prosperity I described in the overall report.

These are concerns that have led me and others to suggest alternatives. In the event the debate proceeds, we will

have that opportunity. I utilize this time of deliberate and thoughtful debate on the farm bill to bring forward some of these facts and some of this information.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that I be allowed to use up to the hour of time postcloture that I am entitled to and that I be allowed to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY POLICY ACT OF 2002

Mr. BINGAMAN. Mr. President, today I joined Senator DASCHLE in introducing the Energy Policy Act of 2002. This bill is a culmination of a great deal of work involving several committees in the Senate. In the Committee on Energy and Natural Resources alone, we had over 50 hearings in the 106th and 107th Congresses that relate to this bill.

The staff of the committee, particularly the majority staff, who have worked on drafting the legislation we introduced today, did yeoman's work. I will mention the individuals who worked so hard on this: Of course, Bob Simon, who is our staff director. This list is in no particular order except perhaps alphabetical, although I am not sure that is exactly right. Patty Beneke worked hard on various provisions; Jonathan Black; Shelley Brown helped us with the bill; Mike Connor; Deborah Estes; Sam Fowler, who was the principal draftsman on the bill; Jennifer Michael; Leon Lowery; Shirley Neff made tremendous contributions. Malini Sekhar, Vicki Thorne, John Watts, Bill Wicker, and Mary Katherine Ishee also made great contributions.

So I want to publicly state my appreciation to them for the good work they did.

Although the bill that we introduced today is the culmination of a great deal of work, it is also in many ways just a beginning. It is a starting point for the next phase of the Senate's consideration of energy policy. Senator DASCHLE has indicated he desires for us to bring it up and debate this legislation and the entire subject area during the first period of the next session.

One obvious question is why we invested so much time on this topic of energy in developing this bill. There are two basic answers to that question. First, energy is central to our present and future economic prosperity. Any of us who lived in the last few decades of this country know we depend upon foreign sources for much of our energy. Our economy is vitally dependent upon reasonable prices for energy.

Second, there has been significant changes in energy markets since the last time Congress considered comprehensive energy legislation. The last

major energy bill we passed was the Energy Policy Act of 1992. Since that time, as a nation we have moved further away from command and control regulation of energy toward a system that relies much more on market forces to set the price of energy. In the process, our energy markets have become more competitive, more dynamic, and there have been some significant bumps in the road which we have all observed.

Consumers are now more vulnerable to the vagaries of energy markets and the volatile prices for energy. The structures to regulate these emerging market forces are not fully developed, as we could see very clearly in the last few weeks with regard to the circumstances of Enron Corporation.

Gasoline supplies nationwide have become increasingly subject to local crises and to price spikes due to the proliferation of inflexible local fuel specifications and tight capacity in refining and in pipelines.

Of course, the events of September 11 have caused many of us to reflect on the inherent vulnerabilities of our energy transmission system. The time may be right for us to rethink how we site energy infrastructure, the balance between central and distributed generation of power in our electricity system.

So Congress needs to respond to these changes and challenges and opportunities. If we do so in a balanced and comprehensive and forward-looking way, then we can develop an energy policy that will lead to a new economic prosperity for the country and for the world. But we will not get there simply by perpetuating the energy policy approaches of the past. New ideas and approaches are needed as well as greater investment to move into the future.

That is what this bill we have introduced today tries to do. The bill has three overarching goals. This chart specifies what those are.

First, we try to ensure adequate and affordable supplies of energy from a variety of sources—from renewable sources as well as from oil and gas and coal and nuclear. I emphasize renewables because, as I will indicate in a few moments, that is an area to which we have given too little attention.

Second, the bill improves the efficiency and productivity of our energy use, including energy reliability and the productivity of our electric transmission system and energy use in industry, in vehicles and appliances, and in buildings.

The third overarching goal of this legislation is to keep other important policy goals in addition to our energy policies, goals such as protection of the environment and global-climate-change-related issues—keep those goals in mind as we sort through our energy policy choices.

I think we can achieve these three goals if we accelerate the introduction

of new technologies and if we create flexible market conditions that empower energy consumers so they can make choices that will benefit both them and our society more generally.

This combination of new technology and policy innovation in pursuit of a diverse and robust national energy system can be seen in the provisions of this bill as they relate to the first major goal. This is obtaining an adequate and affordable supply of energy. So let me start the discussion by speaking first about this important subject of renewable energy that I referred to a minute ago.

Our Senate bill contains numerous provisions enhancing the contribution of renewable forms of energy to our future energy mix. Under the "business as usual" approach of the House energy bill, H.R. 4, which has been proposed at various times on the Senate floor, the contribution to our energy mix from renewables will not substantially increase over the next 20 years. The result will be an energy system, particularly for the production of electricity, that will go from being about 68 percent based on coal and natural gas to being about 80 percent based on those two fuels. That overdependence would leave our country very vulnerable to shortfalls in the delivery of either of those commodities. Consumers would be exposed to severe risks of price spikes.

We clearly need more diversity in the ways that we produce electricity in this country, not less diversity. Our overdependence does not make sense in light of the commitments to renewable energy that have been made in other countries, particularly in Europe. This chart demonstrates that very graphically. This chart is entitled "Commitment to Renewable Generation." This is generation of electricity. The percentage increase in nonhydro renewable generation during the 5 years 1990–1995—a 6-year period, I guess—here you can see the percentage increase. In the case of Spain, it was a little over 300 percent. In the case of Germany, it was something over 150 percent—175 percent. In the case of Denmark, it was nearly 150 percent. Then it goes on down until you get to the United States, which is way down in the single digits.

There are countries that did less during that 5- or 6-year period than we did but not many. Even France, which is often held up as a model for its commitment to nuclear power, has outpaced the United States in recent years in its investment in renewable sources of electricity other than nuclear power. The United States needs to lead the world in renewable technologies.

We have abundant domestic renewable resources. The world market for such technologies is capable of strong growth in the future. Renewable technology leadership would help U.S.

firms achieve a strong position in winning those markets and thus creating new jobs in our own country.

If our country is to lead the world in renewable energy technologies, we need to do a better job of getting those technologies into the marketplace in this country.

Our bill that we have introduced today would boost future use of renewables in five major ways. Let me summarize those five ways.

First, the bill contains market incentives that would triple the amount of electricity produced from renewable energy over the next 20 years. Here is another chart that tries to show graphically where we are today, slightly after the year 2000, at less than 5 quadrillion Btus annually. This green wedge shows what we would anticipate as the growth in the production or generation of electricity from renewable sources between now and the year 2020 under this legislation that we have introduced.

These incentives include a renewable portfolio standard that creates a market for new renewable sources of electricity, whether they are wind or solar or biomass or incremental hydroelectric generation from existing dams.

A second market incentive is the Federal purchase requirement for renewables that would grow to 7.5 percent of all Federal electricity purchases by the year 2010. The renewable energy production incentive, which is an existing program to help rural electric co-ops and municipal utilities generate renewable energy, is also reauthorized in this bill and extended to include Indian lands which contain some prime renewable resources. So that is the first way in which this bill would make an effort to boost our future use of renewables.

The second is that the bill being introduced today greatly expands the contribution of renewable fuels such as ethanol and biodiesel-powered vehicles and transportation. By 2005, 75 percent of the Federal Government's vehicles that can burn alternative fuels would be required to do so, creating more market certainty for renewable fuels and their associated infrastructure.

By 2012, 5 billion gallons a year of renewable fuels would be blended into our gasoline, decreasing our import dependence on foreign oil.

The third way in which the bill helps renewables contribute more to our energy mix is by removing existing regulatory barriers that affect renewable energy. For example, wind and solar power can be effectively tapped by small distributed generation systems, but current practices and rules in the marketplace often discriminate against distributed generation. Our bill tries to deal with this problem by requiring electric utilities to offer their customers net metering, in which a customer can offset his electric bill by

the amount of electricity that he generates and sells to that local utility.

The bill also requires fair transmission rules for intermittent generation such as wind and solar.

Finally, the bill mandates easier interconnection for distributed energy production into the interstate transmission grid and requires States to examine ways to facilitate that interconnection of distributed energy into local electric distribution systems as well.

A fourth major way in which our bill promotes renewables is by disseminating information about and facilitating access to areas of high resource potential, particularly on our public lands. There are many places in this Nation and my State that have untapped renewable energy potential. The bill creates a pilot program at the Department of Energy and in the Forest Service for development of wind and solar energy projects on Federal lands.

A fifth and final area in which the bill helps make renewable energy a bigger part of our energy picture in the future is through enhanced research and development programs. These research and development programs in our bill at the Department of Energy will grow from an authorized level of \$500 million in fiscal year 2003 to \$733 million by fiscal year 2006.

I would like to briefly talk about some of the other more traditional energy supply sources in addition to renewables that we try to promote and encourage in this legislation.

Natural gas is one of those in our Nation at a crossroads major policy decision with regard to energy security. U.S. natural gas demand is expected to increase from 23 trillion cubic feet per year. Demand is expected to be about 35 trillion cubic feet per year by 2020. Much of that demand is going to be driven by the use of natural gas for electricity generation because, as we build more powerplants to produce more electricity, virtually all of those new powerplants that are coming on line—not all, but many of those new powerplants that are coming on line—are expected to use natural gas.

As you can see from this chart, which goes from the period of 1970 through 2020, today there is more consumption of natural gas than there is production in the country. But it is not a very major gap. As we move forward for the next 20 years, that gap grows. Our consumption of natural gas is going to increase more quickly than the production of natural gas is expected to increase.

We tried to follow the developments in this field internationally to understand what is occurring. We have a very disturbing development of which I think the Senate needs to be aware and of which our entire country needs to be aware.

As a result of this gap that I have pointed out on this chart, as a nation

we are at the risk of becoming dependent upon imported natural gas brought to our shores in tankers for a substantial portion of the gas that we consume.

The countries on which we would rely for much of that gas are prone to political instability. They are in the early stages of forming an OPEC-like organization for natural gas exporters.

There is a cover story in the June 2001 issue of OPEC's Bulletin that discusses Iran hosting an inaugural meeting of the Gas Exporting Countries Forum.

As a nation, we do not want to be in the position of having to deal with a cartel in natural gas in addition to the cartel we already deal with related to oil.

Our bill takes several steps to come up with a different policy for natural gas.

We increase funding for research to develop domestic natural gas deposits in deepwater areas in the Gulf of Mexico and in harder to tap geologic formations on shore.

We provide research funds to explore the potential of methane hydrates that are trapped on the ocean floor at great depths.

The bill authorizes more funds to facilitate the permitting and leasing of Federal lands for natural gas production in places where that is environmentally acceptable.

The bill addresses a number of developing problems in natural gas production, such as conflicts over coal bed methane and hydraulic fractures and to bring these conflicts to resolution before they reach crisis proportions.

But even these steps, which I believe will be useful and important, will not be enough to close the gap that is reflected on this chart. The most significant step the bill tries to take for future natural gas supply is to provide enough financial incentives so that we see the construction of a pipeline to bring down from Alaska the vast reserves of natural gas that have been discovered and have already been developed in the Prudhoe Bay region.

The Presiding Officer and I had the opportunity to visit there earlier this year. The existing reserves are estimated to be over 30 trillion cubic feet of gas. It is estimated that the total natural gas resources on the North Slope of Alaska could be in the order of 100 trillion cubic feet. A natural gas pipeline from Alaska to the lower 48 States would provide at least 4 billion to 6 billion cubic feet of natural gas per day before the end of this decade.

Once the pipeline is constructed, it would provide gas to American consumers for at least 30 years. It would be a stabilizing force in natural gas prices as well.

The project makes a great deal of sense. But it has not happened because there is a lack of certainty about the

investment risk of building such a major pipeline.

We are talking about an enormous undertaking. The pipeline would be one of the largest construction projects ever undertaken. It would create a massive number of jobs in Alaska, in Canada, and in the lower 48. The project would require the construction of the largest gas treatment plant in the world, and the laying of about 3,600 miles of pipe requiring 5 million to 6 million tons of steel.

The preliminary estimates are the cost would be in the range of \$40 billion. But since natural gas prices vary from \$2 to \$10—which we have seen that just in the last 12 months—per mcf it is hard for the market to take on this challenge by itself. So we are proposing legislation that would expedite the process for permitting, for providing rights-of-way, and certifications that are needed for the U.S. segment of the pipeline.

The Government would step up and offer to underwrite loans for 80 percent of the cost of the line that is constructed within the United States.

There are various other provisions which we think would improve the likelihood that this pipeline would be built in the near future.

I believe it is important for the Senate to be proactive on this project—not simply to sit back, cross our fingers and hope that the various companies that are looking at this decide to go ahead.

If we do not act while there is substantial private sector interest in building this pipeline, we will lose an important opportunity to bolster our national energy security in natural gas.

As a consequence, we might well be hearing speeches 10 to 20 years from now about our dependence on foreign natural gas which would sound a lot like the speeches we have been hearing about our dependence on foreign oil.

Since I mentioned oil, let me say a few things about what we have in this bill related to oil, and the ways we are trying to increase domestic production of oil.

(Mr. DAYTON assumed the chair.)

Mr. BINGAMAN. When you hear all the rhetoric about drilling in the Arctic National Wildlife Refuge—and we have heard various speeches about that in this Chamber—one would think it is the only place in the United States where we could find more oil. That is far from true. There are 32 million acres of the outer continental shelf off the coast of Texas, Louisiana, and Mississippi that have already been leased by the Government to oil companies for exploration and production. They are shown on this map I show you by these yellow blocks.

There is no requirement that any legislation be passed in order for drilling to occur in these areas. These are areas

that have been leased. They can be drilled. We need to do what we can to encourage the actual development of those leases.

In addition to the production off the Gulf of Mexico, there are outstanding prospects for increased production from the National Petroleum Reserve—Alaska.

Again, the Presiding Officer and I had the opportunity to see the promise that some of the oil companies obviously felt about the potential production there.

Under the Clinton administration, the previous administration, leasing was expanded in this area. Industry made some major finds. There is no law that needs to be passed in order for additional leasing to occur in that area. I, for one at least, believe that is an appropriate place for us to be pursuing additional oil production.

If the problem really is not finding areas to lease under current law, then why is there not more domestic production going on in the areas that are already leased for exploration and production? We need to look at that question. That is not a simple question to answer.

We need to look at the differences between our Federal and State royalty and tax policies and those of other countries with oil and gas resources. We have provisions in this bill to try to have that analysis done.

A second proposal to boost domestic production in the near future is to provide adequate funding for the Federal programs that actually issue new leases and new permits for oil and gas production. For all the rhetoric from the administration about the need to boost domestic production, in its last budget request, the administration did not ask for adequate funding to do this work properly. The result of inadequate funding for U.S. land management agencies is delay and frustration on the part of U.S. oil and gas producers. This bill calls for increased budget levels for those functions. The Federal Government can then take the necessary steps to make oil and gas leasing faster and more predictable where it is already permitted.

The bill also contains increased research and development funding to support domestic oil and gas production by smaller companies and independent producers. These entities account for the majority of on-shore U.S. production of oil. They do not have the resources to do their own exploration and production research and development.

Let me say a few words about coal. This is an important contributor to our current energy supply picture.

Fifty-nine percent of our electricity generation nationwide is based on coal. This chart I show you is a good background chart for anyone interested in how we produce electricity in this country. You can see this top line is

coal. That represents the 59 percent to which I just referred. Fifty-nine percent of our electricity generation is based on coal. We have tremendous coal resources. We have been called the “Saudi Arabia of coal” by some.

But coal's place in our energy future needs to be clean and needs to be emission-free. Coal-based generation, as we all know, produces more greenhouse gas emissions per Btu of energy output than does natural gas-fired generation that I was talking about a few minutes ago. Other pollutants from coal-fired plants have been the source of regional tensions between States where coal-fired plants are located and States that are downwind from those plants.

Coal is too important a resource to write off. Technology holds a promise for dramatically lowering, even to zero, the emissions from coal-based plants. This bill takes a very forward-looking approach to the issue by authorizing a \$200 million per year research and development demonstration program based on coal gasification, carbon sequestration, and related ultraclean technologies for burning coal.

The proposal was a result of a strong bipartisan push in our committee by Senator EVAN BAYH and Senator CRAIG THOMAS and is one more example of the crucial role that research and development is going to play—and needs to play—in shaping our energy future.

Research and development are also keys to the future of nuclear power in this country. Nuclear reactors emit no greenhouse gases, so on that basis one would think they are an option that we should be looking at for the future. But nuclear plants have other characteristics that are not as attractive. They have very high up-front capital costs compared to other generating options. That puts them at a disadvantage in the marketplace. The nuclear waste problem is not yet solved. Nuclear safety is a continuing concern for many in the public. Our cadre of nuclear scientists and engineers is growing older and dwindling, and we are not seeing a large supply of students being trained to help us deal with nuclear issues in the future.

This bill takes on these problems by focusing on research and development on new nuclear plant designs that might address these problems and on a program to strengthen university departments of nuclear science and technology.

The bill also contains a partial reauthorization of the basic nuclear liability statute; that is, the Price-Anderson Act. The part that is in the bill deals with liability of Department of Energy nuclear contractors, including the National Laboratories that are a significant source of our national nuclear expertise. The other main part of the Price-Anderson Act, dealing with the commercial nuclear power industry, is being developed by the Committee on

Environment and Public Works and is expected to be offered by them as an amendment when we get to the floor consideration of the bill.

Hydropower is another source of energy supply that this bill addresses related to electricity generation. Many hydroelectric facilities are reaching the age at which their original licenses under the Federal Power Act are about to expire. The process of relicensing these facilities needs to be protective of the environment, predictable for licensees, and efficient in the way it is administered.

We have been working for months with both the hydropower industry and the environmental groups to develop a consensus on how to achieve these goals. There is strong bipartisan interest in moving in that direction. We are committed to working toward this end. We have worked with Senator CRAIG extensively on this issue. We look forward to continuing that communication and hope that by the time this bill comes to debate on the floor we have a consensus on that issue.

A final way in which the bill focuses on increasing the supply of domestic energy is through a series of provisions facilitating the development of energy resources on Indian lands. Let me say that is an important new area we are trying to put some emphasis on in the bill.

The second of the major overarching goals that I mentioned at the beginning of my comments was this need to use energy supplies more efficiently and productively. So far, we have talked about how to increase supplies of energy through renewables, through oil, gas, coal, hydroelectric, and nuclear.

Let me refer now to parts of the bill that deal with this second overarching goal: how to use energy supplies more productively and efficiently.

As I have mentioned consistently throughout the past year, you cannot have a sound energy policy based only on production or only on conservation. We need to focus on both. Our energy policy needs to combine programs that boost supplies with programs that use those supplies more efficiently.

The first major way in which we can use our energy supply more efficiently is by having an electricity transmission system that is ready for the challenges of the next century. Electricity is essential to our modern way of life, yet our electric system largely operates on a design that is nearly a century old.

We have vulnerabilities in our current system. We just excerpted some of the headlines from national newspapers, and I have put those up here on a chart to remind people of what we were hearing in the news and on television earlier this year.

Let me just read a few of these: "Electricity crisis: The Grinch that

stole Christmas." That was last Christmas.

"Happy holidays. Now turn off that Christmas tree." That was last Christmas.

"California declares power emergency." "Blackout threat remains as California scrambles." "California power woes affect entire west coast." "Energy chief moves to avert California blackouts." "Utilities seek immediate rate hike to avoid bankruptcy." Those are the types of headlines we were seeing at the end of last year and early this year.

We need to address the issue of electricity generation and transmission. The central challenge we face with electricity is to have two elements: First, to have market institutions that ensure reliable and affordable supplies of electricity and, second, to have policies that favor future investments in new technologies that give consumers real choices over their energy use. We have provisions in this bill to do just that.

I could go through those provisions in detail. Since I notice there are others wishing to speak, I will skip over some of these and move on to the highlights of the rest of the bill.

A second way in which we need to increase efficiency in the various uses of energy is in the fuel efficiency of vehicles. The bill contains two provisions in that regard: One that mandates higher fuel efficiency in the vehicles purchased by the Federal Government for civilian use, and a second that provides a framework for the Department of Energy to assist States in expanding scrappage programs to get old fuel inefficient vehicles off the roads. This is cash for clunkers, as it has been referred to by some.

I know Alan Binder has spoken eloquently about how important he thinks it is that we pursue that course both for our energy future and as a way to get cash into the hands of people to stimulate the economy at this point.

Let me move to one other chart to make the point that we do need to deal with this issue of transportation, if we are going to begin to deal with total oil demand in the country. This is a chart that shows U.S. oil consumption in millions of barrels per day. It goes from the year 1950 to the year 2020. This line, which is here at 2000, sort of shows where we are today. You can see that the total oil demand has been increasing and is expected to keep increasing. Total transportation demand has been increasing and is expected to keep increasing.

Domestic oil production has been declining since about 1970. That is not going to change. Domestic oil production is going to continue to decline.

We can affect it. Domestic oil production, if ANWR is opened, will be affected. It will increase it somewhat. That is reflected with this little red

line. But when you look at what are the steps that can be taken that will have a major impact on this total oil demand, this top number, you can see that doing something about transportation demand is by far the largest action that we can take.

The Commerce Committee is having a hearing tomorrow on this very issue. They are intending to develop a proposal to bring to the Senate as an amendment to this bill to indicate a change in the requirements, the corporate average fuel efficiency requirements, the CAFE standards, fuel efficiency standards, and I look forward to seeing what they propose. I do believe it is important we take serious steps in this regard. The House-passed bill did not do that.

We as a Nation have to come to grips with this issue. The technology is there. This is not something we have to go out and speculate on as to whether the technology could be developed that will get us better fuel efficiency. We all know Senator BENNETT, our good friend from Utah, has a hybrid electric vehicle he parks right out here at the Senate steps. I complimented him on it. I asked him yesterday: What kind of fuel efficiency do you get on that car? He said: 53 miles per gallon in town. Now, that is a clear signal to me that the technology is there. We can produce more efficient vehicles. We should do that. We should provide incentives for people to use those.

There are other steps. The Federal Government can do a much better job of increasing efficiency in the energy it uses. We have included various provisions to encourage that. Industrial energy efficiency can be dramatically improved. We have various provisions to encourage that. Commercial and consumer products can be much more efficient than they are, and we have provisions in the bill to encourage that.

There is a new generation lighting initiative in this bill which I believe is a major step in the right direction. We are still using incandescent light bulbs, just as Thomas Edison taught us. There is no reason why we can't be using much more advanced technology which is much more efficient. About 25 percent of the power that goes into most lighting fixtures actually winds up being translated into light. The rest goes off in heat. We can do much better than that. This next generation lighting initiative we believe will help U.S. industry to meet that challenge and help our country to benefit from the development of those new technologies.

We also have a provision for substantially increasing the effort for energy efficiency assistance programs. This is the LIHEAP program, the Low-Income Home Energy Assistance Program. Many people depend upon that as we get into the winter months. You do not know it today by the temperature outside, but there are cold days coming. In

the winter, this is an extremely important program. And also in the summer, when air conditioning is needed, this is an extremely important program for many of our citizens. We propose increases there.

A third and final overarching goal of the bill is to balance energy policy with other important societal considerations. Energy production and use comes associated with a host of consequences for the environment. We need to strike the right balance among energy, the environment, and the economy. That balance is what we are sent to Washington to try to find. This bill addresses the issues in a number of ways. Several provisions of the bill deal with the legacy of past problems posed by energy production and use for the environment.

We have major provisions to focus the attention of the country and the Government on dealing with the issue of global climate change, a proposal Senators BYRD and STEVENS made earlier this year that has been considered in the Governmental Affairs Committee, setting up an office to look at global climate change to come up with a policy and coordinate our governmental response to that issue. That is a proposal the bulk of which we have included in this legislation.

That is a very important part of the bill. I have said from the beginning of the discussion about an energy bill that we needed to have one that integrated energy policy with climate change policy, and we have tried very hard to do that.

We also have provisions in the bill to reconcile energy policy with the needs we have for security of our energy infrastructure. The events of September 11 have caused us to think about potential security vulnerabilities of the energy infrastructure. This is an area where there is a considerable amount of work that has been done, but more needs to be done. We have provisions to focus on the Strategic Petroleum Reserve, to direct the administration to fill the Strategic Petroleum Reserve. We also have provisions related to security of other parts of our energy infrastructure.

Let me say a couple of words about why we have not included a provision in this bill to open the Arctic National Wildlife Refuge to drilling. If you take all of the discussion about energy policy that has occurred in the Chamber over the last 10 or 11 months, you would think that this was the centerpiece, this is the main thing the country needs to be doing to solve its energy problems. I dissent from that view. I do not believe this is the centerpiece of our energy policy. This is a case of the tail wagging the dog.

I do believe that opening the wildlife refuge for drilling is not an essential or substantial part of solving our national energy needs in the future. As you can

see from this chart, it does increase production domestically. It does not increase it to such an extent that our problems of growing dependence on foreign sources of oil are solved.

That debate is one that I am sure we will have, and we have had it already many times in the Senate Chamber. We will have an opportunity to have it again when this bill comes up, and each Senator has a strongly held view on the subject.

Let me put up one final chart and then I will conclude. Earlier this year, President Bush appointed a task force and asked Vice President CHENEY to head the task force and work up a so-called energy plan for the country, look at our long-term energy needs. Although that plan was severely criticized by some, I thought there were some constructive suggestions in it. I didn't agree with everything in it, but I thought there were constructive sections in it.

The administration recommended that the Congress act in 10 different policy areas. We have those on this chart. They range from electricity, to energy tax incentives, expedited Alaska gas pipeline construction, and on down through the list. The House-passed legislation, H.R. 4, which has been proposed here at various times on the Senate floor, addresses 5 of the 10 key areas that the administration proposed that we address.

The legislation we are introducing today addresses 9 of the 10 key issue areas. I am not saying the administration embraces every aspect of what we proposed in each of these nine areas, but in many respects we do believe we are making recommendations that are consistent with that energy plan that was earlier issued by the administration. We believe these issues should not be partisan. We believe there is a great deal of common ground that we can find on energy issues. I look forward to working with my colleagues on the Democratic side and the Republican side in identifying ways this bill can be improved, if there are suggestions out there. The bill is there for anyone to study and to suggest improvements. I think, in many ways, having it available for that kind of scrutiny over the next weeks, until we get into the new session after the first of the year, will be very good and will help us produce a better product for the American people.

I see this as a project that, hopefully, will set the course for our energy policy in this country perhaps for another decade, for some period. It was 1992 when we passed the last major energy bill in the Congress and had it signed into law. There is no reason to believe we are likely to try comprehensive energy legislation in the near term again. I hope very much that we can seriously consider this legislation in the new session of the Congress in February, as

Senator DASCHLE has indicated, and that we can pass a bill on a bipartisan basis and go to conference with the House.

Mr. DORGAN. I wonder if the Senator will yield for a couple questions.

Mr. BINGAMAN. I am glad to yield to my colleague from North Dakota. I compliment him on the very major contributions he made in the development of this bill.

Mr. DORGAN. As a member of the Energy Committee, I am pleased to work with Senator BINGAMAN. He has done an extraordinary job. We have had many Members of the Senate come to the floor of the Senate talking about the urgency of having a new energy policy. I agree with that urgency and that the policy should be new, and I agree it ought to be a balanced, comprehensive policy. The other body, the House of Representatives, wrote an energy bill that I classified as kind of a dig-and-drill bill that is not changing anything very much. It is just trying to produce more of that which we have been using. This legislation enhances production of oil, natural gas, and coal in an environmentally acceptable way. We agree with that proposition. But it is also the case that we believe much more needs to be done.

I wonder if the Senator from New Mexico would describe again the components, other than enhanced production, which we have in this comprehensive plan—the components of conservation, efficiency, and renewable energy, which I think are so important to a balanced energy plan. I wonder if the Senator from New Mexico would especially talk about conservation because I think that is a significant portion of any energy policy that would work in the long term for this country.

Mr. BINGAMAN. Well, I am glad to briefly describe again the main things we are trying to do in the conservation area and increased efficiency area. We are trying to increase efficiency in all aspects of how we use energy—in appliances, residential construction, commercial construction, and increased efficiency with the Federal Government and State governments and schools, school buses, automobiles, and SUVs, and the whole range of places where we use energy in our society, in our economy. We are trying to say we can be much more efficient in the use of energy we produce. There is a great opportunity there.

When the President came out with his energy plan, and the Vice President came out with his plan, it had one statistic that was referred to repeatedly, and that is that we are going to have to build 1,300 new power generation plants in the next 20 years. Well, that is not our analysis. We don't believe that is the case. We think if we take some prudent steps to improve efficiency in conservation, we clearly will need new generation in the next 20 years, but not

anything like the new generation to which the Vice President has referred.

So I think there is a great opportunity here. As the Senator from North Dakota says, we have tried very hard to balance the two—balance increased production with increased efficiency, and move us down the road in a way that is acceptable to the environment.

Mr. DORGAN. The Senator from New Mexico, the chairman, will remember that at a hearing we held with the Department of Energy, I asked the Deputy Secretary what our goals and aspirations were for the next 25 and 50 years, and what kind of energy plan do we have for 50 years from now? What do we aspire to do? What kind of national objectives do we have with respect to supply, and what kind of energy? The answer was, we are going to have to get back to you on that, because they don't have plans 25 and 50 years from now.

The reason I asked the questions, the Senator will recall, is when we debate, for example, Social Security, everybody talks about what will the balance be in the account 30 years from now or 50 years from now. When we talk about energy, nobody is thinking ahead.

That is the point of the bill that has been introduced today. I am proud to be a cosponsor of it. This bill says you have to have balance here and, yes, you have to produce more. But if that is all you do, is produce more natural gas, oil, and coal, then you are consigned to a policy that I call yesterday-forever. Yesterday-forever as an energy policy for this country is shortsighted and foolish. The legislation being introduced today under the leadership of the chairman of the committee is balanced. It includes production, yes, but significant conservation. Conserving a barrel of oil is the same as producing a barrel of oil, along with significant efficiencies and significant new emphasis on limitless energy and renewable energy.

I drove a car on the grounds of this Capitol Building that was run by a fuel cell. There are new technologies, new approaches, new kinds of fuel that are limitless and renewable year after year that we also ought to embrace. Federal policy ought to be the lead in embracing that as a matter of public interest in this country.

So let me again say to the Senator from New Mexico, it has been more than a decade since we have had a comprehensive policy change in energy in this country, one that is thoughtful and balanced and really provides initiative to move us in the direction that would be productive for this country. I think the Senator has provided leadership on a draft of something that is very comprehensive and remarkably refreshing, as compared to what the other body did. I think the other body is saying what we did yesterday, let's do more of tomorrow. That is not a

very thoughtful policy. Let's do a lot of good things that work to move us in a new direction to meet our energy needs.

Again, I asked if he would yield for a question, and I guess I could ask a question, but I did want to say to him that this is good policy. It is not the case that the long-term energy needs of this country will be served in a very comprehensive way if we are able to pass this bill as-is tonight. We won't do that. But does the Senator not believe that this will really advance this country's energy policy in a significant way?

Mr. BINGAMAN. Obviously, I believe it would advance the interests of the country in a very substantial way. I appreciate very much the comments of the Senator from North Dakota. Again, I want to just acknowledge and compliment him on the great contributions he made to the development of this legislation. We have many of his ideas that are central to this legislation.

We look forward to the scrutiny by the rest of our colleagues in the Senate, and I hope very much when this bill comes up for consideration that we will have a good bipartisan vote in favor of it.

Mr. President, I yield the floor. I see there are other Senators wishing to speak.

The PRESIDING OFFICER. The Senator from Louisiana.

Ms. LANDRIEU. Mr. President, I ask unanimous consent to speak as in morning business for 15 minutes.

The PRESIDING OFFICER (Mrs. CARNAHAN). Without objection, it is so ordered.

Ms. LANDRIEU. Madam President, before the Senator from New Mexico leaves the floor, I wish to thank him for his leadership on the issue of energy policy for this Nation and thank him for the way he has worked with me and Senator BREAUX representing Louisiana, which is a producing State but also a State that is very interested in alternative energy sources, particularly from agricultural products, which we think holds a lot of promise.

Many of our universities are engaged in alternative fuel developments, as well as environmental cleanup. I thank the Senator particularly for his willingness to put in this bill significant authorization for the first time for \$450 million for the seven producing States, much of that production being off our coastline. Because of current law, which has been in place for many years, as the Senator knows, Louisiana and other coastal States have been shortchanged because of the impacts that affect our States.

We will be able to use this money to help restore our wetlands which we are losing at an alarming rate. It will help us to provide the critical investments to protect our infrastructure—our pipelines and other facilities—that not

only helps Louisiana but supports the whole Nation, which the Senator from New Mexico mentioned.

I thank the Senator on behalf of all the people of Louisiana and many people in the coastal parts of our Nation for his insight and leadership in including that provisions.

I wanted to go on record this afternoon about this bill and to thank the Senator from New Mexico. There are a number of other good provisions in this bill.

Mr. BINGAMAN. Madam President, may I respond briefly to the comments? The Senator from Louisiana has been a tireless and very effective advocate for her State and for coastal regions generally in this regard.

There are substantial impacts that oil and gas development in particular have had on those regions. We have tried in this legislation to include a provision at her urging that will help provide resources to deal with those impacts. I think it is good legislation. It will be good public policy.

I thank her for her many other contributions to this legislation as well. She is a very valued member of our committee and has made great contributions to various provisions in the bill since the beginning of consideration of it. I thank her very much.

Ms. LANDRIEU. I thank the Senator.

NATIONAL ADOPTION MONTH

Ms. LANDRIEU. Madam President, I want to speak to the Senate for a few minutes on a different subject, but one that is equally important and deserves our attention and focus.

I had hoped to get to the Chamber last week when it was actually November because November is National Adoption Month. I want to spend a few minutes talking about what that means to us as a nation and what adoption has meant and continues to mean and will mean in the future to so many of our families in the United States and around the world.

I also want to talk about all the great successes and celebrations for us to be proud in a bipartisan way. This truly has been one of the issues on which there is unanimous consent and a truly deep commitment on the part of both the Democratic Party and the Republican Party.

I want to spend a few minutes, even though it is December 5, because the schedule was so hectic in the last week, talking about what National Adoption Month means.

Since 1993—so it has been almost 10 years—by Presidential proclamation, the 30 days in November have been declared to be a special recognition of National Adoption Month. During this month, communities, States, and local governments, not-for-profit organizations and adoptive families come together from the east coast, the west coast, the north, and the south to sponsor activities and events to help raise the awareness of the joys of adoption.

My husband and I do not have to attend any of these events necessarily because we live with this joy every day. Our two children are adopted. They are now 4 and 9 years old. It has been the greatest joy of our life. I know the specific stories of hundreds of families. I have held these children in my arms. I have read to them. I have played with them. I have seen them in so many different settings and at so many different ages and in many different physical, emotional, and mental health states; some very healthy, other children with great challenges that God has given them who now have loving parents and the great opportunities these children now have in homes where they can be provided and cared for.

We do not have to go far to these events, but I never tire speaking about it with our colleagues and sharing the importance of it and how proud we are of our success. We recommit our efforts in the month of November to make the way easier, to reduce the barriers that still exist, to recommit our energies to the fact that it should be a God-given right, I believe, and one that we should support for every child to have a family.

God did not create human beings to raise themselves. It just is not possible to do that. Every human being needs to be raised by another human being in a very loving and nurturing way.

For many years, unfortunately, we have had this idea that governments can raise children. Governments cannot raise children; families raise children. Or that some children are damaged goods and they can just raise themselves. No child is damaged goods. Or that children in some way can wake themselves up in the morning even at 3, 4, 5 years old, get themselves dressed, get themselves off to school, feed themselves, care for themselves, protect themselves. It does not happen without a nurturing adult.

Our idea is to talk about the fact that every child deserves a family on which they can count, a family with at least one loving adult, if not two, who will love them, nurture them, protect them, raise them, and give them the opportunities to which they are entitled. We recognize that while we have a lot of successes, we have a long way to go.

Let me share just a few successes. Last year, in 2000, nearly 50,000 children were adopted out of foster care, a record number. That success is built squarely on the shoulders of what President Clinton and Vice President Gore, and now what President Bush and Vice President CHENEY, have committed, which is to help invest resources and help write policies and laws that promote adoption in this Nation.

This represents a 78-percent increase over 1996. There are not many pro-

grams run by the Federal Government, the State governments, or, for that matter, private-sector initiatives or enterprises that can boast of a 78-percent increase. We are proud of our work at the Federal level working with our State governments and, in many instances, faith-based organizations and nonprofits promoting adoption.

Second, because of the work this Senate did, we passed the first international treaty on adoption last year called the Hague Treaty, which is now being ratified and signed by many nations in the world. I specifically thank Senators HELMS and BIDEN for their extraordinary leadership.

While many of the children who are adopted in the United States are born in the United States and then come to families through a domestic system, a growing number of children are coming into this country from other countries, such as China, Russia, countries in South America, and countries in the Mideast.

As this treaty is adopted and embraced by many countries, we are hoping the world—some developed nations, some underdeveloped nations, some nations that are Christian in their outlook, some that have other religious leanings—say with one voice: We believe the world community has a responsibility to see that every child in this world has a home. We wish that every child could stay with the parent to which they were born. That is our greatest hope. We wish we could fix every problem that a family has so those children can be raised in that home into which they were born.

There are terrible circumstances. There is alcoholism, drug addiction. There is abuse and neglect and mental illness and war and famine that separate children from their birth parents. So we cannot leave those children. We cannot say to them: Raise yourself. We have to have international laws in place and policies in place that help to heal that, to give those children, if they cannot stay with their own parent, to be able to have some kind of family to call their own.

I cannot imagine living without having a mother or a father, someone to pick up the phone, even at my age, at any age, to be able to not have someone you can rely on to give you a reference point and stability in your life.

Without this Hague treaty we passed, there are millions and millions of children who will never find a home. Our great hope is this treaty will be implemented with all haste. The State Department is, unfortunately, quite busy with the war effort now, but as soon as it can give its attention, Secretary Powell has assured me he is going to provide the resources necessary to the State Department to get this new system set up. I think it would be welcomed around the world.

The third success we have had, and on which we continue to work, is an

adoption tax credit. If we can give tax credits to some major corporations in this world worth millions and hundreds of millions of dollars, we can most certainly provide tax credits to families who are not wealthy, who live paycheck to paycheck, whose paychecks might be small but their hearts are large, who have loving homes and they want to take a child in.

It is very expensive to raise a child. So the \$10,000 tax credit we can give by doubling the current tax credit and making it permanent will say the Government believes if a private citizen or a family takes a child in through adoption, they are entitled to have some of those expenses written off and we thank them for the contribution they are making to that child's life and we thank them as taxpayers because the taxpayers have to pick up the tab for the raising of that child at higher rates of reimbursement, sometimes as much as \$100 a day for emergency placement or extraordinary fees paid through government agencies. So we are saving ourselves money.

The Senator from Texas, Mr. GRAMM, was wonderful when he spoke about this. When I said the scoring mechanism made us say this tax credit would cost the taxpayers money, he and I entered into a colloquy and we rejected that notion, although technically we were not successful in that, by saying for every dollar we give out in a tax credit, it probably saves \$10 to the taxpayer because these children come off the public roll, come into the loving arms of a family willing to spend the time and basically put sweat equity into the raising of this child, and we are forever grateful. Our tax credit is passed and we now need to make it work for foster care children.

Additionally, the Presidential candidates in this last election, I think for the first time—in my lifetime for pretty certain, and maybe in the history of the country—made adoption a central component of their Presidential platform. So this issue is gaining in strength and is becoming part of the American psyche and conscience, and we are very grateful for that success.

Secondly, while we are very excited and passionate about these successes, we also have a great challenge ahead of us. There are still today 570,000 children in foster care in the Nation, more than half a million children. These are children who have been taken away from their birth parents for many good reasons. Hopefully, many of them will return to their birth parents in an atmosphere of safety and security, but the parental rights of some of these children must be terminated because they are at risk, their life is at risk, unfortunately. There are about 130,000 of these children of all ages and shapes and sizes and colors who are waiting to be adopted today.

I want to share in a couple of weeks from now that we are going to host a

major national event in New Orleans. We are pleased to host this event. We are excited about hosting it. I am going to be there, along with my senior Senator from Louisiana, at the Super Bowl. We are going to be in a stadium. It is called the Dome Stadium. We are proud of it. It is one of the finest stadiums in America. Eighty-five thousand people can fit into this stadium, and there is going to be a record crowd for that event. There will probably even be a few people standing in the aisles.

The only thing that would make it better is if the Saints were playing in the playoffs and the championship. Maybe that will happen. Anyway, this event is going to take place. When it does, I want people to hear this message and my colleagues to think about the fact there are more children waiting to be adopted in the United States than could fit in every seat in the Dome Stadium, in the aisles, and crowding around the concessions.

So when my colleagues see that panoramic, beautiful view of the Dome Stadium, I want them to think about the fact that in every seat there could be a child saying: All I want is a mother or a father or a family to call my own. I am alone in the world. I need someone to help me.

I want to show some pictures and tell some stories of two of these 130,000 children. This is Joshua and Tiffany. They are twins. They are fraternal twins. They are 5 years old. They are beautiful children. They were born premature, as many millions of children are born premature, some extremely so. They have some developmental delays, but they are generally healthy children. Their favorite cartoons are Barney and Teletubbies. I understand 5-year-olds. I have Mary Shannon who watches not too much television but enough to know who Barney and Teletubbies are.

They say in their bio their favorite snacks are cookies and they love ice cream, but what they really want is a mother and a father to adopt them. They are available for adoption. They would love a family. These children are born healthy and they would be two of the children sitting in those seats in the Dome Stadium. I hope somebody will want to take them in. The government has to do a better job of connecting these children to the waiting families who are out there, and I think we are on the track to do that.

Let me show another picture. This is a precious little girl, as are these two. Her name is Cheyenne. She is from Louisiana. Cheyenne is 6 years old. She was born in 1995. She is bright and charming. She wants to be part of a family. She has beautiful blue eyes. They say in her bio she is a little shy, but if I did not have parents, I might be a little shy, too, because it is your mother and your father who help you

to learn how to communicate, learn how to talk to people.

She enjoys active sports. She does not have a family. So if we could be a little more enthusiastic and committed to helping in terms of all the things we are doing, we can help Cheyenne find a family perhaps in Louisiana.

I see my colleague from Arkansas who has done some beautiful work in this area, as well as my colleague from Virginia.

If we can find a family for Cheyenne so she has somebody to count on and depend on, that is what this is all about.

One of the things we are working on—and, again, there are 160 members of our coalition on adoption; that number is growing—one of the projects we hope to have funded this year is an extension of what we call Faces of Adoption. It is an Internet site. Anyone can log on the Internet at www.adopt.org. This site is funded by the Government in partnership with all of our State agencies, with a nonprofit organization out of Philadelphia, the National Adoption Foundation, which has been sort of the lead nonprofit. I thank the President for putting money in his budget so by the year 2005, if we fund it, we will have pictures and information about every child waiting, like Cheyenne, like the twins, like the other children, some of whom are perfectly healthy, some of whom have challenges. There is not one who would not be wanted by some family in this country.

I am very excited about new technologies that can help connect these children to families. We say there are no unwanted children, there are just unfound families. We should thank the Lord for the new technologies that enable us to tell these children's stories to families and to say that while everybody thinks they want to adopt an infant, and it is wonderful to adopt infants—and we did that in our situation—there are children of every age, every race, every background who could fit beautifully into a family.

I want to share one of the other great successes with my colleagues. It is called Angels in Adoption. So many in the Senate, and I think so many of the people in my State and around the Nation, are angels because they do help to find homes for children and take children into their homes. We call them angels. I don't know if the camera can show my angel pin was designed by an artist in Louisiana, Mignon Faget. We give this pin to the Members of Congress and to our award winners in our States. I will talk about Angels in Adoption.

We were scheduled to do this event on September 11. It was planned a year ahead of time. We had thousands of people in Washington that night for this event. We were going to present these awards to these people. I see my

colleague from Idaho; he was going to be cohosting the event on September 11 with me. Of course, we know what happened on September 11. I spend just a moment to say what would have been said that day, but events prevented going forward with the event.

For the record, let me cite some of the people who would have received the angels award. The idea is for every Member of Congress to find one person in their district—it could be a parent who adopted a child; it could be a judge who works overtime and gets into the office early or stays late or takes a couple of cases extra to help make sure that child gets the home they deserve; it could be a local attorney who does it pro bono but really believes in adoption so he or she gives their time; it could be a church that has taken this as a special mission in their community. The Members of Congress give out these awards I cite for the record.

My award would have been given to Volunteers of America in north Louisiana, a nonprofit that has placed 2,500 children in homes in Louisiana and actually some in Arkansas and in our surrounding region. The reason I decided to give my award to the volunteers was that their board created a video which I saw. I was very moved. It was a story of a birth mother and father, a young couple who just were not quite ready, didn't have the resources or the maturity to raise a child. They made a courageous, selfless, and loving decision to give their child to a family who was desperately wanting a child, to provide a home. That video was so moving and would be such a good example for so many young people to see, I thought they should be given an award so we could distribute that video to communities around the country.

Second, Representative JIM MCCRERY from Louisiana would have given his award to Lillie Gallagher who is an angel in the outfield in Baton Rouge, LA. She is director of St. Elizabeth's, a foundation that was created because an individual—a man—went on a retreat. He believes in prayer. God gave him a vision to create an agency. He did it with his own money and his friends. That agency, without government support, has helped place hundreds of children. Lillie contributes tremendously as the original founder and director of that agency. So she was presented an award. This is just an example.

Senator John Breaux would have presented his award to Linda Woods, a birth mother and an adoption advocate in Louisiana. She has been active on many boards and commissions. Linda is an Angel in Adoption.

And finally, one of my favorites, although it wasn't my award, was the award given by the Congressman from my State, CHRIS JOHN from Lafayette, to Kaaren Hebert. I want to talk a minute about Kaaren because she is an angel whom I hope others emulate.

Kaaren is a young woman. She works for the State of Louisiana. She is a government employee. She is fabulous. She worked in a small parish in Louisiana and was so recognized for her work that she was awarded and given a promotion to be a regional director. So she moved up to be the regional director in Lafayette, which is in south Louisiana. It is a beautiful city. About 250,000 to 350,000 people live in the region. Kaaren, under her leadership, had in 1997 35 adoptions in that region. In 1998, there were 43 completed adoptions. In 1999, there were 66 completed. Under her leadership, she has placed over 459 children out of the Louisiana foster care system into homes in Louisiana. Some of them were placed out of State.

If every government worker did the job that Kaaren did—just 85 percent of her work, not 100 percent—I would estimate there wouldn't be any children waiting in this country, if everyone were as conscientious and as gung ho and as wonderful as Kaaren. She most certainly deserved an award, and she got it, although not publicly because of what happened that day.

I wanted to share a few of the angel stories. But there are remarkable stories from every place in the Nation. We hope the press will write about the stories so it will encourage other people to join in and help.

Finally, several Saturdays ago was National Adoption Day. On that day, 1,000 adoptions were finalized in capitals all across the Nation because the judges and family courts have decided to come together and try to promote adoption on one day.

Finally, I end by thanking my colleagues for their work, acknowledging my wonderful partner, LARRY CRAIG, a Senator from Idaho, as we cochair the adoption caucus in the Senate, and I thank the Senator from Arkansas, the Senator from Virginia, and the Senator from Indiana for their good work and say as we celebrated Thanksgiving last week and as we celebrate Christmas, let us recommit ourselves to the idea that these celebrations aren't really worth having, if you think about it, if you don't have a family with whom to celebrate. Nothing, to me, would be sadder than to have no place to go on Thanksgiving or Christmas. I guess because I come from such a large and loving family, the thought of it is so alien to me, I cannot quite grasp it. But I know there are in this world millions of children who not only have no place to go on Thanksgiving and Christmas, but they have no place to go any day. They put themselves to bed and sleep at night by themselves. I hope we will remember them. Think about their pictures, like Cheyenne. Think about so many of them who just need our people and every government official in this Nation, at the Federal, State, and local level, to do more than we do, including

myself. I recommit myself to do this work even harder during this next year.

I thank my colleagues for their work in this area and I yield the remainder of my time.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Madam President, I wish to commend my distinguished colleague from Louisiana. I have been privileged to serve here many years in the Senate. In the 23 years I have been here I do not know of a single Senator who has ever taken the depth of interest and time and commitment to this ever growing, important subject in our land.

This is not politics. This is not partisanship. This is plainly, simply trying to help those who, for many reasons, are less fortunate than ourselves. I commend the distinguished colleague from Louisiana.

Madam President, I would like to address the Senate briefly on the question of the agriculture bill. The distinguished Senator from Indiana is managing this bill from our side. He and I have been discussing an issue with regard to the peanut section of the bill.

Throughout my career here in the Senate, I have worked with those Senators from the areas in which peanuts have been grown and hopefully will grow in the years to come. We have always been able to reach a meeting of the minds to try to provide, not a tremendous profit, but a reasonable profit for the arduous work of growing peanuts.

In my lifetime I had the opportunity to own and operate several farms. In many years we had a small peanut patch. It is not easy to grow those peanuts. It requires a lot of manual labor. There is a constant battle with disease. Now we see a bill before the Senate, indeed one was before the House, which fractures the coalition of States that for so many years have joined together to ensure that our respective peanut growers have a fair share, an opportunity to have the benefits provided by law for those who toil in the most respected profession of agriculture.

Somehow that fracture, in my judgment, seems to hurt Virginia very severely. Virginia prides itself in growing a specialty peanut. Small family farms in rural areas. I have always enjoyed traveling through those areas. You see the old silos, the old barns, in many parts of the State the old farm machinery. But they are very proud of their operations, whether it is a half acre or 500 acres—whatever it may be. Oftentimes, generations pass down to future generations the various plots of ground on which these peanuts have been grown through the years.

We recognize that as things have changed in this country, more and more we try to establish agriculture on its own two feet, independent from sub-

sidization. We have done our best to preserve the ability of these families to continue to raise peanuts.

Virginia, again, grows a specialty peanut. There is not a Member of this Chamber who has not at sometime enjoyed that rather large peanut. It is anywhere from about three-eighths an inch up to a little bigger than a half-inch. It is quite white after it is finally processed for consumption.

By and large, the specialty peanut is served in dishes and bowls where it can be seen. It is such an excellent peanut. But it is costly to grow this peanut. It has such extraordinary quality it really is not economical, in many ways, for them to break it up and put it into candy and cover it with chocolate. Very little goes into peanut butter. Because of the quality and flavor, and indeed the visual aspects of this peanut are so wonderful that it is served on the family table, particularly at festive times of the year. At Christmas, I would bet half the tables in America will have the quality-type peanut grown in this segment of our country, primarily Virginia, some in North Carolina, some in the other States.

Farmers in Virginia are the ones who are, in terms of the numbers of farmers in it, perhaps the most concentrated in this specialty peanut. This legislation, unfortunately, leaves them behind—and I think unfairly. That is the principal thrust of my comments—fairness. I want to see that our farmers are treated as fair as the other peanut farmers, and that they get a fair return for this particular peanut.

These rural areas are suffering from a loss of jobs. Young people are moving on to other areas of our State and elsewhere seeking jobs. If we do not correct this inequity with regard to the production of these specialty peanuts in Virginia, these rural areas are going to suffer an economic loss, one that on the horizon we do not see a recovery to provide the jobs that will be lost in this peanut industry if this bill is passed as it now stands goes through.

The particular farm bill on which farmers all across our country are operating today does not expire until next September. Yet, for some reason, those who drew up this peanut provision said once the Presidential signature is affixed to this piece of legislation and it becomes the law of the land, the programs under which our peanut farmers have operated since the 1930s are gone. And such support as they receive, really what we call the no-net-cost-to-the-Federal-taxpayer-program, is gone.

At a minimum, it would seem you would allow the peanut farmers in Virginia and elsewhere to finish out this growing cycle, a cycle that started first with the decision of the various farmers not to go for another crop, go to their bank, make their commitments for financial resources, and

begin to till the ground and put the necessary fertilizer and other nutrients in that soil to raise next year's crop. Now all of a sudden, bang—the program stops. That is not the type of fairness our Congress wants to inflict on this very small number of farmers.

I will urge and continue to work with the managers of this bill in hopes that, at a minimum, we can have such effective date of the legislation to enable the farmers to continue this growing cycle under the existing farm bill until it expires next September.

I thank my colleague, the distinguished Senator from Virginia, Mr. ALLEN, who spoke on this earlier.

I yield the floor.

COMMENDING SENATOR LANDRIEU

The PRESIDING OFFICER. The Senator from Arkansas.

Mrs. LINCOLN. Madam President, before I begin my remarks I would, as the distinguished Senator from Virginia did, compliment my colleague from Louisiana who has tirelessly involved herself with the issue of adoption, making it more acceptable, more reasonable, and easier to work through in this Nation. She has done a fabulous job. She has provided leadership and compassion in this area, and I have been delighted to work with her, to learn from her, and to share in the experiences that she can bring back to us in this body to help us, in this great Nation, improve the laws of the land that can reach out to the smallest of our constituents to make their quality of life just that much better, providing a loving home and the support they need.

I wanted to compliment her on her work and encourage her as she has rededicated herself today. I, too, rededicate myself to the issue of adoption and working with our States and families across this Nation and other legislators to improve the approach this government takes on adoption, and to making it a much easier, simpler and encouraging process.

Madam President, I rise today to add my voice to those in support of this year's farm bill, and to encourage my colleagues to join me in bringing this bill to the floor as quickly as we can.

For the last 5 years, our farmers have worked to make ends meet under incredibly difficult circumstances. As prices for equipment, fertilizer, energy costs, and other inputs have skyrocketed, the returns have plummeted. Every year they have harvested their crops without knowing if they will be able to afford to plant another crop in the next growing season.

When I was in the House of Representatives, I opposed the 1996 Freedom to Farm bill because it did not provide adequate support for our farmers. It provided flexibility, and it provided policy—but policy that was dependent on other areas of government for which we did not have the wherewithal to provide the support.

Since that bill passed, farmers in Arkansas and around the country have been in limbo every year waiting for Congress to pass emergency spending bills because the existing farm policy was absolutely inadequate. The United States has the safest, most abundant and affordable food supply in the entire world. But if we are going to ensure that safety and abundance, we must invest in our farmers and rural communities, and we must do it immediately.

We desperately need a farm bill to provide a dependable safety net that ensures not only the financial viability of our farmers but also the viability of local bankers, merchants, and other rural and small town institutions that depend on a safe farm economy.

We need a farm bill that will improve and stabilize farm income by continuing fixed income payments and creating a countercyclical income protection system.

We need a farm bill that creates new conservation incentives and increases acreage for existing programs, such as the CRP, our Conservation Reserve Program; the WRP, the Wetlands Reserve Program; the Equip Program; and many other proven programs that allow us to take marginal lands out of production to use our own resources in our farming operations to be better stewards of the land, and to be more productive in our production.

Rural communities across the Nation will see the benefits of a new farm bill.

As we move forward, we need a farm bill that will spur rural development and expand broad-band access to our rural communities so they, too, can compete in this global economy, and so our producers can access the very Government programs that we want to provide them.

As we have tried to minimize Government in bringing it down and making it more efficient, we are dependent on technology. Yet many of our rural communities can't access the very technologies we are expecting them to use for the programs that the Government provides their producers.

We need to increase funding to land-grant colleges. And we desperately need to improve nutrition and food aid programs, energy conservation programs, and forestry initiatives.

We need a comprehensive package for our farm economy and for rural America. We have produced a good, solid, comprehensive package out of the Senate Agriculture Committee.

This past year, I begged my Senate colleagues to focus on our desperate need for new agriculture policy in this country.

This past year, I have also urged my colleagues on the Senate Agriculture Committee to work hard together to deliver a new farm bill this year—something on which producers can depend, something with which they can go to the financial institution to ask

them for the ability to put next year's crop in the ground.

It is time for us to make that happen, and we can. In these few short days that we have left, we can bring about good, comprehensive, constructive agriculture policy that will help the producers of this country and that will allow them to continue to be the producers of the safest, most affordable and abundant food supply in the world.

But it is going to take us coming together, working hard, and focusing on what we need to complete before we break for the holiday.

I am proud to stand up today for American farmers. I am proud to stand up before my colleagues and beg them to come together and bring about a comprehensive policy that will allow the agricultural producers of my State and other States across this country once again to go back to doing what they do best; that is, producing that safe and abundant food supply in a way that they can be assured their Government is providing them the safety net they need to be competitive with other farmers, and particularly other governments across the globe.

As we look at the export assistance numbers across the globe, we can see that the European Union is consuming about 80-plus percent of the export subsidies worldwide. Our farmers are not competing with other farmers. They are competing with other governments, and it is now time for our Government to stand and say we are going to provide the safety net, and we are going to provide the Government assistance in working with our agricultural producers so they, too, can be competitive.

Today, I urge my colleagues to join me in supporting a farm policy that works for working farmers—a farm policy that we can conference with the House and get a good, solid, comprehensive bill to the desk of the President so we can once again have good, solid, agricultural policy on behalf of the many hard working men and women on family farms today and across this Nation.

Thank you, Madam President. I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. GRAHAM. Thank you, Madam President.

EXPIRATION OF ATPA

Mr. GRAHAM. Madam President, I am here this evening with a tinge of sadness. At midnight last night, one of the most important and successful efforts in the United States to build better relations with our neighbors in Latin America expired. After 10 years of successful service to the United States and the four countries of the Andean region—Bolivia, Peru, Ecuador, and Colombia—the Andean Trade Preference Act expired of its own accord last night, and the Congress has not allocated the time necessary for its extension.

This landmark trade agreement, which was passed in 1991, has helped the United States and these four countries to develop legitimate, strong, expanding commercial ties, and it has contributed substantially to the goal of stabilizing the economies and political systems of these four countries by encouraging a diversification of their economies.

To look backwards, in the last full year before the Andean Trade Preference Act was passed, the United States imported \$12.7 billion from these four Andean countries, primarily in traditional agricultural commodities such as coffee and bananas.

In the year 2000, the United States imported \$28.5 billion from these countries—a 125-percent increase. Much of this increase was in new and frequently nontraditional areas of economic activity for these four countries.

To mention one example, the cut-flower industry hardly existed in terms of its imports into the United States prior to the Andean Trade Preference Act. In 1991, the year before ATPA took effect, the United States imported \$220 million in flowers from the four Andean countries. In the year 2000, the United States had more than doubled that amount to over \$440 million worth in flowers.

The flower industry is particularly important because it is a very strong job generator. I have been told that, on average, for every hectare of land that is committed to flower production in the Andean region, there are between 5 and 10 persons employed to work those flowers and to bring them into full blossom and ready to be exported not only to the United States but increasingly to the world.

The United States has also been a significant direct beneficiary in that we have substantially increased our exports to the Andean region. Over the last 8 years, those exports have grown by 65 percent, to a total of \$6.3 billion in 1999.

As one visits the Andean region, they are struck by the prevalence of U.S. products—everything from the yellow diesel equipment, Caterpillar, to telecommunications equipment made in the United States.

Given the clear value this program has had for the United States and our four neighbors in the Andean region, it is a sad commentary that after 10 years of success we have allowed this program to expire. It also ought to be a strong motivation for us to say we shall not conclude this session of Congress without extending this program and expanding the program so that it will yield even greater benefits to the United States and to our Andean neighbors.

I filed legislation in the last Congress and again in this one which has that objective. I am pleased to report that the Senate Finance Committee, last

week, reported favorably the legislation which will extend and expand the Andean Trade Preference Act. The House of Representatives has already adopted a similar piece of legislation. I hope in the next few days the Senate will do likewise, and we can move quickly to resolve differences between the two Houses and send this legislation on to the President to be signed.

I also am very hopeful we will make this legislation retroactive to midnight of last night so there will not be a hiatus in the benefits which have been available for a decade.

Why is all of this important to the United States beyond the amount of direct economic benefit? It is important to the United States because the United States has a stake in what happens in this region of the world—a region that is so close to us.

If we are serious about halting the flow of illegal drugs into the United States, we must be concerned about the Andean region because over 80 percent of the cocaine that comes into the United States, and an increasing proportion of the heroin that comes into the United States, comes from this region. If we are interested in building strong democratic capitalist institutions, we should be concerned about this region.

Colombia has had one of the longest democracies in South America. It has been a role model to other countries in the hemisphere. But Colombia, as well as its neighbors, has faced unusually stressful and challenging situations over the last decade. The Andean Trade Preference Act has been a source of stability in a region which has frequently been in turmoil. If we are steadfast in our war against terrorism, then we must be concerned with what is happening in the Andean region.

Some of the most violent terrorists in the world are in our own hemisphere. The guerrillas and drug traffickers who are waging war on civil society in Colombia are some of the most vicious in the world. What many Americans fail to recognize is that the largest single source of terrorist attacks against Americans in the world is in the country of Colombia.

In the year 2000, over 40 percent of the incidents of terrorist attacks against U.S. citizens and U.S. interests were in the country of Colombia. Unfortunately, that violence in Colombia is spilling over to its neighbors, especially Ecuador.

I am concerned that we have already taken a step back from our commitment which the Congress made just a year ago through Plan Colombia, a commitment that was to galvanize the international community with Colombia in a major effort at rolling back drug trafficking, guerrillas, and terrorism. One year later, we in the Senate, by a 22-percent margin, have cut the funding for the Andean Regional Initiative.

I hope before we vote on the foreign operations conference report the negotiations between the Senate and the House will result in a significant restoration of those funds not only because the dollars are needed in order to accomplish their important objectives but also because of the symbol that those dollars represent in terms of our commitment to a long-term war against terrorism.

The Senate must act rapidly on this legislation so the people of this region will have confidence in our reliability as a neighbor and partner and that they will have incentives to develop legitimate economic alternatives to the production of drugs and other illicit activity.

It has been estimated that in Colombia alone, if we were to be fully successful in our efforts to rid that country of the scourge of drug production and trafficking, some 400,000 Colombians would be without a livelihood. It is important that we be a partner not only in the eradication of drugs but also in the provision of legitimate, lawful employment to replace those 400,000 illicit jobs.

I would point to the fact that the legislation I hope we will soon be considering is not just a replication of that which passed in 1991. There have been significant changes in the political and economic landscape of the Andean region since that initial enactment.

To mention one of the most significant of those changes was last year's passage by the Congress of the Caribbean Basin Trade Partnership Act of 2000. This was important to the Andean region because it changed the competitive playing field between the Andean region and the Caribbean Basin.

The 2000 legislation—the Caribbean Basin Trade Partnership Act—gave to the countries of Central America and the Caribbean, which participate in the Caribbean Basin Initiative, parity with the benefits that had earlier been offered to Mexico under the North American Free Trade Act. The effect of this has been to change the competitive position between the Caribbean Basin and the Andean Trade Pact.

In one of the most critical areas, which is apparel assembly, today most apparel in the Caribbean Basin will come into the United States duty-free, while the Andean region will still be paying, on average, a 14-percent duty for the same assembled items. There have been fears that that differential—zero from the Caribbean; 14 percent from the Andean region—could result in as much as 100,000 jobs lost in Colombia alone, lesser amounts in the other three Andean trade countries.

That would go in exactly the opposite direction of what we should be doing in terms of encouraging more legitimate jobs in the region as an alternative to the illicit jobs in the drug trade. We are seeing the effects of that

14-percent differential. In May and August of this year, imports of apparel from Andean trade countries declined 6 percent over the same period just a year ago. Through that same period, imports from the CBI countries have increased over \$47 million. We are already beginning to see some relocation of industrial activity out of the Andean region into the Caribbean.

I was the sponsor of the Caribbean Basin legislation in 2000 and have long been a supporter of our relations with that region of the world. We must not continue to help one region at the expense of the other. We must have a trade, economic, and foreign policy perspective that treats all of our neighbors with respect and equality.

I would like to point out that there is not only a past and a future in the United States relationship with the Andean trade region, but there is also going to be a past, a present, and a future. That future is that it is critical that we prepare for the year 2005.

What is the significance of the year 2005? The significance is that in the major area of job creation and promotion that we can influence in this region, which is primarily in the apparel assembly area, we are going to lose the protections we have had over the recent past.

A little background: For much of the past several decades, there has been an international agreement called the multifiber agreement. That agreement has restricted the number of specific apparel items which any individual country can ship into the United States. Under that agreement, for instance, the country of China is limited as to the number of shirts and blouses and other items it can import. Those numbers are substantially below what its capacity to produce is.

Because of that, the differential in the cost of production between Mexico and the Caribbean and the Andean region and the Far East has been kept within tolerable limits. The concern is that as soon as that multifiber agreement lapses, which will occur in the year 2005, there will be the potential that the United States will be swamped with apparel products from Asia with which our neighbors in Mexico and the Caribbean and the Andean region cannot compete.

Therefore, the next few years are critical in our urgency of developing a more efficient and productive industry and a partnership between the U.S. textile capability, because virtually all of those assembled items are assembled from U.S.-grown fiber and U.S.-spun textiles, which are then assembled in either Mexico or the Caribbean or the Andean region. We must make that partnership of American textiles and near-neighbor assembly sufficiently efficient that it can survive in a post-2005 economic environment.

We need to start that process as rapidly as possible in all areas. We have

already done it with Mexico and the Caribbean. Now we must turn our attention to the Andean region.

One final point: Our office is receiving calls from a wide variety of businesses, both in the United States and in Latin America, complaining that they will be subject to increased duties starting today, December 5. Many of these companies deal with perishable goods, including cut flowers and vegetables, that cannot be held for days or weeks while Congress deliberates.

I would like to make it clear again that it is my intention and hope to work to assure that the current ATPA benefits will be retroactive from the date of enactment of any legislation to midnight of last night. That would mean that any duties collected in the coming days by the Customs Service would be refundable.

We recognize that the confusion and inconvenience this situation will create will result in some dislocations and some abrasions between our country and these four good neighbors. I wish it could have been avoided. What we can do today is commit that we will make this period as short as possible and we will make it as painless as possible to all involved.

The old cliché is "trade, not aid." That is not a cliché but a truth that has worked in the Andean region to our benefit and to the benefit of our four neighboring countries. The United States has been a powerful beacon for open markets and strong free trade and a capitalist economic system as a fundamental foundation under democracies. Now it is our challenge to rebuild that foundation in a deeper and expanded form for our relationship with these four neighbors in the Andean region. I hope we will get about that business of foundation building as soon as possible.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Madam President, I appreciate very much the words of the distinguished Senator from Florida. I share his feelings completely. We had the privilege in the Foreign Relations Committee of having a meeting with the President of Bolivia just this morning. President Ramirez is in Washington to meet with President Bush tomorrow.

Obviously, the President of Bolivia, an extraordinarily talented person, a great leader in South America, expressed very considerable anxiety over the end of the Andean free trade situation. Bolivia has taken extraordinary steps against the drug trade at great cost but with great effectiveness. Our foreign policy really depends upon the support of extraordinary leaders such as the President of Bolivia.

The words of the Senator from Florida are timely, and his leadership on this issue really has been exemplary. I congratulate him and look forward to working with him.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. CLINTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE AND NEW YORK DISASTER NEEDS

Mrs. CLINTON. Mr. President, I appreciate the opportunity and thank the distinguished ranking member on the Agriculture Committee for the chance to come to the floor and speak about a matter of great concern and urgency to my State. I also commend the Senator from Indiana and the chairman of the Agriculture Committee for their very hard and diligent work on the bill we are considering.

I turn our attention, as I have on numerous occasions over the past weeks, to the situation in the State of New York following the attacks on September 11 and the extraordinary damage inflicted on the infrastructure, on the economy, and most especially on the lives of New Yorkers.

I commend Senator BYRD and the Appropriations Committee for the extraordinary job they have done in marking up the fiscal year 2002 Defense appropriations bill which addresses not only the pressing national security and defense needs of our Nation but also marks a significant step forward in addressing our homeland defense needs, as well as the specific needs related to the cleanup, rebuilding, and revitalization of the city of New York.

Just days after the horrific attack on September 11, just over 12 weeks ago, President Bush told a joint session of Congress: We will rebuild New York City. The President's Budget Director weeks later said: The President's pledge of \$20 billion is an absolute guarantee, and it is likely to be more.

We have collected quotations from other leaders. It is very gratifying to me that Senator BYRD and the Appropriations Committee have moved forward to fulfill the promises and commitments made to the people of New York. I personally thank and commend Senator BYRD for balancing the needs of our country with the need to be prepared in the face of terrorism, to rebuild the financial capital of the world, New York City, and to be fiscally responsible—understanding if we don't get our economy going, if we don't proceed, it will cost more later. I also thank the Appropriations Committee staff, especially Terry Sauvain and Chuck Kieffer and Paul Carliner on Senator MIKULSKI's staff who have given my staff and myself so much assistance in the weeks since September 11.

The bill reported out of committee is just the first step. As we go to the floor, which could be as early as tomorrow, I hope my colleagues understand

and appreciate we are fighting a war on two fronts. We have to fully fund the important defense needs of our Nation, and we have to fully fund, beginning with the Appropriations recommendations, the homeland security needs and New York City's needs.

I will speak today particularly about the health care needs of New Yorkers and Americans in the aftermath of this disaster. The essential services that hospitals and health care workers provided throughout the World Trade Center disaster demonstrate how much we depend upon our health care system all the time, but particularly in a time of need. New York's hospitals and hospital workers pitched in heroically during the emergency, not only on the day of September 11 but on the days and weeks following. They worked around the clock. They operated on backup power systems, without phones and other utilities. Health care workers jeopardized their own lives to be at their stations. Hospital personnel provided supportive services to community members and hospitals that were right there at ground zero. St. Vincent's and NYU Downtown not only cared for the injured but provided meals for rescue workers, took meals to elderly residents who were trapped in their apartments. They served as the backbone of the care and support system we relied on during this crisis while suffering their own structural damage. NYU, for example, lost its data center, and therefore its billing capacity. In effect, that was a fitting metaphor for how these hospitals operated: According to their mission, not their bottom line. They did not begrudge the costs of clearing hospital beds. They did not count the costs of bringing staff in on highest alert on overtime pay. They did not stand at the door of the emergency room asking to see people's insurance cards and sending them to a line to get their applications filled out.

They incurred security expenses. They depleted stockpiles of emergency supplies, pharmaceuticals, and blood. They provided disaster counseling services as well as emergency food, housing, and transportation. They also incurred expenses on emergency telecommunications and backup generators. When they ran out, they had to purchase and rent equipment. They had to set up an emergency morgue. They incurred so many extraordinary costs, and it is in part to alleviate some of those costs that we have a special provision in the appropriations for hospital costs that were incurred during this disaster.

But the disaster has had a devastating impact, not only on providers but on health coverage as well. One of the most unfortunate consequences of the disaster, combined with the economic downturn, has been the impact on workers. Many workers in New York

City saw their jobs just vanish in the rubble of the collapsed towers. Thousands more throughout the city and State lost their jobs because of the aftershocks of the disaster. Then it spread out around our country.

The unemployment rate nationally has gone up half of 1 percent—faster in 1 month than at any point in the last 20 years. In New York City, of course, the problem is exacerbated. In the span of 1 month, unemployment rose 1.3 percent, more than twice the national rate.

This is a picture of a recent job fair. Here you see people scrambling for their livelihoods, for their families' economic survival, but with limited opportunities in a recessionary economy.

The headline from the San Antonio Express News, October 18:

New York job fair sends thousands away; Arena isn't big enough for crowd.

The New York Department of Labor has estimated that 250,000 New Yorkers will be out of work by year's end. Based on what we know about the rates of health insurance among the jobless, the majority will lose their health insurance.

While some may be able to rely on Medicaid, estimates show that 100,000 of these displaced workers will end up uninsured. This is true across the country. We know that more than two out of five Americans who lose their jobs lose health care as well. That inflicts a double blow. It is my hope that in the coming days we can address some of these pressing economic and health care needs, not only for New Yorkers but for all Americans, first through supplemental appropriations, then through the stimulus package.

The proposed Senate economic stimulus package reported to the Senate floor would provide additional help for displaced workers who are eligible for COBRA continuation but cannot afford to use up over half of their unemployment check each month just for health insurance. The proposal would cover 75 percent of the cost of COBRA, making it affordable for far more unemployed families. This would mean we would see that approximately 457,000 temporary unemployed workers and their families would be covered. Currently the COBRA premiums, which average over \$7,700 for families in New York, are unaffordable without some additional help.

But we also know that many workers in small businesses are not COBRA eligible. In New York, 25 percent of workers are employed by small businesses not covered by COBRA. The stimulus proposal addresses that gap by offering health coverage through a temporary State Medicaid option with an enhanced match to encourage States to provide the coverage.

We will see not only an effect on individuals and their families but also on State budgets. States expect to see an

additional 4 million individuals added to their Medicaid rolls. The number of children on Medicaid could rise as much as 11.3 percent.

Here you see on this chart the steady growth in Medicaid enrollments as unemployment rates grow. At a time when States are already reeling from reduced revenues, many of our States will not have the resources to meet this increased need. We already have heard troubling stories from our States. Tennessee is proposing to eliminate coverage for 180,000 Medicaid beneficiaries. Washington is considering cuts of 10 percent to 15 percent. California is talking about budget cuts of up to \$1 billion in Medicaid. Florida may eliminate coverage of adults with catastrophic health care costs. And Indiana has appropriated \$140 million less than is projected will be needed for Medicaid in that State alone.

So just when we have unemployment going up, revenues going down, many more people being thrown into the ranks of the unemployed, unable to keep their insurance, when we have 2.6 million more children having to rely on this safety net program, the States are in an impossible position, and it is a vicious circle because if they cannot provide at least some Medicaid funding, many hospitals will be forced to provide services the best they can, increasing their costs which will not be reimbursed. And we are into that vicious cycle where uncompensated costs create downward pressures on institutions such as hospitals that have to cut services even for the insured and have to turn away the uninsured.

Many States are going to be in that difficult position. I hope we are going to provide at least some temporary support through increased matching funds to help Governors be able to deal with the increasing health care costs.

I know in the State of New York we came up with a quite creative approach by creating something called the Disaster Relief Medicaid Program. It cut through all the bureaucratic redtape, cut the application process which many of us have been complaining about for years—cut it down to one page, allowed many needy people to skip over all those bureaucratic hurdles to be able to be eligible for Medicaid. It has been a lifesaver for a lot of our New York families.

We will not be able to continue that without some additional help. I think, actually, this program is a very good model we ought to look at in the future when we try to think of some permanent ways to provide more Medicaid assistance. But certainly this streamlined post-crisis process really did a tremendous job filling a breach that would have otherwise caused a tremendous amount of backlog and uninsured people not being given the health care they deserve to have.

Yesterday, Congressman PETER KING from New York, along with some House

colleagues, introduced legislation on the House side to hold States harmless if they were slated for what is called an FMAP decrease—in other words, the match they get from the Federal Government—and provide an additional two point increase to all States, with an additional 2.5 percent available to States with unemployment rates higher than the average across States nationwide.

I think this is a good short-term solution. It is also a good stimulus, if you can get money into the hands of people who need to spend it, as people who have health care needs have to spend it. But it is the right thing to do as well.

I urge my colleagues to support the kind of cobbled together approach that would give COBRA premium subsidies, would provide an increase in the FMAP, at least temporarily, to help out our States that are facing such revenue shortfalls, provide a Medicaid option for non-COBRA-eligible workers which will be not only important for our States and for our economy and our health care system but absolutely essential to so many of the workers who, since September 11, have been not only out of work but out of health insurance as well.

I thank my colleague, the ranking member of the Agriculture Committee, for his indulgence, in being able to address this critical issue that will come before us sometime in the next few days. I appreciate greatly the attention that can be paid to making sure we provide the kind of health care support that is needed at this time.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT

Mr. REID. Mr. President, I ask unanimous consent that at 12 noon, Thursday, December 6, the motion to proceed to S. 1731, the farm bill, be agreed to and the motion to reconsider be laid on the table; that the Senate then proceed to the consideration of Calendar No. 254, H.R. 3338, the Department of Defense appropriations bill, provided, further that no amendments be in order to S. 1731 prior to Tuesday, December 11.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Mr. President, the two managers of the bill, Senators HARKIN and LUGAR, are two of the prizes we have in the Senate. The debate has

been very civil, and they really look forward to going back to this bill. Debate on the bill should be one of the better debates we have had this year. I hope everyone who has concerns will get their amendments ready so we can finish this bill before the end of the year.

Mr. HARKIN. Mr. President, if the Senator will yield, I thank the Senator for working out this agreement and for getting us to cloture on this bill so we can proceed to the farm bill.

As my good friend from Nevada knows, people in rural America need this bill. They need it now.

The Presiding Officer also knows that his farmers in Georgia, and especially farmers around the South, are going to have to go to their banks pretty soon after the first of the year to get loans ready for planting their crops. Their bank is going to say: What are you looking at? What are you going to have next year? They will not know. Many farmers will be right behind them in about February and March. They will be going to their banks.

That is why it is so important to get this farm bill finished. As I said earlier today, and I say to my good friend from Nevada, right now we are facing over 54 percent less net farm income today than we had in 1995. We can't afford to wait any longer. We have a good bill. It is a balanced bill. We have worked out all of our agreements.

This is a good bill for all Americans. It is a good bill for farmers all over this country. It is a good bill for people who live in our small towns and communities.

I want to personally thank my good friend from Nevada, the assistant majority leader, for all of his help in getting this bill to the floor and for making sure we get this bill finished before we go home for Christmas. We are going to do that. We are going to finish this bill. We are going to have it out of here, and we are going to let the farmers of America know what they can count on for next year.

I thank my friend.

Mr. REID. Mr. President, the majority leader asked me to also announce that when we go to the Defense appropriations bill, we are going to complete it this week. He will certainly have more to say about this tomorrow. But this is something we have to do. People who serve in the Senate want to be out of here by a week from Friday, and we have to finish this bill so it can be taken to conference over the weekend and the conference report brought back prior to next Friday. I hope everyone will understand that.

As he said—I am speaking for the majority leader—we may have to work through the weekend. But if people have any hope of getting out of here by next Friday, they are going to have to really work with us and move this legislation.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nomination: Calendar No. 532; that the nomination be confirmed, the motion to reconsider be laid upon the table, any statements thereon be printed in the RECORD, and the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination was considered and confirmed as follows:

EXECUTIVE OFFICE OF THE PRESIDENT

John P. Walters, of Michigan, to be Director of National Drug Control Policy.

Mr. LEAHY. Mr. President, all of us have a strong desire to confront and conquer the scourge of drug abuse and the ways it ravages American lives, especially young American lives. The debate on how best to prevail in this struggle is well under way in communities and at kitchen tables across the nation. The President's nomination of John Walters to head the Office of National Drug Control Policy has been the most recent catalyst for this debate.

I voted against Mr. Walters' nomination in committee. In light of that, I would like to share some of my concerns about Mr. Walters in the hope that he will take them to heart, and that he will greatly exceed my expectations and the expectations of the other Senators who voted against him in committee.

I believe Mr. Walters was the wrong choice for this job, and that his sharply partisan approach to drug policy issues provides an imperfect fit for an era of growing bipartisan consensus about drugs. Indeed, his ideological bent is a hindrance when our efforts to prevent drug abuse call for cooperation and pragmatism. Until his confirmation hearings, most of the little he had said and written about drug treatment was deeply skeptical. He has focused primarily on the need to reduce the supply of drugs, too rarely focusing on the neglected demand side of the drug equation. He has also dismissed concerns about the racial impact of our current drug policies and the utility of mandatory minimum sentences. In short, Mr. Walters' public record does not inspire confidence in those of us who think Congress has occasionally made the wrong decisions in our attempts to prevent drug abuse.

I do not doubt Mr. Walters' intellect or the depth of his concern about our nation's drug problems. I simply believe that he is not the best person to coordinate our anti-drug efforts. We all agree that the fight against drug abuse is vitally important. We disagree only in the methods we choose to achieve our shared goal of a drug-free America.

We have worked hard on the Judiciary Committee to ensure a speedy and fair hearing for the Bush administration's executive branch nominees. Within days of the Senate's reorganization this summer and my becoming chairman, I noticed a hearing on Asa Hutchinson's nomination to head the Drug Enforcement Administration. After we had the hearing, I expedited the process to provide a quick committee vote, and then worked to secure a vote on the floor so that Mr. Hutchinson's nomination could be approved before the August recess. I similarly expedited the process for the nominations of Robert Mueller to head the Federal Bureau of Investigation and of James Ziglar to head the Immigration and Naturalization Service, among others.

I scheduled John Walters' nomination hearing for the first full week following our August recess. That hearing was set for the morning of September 11, and was, of course, postponed as a result of the terrorist attacks in New York and near Washington. I made every effort to reschedule the hearing as soon as possible, consistent with our obligations to consider the anti-terrorism legislation that the Administration proposed shortly after the attacks. I believed strongly that drug abuse was still a vital problem for this nation and that we needed to continue to pay attention to our domestic priorities even as we engaged in our necessary response to terrorism. The committee considered the nomination on October 10.

After that hearing, the work of the Judiciary Committee was made more difficult by the anthrax concerns that led to the closing of the Senate office buildings and the displacement of Members and their staffs. Considering these delays, and the controversy that Mr. Walters engendered, I think it is a tribute to the committee that we voted on his nomination as quickly as we did, within a month of his confirmation hearing.

Law enforcements is and will remain indispensable in reducing drug abuse. Indeed, we all agree that we must severely punish those who traffic in and sell drugs. More than anyone, however, law enforcement officers know that improving drug treatment and taking other measures to reduce the demand for drugs will greatly assist their efforts. The White House also understands this. President Bush has said that "[t]he most effective way to reduce the supply of drugs in America is to reduce the demand for drugs in America," and has promised that his administration will concentrate "unprecedented attention" on the demand for drugs. In the Senate, I have joined with Senator HATCH, Senator BIDEN, and others in introducing S. 304, the Drug Abuse Education, Prevention, and Treatment Act. That legislation would

increase the federal focus on treatment programs, with targeted programs to increase the availability and effectiveness of drug treatment programs in rural areas, provide additional treatment opportunities for mothers who are addicted to drugs, and more.

Although Mr. Walters testified at his confirmation hearing and wrote in his responses to written questions that he supports drug treatment efforts, his previous record casts doubt on the strength of this support. Mr. Walters has criticized the concept that addiction is a disease, referring to that concept as an "ideology," even though it is held widely, if not universally, by government and private experts. He has written that "the culture of victimhood lies at the core of the therapeutic worldview." He has said that he supports "good" treatment but sharply criticized existing treatment providers, aside from faith-based providers. These and other statements by Mr. Walters have caused great concern among many of these who care about treating drug addiction. For example, the president of the Betty Ford Center wrote to the Judiciary Committee on October 9 that: "Mrs. Ford and I are convinced that Mr. Walters may not have the confidence in the treatment and prevention strategies that we believe are necessary for the creation and implementation of a balanced and thoughtful approach to U.S. drug policy."

As I have said repeatedly, we cannot reduce drug abuse without punishing drug offenders, and in particular without ensuring that those who traffic in and sell drugs are incarcerated for substantial periods of time. At the same time, many of us—Democrats and Republicans—have come to question our reliance on mandatory minimum sentences for a wide variety of drug offenses, as well as the 100:1 disparity under current law between sentences for crack and powder cocaine. In his writings and statements, Mr. Walters has been hostile to reconsideration of these policy choices Congress made during the 1980s. For example, he wrote as recently as March that the arguments that we are imprisoning too many people for merely possessing illegal drugs and that criminal sentences are too long or harsh were "among the great urban myths of our time." This statement flies in the face of the widespread dissatisfaction with mandatory minimum sentences among policymakers and federal judges. Indeed, Chief Justice Rehnquist and the Judicial Conferences composed of representatives from all 12 U.S. circuits have called for the repeal of federal mandatory minimum sentences. Mr. Walters has said he would conduct a review of the current sentencing structure, but given his past views, I do not believe that he is the best person to undertake that task.

Between 1983 and 1998, drug admissions to State and Federal prisons increased almost 16-fold, from over 10,000 drug admissions in 1983 to almost 167,000 new prison entries for drug offenses in 1998. During this time, white drug admissions increased more than 7-fold, Hispanic drug admissions increased 18-fold, and black drug admissions increased more than 26-fold. The disparity in sentences for crack and powder cocaine has contributed significantly to this disproportionate imprisonment of African Americans. Under current law, it takes only 1 percent as much crack cocaine to trigger equal mandatory minimum penalties with powder cocaine. This disparity has a severe racial impact, as African Americans are much more likely than white Americans to be sentenced for crack offenses. For example, in FY 1999, blacks accounted for 84.7 percent of those sentenced for crack offenses and whites accounted for just 5.4 percent. There is also reason to doubt the logic of the crack-powder distinction on law enforcement grounds. Since cocaine is imported and distributed in powder form, and only manufactured into crack at the retail level, those persons at the highest end of the drug distribution chain are rarely affected by the increased crack penalties. In other words, the harshest sentences are reserved for less-culpable offenders.

Despite these troubling facts, Mr. Walters has referred to the racial impact of the sentencing disparity as a "perceived racial injustice" and urged Congress in 1996 testimony to "[b]lock lower crack sentences" and to strip the U.S. Sentencing Commission of authority even to propose changes in criminal penalties where Congress has adopted mandatory minimums. His position on this issue undoubtedly has played a role in the decision by 21 members of the Congressional Black Caucus, including the ranking Democratic member of the House Judiciary Committee, Mr. JOHN CONYERS, to oppose this nomination. Considering that Mr. CONYERS was such a strong supporter of Asa Hutchinson's nomination to head the Drug Enforcement Administration that he took the time to write me about it, I take his strong opposition to this nomination seriously.

Mr. Walters' reaction to popular and legislative judgments by various States to allow limited use of marijuana for medical purposes also concerns me. Numerous states have considered and passed medical marijuana initiatives, some by substantial majorities. Mr. Walters has responded to this trend by advocating that the federal government use the Controlled Substances Act to take away the federal licenses from any physician who prescribes marijuana to a patient in states that permit the practice. Such a step would prevent these doctors from prescribing or possessing any medication that is

federally controlled, basically making the practice of medicine impossible. In addition to running roughshod over any federalism concerns whatsoever, Mr. Walters' draconian response raises questions about his sense of proportion. Although shutting down the process as he has suggested may be effective in rendering these State-passed initiatives meaningless, his proposal is a very blunt instrument, to say the least.

Mr. Walters' response to written questions on this issue did not alleviate my concerns. I asked him whether the Federal government should make it a priority to prosecute people who distribute marijuana to ill people in States that have approved medical marijuana initiatives. He answered that he supports "enforcing the law," and then briefly discussed the relatively small size of the DEA, without addressing whether medical marijuana cases should be a priority. I am all the more disappointed by the insufficiency of this answer in light of last month's DEA raid on a California center that provided marijuana to the ill in accordance with California law. It is absurd that such a matter has become a government priority, given our growing problems with heroin, methamphetamines, and other far more powerful and dangerous drugs. I asked Mr. Walters recently about this raid, but he said he believed it would be inappropriate to make any substantive comment prior to his confirmation.

Mr. Walters has been a prominent spokesman for active interdiction efforts in Latin America, and I fear he would seek to have the United States overextend its anti-drug role in Latin America. Prior to the development of Plan Colombia, he said that "we need to do more in Latin America" in "[f]ighting drugs at the source." He has also been a consistent supporter of increasing the U.S. military's role in preventing drugs from entering the United States. I agree that reducing the supply of drugs would have tremendous benefits for our nation. At the same time, I agree with President Bush that the reason that so many drugs find their way to our shores is because there is substantial demand for them. The costs—both financial and political—of our involvement in the internal affairs of Latin American nations require close scrutiny. I have been skeptical about many elements of the ill-considered Plan Colombia, and we should be extremely cautious of additional proposals of that nature.

In addition, Mr. Walters has been sharply critical of Mexico, calling it a "narco state" and a "safe haven" for the illegal drug industry. Although these comments were made about predecessor governments to the Fox administration, they cannot help Mr. Walters' efforts to implement the Bush administration's appropriate policy of strengthening our ties with Mexico.

Mr. Walters has forcefully expressed his positions on drug-related and other issues for the better part of two decades, both in and out of government. He is a staunch advocate for interdiction and punishment, but his record has not demonstrated a commitment to a comprehensive approach to our drug problems. When the Judiciary Committee held its confirmation hearing for this nominee, I said that I feared that Mr. Walters had a hard-line law enforcement answer to every question about drug policy, at the expense of the balanced approach that we need to succeed in the struggle against drug abuse. I still hold those fears, but I hope that Mr. Walters exceeds my expectations in office.

Mr. HATCH. Mr. President, on behalf of all parents and grandparents, teachers, clergy, mentors, agents of law enforcement, treatment and prevention professionals, and all the others who work every day to prevent illegal drug use from destroying the lives of our young people, I rise to support the nomination of John Walters, the President's nominee to be our nation's next Drug Czar. The confirmation of this important nominee is long overdue. Mr. Walters' nomination has languished in the Senate for almost six months, but with his confirmation, the President's cabinet will finally be complete.

Mr. Walters will begin his tenure as Drug Czar at a very precarious time, but I know he is the right person for this challenge. He will need to work closely with law enforcement, intelligence, and military authorities to prevent drugs from being trafficked into America from abroad and to prevent the manufacturing and sale of drugs for the purpose of funding terrorist activities. Mr. Walters is eminently qualified to carry out this task, and, as I have previously stated, I am confident that he will be a first-rate Director. After all, having served at the Office of National Drug Control Policy and the Department of Education with Bill Bennett, he learned from the person widely regarded—by Republicans and Democrats alike—as the most talented and effective drug czar we have had in this country.

I want to highlight once more how John Walters' career in public service has prepared him well for this office. He has worked tirelessly over the last two decades helping to formulate and improve comprehensive policies designed to keep drugs away from our children. By virtue of this experience, he truly has unparalleled knowledge and experience in all facets of drug control policy. Lest there be any doubt that Mr. Walters' past efforts were successful, let me point out that during his tenure at the Department of Education and ONDCP, drug use in America fell to its lowest level at any time in the past 25 years, and drug use by

teens plunged over 50 percent. Even after leaving ONDCP in 1993, Mr. Walters has remained a vocal advocate for curbing illegal drug use. Tragically, as illegal drug use edged upward under the previous administration, his voice went unheeded.

John Walters enjoys widespread support from distinguished members of the law enforcement community, including the Fraternal Order of Police and the National Troopers Coalition. His nomination is also supported by some of the most prominent members of the prevention and treatment communities, including the National Association of Drug Court Professionals, the American Methadone Treatment Association, the Partnership for Drug Free America, National Families in Action, and the Community Anti-Drug Coalitions of America. All of these organizations agree that if we are to win the war on drugs in America, we need a comprehensive policy aimed at reducing both the demand for and supply of drugs. Mr. Walters' accomplished record demonstrates that he, too, has always believed in such a comprehensive approach. As he stated before Congress in 1993, an effective anti-drug strategy must "integrate efforts to reduce the supply of as well as the demand for illegal drugs."

Despite this groundswell of support, ever since Mr. Walters was first mentioned almost seven months ago to be the next Drug Czar, several interested individuals and groups have attacked his nomination with a barrage of unfounded criticisms. Because these untruths helped delay his confirmation until today, I feel compelled to respond once more to some of these gross distortions.

Some have charged that John Walters is hostile to drug treatment. Once again, I want to state for the record that this criticism is categorically false. He has a long, documented history of supporting drug treatment as an integral component of a balanced national drug control policy. You do not have to take my word on this. You need only look at the numbers.

During Mr. Walters' tenure at ONDCP, treatment funding increased 74 percent. This compares with an increase over eight years for the Clinton Administration of a mere 17 percent. This commitment to expanding treatment explains why John Walters has such broad support from the treatment community. It is simply inconceivable that the prominent groups supporting Mr. Walters would do so if they believed he was hostile to treatment.

Another recurring criticism is that Mr. Walters doesn't support a balanced drug control policy that incorporates both supply and demand reduction programs. This criticism, too, is flat wrong and again belied by his record. For example, in testimony given before this Committee in 1991, Mr. Walters,

then acting Director of ONDCP, laid out a national drug control strategy that included the following guiding principles: educating our citizens about the dangers of drug use; placing more addicts in effective treatment programs; expanding the number and quality of treatment programs; reducing the supply and availability of drugs on our streets; and dismantling trafficking organizations through tough law enforcement and interdiction measures.

Mr. Walters' firm support of prevention programs is equally evident. His commitment to prevention became clear during his tenure at the Department of Education during the Reagan Administration. He drafted the Department's first drug prevention guide for parents and teachers—titled "Schools Without Drugs," created the Department's first prevention advertising campaign, and implemented the Drug-Free Schools grant program.

These are not the words or actions of an ideologue who is hostile to prevention and treatment, but rather, represent the firmly held beliefs of a man of conviction who has fought hard to include effective prevention and treatment programs in the fight against drug abuse.

Some have also criticized Mr. Walters because he doesn't buy into the oft-repeated liberal shibboleth that too many low-level, "non-violent" drug offenders are being arrested, prosecuted, and jailed. I, too, plead guilty to this charge, but the facts prove we are right. Data from the Bureau of Justice Statistics reveals that 67.4 percent of federal defendants convicted of simple possession had prior arrest records, and 54 percent had prior convictions. Moreover, prison sentences handed down for possession offenses amount to just 1 percent of Federal prison sentences. Thus, it is patently false that a significant proportion of our federal prison population consists of individuals who have done nothing other than possess illegal drugs for their personal consumption.

The drug legalization camp exaggerates the rate at which defendants are jailed solely for simple possession. This camp also wants us to view those who sell drugs as "nonviolent offenders." Mr. Walters, to his credit, has had the courage to publicly refute these misleading statistics and claims. I want to join him in making one point perfectly clear. Those who sell drugs, whatever type and whatever quantity, are not, to this father and grandfather, "non-violent offenders." Not when each pill, each joint, each line, and each needle can and often does destroy a young person's life.

I am committed 100 percent to expanding and improving drug abuse education, prevention, and treatment programs, and I know that John Walters is my ally in this effort. Last week, the

Judiciary Committee voted out S. 304, the "Drug Abuse Education, Prevention, and Treatment Act of 2001," a bipartisan bill I drafted with Senators LEAHY, BIDEN, DEWINE, THURMOND, FEINSTEIN, and GRASSLEY. This legislation will dramatically increase prevention and treatment efforts, and I remain confident that it will become law this Congress. As I have stated many times, I solicited Mr. Walters' expert advice in drafting S. 304. I know, and his record clearly reflects, that he agrees with me and my colleagues that prevention and treatment must remain integral components of our national drug control strategy.

We need to shore up our support for demand reduction programs if we are to reduce illegal drug use in America. This commitment is bipartisan. Our President believes in it. Our Attorney General believes in it. Our Democratic leader in the Senate believes in it. My Republican colleagues believe in it. And most importantly, John Walters believes in it.

Finally, Mr. President, now that Mr. Walters is about to be confirmed, I want to urge the Senate not to let this session end without holding hearings for and acting on the deputy positions at ONDCP. Mr. Walters needs his team in place. I look forward to working with my Senate Republican and Democratic colleagues and the Administration to carry forward our fight against drug trafficking and terrorism.

Mr. KENNEDY. Mr. President, I oppose this nomination. We have a real opportunity to strengthen the nation's efforts against substance abuse, and we ought to take advantage of it. We rely heavily today on police, prosecutors, and prisons to handle this problem. There's too little emphasis on prevention and treatment. Spending for prevention and treatment has never exceeded one-third of the federal drug-control budget.

This unacceptable situation continues, in spite of overwhelming evidence that drug treatment works.

In 1994, a landmark study, the California Drug and Alcohol Treatment Assessment, found that every dollar spent on treatment saves taxpayers \$7 in future costs for crime and health care.

A 1997 study by the Rand Corporation found that treatment for heavy cocaine users is three times more effective at reducing cocaine consumption than mandatory minimum sentences, and 11 times more effective than interdiction.

A study by the Institute of Medicine showed that treatment was effective in reducing criminal activity and emergency-room visits, and in increasing rates of employment.

In 1997, the Department of Justice reported that offenders who complete drug-court programs are only one-third as likely to be arrested for new drug offenses or felonies compared to other offenders, and only one-fourth as likely to violate probation or parole.

Now more than ever, Americans support prevention and treatment. They understand that we cannot stop substance abuse without reducing the demand for drugs. In the nation's efforts against substance abuse, prevention and treatment must become equal partners with incarceration and interdiction.

To his credit, President Bush has called for closing the treatment gap. He has stated that "the most effective way to reduce the supply of drugs in America is to reduce the demand for drugs in America."

Thanks to the leadership of Senator LEAHY, Senator HATCH, and Senator BIDEN, the Judiciary Committee passed a bill last week to increase federal funding for drug education, prevention, and treatment. There is much more, however, that we must do to see that all Americans understand that drug use is harmful, and that effective treatment is available to every addict who wants it.

The nomination of John Walters sends exactly the opposite signal. As a longtime critic of drug treatment, he's the wrong man for the job. In 1996, he ridiculed President Clinton's proposal to provide drug treatment to chronic users as "the latest manifestation of the liberals' commitment to a 'therapeutic state' in which government serves as the agent of personal rehabilitation." Last March, Mr. Walters described the view that addiction is a disease of the brain as an "ideology" promulgated by the "therapy-only lobby."

Mr. Walters has emphasized punishment and prisons as the primary solution to the problem of drugs. He has criticized attempts to reform mandatory-minimum sentences for non-violent drug offenses. The United States now has the highest per capita incarceration rate in the world. Yet Mr. Walters recently declared that "[t]he war on crime and drugs is rapidly losing ground to the war on punishment and prisons."

In his response to the Judiciary Committee's questionnaire, Mr. Walters said that during the first Bush administration, he was "a principal author of a new drug strategy and federal spending plan that targeted more resources for treatment than any administration before or after." But as Mr. Walters has admitted, the Clinton administration spent substantially more—not less—on drug treatment. As for the increases that did occur during the Bush administration, Mr. Walters fought them all the way.

At his nomination hearing on October 10, I pressed Mr. Walters on whether he would try to balance federal spending for demand-reduction and supply-control efforts. Saying only that he was not "notionally" opposed to equal spending, he refused to give an answer.

Before the hearing, the president of the Betty Ford Center wrote that he and Mrs. Ford questioned whether Mr. Walters has "the confidence in the treatment and prevention strategies that . . . are necessary for the creation and implementation of a balanced and thoughtful approach to U.S. drug policy."

Mr. Walters' comments on race are also troubling. In 1997, he criticized General Barry McCaffrey for sending "the wrong message" when he expressed concern about the high percentage of African-Americans being imprisoned for drug offenses. Earlier this year, he categorically dismissed the view that the criminal justice system unjustly punishes African-American men as one of "the great urban myths of our time."

Racial discrimination is offensive and unacceptable in all its aspects. The need to eliminate it continues to be one of the nation's important challenges. It is undisputed that even though blacks and whites use illegal drugs at the same rate, blacks are incarcerated for drug offenses at a much higher rate. Mr. Walters was asked to justify his "urban myth" statement, but he only cited unrelated statistics on murder rates. We need a Drug Czar who has, at the very least, an open mind about the possibility of racial bias in drug sentencing.

Mr. Walters' supporters contend that despite his longstanding opposition to increased treatment funding, and his very recent criticism of drug therapy, he is the right choice to revitalize our drug-control efforts and close the country's treatment gap. I hope that they are right, and that those of us who oppose him are wrong. I am concerned, however, that by approving this nomination today, we are losing our best opportunity to develop a more balanced and more effective national strategy on drug abuse.

Mr. MCCAIN. Madam President, I want to congratulate John Walters, the new Director of the Office of National Drug Control Policy, on his confirmation by the Senate last night. I have no doubt that the hard work and experience he brings to the Office will greatly benefit our efforts to reduce drug abuse in our nation.

I do wish he could have been confirmed much earlier, considering the challenges we face at home and overseas. In the last eight years alone, teenage drug use has almost doubled and, as I speak, terrorists, including those we are fighting in Afghanistan and across the globe, are using the drug trade to help finance their operations.

President Bush nominated John Walters in early June, but he was not granted a hearing until October 10. Finally, on November 8 and five months after his nomination, John Walters was favorably voted out of the Senate Judi-

ciary Committee, 14 to 5, with five Democrats joining all the Republicans in support of his confirmation. Seven months to be confirmed is not a credit to the workings of the Senate.

It was disappointing that, of the small number of activists opposed to the nomination of John Walters, a few carried on a campaign to distort his public policy positions. Americans would not have known if they just listened to these activists that John Walters believes that many first-time, non-violent offenders ought to be diverted into treatment. In fact, when he was deputy drug czar in the first Bush Administration under William Bennett, he helped secure increases in the drug treatment budget in four years that were double what the previous administration managed in eight. And it's also noteworthy that the previous administration enforced the very same anti-drug laws that some of John Walters' opponents today criticize, and the same administration made no effort to change them.

I look forward to working with John Walters and hope his needlessly protracted nomination process will not discourage other outstanding Americans from considering public service to our Nation.

Mr. DURBIN. Mr. President, I join with several of my colleagues in opposing the nomination of John P. Walters to be Director of the Office of National Drug Control Policy—the Nation's Drug Czar.

As much as anyone here, I am mindful of the need to unify behind the President during these times. Let me emphasize that I share the President's goals in combating the problem of drug abuse, and I applaud his commitment of greater resources to drug treatment and prevention efforts. My fear, however, is that Mr. Walters is not the person to meet these goals.

John Walters is a seasoned veteran of the Drug War, someone with a long and established track record on many controversial issues. Too often in the past, he has adopted divisive stances on these issues. His views, and his certitude in advocating them, send a fair warning to this body as it debates his nomination. His controversial and often incendiary writings on drug-related issues have been red meat for the right-wing of the Republican Party.

Let me focus on a couple topics. Like many of my colleagues, I am very troubled by the considerable evidence that our prosecution of the drug war disproportionately targets racial and ethnic minorities. African-Americans represent 12 percent of the U.S. population, 11 percent of current drug users, but 35 percent of those arrested for drug violations, 53 percent of those convicted in state courts, and 58 percent of those currently incarcerated in state prisons. In my home State of Illinois, African-American men end up in

State prisons on drug charges at a rate 57 times greater than white men. These disparities, whatever their cause, demand the attention of the Nation's Drug Czar. Aside from the injustice of this situation, there is stark evidence that drug offenders who are not minorities escape the same scrutiny and enforcement as those who are. Our war on drugs must be fair and balanced.

With the exception of the last few weeks, Mr. Walters has spent most of his career being dismissive of the subject of racial disparities in drug enforcement. As recently as this April, he characterized as "urban myth" the sincere concern of many, including myself, that young black men receive excessive prison terms under the current sentencing regime. He has accused the nonpartisan federal Sentencing Commission of being "irresponsible" for proposing adjustments to the 100-1 disparity between federal prison terms for crack cocaine and powder cocaine offenses, offenses which divide starkly along color lines.

It has become a cliché for public officials to lament racial profiling in law enforcement. What matters is action, not words. But even now, when Mr. Walters has experienced a "change of heart" on many issues, he will only concede that there is a "perception" of disparate treatment in the criminal justice system. As someone committed to using the Drug Czar's office to promote criminal law initiatives, he has exhibited little sensitivity for the role that race plays in the criminal justice system. Given the important law enforcement role filled by the Drug Czar, I cannot overlook this weakness.

Another source of real concern is the nominee's record on drug treatment and prevention. Early in my congressional career, I worked to pass legislation to improve substance abuse treatment programs for pregnant and postpartum women. We know that treatment programs can work. A study by the RAND Corporation a few years ago found that for every dollar that we invest in substance abuse treatment, the American taxpayers save \$7.46 in miscellaneous societal costs.

The Nation's drug crisis demands that we supplement law enforcement efforts with effective treatment and prevention programs. While Mr. Walters has voiced his support for a balanced and coordinated approach, his long paper trail belies his real intentions. He has a long record of hostility towards, as he put it, the "notoriously under-performing drug treatment system," and towards those who implement it. He has criticized those who approach drug addiction as a disease as "ideologues." He has condemned the Drug-Free Schools Act, which created many of the same types of prevention programs he takes credit for now.

Let me say a few brief words about the John Walters who came to visit the

Senate Judiciary Committee. Judging by his answers to the Committee's questions, he has been doing a lot of reflection lately. He now believes that "the consideration of addiction as a disease has wide application." A man who once defended harsh mandatory minimum sentences today professes support for "second and third chances" and tempering justice with mercy. A harsh partisan critic of President Clinton now wishes to "transcend traditional political and party boundaries." The same person who wrote "[t]here is no question that supply fosters demand" stands beside President Bush's pledge that "[t]he most effective way to reduce the supply of drugs in America is to reduce the demand for drugs in America."

Mr. Walters assured the Committee that he has not undergone what we refer to as a "confirmation conversion." That is precisely what concerns me—that he has not moderated his views at all, but has merely rethought his public relations strategy. Over the course of his career, Mr. Walters has made a conscious choice to polarize rather than advance the public debate. Accordingly, I cannot provide my support for his nomination.

ADDITIONAL STATEMENTS

LIFE AS AN AMERICAN

• Mr. DURBIN. Mr. President, I rise today to share with you and the rest of my colleagues the thoughts of one of my younger constituents, for I think they are noteworthy for their insight, their honesty and their prescience.

Stephanie Kaplan, who lives in Highland Park, IL, is a junior at Highland Park High School. Stephanie recently submitted her writing to the Jewish Press in Omaha, NE, in response to their request for essays about patriotism. Out of all the responses that arrived at the newspaper, the editors deemed Stephanie's the best among them.

Perhaps most remarkable is that this essay, in which Stephanie explains what life as an American means to her, was written in August, before Osama bin Laden became a household name and when the top news stories did not mention Afghanistan.

Our enemies have attacked us for who we are and what we believe. The very freedoms we love inspire their hatred. As our freedoms are the source of this conflict, we cannot allow them to become its casualties.

Stephanie's writing is a timely reminder of what it is we value and what it is we are defending.

Her essay follows:

WHAT BEING AN AMERICAN MEANS TO ME
(by Stephanie Kaplan)

Ice cream for dinner. Sitting on the bleachers through a muggy afternoon, cheering

heartily for a favored team or player. An early-morning walk, as the trees that line the street wave their green leaves in the wind, scintillating drops of dew falling down to join their brethren on the glistening grass. Air conditioning with the twist of a knob.

This is America!

But luxuries, the majority of which can be purchased by money, do not define what being an American means to me.

Freedom. Yes, there are rules and regulations, a moral code, and systems of punishment for those who infringe and sever them. They are in place to protect the people, however, and are not oppressing as some governments, which implement so many restrictions that the citizens are suffocated by the layers upon layers of laws.

I can keep my lights on through the night, if I so wish. No policies prohibit me from befriending a Jew, a Muslim, or a person of color. And only my own predilections will rule my summer afternoon activities, be it in-line pick-up hockey on the basketball court down the street, or a lazy afternoon perched before my computer, like a dog passing away the hours chewing on rawhide.

Being a United States resident, to me, translates into the simple joy that I can ride my bike to the places that defined my carefree youth, mainly the elementary school's playground. And if I so wish, I'll stray from the paved trail and take the long route, or cut across the grass.

Most importantly, I possess no fear when being out alone. For I feel safe, in this country, that I will not be a victim of hostility based on any outward appearance. And I'd never really noticed how wonderful and rare that is until I spent three weeks on a teen tour with students from 21 different countries.

My best friend became a girl from Hong Kong, and, as we were walking along one overcast afternoon, she stated, "I hate the Beijing government." Then, she added, "If I said that in Hong Kong, in a casual conversation, I might be okay. But if I was in Beijing, I could get shot. That's why I like America, it's free for opinions."

Never experiencing any sort of political oppression, it's difficult for me to grasp what she must feel, or the fear of a simple slip translating into death.

And this country is not perfect.

But as the anthem states, this is "... the land of the free." Sovereignty is a daily part of life. What may have seemed like a burden—all the decisions one must make, and the consequences that can only be blamed on an individual—now seems liberating.

Existing in America means much to me, but the most poignant example is that I can pray, out loud, in Hebrew, with the shades drawn up and the door gaping, invitingly open.

On the trip, while occupying a dorm room, I prayed every morning, just as I do at home. The glaring difference was that the people who passed by my open doorway were not all Jewish. Openly, I expressed my faith and reinforced my beliefs to myself, my dedication to the Hashem.

How far we've traveled, in place, time, and pure progression, since my grandmother hid below ground in Germany, with but one dress, and could not even talk, let alone pray aloud, for fear of SS men. And the advances since my grandfather fought for survival in the same foreign country, with outlandish limitations, are miraculous.

Could, I wonder, either of them imagined a time in which their granddaughter—yes, a

family!—could be so audacious as to flaunt her prayer?

It's not the passing of years, though, but the changing of countries that made it possible.

America may never be able to be defined, as being American means so many different things to millions of unique people. For the country, when drawn, should not be its traditional shape, as seen on a map, but as a 3-D shape, with as many angles as it has citizens, for the people shape America as much as the land.

Being an American means choices, luxuries, decisions, freedoms, and a feeling of not importance, but responsibility, in illustrating the greatness of my country, and endeavoring to uphold the lofty ideals of the founders of this Nation, inhabitants who, like my grandparents, escaped tyranny and a role of inferiority to pull freedom to their chests and keep it there, chained 'til a death that does not come prematurely due to discrimination.

Being an American means I am an individual and have the independence to be just that—an American, because I believe in the country and the opportunity. While it may take a little digging, opportunity is available; even if found, one must clean off the dirt before pursuing it.

I am a living, breathing, original American, and that I can exist unscathed is what being a citizen of this realm is all about. Existing as a member of this free country means, to me, that if in 60 years my family can go from savoring every drop of water to survive to having a house with a mezuzah on each doorway, I can savor the prospects presented by freedom and find a way to take it a step farther.

After all, my door is always open.●

TRIBUTE TO MARY KAY ASH

• Mrs. HUTCHISON. Mr. President, I rise today to pay tribute to Mary Kay Ash.

On November 22, 2001, America and Texas lost a great person Mary Kay Ash.

Throughout Mary Kay Ash's life, her unswerving devotion to principles and to doing what is right enabled her to exert an influence unique in a society that was known for strict rules of hierarchy, specifically male hierarchy. She flourished where many fail, or simply remain in the shadows of obscurity. By doing so, she blazed the path for many women after her, we have all profited from her success.

Over her career, Mary Kay sacrificed a lot to fulfill her dream, do her duty to her family and her God, and to stand by her principles. It is women and men of that caliber who have made our country great.

Her savvy created an incredible business from a profit point of view, but, most important, she created a business that offers women the chance for personal and professional fulfillment and success. It is no wonder that Mary Kay Cosmetics is considered by Fortune Magazine as one of the top ten best companies for women, indeed, it is also recognized as one of The 100 Best Companies to Work for in America.

But Mary Kay never stopped with work, she did not even start with work.

Her priorities were always clear: God first, family second, and career third. It is why, when her husband died from cancer, she put her endless energies to work in that arena as well, creating the Mary Kay Ash Charitable Foundation in 1996. This nonprofit provides funding for research of cancers affecting women, and it has recently expanded its focus to address violence against women.

Since she was a fellow Texan, I was never surprised by her zest for life. E.B. White once wrote, "I arise in the morning torn between a desire to save the world and a desire to savor the world. This makes it hard to plan the day." Not for people like Mary Kay, she knew how to accomplish both.

Mary Kay remembered what was important yet still reached for the stars—and all of us are the better for it. Thank you Mary Kay, I hope you are driving a beautiful pink Cadillac up in heaven.●

TRIBUTE TO KAREN NYSTROM MEYER

● Mr. JEFFORDS. Mr. President, Karen Nystrom Meyer was appointed to serve as the Executive Vice President of the Vermont Medical Society (VMS) in 1988. Throughout her tenure in office, Karen's work has been characterized by great integrity, compassion and a strong understanding of the critical role physicians play in improving the quality of life in the Green Mountain State. Many Vermonters shared my sense of loss when Karen Meyer recently announced her resignation in order to accept a new position in the field of higher education.

The fourteen years she led the society were years of great change and accomplishment for the organization. It was Karen's first job as an office assistant in a large internal medicine practice that gave her a real appreciation for the struggles and rewards of practicing medicine. The first woman executive of a State medical society in the country, she completely restructured the governance of the society moving from the traditional House of Delegates representative structure to an annual membership meeting format where each VMS member may participate in making Society policy. While Vermont was the first State to restructure its governance structure in this way, many other State societies have followed Vermont's lead.

During Karen's tenure at VMS, the society was able to achieve many of its policy initiatives at the State and Federal level. These include passing the "Clean Indoor Air Act," supporting lead screening for children, ensuring coverage of clinical trials, increasing access to health care for Vermonters, funding anti-tobacco programs, and developing a strong education program for physicians around end-of life care.

Karen was also instrumental in helping to establish the Vermont Program for Quality in Health Care (VPQHC). Over the years, VPQHC has achieved national recognition for its important work developing clinical guidelines, reporting on health care quality in Vermont and educating physicians and practitioners. Karen has also demonstrated outstanding leadership and gained national recognition for her work with the American Medical Association and the American Association of Medical Society Executives, where she has participated on many work groups and policy teams.

Prior to becoming Executive Vice President of the Vermont Medical Society, Karen was the Commissioner of Housing and Community Affairs for the State of Vermont. As Commissioner, she worked tirelessly to increase the availability of affordable housing in Vermont. However, I am sure she will say that her most enjoyable job was working for me as a legislative assistant in the 1970's when I represented Vermont in the House of Representatives. Based on our work together, I can personally attest to her grace, competency and sense of humor—all of which are the key characteristics of a successful public servant.

While Karen is leaving the medical society, she will continue to play an important role in improving the social fabric of Vermont. She has accepted a new position at the University of Vermont where she will work with the acting President to develop a renewed sense of mission for the University. I know that I speak for thousands of Vermonters in thanking her for extraordinary service to the Vermont Medical Society and conveying our best wishes in her future endeavors.●

TRIBUTE TO MONICA TENCATE

● Mr. GRASSLEY. Mr. President, I rise to pay tribute to a departing Senate Finance Committee staffer, Monica Tencate. She has served the Senate with great distinction, and it is with much sadness that I am bidding her goodbye. I'd like to take a few moments to describe her contribution.

Monica came to the Senate from California in 1998, and joined Chairman Roth's Finance Committee health team. After effective service there, she moved to Senator FRIST's Subcommittee on Public Health, making a tremendous contribution on a broad range of challenging HELP Committee issues. I know her years with Senator FRIST were very rewarding ones for her, so I was delighted that she was willing to return to the Finance Committee to work with me, as Director of the Finance Committee's health policy team.

As I look back at this year, Monica was a real leader in the Committee's effort to strengthen and improve Medi-

care for the 21st Century, including prescription drug coverage for Medicare beneficiaries. She did a stellar job in helping to assemble a Tripartisan group, which put forward a framework for future success in this area. Due to the September 11 terrorist attacks, making major improvements to Medicare will have to wait until 2002. I believe, however, that we've laid a solid foundation for next year's efforts, and Monica's contribution was indispensable.

Monica also played a key role in the Committee's efforts to help provide coverage to the uninsured, to streamline Medicare regulations for beneficiaries and providers, and to address potentially serious problems posed by the new hospital outpatient payment system. She's done all this while keeping in mind the reality that our federal health programs aren't free—it's hard-working Americans who pay for them. It's easy to lose sight of that fact here inside the Beltway, but Monica never has.

Monica's contribution to me and to the Senate, in fact, went beyond policy and politics. She was a true team player, earning the respect of everyone she worked with, and the affection of her fellow Finance Committee staffers. And she did all this during one of this body's most tumultuous years in recent history—a year we'll all remember for the 50-50 Senate, the change in party control, the September 11 attacks, and finally the anthrax attack that drove many of us out of our offices. She served in her extraordinarily challenging job under these difficult circumstances with grace, commitment, and good humor. She will be sorely missed.

Now Monica is heading home to San Diego, to rejoin her husband Mike, who's also serving the nation in the United States Marines. I wish her and Mike every blessing in this new phase of their life, and I extend to her my deepest thanks.●

200TH ANNIVERSARY OF THE CARLISLE FIRE COMPANY

● Mr. BIDEN. Mr. President, among the images of September 11th that we will never forget, are the pictures of the firefighters rushing into the buildings to help, as everyone else who was able was trying to get out to safety. At that moment, without discussion or explanation, an appreciation for the extraordinary service and leading citizenship of firefighters became a prominent and, I hope, permanent feature of our collective consciousness.

In my State of Delaware, we have a rich heritage of local fire companies serving our communities, a tradition of neighbors helping neighbors. And I rise today to honor one of those local departments, the Carlisle Fire Company,

which serves the City of Milford, Delaware and which will celebrate its 200th anniversary in 2002.

Originally founded under charter from the State Legislature, as, simply, a "Fire Fighting Organization," the company began its service in the spring of 1802, a full 90 years before the first water mains and fire hydrants were installed in Milford. A hand drawn hook-and-ladder was acquired, and was stored along with other equipment at a building owned by Mrs. Angeline Marshall, appropriately, on Water Street.

In 1915, the department reincorporated as the Milford Fire Company, and that same year, there was a 10-day fund drive which raised money to purchase a triple combination fire truck Milford's Truck No. 1. A second name change followed in 1918, to honor Paris T. Carlisle, a Milford resident and member and officer of the Fire Company, who was killed in France during World War I. In 1921, the Company broke ground to build its first fire station, and in 1923, after another successful fundraising drive, Truck No. 2 was purchased and Truck No. 1 refitted to better serve the community. Ground was broken for the current fire hall on Northwest Front Street in 1977, and as the folks in Milford will tell you with well-earned pride, they paid off and burned the mortgage in 1990. At about the same time, ambulance service was added.

From that hall on Front Street, the Carlisle Fire Company responds to more than 1,800 calls per year. With an active Ladies Auxiliary, founded in 1963 with Peggy Jester as its first president, and a Junior Member program, created by then-Chief Marvin Hitch in 1973, the Company is truly a center of community life in Milford. And it also has a special place in our statewide fire-fighting community; the Delaware Volunteer Firemen's Association (DVFA) was organized in Milford in February of 1921, and the first president was Charles E. Varney, who was also president of the Carlisle Fire Company. The Company has continued its leadership in statewide programs ever since.

It is my privilege to share some of the history and hopefully some of the spirit of the Carlisle Fire Company with my colleagues and with our fellow citizens today. We honor the Company's 200th anniversary, and the extraordinary commitment and service that it represents, with gratitude to local firefighters, our neighbors who are there when we need them most. Congratulations to President Francis Morris and Fire Chief Kevin Twilley, and to all the officers, members and friends of the Carlisle Fire Company again, with great respect and with thanks.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to

the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 11:42 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, with an amendment:

S. 494. An act to provide for a transition to democracy and to promote economic recovery in Zimbabwe.

The message also announced that the House has disagreed to the amendment of the Senate to the bill (H.R. 2883) to authorize appropriations for fiscal year 2002 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central intelligence Agency Retirement and Disability System, and for other purposes, and agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints the following Members as the managers of the conference on the part of the House:

From the Permanent Select Committee on Intelligence, for consideration of the house bill and the Senate amendment, and modifications committed to conference: Mr. GOSS, Mr. BEREUTER, Mr. CASTLE, Mr. BOEHLERT, Mr. GIBBONS, Mr. LAHOOD, Mr. CUNNINGHAM, Mr. HOEKSTRA, Mr. BURR of North Carolina, Mr. CHAMBLISS, Ms. PELOSI, Mr. BISHOP, Ms. HARMAN, Mr. CONDIT, Mr. ROEMER, Mr. HASTINGS of Florida, Mr. REYES, Mr. BOSWELL, and Mr. PETERSON of Minnesota.

From the Committee on Armed Services, for consideration of defense tactical intelligence and related activities: Mr. STUMP, Mr. HUNTER, and Mr. SKELTON.

The message further announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 90. An act to amend the Communications Act of 1934 to prohibit telemarketers from interfering with the caller identification service of any person to whom a telephone solicitation is made, and for other purposes.

H.R. 2305. An act to require certain Federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes.

H.R. 2441. An act to amend the Public Health Service Act to redesignate a facility as the National Hansen's Disease Programs Center, and for other purposes.

H.R. 3323. An act to ensure that covered entities comply with the standards for electronic health care transactions and code sets adopted under part C of title XI of the Social Security Act, and for other purposes.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1766. A bill to provide for the energy security of the Nation, and for other purposes.

H.R. 3346. An act to amend the Internal Revenue Code of 1986 to simplify the reporting requirements relating to higher education tuition and related expenses.

H.R. 3391. An act to amend title XVIII of the Social Security Act to provide regulatory relief and contracting flexibility under the Medicare Program.

H.R. 3392. An act to name the national cemetery in Saratoga, New York as the Gerald B.H. Solomon Saratoga National Cemetery, and for other purposes.

H.J. Res. 60. A joint resolution honoring Maureen Reagan on the occasion of her death and expressing condolences to her family, including her husband Dennis Revell and her daughter Rita Revell.

H.J. Res. 76. A joint resolution making further continuing appropriations for the fiscal year 2002, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 25. Concurrent resolution expressing the sense of the Congress regarding tuberous sclerosis.

H. Con. Res. 277. Concurrent resolution recognizing the important contributions of the Hispanic Chamber of Commerce.

The message further announced that pursuant to section 491 of the Higher Education Act (20 U.S.C. 1098(c)), and upon the recommendation of the majority leader, the Speaker has appointed the following member on the part of the House of Representatives to the Advisory Committee on Student Financial Assistance for a 3-year term to fill the existing vacancy thereon: Ms. Norine Fuller of Arlington, Virginia.

ENROLLED BILLS SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 1766. An act to designate the facility of the United States Postal Service located at 4270 John Marr Drive in Annandale, Virginia, as the "Stan Parris Post Office Building."

H.R. 2261. An act to designate the facility of the United States Postal Service located at 2853 Candler Road in Decatur, Georgia, as the "Earl T. Shinhoster Post Office."

H.R. 2299. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

H.R. 2454. An act to redesignate the facility of the United States Postal Service located at 5472 Crenshaw Boulevard in Los Angeles, California, as the "Congressman Julian C. Dixon Post Office Building."

H.J. Res. 71. A joint resolution amending title 36, United States Code, to designate September 11 as Patriot Day.

The enrolled bills and joint resolution were signed subsequently by the President pro tempore (Mr. BYRD).

MEASURES REFERRED

The following bills and joint resolutions were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 90. An act to amend the Communications Act of 1934 to prohibit telemarketers from interfering with the caller identification service of any person to whom a telephone solicitation is made, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 2305. An act to require certain Federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes; to the Committee on Governmental Affairs.

H.R. 2441. An act to amend the Public Health Service Act to redesignate a facility as the national Hansen's Disease Programs Center, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

H.R. 3392. An act to name the national cemetery in Saratoga, New York, as the Gerald B.H. Solomon Saratoga National Cemetery, and for other purposes; to the Committee on Veterans' Affairs.

H.J. Res. 60. Joint resolution honoring Maureen Reagan on the occasion of her death and expressing condolences to her family, including her husband Dennis Revell and her daughter Rita Revell; to the Committee on the Judiciary.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 25. Concurrent resolution expressing the sense of the Congress regarding tuberous sclerosis; to the Committee on Health, Education, Labor, and Pensions.

H. Con. Res. 277. Concurrent resolution recognizing the important contributions of the Hispanic Chamber of Commerce; to the Committee on Commerce, Science, and Transportation.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

S. 1765. A bill to improve the ability of the United States to prepare for and respond to a biological threat or attack.

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3323. An act to ensure that covered entities comply with the standards for electronic health care transactions and code sets adopted under part C of title XI of the Social Security Act, and for other purposes.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1766. A bill to provide for the energy security of the Nation, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4831. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Emergency Extension of the Compliance Date for Standards for Hazardous Air Pollutants for Hazardous Waste Combustors" (FRL7114-6) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4832. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Final Authorization of State Hazardous Waste Management Program Revisions" (FRL7110-7) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4833. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Environmental Impact Assessment of Nongovernmental Activities in Antarctica" (FRL7114-3) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4834. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Operating Permits Program; Oklahoma" (FRL7113-7) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4835. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of the Title V Operating Permit Programs for Thirty-Four California Air Pollution Control Districts" (FRL7113-5) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4836. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval; Operating Permit Programs for the State of Texas" (FRL7113-6) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4837. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Operating Permit Program; New York" (FRL7113-3) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4838. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Operating Permit Program; New Jersey" (FRL7113-1) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4839. A communication from the Principal Deputy Associate Administrator of the

Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of the Operating Permits Program; Arizona Department of Environmental Quality, Maricopa County Environmental Services Department, Pima County Department of Environmental Quality, Arizona" (FRL7113-4) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4840. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Title V Operating Permits Programs; Clark County Department of Air Quality Management, Washoe County District Health Department, and Nevada Division of Environmental Protection, Nevada" (FRL7113-8) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4841. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval of Promulgation of Air Quality Implementation Plans; Connecticut; Revisions to State Plan for Municipal Waste Combustors and Incorporation of Regulation into State Implementation Plan for Ozone" (FRL7106-4) received on December 3, 2001; to the Committee on Environment and Public Works.

EC-4842. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of the Operating Permits Program in Alaska" (FRL7113-9) received on December 3, 2001; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LIEBERMAN, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 1382. A bill to amend title 11, District of Columbia Code, to redesignate the Family Division of the Superior Court of the District of Columbia as the Family Court of the Superior Court, to recruit and retain trained and experienced judges to serve in the Family Court, to promote consistency and efficiency in the assignment of judges to the Family Court and in the consideration of actions and proceedings in the Family Court, and for other purposes. (Rept. No. 107-107).

H.R. 2657. A bill to amend title 11, District of Columbia Code, to redesignate the Family Division of the Superior Court of the District of Columbia as the Family Court of the Superior Court, to recruit and retain trained and experienced judges to serve in the Family Court, to promote consistency and efficiency in the assignment of judges to the Family Court and in the consideration of actions and proceedings in the Family Court, and for other purposes. (Rept. No. 107-108).

By Mr. INOUE, from the Committee on Appropriations:

Report to accompany H.R. 3338, A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes. (Rept. No. 107-109).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. DASCHLE (for himself and Mr. BINGAMAN):

S. 1766. A bill to provide for the energy security of the Nation, and for other purposes; read the first time.

By Mr. KENNEDY (for himself and Mr. MCCAIN):

S. 1767. A bill to amend title 38, United States Code, to provide that certain service in the American Field Service ambulance corps shall be considered active duty for the purposes of all laws administered by the Secretary of Veteran's Affairs, and for other purposes; to the Committee on Veterans' Affairs.

By Mrs. FEINSTEIN (for herself and Mrs. BOXER):

S. 1768. A bill to authorize the Secretary of the Interior to implement the CalFed Bay-Delta Program; to the Committee on Energy and Natural Resources.

By Mrs. BOXER:

S. 1769. A bill to authorize the Secretary of the Army to carry out a project for flood protection and ecosystem restoration for Sacramento, California, and for other purposes; to the Committee on Environment and Public Works.

By Mr. LEAHY:

S. 1770. A bill to implement the International Convention for the Suppression of Terrorist Bombings to strengthen criminal laws relating to attacks on places of public use, to implement the International Convention of the Suppression of the Financing of Terrorism, to combat terrorism and defend the Nation against terrorist acts, and for other purposes; to the Committee on the Judiciary.

By Mr. TORRICELLI (for himself and Mr. CORZINE):

S. 1771. A bill to designate the facility of the United States Postal Service located at 65 North Main Street in Cranbury, New Jersey, as the "Todd Beamer Post Office Building"; to the Committee on Governmental Affairs.

By Mr. SMITH of New Hampshire:

S. 1772. A bill to ensure that American victims of terrorism have access to the blocked assets of terrorists, terrorist organizations, and state sponsors of terrorism; to the Committee on the Judiciary.

By Mrs. BOXER (for herself and Mrs. FEINSTEIN):

S. 1773. A bill to designate the Richard J. Guadagno Headquarters and Visitors Center at Humboldt Bay National Wildlife Refuge, California; to the Committee on Environment and Public Works.

By Mr. CORZINE (for himself and Mr. TORRICELLI):

S. 1774. A bill to accord honorary citizenship to the alien victims of September 11, 2001, terrorist attacks against the United States and to provide for the granting of citizenship to the alien spouses and children of certain victims of such attacks; to the Committee on the Judiciary.

By Mr. HUTCHINSON:

S. 1775. A bill to prevent plant enterprise terrorism; to the Committee on the Judiciary.

By Mr. CORZINE (for himself and Mr. TORRICELLI):

S. 1776. A bill to provide for the naturalization of Deena Gilbey; to the Committee on the Judiciary.

By Mrs. CLINTON (for herself, Mr. LEAHY, and Mr. SPECTER):

S. 1777. A bill to authorize assistance for individuals with disabilities in foreign countries, including victims of landmines and other victims of civil strife and warfare, and for other purposes; to the Committee on Foreign Relations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CLELAND (for himself, Mr. FEINGOLD, Mr. ALLEN, Mr. COCHRAN, Mr. MILLER, and Mr. AKAKA):

S. Res. 187. A resolution commending the staffs of Members of Congress, the Capitol Police, the Office of the Attending Physician and his health care staff, and other members of the Capitol Hill community for their courage and professionalism during the days and weeks following the release of anthrax in Senator Daschle's office; to the Committee on Governmental Affairs.

By Mr. BIDEN (for himself, Mr. DASCHLE, Mr. LOTT, Mr. BAYH, Mr. BOND, Mrs. BOXER, Mr. BROWNBAC, Mrs. CARNAHAN, Mr. CARPER, Mr. DODD, Mr. DORGAN, Mr. DURBIN, Mr. EDWARDS, Mr. GRAHAM, Mr. HATCH, Mr. HUTCHINSON, Mr. KERRY, Mr. KOHL, Mr. LEVIN, Mr. LIEBERMAN, Mr. MCCONNELL, Ms. MIKULSKI, Mr. MURKOWSKI, Mrs. MURRAY, Mr. NELSON of Florida, Mr. SARBANES, Mr. STEVENS, Mr. THOMAS, Mr. THOMPSON, and Mr. TORRICELLI):

S. Con. Res. 88. A concurrent resolution expressing solidarity with Israel in the fight against terrorism; considered and agreed to.

ADDITIONAL COSPONSORS

S. 321

At the request of Mr. GRASSLEY, the name of the Senator from Nevada (Mr. ENSIGN) was added as a cosponsor of S. 321, a bill to amend title XIX of the Social Security Act to provide families of disabled children with the opportunity to purchase coverage under the Medicaid program for such children, and for other purposes.

S. 556

At the request of Mr. JEFFORDS, the name of the Senator from Minnesota (Mr. WELLSTONE) was added as a cosponsor of S. 556, a bill to amend the Clean Air Act to reduce emissions from electric powerplants, and for other purposes.

S. 697

At the request of Mr. HATCH, the name of the Senator from Ohio (Mr. VOINOVICH) was added as a cosponsor of S. 697, a bill to modernize the financing of the railroad retirement system and to provide enhanced benefits to employees and beneficiaries.

S. 1067

At the request of Mr. GRASSLEY, the name of the Senator from Nevada (Mr. ENSIGN) was added as a cosponsor of S. 1067, a bill to amend the Internal Revenue Code of 1986 to expand the avail-

ability of Archer medical savings accounts.

S. 1119

At the request of Mr. LEAHY, the name of the Senator from Delaware (Mr. BIDEN) was added as a cosponsor of S. 1119, a bill to require the Secretary of Defense to carry out a study of the extent to the coverage of members of the Selected Reserve of the Ready Reserve of the Armed Forces under health benefits plans and to submit a report on the study of Congress, and for other purposes.

S. 1379

At the request of Mr. KENNEDY, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 1379, a bill to amend the Public Health Service Act to establish an Office of Rare Diseases at the National Institutes of Health, and for other purposes.

S. 1578

At the request of Mr. DORGAN, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 1578, a bill to preserve the continued viability of the United States travel industry.

S. 1663

At the request of Mrs. CLINTON, the name of the Senator from New Mexico (Mr. BINGAMAN) was added as a cosponsor of S. 1663, a bill to amend title 4, United States Code, to add National Korean War Veterans Armistice Day to the list of days on which the flag should especially be displayed.

S. 1678

At the request of Mr. MCCAIN, the names of the Senator from Delaware (Mr. BIDEN) and the Senator from Kansas (Mr. BROWNBAC) were added as cosponsors of S. 1678, a bill to amend the Internal Revenue Code of 1986 to provide that a member of the uniformed services or the Foreign Service shall be treated as using a principal residence while away from home on qualified official extended duty in determining the exclusion of gain from the sale of such residence.

S. 1679

At the request of Mr. CONRAD, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 1679, a bill to amend title XVIII of the Social Security Act to accelerate the reduction on the amount of beneficiary copayment liability for Medicare outpatient services.

S. 1707

At the request of Mr. DURBIN, his name was added as a cosponsor of S. 1707, a bill to amend title XVIII of the Social Security Act to specify the update for payments under the Medicare physician fee schedule for 2002 and to direct the Medicare Payment Advisory Commission to conduct a study on replacing the use of the sustainable growth rate as a factor in determining such update in subsequent years.

At the request of Mr. THOMAS, his name was added as a cosponsor of S. 1707, *supra*.

At the request of Mr. JEFFORDS, the names of the Senator from Utah (Mr. HATCH), the Senator from Illinois (Mr. FITZGERALD), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 1707, *supra*.

S. 1738

At the request of Mr. KERRY, the names of the Senator from Ohio (Mr. VOINOVICH) and the Senator from Maine (Ms. COLLINS) were added as cosponsors of S. 1738, a bill to amend title XVIII of the Social Security Act to provide regulatory relief, appeals process reforms, contracting flexibility, and education improvements under the medicare program, and for other purposes.

S. 1745

At the request of Mrs. LINCOLN, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S. 1745, a bill to delay until at least January 1, 2003, any changes in medicaid regulations that modify the medicaid upper payment limit for non-State Government-owned or operated hospitals.

S. 1752

At the request of Mr. CORZINE, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 1752, a bill to amend the Public Health Service Act with respect to facilitating the development of microbicides for preventing transmission of HIV and other sexually transmitted diseases.

S. 1765

At the request of Mr. FRIST, the names of the Senator from Hawaii (Mr. INOUE), the Senator from Michigan (Mr. LEVIN), and the Senator from Alabama (Mr. SESSIONS) were added as cosponsors of S. 1765, a bill to improve the ability of the United States to prepare for and respond to a biological threat or attack.

S.J. RES. 29

At the request of Mr. HATCH, the name of the Senator from New York (Mrs. CLINTON) was added as a cosponsor of S.J. Res. 29, a joint resolution amending title 36, United States Code, to designate September 11 as Patriot Day.

AMENDMENT NO. 2157

At the request of Mr. MCCAIN, the names of the Senator from Delaware (Mr. BIDEN) and the Senator from Kansas (Mr. BROWNBACK) were added as cosponsors of amendment No. 2157 intended to be proposed to H.R. 3090, a bill to provide tax incentives for economic recovery.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DASCHLE (for himself and Mr. BINGAMAN):

S. 1766. A bill to provide for the energy security of the Nation, and for other purposes; read the first time.

Mr. JOHNSON. Mr. President, I rise in strong support of the comprehensive energy bill that is being introduced today.

As we all know, there has been a great deal of discussion this year about the nation's energy situation. The increasing volatility in gasoline and diesel prices and the growing tension in the world from the terrorist attacks have affected all of us. There is a clear need for energy policies that ensure long term planning, homeland security, fuel diversity and a focus on new technologies.

To this end, I am very pleased that a comprehensive energy bill has been introduced in the Senate by my South Dakota colleague, Senator TOM DASCHLE. The bill is the result of many months of hard work by the Majority Leader and the chairmen of the committees of jurisdiction, including Senator JEFF BINGAMAN, the chairman of the Energy Committee, of which I am a member. They have listened to the concerns of both those who run our energy systems and our constituents in crafting the legislation. The result is a balanced and thorough product that addresses most of the major segments of the energy system and looks ahead to the needs of future.

The bill covers a number of important areas, including incentives to increase oil and gas production and the nation's supplies of traditional fuels, streamlining of electricity systems and regulations, important environmental and conservation measures, and provisions to increase efficiency of vehicles and appliances.

One of the key provisions in the bill is the inclusion of a renewable fuels standard. Earlier this year, I introduced a bill with Senator CHUCK HAGEL of Nebraska, the Renewable Fuels for Energy Security Act of 2001 (S. 1006), to ensure future growth for ethanol and biodiesel through the creation of a new renewable fuels content standard in all motor fuel produced and used in the U.S. I am pleased the framework of this bill is included in the comprehensive energy legislation.

Today, ethanol and biodiesel comprise less than one percent of all transportation fuel in the United States. 1.8 billion gallons is currently produced in the U.S. The energy bill's language would require that five billions gallons of transportation fuel be comprised of renewable fuel by 2012—nearly a tripling of the current ethanol and renewable fuel production.

There are great benefits of ethanol and renewable fuels for the environment and the economies of rural communities. We have many ethanol plants in South Dakota and more are being planned. These farmer-owned ethanol plants in South Dakota, and in neigh-

boring states, demonstrate the hard work and commitment to serve a growing market for clean domestic fuels.

Based on current projections, construction of new plants will generate \$900 million in capital investment and tens of thousands of construction jobs to rural communities. For corn farmers, the price of corn is expected to rise between 20 and 30 cents per bushel. Farmers will have the opportunity to invest in these ethanol plants to capture a greater piece of the "value chain."

Combine this with the provisions of the energy bill and the potential economic impact for South Dakota is tremendous. Today, 3 ethanol plants in South Dakota (Broins in Scotland and Heartland Grain Fuels in Aberdeen and Huron) produce nearly 30 million gallons per year. With the enactment of a renewable fuels standard, the production in South Dakota could grow substantially, with at least 2000 farmers owning ethanol plants and producing 200 million gallons of ethanol per year or more.

An important but under-emphasized fuel is biodiesel, which is chiefly produced from excess soybean oil. We all know that soybean prices are hovering near historic lows. Biodiesel production is small but has been growing steadily. The renewable fuels standard would greatly increase the prospects for biodiesel production and benefit soybean farmers from South Dakota and other states.

Moreover, the enactment of a renewable fuels standards would greatly increase the nation's energy security. Greater usage of renewable fuels would displace the level of foreign oil that we currently use. During these difficult times, it is imperative that we find ways to improve the nation's energy security and reduce our dependence on foreign oil. A renewable fuels standard would go a long way towards achieving this goal.

The House passed an energy bill without any provisions for a renewable fuels standard. Moreover, the House looks backward by focusing too heavily on tax breaks for traditional fuel supplies without enough encouragement for new technologies and provisions that will reduce our dependency on foreign oil. The Senate bill achieves the right balance for the nation's future. I commend Senators DASCHLE and BINGAMAN for their efforts and look forward to enacting the bill.

Mr. HOLLINGS. Mr. President, I want to thank Senator BINGAMAN and Senator DASCHLE for their leadership on the introduction of a comprehensive energy bill today, the Energy Policy Act of 2001. This bill has many components, and it required a great deal of coordination and effort to compile pieces that address issues that cut across committee lines. I appreciate their efforts in this regard.

As chairman of the Committee on Commerce, Science, and Transportation, I am particularly pleased to see several areas of coverage in the bill. This bill incorporates many climate science and technology provisions from a bill Senators KERRY, STEVENS, INOUE, AKAKA, and I recently introduced, S. 1716, the Global Climate Change Act of 2001. These provisions will improve our climate monitoring, measurement, research, and technology so that we are better able to discern climate change, understand its patterns, and manage its effects. In addition, it contains provisions that would establish a service to provide expert, unbiased technology advice to Congress, which we have sorely lacked since the Office of Technology Assessment was abolished in 1995.

In addition, there is a placeholder in the bill for a CAFE provision. In 1975, I co-sponsored the legislation that became the current CAFE law. I was also very involved in efforts during the 101st and 102nd Congresses to increase CAFE standards. I am pleased to report that the Commerce Committee is again taking up the issue of fuel economy standards. In fact, we will be holding a hearing on this topic tomorrow morning.

The Committee is embarking on a process to develop a strong and technically feasible CAFE proposal that will strengthen our domestic and economic security. Such a provision must achieve oil savings to reduce our petroleum consumption and dependence on imported oil. It also must ensure that our automotive industry remains technically competitive. This is quite a challenge, but it is an issue that must be addressed.

The CAFE measures originally arose out of concern for the nation's energy security following the oil crisis of the early 1970s. When the U.S. first pursued CAFE, imported oil accounted for 36 percent of the nation's oil use; today imported oil accounts for 56 percent of U.S. oil use. Twenty-eight percent of our nation's total oil consumption is used in the transportation sector.

Since CAFE was implemented in 1975, we have seen an approximate doubling in the fuel economy of the nation's vehicle fleet. In 2000 alone, we saved over 3 million barrels of oil per day because of the fuel economy gains made since the mid-1970s. Clearly, a comprehensive energy policy must incorporate provisions to reduce energy use in the transportation sector—a goal that I believe can best be achieved by using technological advances to boost the fuel economy of passenger vehicles.

I appreciate that Senator BINGAMAN and Senator DASCHLE recognized the complexity of CAFE issues. I look forward to reporting back in a few months with a solid piece of legislation, compiled through the entire Commerce Committee, to fill the current placeholder in the energy bill.

By Mr. KENNEDY (for himself and Mr. MCCAIN):

S. 1767. A bill to amend title 38, United States Code, to provide that certain service in the American Field Service ambulance corps shall be considered active duty for the purposes of all laws administered by the Secretary of Veterans' Affairs, and for other purposes; to the Committee on Veterans' Affairs.

Mr. KENNEDY. Mr. President, it's a privilege to join Senator MCCAIN in introducing the American Field Service Recognition Act to correct the long-standing injustice suffered by these courageous World War II veterans who saved the lives of so many American and Allied service members, but who have long been denied the veterans benefits that they need and deserve.

The American Field Service was a corps of nearly 2200 Americans, who drove ambulances into combat zones where American and Allied troops fought between 1939 and 1945. Twenty-seven were killed, seventy-one were wounded, and at least twenty-three were captured during that time.

The AFS members were volunteers who wanted to contribute to the war effort, but many were ineligible for service in the U.S. Armed Forces because of their age or their physical disability. The AFS received substantial support from the American government and its personnel were assigned in the theaters of North Africa, Western Europe, and India-Burma. During the war, the AFS evacuated approximately 700,000 wounded on these fronts.

Their application under a 1970's law for veterans' benefits was finally, but only partially, approved in 1990. The request for eligibility was that each AFS driver must have served under direct U.S. Army command during prescribed periods of time. The result was to exclude AFS drivers who served in France and North Africa before January 1943, half of the drivers who served in Italy, and all who served in the India-Burma Theater. Overall, because of this narrow interpretation of the law, fifty percent of the drivers who served under fire were denied benefits given to other drivers who served in other combat regions.

Sadly, AFS drivers are passing away at an increasingly rapid rate. There are currently 631 living drivers from World War II on the AFS roster, and 198 of them are still ineligible for benefits, including six who have recently passed away without access to VA medical care. Clearly, these courageous veterans, such as Clifford Bissler of Stuart, FL, who lost a leg and received two Purple Hearts for his service in the India-Burma Theater, deserve the help and recognition that this legislation will bring.

In 1943, President Roosevelt wrote to the leader of AFS and said of the drivers, "In serving our allies, they serve

America." It is long, long past time for Congress to finally recognize the contributions of all of these dedicated Americans who served during World War II, granting them the veteran's benefits and assistance that they very much need and deserve. If you would like to cosponsor this bill, please contact us or have your staff contact Duane Seward at 224-2008.

By Mrs. FEINSTEIN (for herself and Mrs. BOXER):

S. 1768. A bill to authorize the Secretary of the Interior to implement the CalFed Bay-Delta Program; to the Committee on Energy and Natural Resources.

Mrs. FEINSTEIN. Mr. President, today I am introducing a bill to authorize the CALFED Bay Delta Program. I am pleased that Senator BOXER has agreed to co-sponsor this bill with me. The bill that I am introducing today is also supported by Senator BINGAMAN, the chairman of the Senate Energy and Natural Resources Committee. He has committed to helping move this bill through his committee and hopefully through the Senate.

The most important thing about this new bill is that it fully authorizes the CALFED Record of Decision and all the projects associated with it with Federal costs of less than \$10 million. Any projects of more than \$10 million that are ready to be constructed will be reported to the authorizing committees in a package every 2 years.

This bill authorizes \$2.4 billion to cover the one-third Federal share of the CALFED program. The State and water users will each be responsible for the other two-thirds.

California's population is 35 million today and could reach 50 million within the next 20 years. There simply is not enough water in the system to meet the future demand. CALFED is the best hope we have to increase our water supply, preserve the environment and protect against a water emergency. I don't believe we can wait any longer.

Mrs. BOXER. I am very pleased to be joining Senator FEINSTEIN today in the introduction of a bill that will help address California's water needs. We have worked closely together on this effort over the last year and I believe that this bill will help the CALFED program move forward in the right direction.

In California, as in many parts of the West, water is our lifeblood. For decades, water allocation was conducted through endless appeals and lawsuits, and divisive ballot initiatives. Such battles were painful and, they prevented us from finding real solutions to our state's very real water problems.

In 1994, a new state-federal partnership program called CALFED promised a better way—a plan to provide reliable, clean water, to farms, businesses, and millions of Californians while at

the same time restoring our fish, wildlife and environment. What has made CALFED work is that it employs a consensus approach that balances the needs of these various interests.

This bill stays true to that balanced approach. It authorizes the continuation of the CALFED program over the next 5 years and provides for a federal contribution of \$2.4 billion over that time period. The bill requires that the CALFED program goals of protecting drinking water quality, restoring ecological health, improving water supply reliability, and protecting Delta levees progress in a balanced manner. The bill describes a detailed set of reports that should be provided to Congress prior to approving any project costing over \$10 million. This reporting process is designed to ensure that major projects are not approved until the environmental and economic impacts are clearly understood.

I believe CALFED offers the best hope for ending California's intractable water wars. This bill will ensure that the CALFED program can continue its good work.

By Mrs. BOXER:

S. 1769. A bill to authorize the Secretary of the Army to carry out a project for flood protection and ecosystem restoration for Sacramento, California, and for other purposes; to the Committee on Environment and Public Works.

Mrs. BOXER. S. 1769, Mr. President, I am introducing a bill to improve flood protection in Sacramento. This is a companion bill to one that Representative MATSUI is introducing today in the House.

Currently, Sacramento only has an 85-year flood protection. This bill would raise the existing walls of Folsom Dam by 7 feet, which would improve flood protection to 213 years. Without this improvement, \$40 billion of property, including the California State Capitol, 6 major hospitals, 26 nursing home facilities, over 100 schools, three major freeway systems, and approximately 160,000 homes and apartments, are at risk of a devastating flood.

For a city of its size, Sacramento falls shockingly below the 400 year-level of flood protection enjoyed by other river cities such as St. Louis, Tacoma, Dallas, and Kansas City. The Folsom mini raise is the critical next step in providing Sacramento with an adequate level of flood protection.

Next year, the Environment and Public Works Committee, of which I am a member, will reauthorize the Water Resources and Development Act. I hope this bill will be included as part that legislation.

By Mr. LEAHY:

S. 1770. A bill to implement the International Convention for the Suppression of Terrorist Bombings to strength-

en criminal laws relating to attacks on places of public use, to implement the International Convention of the Suppression of the Financing of Terrorism, to combat terrorism and defend the Nation against terrorist acts, and for other purposes; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, I rise to introduce the Terrorist Bombing Convention Implementation Act of 2001 and the Suppression of the Financing of Terrorism Convention Implementation Act of 2001. This bill would bring the United States into indisputable and immediate compliance with two important international conventions, which were signed by the United States and transmitted to the U.S. Senate for ratification by President Clinton. Both Conventions were entered into after the terrorist bombings at the United States embassies in Kenya and Tanzania. The bill also contains a provision which would enhance the ability of law enforcement authorities to work with their foreign counterparts in fighting sophisticated international criminal organizations by sharing wiretap information when appropriate.

The International Convention for the Suppression of Terrorist Bombings, "Bombing Convention", was adopted by the United Nations General Assembly in December 1997 and signed by the United States in January 1998. In September 1999, it was transmitted to the Senate by President Clinton for ratification.

The International Convention for the Suppression of Financing Terrorism, "Financing Convention", was adopted by the United Nations General Assembly in December 1999 and signed by the United States in January 2000. In October 2000, it was transmitted to the Senate by President Clinton for ratification.

Under the chairmanship of Senator BIDEN, the Foreign Relations Committee has moved expeditiously to report these conventions to the full Senate. Once ratified, they should be swiftly implemented. The passage of the proposed implementing legislation which I introduce today would ensure that the United States is in immediate compliance with these international obligations relating to terrorism.

Both conventions require signatory nations to adopt criminal laws prohibiting specified terrorist activities in order to create a regime of universal jurisdiction over certain crimes. Articles 2 and 4 of the Bombing Convention require signatory countries to criminalize the delivery, placement, discharge or detonation of explosives and other lethal devices, "in, into, or against" various defined public places with the intent to kill, cause serious bodily injury, or extensively damage such public places. The Bombing Convention also requires that signatories criminalize aiding and abetting, at-

tempting, or conspiring to commit such crimes.

Articles 2 and 4 of the Financing Convention require signatory countries to criminalize willfully "providing or collecting" funds, directly or indirectly, with knowledge that they are to be used to carry out acts which either 1. violate nine enumerated existing treaties, or 2. are aimed at killing or injuring civilians with the purpose of intimidating a population or compelling a government to do any act. The Financing Convention also requires that signatories criminalize aiding and abetting, attempting, or conspiring to commit such crimes. Signatories must criminalize such acts under Article 2 whether or not "the funds were actually used to carry out" such an offense.

Both conventions require that signatory nations exercise limited extraterritorial jurisdiction and extradite or prosecute those who commit such crimes when found inside their borders. The conventions also require that signatories ensure that, under their domestic laws, political, religious, ideological, racial or other similar considerations are not a justification for committing the enumerated crimes. Thus, signatory nations will not be able to assert such bases to deny an extradition request for a covered crime. Finally, Article 4 of each convention requires that signatory states make the covered offenses "punishable by appropriate penalties which take into account the grave nature of [the] offenses."

This proposed implementation legislation, consistent with the House version of this bill, H.R. 3275, creates two new crimes, one for bombings and another for financing terrorist acts, that would track precisely the language in the treaties, and bring the United States into undisputed compliance. The bill would also provide extraterritorial jurisdiction as required by the conventions. Furthermore the bill would create domestic jurisdiction for these crimes in limited situations where a national interest is implicated, while excluding jurisdiction over acts where the convention does not require such jurisdiction and there is no distinct federal interest served.

The bill, again consistent with the H.R. 3275, also contains "ancillary provisions" that would make the two new crimes predicates for money laundering charges, wiretaps, RICO charges, an 8-year statute of limitations, include them as "federal crimes of terrorism," and make civil asset forfeiture available for the new terrorism financing crime. Existing laws which relate to similar crimes are predicates for each of these tools, and providing law enforcement with these ancillary provisions is both consistent and appropriate.

Neither international convention requires a death penalty provision for

any covered crime, and the Department of Justice has provided a memorandum to Congress, in response to a request for its views, that such a provision would not be required to bring the United States into compliance. This should come as no surprise, given international sentiment opposing the United States' use of the death penalty in other contexts. Indeed, the inclusion of a death penalty provision in the implementing legislation for these conventions could lead to complications in extraditing individuals to the United States from countries that do not employ the death penalty. Therefore, unlike the House version of the implementing legislation, the Senate version contains no new death penalty provision.

Unlike H.R. 3275, the bill does not contain a third crime for "concealment" of material support for terrorists. The Department of Justice has conceded in the memorandum which it provided to Congress that this provision is not necessary to bring the United States into compliance with the conventions. Indeed, in the wake of the passage of similar provisions in the USA Patriot Act, P.L. No. 107-56, such legislation is not needed. Furthermore, although a similar provision is currently set forth in 18 U.S.C. §2339A, the House bill provides a lower *mens rea* requirement than that law; an important change which was not highlighted in the Administration materials provided explaining the proposal.

Finally, the Senate bill contains an important new tool for international cooperation between law enforcement which is not included in H.R. 3275. Currently, there is no clear statutory authority which allows domestic law enforcement agents to share Title III wiretap information with foreign law enforcement counterparts. This may create problems when, for example, the DEA wants to alert Colombian authorities that a cocaine shipment is about to leave a Colombian port but the information is derived from a Title III wiretap.

This bill would clarify the authority for sharing wiretap derived information, specifically in the Title III context. The bill provides a clear mechanism through which law enforcement may share wiretap information with foreign law enforcement, while at the same time ensuring that there are appropriate safeguards to protect this sensitive information against misuse. It adds a subsection to 18 U.S.C. §2517, that permits disclosure of wiretap information to foreign officials (1) with judicial approval, (2) in such a manner and under such conditions as a court may direct, and (3) consistent with Attorney General guidelines on how the information may be used to protect confidentiality. This clarification will provide an additional tool to investigate international criminal enter-

prises and to seek the assistance of foreign law enforcement in our efforts.

For all of these reasons, I am pleased to introduce this legislation and I urge its swift enactment into law.

I ask unanimous consent that the text of the bill be printed in the RECORD, along with the sectional analysis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1770

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SUPPRESSION OF TERRORIST BOMBINGS

SEC. 101. SHORT TITLE.

This title may be cited as the "Terrorist Bombings Convention Implementation Act of 2001".

SEC. 102. BOMBING STATUTE.

(a) OFFENSE.—Chapter 113B of title 18, United States Code, relating to terrorism, is amended by adding at the end thereof the following new section:

"§2332f. Bombings of places of public use, government facilities, public transportation systems and infrastructure facilities"

"(a) OFFENSES.—

"(1) IN GENERAL.—Whoever unlawfully delivers, places, discharges, or detonates an explosive or other lethal device in, into, or against a place of public use, a state or government facility, a public transportation system, or an infrastructure facility—

"(A) with the intent to cause death or serious bodily injury, or

"(B) with the intent to cause extensive destruction of such a place, facility, or system, where such destruction results in or is likely to result in major economic loss, shall be punished as prescribed in subsection (c).

"(2) ATTEMPTS AND CONSPIRACIES.—Whoever attempts or conspires to commit an offense under paragraph (1) shall be punished as prescribed in subsection (c).

"(b) JURISDICTION.—There is jurisdiction over the offenses in subsection (a) if—

"(1) the offense takes place in the United States and—

"(A) the offense is committed against another state or a government facility of such state, including its embassy or other diplomatic or consular premises of that state;

"(B) the offense is committed in an attempt to compel another state or the United States to do or abstain from doing any act;

"(C) at the time the offense is committed, it is committed—

"(i) on board a vessel flying the flag of another state;

"(ii) on board an aircraft which is registered under the laws of another state; or

"(iii) on board an aircraft which is operated by the government of another state;

"(D) a perpetrator is found outside the United States;

"(E) a perpetrator is a national of another state or a stateless person; or

"(F) a victim is a national of another state or a stateless person;

"(2) the offense takes place outside the United States and—

"(A) a perpetrator is a national of the United States or is a stateless person whose habitual residence is in the United States;

"(B) a victim is a national of the United States;

"(C) a perpetrator is found in the United States;

"(D) the offense is committed in an attempt to compel the United States to do or abstain from doing any act;

"(E) the offense is committed against a state or government facility of the United States, including an embassy or other diplomatic or consular premises of the United States;

"(F) the offense is committed on board a vessel flying the flag of the United States or an aircraft which is registered under the laws of the United States at the time the offense is committed; or

"(G) the offense is committed on board an aircraft which is operated by the United States.

"(c) PENALTIES.—Whoever violates this section shall be imprisoned for any term of years or for life.

"(d) EXEMPTIONS TO JURISDICTION.—This section does not apply to—

"(1) the activities of armed forces during an armed conflict, as those terms are understood under the law of war, which are governed by that law,

"(2) activities undertaken by military forces of a state in the exercise of their official duties; or

"(3) offenses committed within the United States, where the alleged offender and the victims are United States citizens and the alleged offender is found in the United States, or where jurisdiction is predicated solely on the nationality of the victims or the alleged offender and the offense has no substantial effect on interstate or foreign commerce.

"(e) DEFINITIONS.—As used in this section, the term—

"(1) 'serious bodily injury' has the meaning given that term in section 1365(g)(3) of this title;

"(2) 'national of the United States' has the meaning given that term in section 101(a)(22) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22));

"(3) 'state or government facility' includes any permanent or temporary facility or conveyance that is used or occupied by representatives of a state, members of Government, the legislature or the judiciary or by officials or employees of a state or any other public authority or entity or by employees or officials of an intergovernmental organization in connection with their official duties;

"(4) 'intergovernmental organization' includes international organization (as defined in section 1116(b)(5) of this title);

"(5) 'infrastructure facility' means any publicly or privately owned facility providing or distributing services for the benefit of the public, such as water, sewage, energy, fuel, or communications;

"(6) 'place of public use' means those parts of any building, land, street, waterway, or other location that are accessible or open to members of the public, whether continuously, periodically, or occasionally, and encompasses any commercial, business, cultural, historical, educational, religious, governmental, entertainment, recreational, or similar place that is so accessible or open to the public;

"(7) 'public transportation system' means all facilities, conveyances, and instrumentalities, whether publicly or privately owned, that are used in or for publicly available services for the transportation of persons or cargo;

"(8) 'explosive' has the meaning given in section 844(j) of this title insofar that it is designed, or has the capability, to cause death, serious bodily injury, or substantial material damage;

“(9) ‘other legal device’ means any weapon or device that is designed or has the capability to cause death, serious bodily injury, or substantial damage to property through the release, dissemination, or impact of toxic chemicals, biological agents, or toxins (as those terms are defined in section 178 of this title) or radiation or radioactive material;

“(10) ‘military forces of a state’ means the armed forces of a state which are organized, trained, and equipped under its internal law for the primary purpose of national defense or security, and persons acting in support of those armed forces who are under their formal command, control, and responsibility;

“(11) ‘armed conflict’ does not include internal disturbances and tensions, such as riots, isolated, and sporadic acts of violence, and other acts of a similar nature; and

“(12) ‘state’ has the same meaning as that term has under international law, and includes all political subdivisions thereof.”

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 113B of title 18, United States Code, is amended by adding at the end thereof the following:

“2332f. Bombings of places of public use, government facilities, public transportation systems and infrastructure facilities.”

(c) DISCLAIMER.—Nothing contained in this section is intended to affect the applicability of any other Federal or State law which might pertain to the underlying conduct.

SEC. 103. EFFECTIVE DATE.

Section 102 shall take effect on the date that the International Convention for the Suppression of Terrorist Bombings enters into force for the United States.

TITLE II—SUPPRESSION OF THE FINANCING OF TERRORISM

SEC. 201. SHORT TITLE.

This title may be cited as the “Suppression of the Financing of Terrorism Convention Implementation Act of 2001”.

SEC. 202. TERRORISM FINANCING STATUTE.

(a) IN GENERAL.—Chapter 113B of title 18, United States Code, relating to terrorism, is amended by adding at the end thereof the following new section:

“§ 2339C. Prohibitions against the financing of terrorism

“(a) OFFENSES.—

“(1) IN GENERAL.—Whoever, in a circumstance described in subsection (c), by any means, directly or indirectly, unlawfully and willfully provides or collects funds with the intention that such funds be used, or with the knowledge that such funds are to be used, in full or in part, in order to carry out—

“(A) an act which constitutes an offense within the scope of a treaty specified in subsection (e)(7), as implemented by the United States, or

“(B) any other act intended to cause death or serious bodily injury to a civilian, or to any other person not taking an active part in the hostilities in a situation of armed conflict, when the purpose of such act, by its nature or context, is to intimidate a population, or to compel a government or an international organization to do or to abstain from doing any act, shall be punished as prescribed in subsection (d)(1).

“(2) ATTEMPTS AND CONSPIRACIES.—Whoever attempts or conspires to commit an offense under paragraph (1) shall be punished as prescribed in subsection (d)(1).

“(3) RELATIONSHIP TO PREDICATE ACT.—For an act to constitute an offense set forth in

this subsection, it shall not be necessary that the funds were actually used to carry out a predicate act.

“(b) JURISDICTION.—There is jurisdiction over the offenses in subsection (a) in the following circumstances—

“(1) the offense takes place in the United States and—

“(A) a perpetrator was a national of another state or a stateless person;

“(B) on board a vessel flying the flag of another state or an aircraft which is registered under the laws of another state at the time the offense is committed;

“(C) on board an aircraft which is operated by the government of another state;

“(D) a perpetrator is found outside the United States;

“(E) was directed toward or resulted in the carrying out of a predicate act against—

“(i) a national of another state; or

“(ii) another state or a government facility of such state, including its embassy or other diplomatic or consular premises of that state;

“(F) was directed toward or resulted in the carrying out of a predicate act committed in an attempt to compel another state or international organization to do or abstain from doing any act; or

“(G) was directed toward or resulted in the carrying out of a predicate act against—

“(i) outside the United States; or

“(ii) within the United States, and either the offense or the predicate act was conducted in, or the results thereof affected, interstate or foreign commerce;

“(2) the offense takes place outside the United States and—

“(A) a perpetrator is a national of the United States or is a stateless person whose habitual residence is in the United States;

“(B) a perpetrator is found in the United States; or

“(C) was directed toward or resulted in the carrying out of a predicate act against—

“(i) any property that is owned, leased, or used by the United States or by any department or agency of the United States, including an embassy or other diplomatic or consular premises of the United States;

“(ii) any person or property within the United States;

“(iii) any national of the United States or the property of such national; or

“(iv) any property of any legal entity organized under the laws of the United States, including any of its States, districts, commonwealths, territories, or possessions;

“(3) the offense is committed on board a vessel flying the flag of the United States or an aircraft which is registered under the laws of the United States at the time the offense is committed;

“(4) the offense is committed on board an aircraft which is operated by the United States; or

“(5) the offense was directed toward or resulted in the carrying out of a predicate act committed in an attempt to compel the United States to do or abstain from doing any act.

“(c) PENALTIES.—Whoever violates subsection (a) shall be fined under this title, imprisoned for not more than 20 years, or both.

“(d) DEFINITIONS.—In this section—

“(1) the term ‘funds’ means assets of every kind, whether tangible or intangible, movable or immovable, however acquired, and legal documents or instruments in any form, including electronic or digital, evidencing title to, or interest in, such assets, including coin, currency, bank credits, travelers checks, bank checks, money orders, shares,

securities, bonds, drafts, and letters of credit;

“(2) the term ‘government facility’ means any permanent or temporary facility or conveyance that is used or occupied by representatives of a state, members of a government, the legislature, or the judiciary, or by officials or employees of a state or any other public authority or entity or by employees or officials of an intergovernmental organization in connection with their official duties;

“(3) the term ‘proceeds’ means any funds derived from or obtained, directly or indirectly, through the commission of an offense set forth in subsection (a);

“(4) the term ‘provides’ includes giving, donating, and transmitting;

“(5) the term ‘collects’ includes raising and receiving;

“(6) the term ‘predicate act’ means any act referred to in subparagraph (A) or (B) of subsection (a)(1);

“(7) the term ‘treaty’ means—

“(A) the Convention for the Suppression of Unlawful Seizure of Aircraft, done at The Hague on December 16, 1970;

“(B) the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, done at Montreal on September 23, 1971;

“(C) the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, adopted by the General Assembly of the United Nations on December 14, 1973;

“(D) the International Convention against the Taking of Hostages, adopted by the General Assembly of the United Nations on December 17, 1979;

“(E) the Convention on the Physical Protection of Nuclear Material, adopted at Vienna on March 3, 1980;

“(F) the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, supplementary to the Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation, done at Montreal on February 24, 1988;

“(G) the Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation, done at Rome on March 10, 1988;

“(H) the Protocol for the Suppression of Unlawful Acts against the Safety of Fixed Platforms located on the Continental Shelf, done at Rome on March 10, 1988; or

“(I) the International Convention for the Suppression of Terrorist Bombings, adopted by the General Assembly of the United Nations on December 15, 1997;

“(8) the term ‘intergovernmental organization’ includes international organizations;

“(9) the term ‘international organization’ has the same meaning as in section 1116(b)(5) of this title;

“(10) the term ‘armed conflict’ does not include internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature;

“(11) the term ‘serious bodily injury’ has the same meaning as in section 1365(g)(3) of this title;

“(12) the term ‘national of the United States’ has the meaning given that term in section 101(a)(22) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22)); and

“(13) the term ‘state’ has the same meaning as that term has under international law, and includes all political subdivisions thereof.

“(e) CIVIL PENALTY.—In addition to any other criminal, civil, or administrative liability or penalty, any legal entity located

within the United States or organized under the laws of the United States, including any of the laws of its States, districts, commonwealths, territories, or possessions, shall be liable to the United States for the sum of at least \$10,000, if a person responsible for the management or control of that legal entity has, in that capacity, committed an offense set forth in subsection (a)."

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 113B of title 18, United States Code, is amended by adding at the end thereof the following:

"2339C. Prohibitions against the financing of terrorism."

(c) DISCLAIMER.—Nothing contained in this section is intended to affect the scope or applicability of any other Federal or State law.

SEC. 203. EFFECTIVE DATE.

Except for paragraphs (1)(D) and (2)(B) of section 2339C(b) of title 18, United States Code, which shall become effective on the date that the International Convention for the Suppression of the Financing of Terrorism enters into force for the United States, and for the provisions of section 2339C(d)(7)(I) of title 18, United States Code, which shall become effective on the date that the International Convention for the Suppression of Terrorist Bombing enters into force for the United States, section 202 shall take effect on the date of enactment of this Act.

TITLE III—ANCILLARY MEASURES

SEC. 301. ANCILLARY MEASURES.

(a) WIRETAP PREDICATES.—Section 2516(1)(q) of title 18, United States Code, is amended by—

(1) inserting "2332f," after "2332d,"; and

(2) striking "or 2339B" and inserting "2339B, or 2339C".

(b) FEDERAL CRIME OF TERRORISM.—Section 2332b(g)(5)(B) of title 18, United States Code, is amended by—

(1) inserting "2332f (relating to bombing of public places and facilities)," after "2332b (relating to acts of terrorism transcending national boundaries)," ; and

(2) inserting "2339C (relating to financing of terrorism," before "or 2340A (relating to torture)".

(c) PROVIDING MATERIAL SUPPORT TO TERRORISTS PREDICATE.—Section 2339A of title 18, United States Code, is amended by inserting "2332f," before "or 2340A".

(d) FORFEITURE OF FUNDS, PROCEEDS, AND INSTRUMENTALITIES.—Section 981(a)(1) of title 18, United States Code, is amended by adding at the end the following:

"(H) Any property, real or personal, involved in a violation or attempted violation, or which constitutes or is derived from proceeds traceable to a violation, of section 2339C of this title."

TITLE IV—DISCLOSURE OF INTERCEPTED WIRE, ORAL, OR ELECTRONIC COMMUNICATIONS TO FOREIGN LAW ENFORCEMENT

SEC. 401. SHORT TITLE.

This title may be cited as the "Foreign Law Enforcement Cooperation Act of 2001".

SEC. 402. AMENDMENT TO WIRETAP DISCLOSURE STATUTE.

Section 2517 of title 18, United States Code, relating to the interception of communications, is amended by adding at the end the following:

"(6) Disclosure otherwise prohibited under this chapter of knowledge of or the contents of any wire, oral, or electronic communication, or evidence derived therefrom may also be made when permitted by the court at the

request of an attorney for the government, upon a showing that such information may disclose a violation of the criminal laws of the United States or a foreign nation, to an appropriate official of a foreign nation or subdivision thereof for the purpose of enforcing such criminal law. If the court orders disclosure of any matters under this subsection, the disclosure shall be made in such manner, at such time, and under such conditions as the court may direct. In making any application under this subsection, the attorney for the government shall certify that the official or officials for whom an order permitting disclosure is sought, have been informed that they may only make use of the information provided under this subsection consistent with such guidelines as the Attorney General shall issue to protect confidentiality."

ANTI-TERRORISM CONVENTIONS IMPLEMENTATION—SECTION-BY-SECTION ANALYSIS

TITLE I SUPPRESSION OF TERRORIST BOMBINGS

Title I of this bill implements the International Convention for the Suppression of Terrorist Bombings, which was signed by the United States on January 12, 1998, and was transmitted to the Senate for its advice and consent to ratification on September 8, 1999. Twenty-eight States are currently party to the Convention, which entered into force internationally on May 23, 2001. The Convention requires State Parties to combat terrorism by criminalizing certain attacks on public places committed with explosives or other lethal devices, including biological, chemical and radiological devices. The Convention also requires that State Parties criminalize aiding and abetting, conspiring and attempting to undertake such terrorist attacks.

SECTION 101. SHORT TITLE

Section 101 provides that title I may be cited as "The Terrorist Bombings Convention Implementation Act of 2001."

SECTION 102. BOMBING STATUTE

Section 102 adds a new section to the Federal criminal code, to be codified at 18 U.S.C. §2332f and entitled "Bombings of places of public use, government facilities, public transportation systems and infrastructure facilities," which makes terrorist acts covered by the Convention a crime. New section 2332f supplements and does not supplant existing Federal and State laws, and contains five subsections, which are described below.

Subsection (a) makes it a crime to unlawfully place or detonate an explosive in certain public places and facilities with the intent to cause death or serious bodily injury, or with the intent to cause extensive destruction, where such destruction results in, or is likely to result in, major economic loss. Conspiracies and attempts to commit such crimes are also criminalized. This provision implements Article 2, paragraphs 1, 2 and 3 of the Convention.

Inclusion of the term "unlawfully" in subsection (a), which is mirrored in Article 2 of the Convention defining the offenses, is intended to allow what would be considered under U.S. law as common law defenses. For purposes of subsection (a), whether a person acts "unlawfully" will depend on whether he is acting within the scope of authority recognized under and consistent with existing U.S. law, which reflects international law principles, such as self defense or lawful use of force by police authorities. This language is not to be construed as permitting the assertion, as a defense to prosecution under new section 2332f, that a person purportedly acted

under authority conveyed by any particular foreign government or official. Such a construction, which would exempt State-sponsored terrorism, would be clearly at odds with the purpose of the Convention and this implementing legislation.

With respect to the mens rea provision of subsection (a), it is sufficient if the intent is to significantly damage the targeted public place or facility. Further, for the purpose of subsection (a), when determining whether the act resulted in, or was likely to result, major economic loss, the physical damage to the targeted place or facility may be considered, as well as other types of economic loss including, but not limited to, the monetary loss or other adverse effects resulting from the interruption of its activities. The adverse effects on non-targeted entities and individuals, the economy and the government may also be considered in this determination insofar as they are due to the destruction caused by the unlawful act.

Subsection (b) establishes the jurisdictional bases for the covered offenses and includes jurisdiction over perpetrators of offenses abroad who are subsequently found within the United States. This provision implements a crucial element of the Convention (Article 8(1)), which requires all State Parties to either extradite or prosecute perpetrators of offenses covered by the Convention who are found within the jurisdiction of a State Party. While current Federal or State criminal laws encompass all the activity prohibited by the Convention that occurs within the United States, subsection (b)(1) ensures Federal jurisdiction where there is a unique Federal interest e.g., a foreign government is the victim of the crime or the offense is committed in an attempt to compel the United States to do or abstain from doing any act.

Subsection (c) establishes the penalties for committing the covered crimes at any term of years or life. This provision differs from the Administration proposal, which sought to add a new death penalty provision for this crime, despite the fact that such a provision is not required for compliance under the Convention and may create hurdles in seeking extradition to the United States under this statute.

Subsection (d) sets forth certain exemptions to jurisdiction as provided by the Convention. Specifically, the subsection exempts from jurisdiction activities of armed forces during an armed conflict and activities undertaken by military forces of a State in the exercise of their official duties.

Subsection (e) contains definitions of twelve terms that are used in the new law. Six of those definitions ("State or government facility," "infrastructure facility," "place of public use," "public transportation system," "other lethal device," and "military forces of a State") are the same definitions used in the Convention. Four additional definitions ("serious bodily injury," "explosive," "national of the United States," and "intergovernmental organization") are definitions that already exist in other U.S. statutes. One of those definitions ("armed conflict") is defined consistent with an international instrument relating to the law of war, and a U.S. Understanding to the Convention that is recommended to be made at the time of U.S. ratification. The final term ("State") has the same meaning as that term has under international law.

SECTION 103. EFFECTIVE DATE

Since the purpose of Title I is to implement the Convention, section 103 provides that the new criminal offense created in Section 102 will not become effective until the

date that the Convention enters into force in the United States. This will ensure immediate compliance of the United States with its obligations under the Convention.

TITLE II. SUPPRESSION OF THE FINANCING OF TERRORISM

Title II implements the International Convention for the Suppression of the Financing of Terrorism, which was signed by the United States on January 10, 2000, and was transmitted to the Senate for its advice and consent to ratification on October 12, 2000. The Convention is not yet in force internationally, but will enter into force 30 days after the deposit of the 22nd instrument of ratification with the U.N. Secretary-General. Once in force, the Convention requires State Parties to combat terrorism by criminalizing certain financial transactions made in furtherance of various terrorist activities. The Convention also requires that State Parties criminalize conspiracies and attempts to undertake such financing.

SECTION 201. SHORT TITLE

Section 201 provides that title II may be cited as "The Suppression of Financing of Terrorism Convention Implementation Act of 2001."

SECTION 202. TERRORISM FINANCING STATUTE

Section 202(a) adds a new section to the Federal criminal code, to be codified at 18 U.S.C. §2339C and entitled "Prohibitions against the financing of terrorism," which makes financial acts covered by the Convention a crime. New section 2339C supplements and does not supplant existing Federal and State laws, and contains five subsections, which are described below.

Subsection (a) makes it a crime to provide or collect funds with the intention or knowledge that such funds are to be used to carry out certain terrorist acts. Conspiracies and attempts to commit these crimes are also criminalized. This subsection implements Article 2, paragraphs 1, 3, 4 and 5 of the Convention.

Subsection (b) establishes the jurisdictional bases for the covered offenses under section 2339C(a) and includes jurisdiction over perpetrators of offenses abroad who are subsequently found within the United States. This provision implements a crucial element of the Convention (Article 10), which requires all State Parties to either extradite or prosecute perpetrators of offenses covered by the Convention who are found within the territory of a State Party. The structure of this provision is designed to accommodate the structure of the Convention, which sets forth both mandatory and permissive bases of jurisdiction, and excludes certain offenses that lack an international nexus. Some portions of this provision go beyond the jurisdictional bases required or expressly permitted under the Convention, however, where expanded jurisdiction is desirable from a policy perspective because a unique Federal interest is implicated and is consistent with the Constitution.

Subsection (c) established the penalties for committing the covered crimes at imprisonment for not more than 20 years, a fine under title 18, United States Code, or both. This penalty is consistent with the current penalties for money laundering offenses. See 18 U.S.C. §1956.

Subsection (d) contains 13 definitions of terms that are used in the new law. Two of those definitions ("government facility," and "proceeds") are the same definitions used in the Convention. The definition for "funds" is identical to that contained in the Convention with the exception that coins

and currency are expressly mentioned as money. The definitions for "provides" and "collects" reflect the broad scope of the Convention. The definition for "predicate acts" specifies the activity for which the funds were being provided or collected. These are the acts referred to in subparagraphs (A) and (B) of section 2339C(a)(1). The definition of "treaty" sets forth the nine international conventions dealing with counter-terrorism found in the Annex to the Convention. The term "intergovernmental organization," which is used in the Convention, is specifically defined to make clear that it contains within its ambit existing international organizations. The definitions for "international organization," "serious bodily injury," and "national of the United States" incorporate definitions for those terms that already exist in other U.S. statutes. One of the definitions ("armed conflict") is defined consistent with international instruments relating to the law of war. The final term ("State") has the same meaning as that term has under international law.

Subsection (e) creates a civil penalty of at least \$10,000 payable to the United States, against any legal entity in the United States, if any person responsible for the management or control of that legal entity has, in that capacity, committed an offense set forth in subsection (a) of the new section 2339C. This civil penalty may be imposed regardless of whether there is a conviction of such person under subsection (a), and is in addition to any other criminal, civil, or administrative liability or penalty allowable under United States law. Subsection (e) fulfills Article 5 of the Convention.

SECTION 203. EFFECTIVE DATE

Section 203 provides that those provisions of the Act that may be implemented immediately shall become effective upon enactment. However, two jurisdictional provisions will not become effective until the Financing Convention enters into force for the United States. Those provisions are the new 18 U.S.C. §§2339C(b)(1)(D) and (2)(B). In addition, new 18 U.S.C. §2339C(d)(7)(1), which is a definitional section specifically linked to the Bombing Convention, will not become effective until that Convention enters into effect.

TITLE III. ANCILLARY MEASURES

Title III, which is not required by the International Conventions but will assist in federal enforcement, adds the new 18 U.S.C. §§2332f and 2339C to several existing provisions of law.

SECTION 301. ANCILLARY MEASURES

Sections 2332f and 2339C are made predicates under the wiretap statute (18 U.S.C. §2516(1)(q)) and under the statute relating to the provision of material support to terrorists (18 U.S.C. §2339A). Sections 2332f and 2339C are also added to those offenses defined as a "Federal crime of terrorism" under 18 U.S.C. §2332b(g)(5)(B), as amended by the USA PATRIOT Act, P.L. No. 107-56. In addition, a provision is added to the civil asset forfeiture statute that makes this tool available in the case of a violation of 18 U.S.C. §2339C. These provisions are consistent with the treatment of similar Federal crimes already in existence.

TITLE IV. FOREIGN DISCLOSURE OF WIRETAP INTERCEPTS

This provision, which is not required by the International Conventions, clarifies that Federal law enforcement authorities may disclose otherwise confidential wiretap information to their foreign counterparts with appropriate judicial approval. This provision

is intended to ensure effective cooperation between domestic and foreign law enforcement in the investigation and prosecution of international criminal organizations.

SECTION 401. SHORT TITLE

Section 401 provides that title IV may be cited as "The Foreign Law Enforcement Cooperation Act of 2001."

SECTION 402. AMENDMENT TO WIRETAP STATUTE

Section 402 adds a new subsection to 18 U.S.C. §2517 that governs the disclosure of otherwise confidential information gathered pursuant to a Title III wiretap. This provision clarifies the authority of domestic law enforcement officers to disclose such information as may show a violation of either domestic or foreign criminal law to foreign law enforcement officials. The provision requires a court order prior to making such a disclosure and sets the standards for the issuance of such an order. It is intended to allow foreign disclosure only to enforce the criminal laws of either the United States or the foreign nation. It also requires that an attorney for the government certify that the foreign officials who are to receive the wiretap information have been informed of the Attorney General's guidelines protecting confidentiality. This provision is intended to enhance the ability of domestic law enforcement to work with their foreign counterparts to investigate international criminal activity at the same time as protecting against improper use of such wiretap information.

By Mrs. BOXER (for herself and Mrs. FEINSTEIN):

S. 1773. A bill to designate the Richard J. Guadagno Headquarters and Visitors Center at Humboldt Bay National Wildlife Refuge, California; to the Committee on Environment and Public Works.

Mrs. BOXER. Mr. President, today, I am introducing a bill to honor a California, Richard J. Guadagno, who sadly lost his life on United Flight 93 when it crashed in Western Pennsylvania on September 11. This legislation will designate the Headquarters and Visitors Center of the Humboldt Bay National Wildlife Refuge as the Richard J. Guadagno Headquarters and Visitors Center. Representative THOMPSON introduced this bill in the House.

Mr. Guadagno was the manager of the Humboldt Bay National Wildlife Refuge and devoted his life to the preservation of wildlife. As refuge manager at the Humboldt Bay National Wildlife Refuge, he lead with a vision that his colleagues embraced and admired. He always keep the best interests of the refuge at heart, and he enthusiastically worked to improve the condition of the refuge. Colleagues in the Fish and Wildlife Service consistently commended his courage and dedication to conservation and protecting biological diversity.

Mr. Guadagno began a career in public service as a biologist at the New Jersey Fish and Game Department and the Great Swamp National Wildlife Refuge. Before joining the Humboldt Bay National Wildlife Refuge, he worked at the Prime Hook National Wildlife Refuge in Delaware, Supawna

Meadows National Refuge in New Jersey, and the Baskett Slough and Ankeny National Wildlife Refuges in Oregon.

Richard Guadagno worked his entire life to preserve our Nation's wildlife. This legislation will ensure that we have a lasting memory of his work.

By Mr. CORZINE (for himself and Mr. TORRICELLI):

S. 1774. A bill to accord honorary citizenship to the alien victims of September 11, 2001, terrorist attacks against the United States and to provide for the granting of citizenship to the alien spouses and children of certain victims of such attacks; to the Committee on the Judiciary.

Mr. CORZINE. Mr. President, I rise today to introduce legislation, the Terrorist Victim Citizenship Relief Act, that would quickly provide citizenship relief to hundreds of families adversely affected by the attacks of September 11, 2001.

Today I am meeting with several of the families of the victims of the September 11 terrorist attacks to discuss crucial legislation that would provide them with tax relief in the wake of a national calamity. They are dealing with a personal anguish that many of us can only imagine. It is critical that the House of Representatives move swiftly to pass the tax relief legislation that has already passed the Senate, by unanimous consent, I might add. But there is more that Congress must do to account for the shocking and unanticipated failure of the existing legal framework in the aftermath of September 11. I believe that the Terrorist Victim Citizenship Relief Act is an important part of this vitally necessary overhaul.

When American citizens, foreign nationals, and immigrants perished in the cowardly terrorist acts of September 11, the immigration status of hundreds of families was thrown into turmoil. The attacks were on American soil on a major American institution and directed at the United States. Yet American citizens were not the only victims. Hundreds of temporary workers and immigrants died shoulder-to-shoulder with thousands of Americans. Their deaths should be acknowledged and their families should be honored.

My legislation would bestow honorary citizenship on legal immigrants and non-immigrants who died in the disaster. This would honor their spirit and their tremendous sacrifice. Perhaps more important, the bill would offer citizenship to surviving spouses and children, subject to a background investigation by the Federal Bureau of Investigation. In the spirit of fairness and unity, it is appropriate and responsible to offer the privilege of citizenship to families who lost so much because of this attack on the United States.

More than 3,000 people lost their lives when four planes crashed on that fateful September morning. Bodies are still being uncovered, and the death count has been revised several times. Nationals from some 86 countries perished in the attack, including visitors, non-immigrant workers, and legal permanent residents.

America was not the only country that suffered losses. There was good reason the complex was called the World Trade Center. In the September 11 attacks, England lost 75 people, with 60 other British nationals unaccounted for. India lost more than 100. Germany has 31 confirmed casualties. Mexico has 19. Colombia has 15. Japan has as many as 21. Canada, Australia, the Philippines, Ireland, South Africa, and Pakistan all suffered tragic losses. And there were many more. It would be wrong to allow the tragic destruction of that fateful day to derail the hopes of hundreds of immigrant families to secure a better life for themselves and their children in the United States. And we must acknowledge the hundreds of families from 86 countries who lost loved ones in the attack.

In New Jersey, there are dozens of poignant stories of immigrant families who experienced tragic losses in the World Trade Center disaster. These innocent people have lost husbands and wives, sons and daughters, sisters and brothers. Their families have been fractured and their livelihoods jeopardized. Immigrant families have been forced to grapple with a bureaucratic nightmare, wading through the myriad of programs available to the families of victims in an effort to keep their heads above water. They are often disheartened to learn that, although their loved ones died in the same attack, non-citizens are ineligible for many of the programs designed to assist the surviving families of victims.

Concerns about immigration status have only added to the tremendous burden immigrant families are already confronting. Take the example of one New Jersey woman who came to my office seeking assistance. Her immigration status was directly dependent on the non-immigrant worker status of her husband who died in the attack. Both of her children were born in the United States. They are full citizens and are enrolled in American schools. She wants to continue to raise her children in the United States. However, under the antiterrorism legislation that Congress passed this month, this mother of two will be allowed just one additional year to sort out her affairs before being forced to uproot her children and return to England.

One year is simply not enough to compensate this innocent woman for the loss of her husband. My legislation would grant her citizenship immediately, helping her to avoid the burden of removing her children from the

only country they have ever truly known after having just lost their father. Granting her citizenship is the right thing to do.

But, this woman's story is one of hundreds. My office has received numerous inquiries from immigrant families concerned that their immigration status has been undermined by the death of a loved one. Many families were in the process of preparing the necessary paperwork to apply for a change in status, only to have their potential sponsor die alongside thousands of others in the World Trade Center attack. This legislation would ensure that those families would be allowed to become American citizens and avoid undue paperwork and heartache.

More than two months have passed since the United States was brutally attacked. When perpetrating their horrific crime, the terrorists did not distinguish between immigrants and American citizens or between undocumented workers and legal permanent residents. They were attacking the United States, and, in the process, killed thousands, citizens and non-citizens alike. In death, citizenship was irrelevant. In death, they were all unified.

The thousands who died did not know it when they went to work, but they were at the front lines in the next American war. Their deaths are a tragedy that every civilized human being wishes could be reversed. Unfortunately, we cannot turn back the clock. However, we can acknowledge the tremendous loss of hundreds of immigrant families by allowing them to take on the full rights and responsibilities of American citizenship.

I urge my colleagues to support this important legislation, and ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1774

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Terrorist Victim Citizenship Relief Act".

SEC. 2. FINDINGS.

Congress makes the following findings:

- (1) On September 11, 2001, the United States suffered a series of attacks which led to the deaths of thousands of people.
- (2) Hundreds of foreign nationals perished in the attacks on the American institutions on American soil.
- (3) At that time, the Immigration and Naturalization Service was processing applications for adjustment in immigration status for immigrants who perished in the attacks.
- (4) The immigrant or nonimmigrant status of many immigrant families depends on the sponsorship of those who perished.
- (5) The Immigration and Naturalization Service has publicly stated that it does not intend to take action against foreign nationals whose immigration status is in jeopardy as a direct result of the attack.

(6) Commissioner of the Immigration and Naturalization Service James Ziglar stated that "the Immigration and Naturalization Service will exercise its discretion toward families of victims during this time of mourning and readjustment".

(7) Only Congress has the authority to change immigration law to address unanticipated omissions in existing law to account for the unique circumstances surrounding the events of September 11, 2001.

SEC. 3. DECEASED ALIEN VICTIMS OF TERRORIST ATTACKS DEEMED TO BE UNITED STATES CITIZENS.

Notwithstanding title III of the Immigration and Nationality Act (8 U.S.C. 1101 et seq.), and except as provided in section 5, each alien who died as a result of a September 11, 2001, terrorist attack against the United States, shall, as of that date, be considered to be an honorary citizen of the United States if the alien held lawful status under the immigration laws of the United States as of that date.

SEC. 4. CITIZENSHIP ACCORDED TO ALIEN SPOUSES AND CHILDREN OF CERTAIN VICTIMS OF TERRORIST ATTACKS.

Notwithstanding title III of the Immigration and Nationality Act (8 U.S.C. 1101 et seq.), and except as provided in section 5, an alien spouse or child of an individual who was lawfully present in the United States and who died as a result of a September 11, 2001, terrorist attack against the United States shall be entitled to naturalization as a citizen of the United States upon being administered the oath of renunciation and allegiance in an appropriate ceremony pursuant to section 337 of the Immigration and Nationality Act, without regard to the current status of the alien spouse or child under the immigration laws of the United States, if the spouse or child applies to the Attorney General for naturalization not later than two years after the date of enactment of this Act. The Attorney General shall record the date of naturalization of any person granted naturalization under this section as being September 10, 2001.

SEC. 5. EXCEPTIONS.

Notwithstanding any other provision of this Act, an alien may not be naturalized as a citizen of the United States, or afforded honorary citizenship, under this Act if the alien is—

(1) inadmissible under paragraph (2) or (3) of section 212(a) of the Immigration and Nationality Act, or deportable under paragraph (2) or (4) of section 237(a) of that Act, including any terrorist perpetrator of a September 11, 2001, terrorist attack against the United States; or

(2) a member of the family of a person described in paragraph (1).

By Mr. CORZINE (for himself and Mr. TORRICELLI):

S. 1776. A bill to provide for the naturalization of Deena Gilbey; to the Committee on the Judiciary.

Mr. CORZINE. Mr. President, I rise today to introduce private legislation granting citizenship to Deena Gilbey, a woman profoundly affected by the disaster of September 11. Since then, Deena has endured a tremendous hardship, a hardship that has been compounded by mounting paperwork and an unyielding, dispassionate bureaucratic process. Without swift congressional action, Deena, a British na-

tional, will be forced to uproot her two children and remove them from the only country they have ever known just one year from the death of their father.

Deena Gilbey first moved to the United States in July 1993 when Paul, her husband was transferred from London to the New York office of Euro Bank. They spent the eight years that followed building a life in the United States in suburban Chatham Township. They began to raise two children, Max, 7, and Mason, 3, both of whom were born in the United States. Although the children are both U.S. citizens, Deena is not and was present in the country as part of her husband's H1-B work visa. Both Deena and Paul were attempting to become citizens when disaster struck.

For all Americans, September 11 will be remembered with a deep sadness. However, that national anguish took on a personal quality for the Gibleys when the family learned that Paul, like so many others, was lost beneath the rubble of the World Trade Center.

With the death of Paul, Deena was forced to face up to the difficult realization that her own lawful status in the United States was in jeopardy. For the first several weeks after he died, it was unclear whether Deena would be allowed to leave the country and spend time with family or even work to support her children. The anti-terrorism bill that passed the Congress earlier this year was a step in the right direction. But it did not go far enough. It did not give Deena and Paul's children the stability they deserve.

The anti-terrorism legislation that passed the Congress earlier this year allowed Deena to remain in the United States just one additional year to sort out her affairs. She had just one year to wrap up the life she and Paul had made together in the United States. She had just one year to prepare her children for the trauma of moving to a foreign country and of leaving the only country that had ever been home. One additional year is simply not enough.

When Paul died in the attack on the World Trade Center, he died with thousands of Americans. Before that, he contributed to the American economy for nearly a decade, paying taxes and lending his expertise in a highly specialized field. On that fateful day, he embodied the American spirit when he assisted coworkers in escaping the fire and destruction of ground zero.

Paul Gilbey was killed in a callous and cowardly attack on America. In the aftermath of this tragic event, we have a responsibility to help ensure that stability returns to the lives of the children he left behind.

Giving citizenship to Deena Gilbey is our patriotic responsibility. I hope this Congress will acknowledge her sacrifice and allow her and her children to remain in the United States.

I urge my colleagues to support this important legislation and ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1776

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NATURALIZATION OF DEENA GILBEY.

Notwithstanding title III of the Immigration and Nationality Act (8 U.S.C. 1101 et seq.) Deena Gilbey shall be entitled to naturalization as a citizen of the United States upon being administered the oath of renunciation and allegiance in an appropriate ceremony pursuant to section 337 of the Immigration and Nationality Act. Upon naturalization of Deena Gilbey under this Act, the Attorney General shall record the date of naturalization of Deena Gilbey as being September 10, 2001.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 187—COMMENDING THE STAFFS OF MEMBERS OF CONGRESS, THE CAPITOL POLICE, THE OFFICE OF THE ATTENDING PHYSICIAN AND HIS HEALTH CARE STAFF, AND OTHER MEMBERS OF THE CAPITOL HILL COMMUNITY FOR THEIR COURAGE AND PROFESSIONALISM DURING THE DAYS AND WEEKS FOLLOWING THE RELEASE OF ANTHRAX IN SENATOR DASCHLE'S OFFICE

Mr. CLELAND (for himself, Mr. FEINGOLD, Mr. ALLEN, Mr. COCHRAN, Mr. MILLER, and Mr. AKAKA) submitted the following resolution; which was referred to the Committee on Governmental Affairs:

S. RES. 187

Whereas there are approximately 30,000 legislative branch employees who work on Capitol Hill including approximately 6,200 Senate employees, 11,500 House employees, and 12,800 staff from other entities;

Whereas the Capitol Complex consists of approximately 285 acres comprised of 3 Senate office buildings, 3 House office buildings, 2 House annex buildings, 3 Library of Congress buildings, and several other facilities;

Whereas on October 15, 2001, a letter containing anthrax spores was opened in Senator Daschle's office;

Whereas approximately 6,000 individuals were tested for exposure to anthrax and 28 of those individuals tested positive;

Whereas approximately 1000 individuals received a 60-day supply of antibiotics as a precautionary measure;

Whereas the House of Representatives closed the Rayburn and Cannon House Office Buildings for 7 days and the Longworth House Office building for 19 days;

Whereas the Senate closed the Russell Senate Office Building for 6 days, the Dirksen Senate Office Building for 8 days, and the Hart Senate Office Building remains closed;

Whereas during the closure of the Senate and House Office Buildings, Members and

staff were forced to find alternative office space or to work from their homes;

Whereas Members and staff whose offices are located in the Hart Senate Office Building continue to utilize alternative office space, including office space donated by other Members;

Whereas Senate, House, and support staff continued and still continue to perform their duties and serve the public with courage and professionalism in spite of the threat of anthrax exposure;

Whereas Capitol Hill police officers have worked 12 hour shifts in response to the September 11, 2001, attacks and have been working additional overtime due to anthrax contamination in the Capitol Complex to ensure the safety of Members, staff, and visitors within the Capitol Complex; and

Whereas the release of anthrax in Senator Daschle's office, and the contamination of 2 Senate office buildings and 1 House office building, has further disrupted the daily routines of Congressional Members and their staffs and caused frustration due to dislocated offices: Now, therefore, be it

Resolved, That the Senate—

(1) commends the staffs of Members of Congress, the Capitol Police, the Office of the Attending Physician and his health care staff, and other members of the Capitol Hill community for their courage, professionalism, and dedication to serving the public in the aftermath of the September 11, 2001, attacks and the release of anthrax in Senator Daschle's office;

(2) recognizes the Congressional leadership, Congressional employees, the Capitol Police, and the Office of the Attending Physician and the health care professionals in his office, in particular, who by their quick actions and early intervention prevented actual cases of anthrax within the Capitol Complex; and

(3) requests that the President recognize the courage and professionalism of Congressional staff, the Capitol Police, and other members of the Capitol Hill community for their public service in continuing to do the public's business in defiance of terrorist attacks.

Mr. CLELAND. Mr. President, I rise today to submit a resolution that will recognize the courage and professionalism of Congressional Staff, the Capitol Police, and other members of the Capitol Hill Community following the release of anthrax in Senator DASCHLE's office. In the aftermath of the first-ever evacuation of the Capitol and surrounding office buildings due to the terrorist attacks on September 11, 2001, and especially after the bioterrorist attack on the Congress and the Capitol Hill Community it is important to acknowledge the approximately 30,000 legislative branch employees who work on Capitol Hill including, approximately 6,200 Senate employees, 11,500 House employees, and 12,800 additional staff from other entities who have been affected by the release of anthrax in Senator DASCHLE's office. Therefore, in recognition of their outstanding public service in continuing to do the public's business in defiance of the terrorist attacks I am submitting a resolution to commend Congressional employees, the Capitol Police, the Office of the Attending Physician and his health care staff, and other

members of the Capitol Hill community for their dedication to public service.

This legislation acknowledges the extensive grounds of the Capitol complex which consists of the Capitol building, three Senate office buildings, three House office buildings, two House annex buildings, three Library of Congress buildings, and several other facilities that comprise the Capitol complex of approximately 285 acres. The Office of the Attending Physician, in response to the release of anthrax in Senator DASCHLE's office, tested approximately 6,000 individuals for exposure to anthrax, 28 of whom were positive. In addition, approximately 1,000 individuals received 60-day supply of antibiotics as a precautionary measure and the Senate and House office buildings were closed while investigators and bioterrorism experts decontaminated the offices exposed to anthrax.

During the closure of the Senate and House office buildings, Members and staff were forced to find alternative office space or work from their homes. Members and staff whose offices are located in the Hart Senate Office Building continue to utilize alternative office space including office space donated by other Members. Senate, House, and support staff continued to perform their duties and serve the public with courage and professionalism in spite of the threat of exposure to anthrax. In addition, Capitol Hill police officers worked 12 hour shifts in response to the September 11, attacks and have been working additional overtime since anthrax contamination in the Capitol Complex to ensure the safety of Members, staff, and visitors within the Capitol Complex. Finally, the release of anthrax and subsequent contamination of Congressional offices disrupted the daily routines of Congressional Members and their staffs and caused frustration due to dislocated offices.

My legislation commends the Congressional leadership, Congressional employees, the Capitol Police, the Office of the Attending Physician and the health care professionals in his office, in particular, for their quick actions and early intervention which prevented actual cases of anthrax within the Capitol Complex. Capitol Hill employees deserve to be commended for their strength, courage, and professionalism since the September 11 attacks and this resolution asks the President to recognize them for their unwavering commitment to public service in continuing to do the public's business in defiance of the terrorist attacks. Thank you to Senators ALLEN, FEINGOLD, COCHRAN, MILLER, and AKAKA who have signed on as cosponsors to this legislation. I encourage other Senators to join us in this worthy recognition of the Capitol Hill community by cosponsoring this resolution.

SENATE CONCURRENT RESOLUTION 88—EXPRESSING SOLIDARITY WITH ISRAEL IN THE FIGHT AGAINST TERRORISM

Mr. BIDEN (for himself, Mr. DASCHLE, Mr. LOTT, Mr. BAYH, Mr. BOND, Mrs. BOXER, Mr. BROWNBACK, Mrs. CARNAHAN, Mr. CARPER, Mr. DODD, Mr. DORGAN, Mr. DURBIN, Mr. EDWARDS, Mr. GRAHAM, Mr. HATCH, Mr. HUTCHINSON, Mr. KERRY, Mr. KOHL, Mr. LEVIN, Mr. LIEBERMAN, Mr. MCCONNELL, Ms. MIKULSKI, Mr. MURKOWSKI, Mrs. MURRAY, Mr. NELSON of Florida, Mr. SARBANES, Mr. STEVENS, Mr. THOMAS, Mr. THOMPSON, and Mr. TORRICELLI) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 88

Whereas 26 innocent people in Israel were murdered in cold blood and at least 175 wounded by Palestinian terrorists, all within 14 hours, during the weekend of December 1–2, 2001;

Whereas these deaths are the equivalent, on a basis proportional to the United States population, of 1,200 American deaths and 8,000 wounded;

Whereas the President's Middle East envoy General Anthony C. Zinni has labeled the terrorism of this past weekend "the deepest evil one can imagine";

Whereas this bloody weekend is part of an ongoing terror campaign often targeted at youth and families and perpetrated by Islamic fundamentalist groups Hamas and Palestinian Islamic Jihad and by some elements of Palestinian Authority Chairman Yasser Arafat's Fatah movement;

Whereas President Bush declared at a joint session of Congress on September 20, 2001, that "[e]very nation, in every region, now has a decision to make. Either you are with us, or you are with the terrorists. From this day forward, any nation that continues to harbor or support terrorism will be regarded by the United States as a hostile regime"; and

Whereas President Bush declared on December 2, 2001, that "Chairman Arafat must do everything in his power to find those who murdered innocent Israelis and bring them to justice"; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) condemns the vicious terrorist murders of 26 innocent people in Israel within 14 hours during December 1–2, 2001, and extends its deepest sympathies to the State of Israel and to the families of the victims;

(2) expresses outrage at the ongoing Palestinian terrorist campaign and insists that the Palestinian Authority take all steps necessary to end it;

(3) demands specifically that the Palestinian Authority take action immediately to—

(A) destroy the infrastructure of Palestinian terrorist groups;

(B) pursue and arrest terrorists whose incarceration has been called for by the Government of Israel; and

(C) either—

(i) prosecute such terrorists, provide convicted terrorists with the stiffest possible punishment, and ensure that those convicted remain in custody for the full duration of their sentences; or

(ii) render all arrested terrorists to the Government of Israel for prosecution;

(4) urges the President to suspend all relations with Yasser Arafat and the Palestinian Authority, if Yasser Arafat and the Palestinian Authority fail to take the actions described in paragraphs (2) and (3);

(5) further urges the President to insist that all countries harboring, materially supporting, or acquiescing in the private support of Palestinian terrorist groups should end such support, dismantle the infrastructure of such groups, and bring all terrorists within their borders to justice; and

(6) expresses the solidarity of the United States with Israel in our common struggle against the scourge of terrorism.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2240. Mr. FEINGOLD (for himself, Mr. BAUCUS, and Mr. HELMS) submitted an amendment intended to be proposed by him to the bill S. 1731, to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes; which was ordered to lie on the table.

SA 2241. Mr. KERRY (for himself and Ms. SNOWE) submitted an amendment intended to be proposed by him to the bill S. 1731, supra; which was ordered to lie on the table.

SA 2242. Mr. CRAPO (for himself, Mr. BINGAMAN, Mr. DOMENICI, Mrs. FEINSTEIN, Mr. BROWNBACK, and Mr. CRAIG) submitted an amendment intended to be proposed by him to the bill S. 1731, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 2240. Mr. FEINGOLD (for himself, Mr. BAUCUS, and Mr. HELMS) submitted an amendment intended to be proposed by him to the bill S. 1731, to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the bill insert the following sections:

SEC. . COST OF LIVING ADJUSTMENT FOR MEMBERS OF CONGRESS.

Notwithstanding any other provision of law, no adjustment shall be made under section 601(a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31) (relating to cost of living adjustments for Members of Congress) during fiscal year 2002.

SA 2241. Mr. KERRY (for himself and Ms. SNOWE) submitted an amendment intended to be proposed by him to the bill S. 1731, to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other

purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . COMMERCIAL FISHERIES FAILURE.

In addition to amounts appropriated or otherwise made available by this Act, there are appropriated to the Department of Agriculture \$10,000,000 for fiscal year 2002, which shall be transferred to the Department of Commerce to provide emergency disaster assistance for the commercial fishery failure under section 308(b)(1) of the Interjurisdictional Fisheries Act of 1986 (16 U.S.C. 4107(b)(1)) with respect to Northeast multispecies fisheries. Amounts made available under this section shall be used to support a voluntary fishing capacity reduction program in the Northeast multispecies fishery that permanently revokes multispecies, limited access fishing permits so as to obtain the maximum sustained reduction in fishing capacity at the least cost and in the minimum period of time and to prevent the replacement of fishing capacity removed by the program.

SA 2242. Mr. CRAPO (for himself, Mr. BINGAMAN, Mr. DOMENICI, Mrs. FEINSTEIN, Mr. BROWNBACK, and Mr. CRAIG) submitted an amendment intended to be proposed by him to the bill S. 1731, to strengthen the safety net for agricultural producers, to enhance resource conservation and rural development, to provide for farm credit, agricultural research, nutrition, and related programs, to ensure consumers abundant food and fiber, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 132 and insert the following:

SEC. 132. STUDY OF NATIONAL DAIRY POLICY.

(a) STUDY REQUIRED.—Not later than April 30, 2002, the Secretary of Agriculture shall submit to Congress a comprehensive economic evaluation of the potential direct and indirect effects of the various elements of the national dairy policy, including an examination of the effect of the national dairy policy on—

(1) farm price stability, farm profitability and viability, and local rural economies in the United States;

(2) child, senior, and low-income nutrition programs, including impacts on schools and institutions participating in the programs, on program recipients, and other factors; and

(3) the wholesale and retail cost of fluid milk, dairy farms, and milk utilization.

(b) NATIONAL DAIRY POLICY DEFINED.—In this section, the term “national dairy policy” means the dairy policy of the United States as evidenced by the following policies and programs:

(1) Federal Milk Marketing Orders.

(2) Interstate dairy compacts (including proposed compacts described in H.R. 1827 and S. 1157, as introduced in the 107th Congress).

(3) Over-order premiums and State pricing programs.

(4) Direct payments to milk producers.

(5) Federal milk price support program.

(6) Export programs regarding milk and dairy products, such as the Dairy Export Incentive Program.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, December 5, at 9:30 a.m., to conduct a hearing. The committee will receive testimony on the nominations of Margaret S.Y. Chu to be Director of the Office of Civilian Radioactive Waste Management, Department of Energy; Beverly Cook to be an Assistant Secretary of Energy (Environment, Safety, and Health), Department of Energy; Jeffrey D. Jarrett to be Director of the Office of Surface Mining Reclamation and Enforcement, Department of the Interior; and Rebecca W. Watson to be an Assistant Secretary of the Interior (Lands and Minerals Management), Department of the Interior.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a nominations hearing on Wednesday, December 5, 2001, at 10 a.m., in Dirksen Room 226.

Witness List

Panel I: Hon. John Warner, Hon. Phil Gramm, Hon. Harry Reid, Hon. Bob Graham, Hon. Ben Nighthorse Campbell, Hon. Kay Bailey Hutchison, Hon. Wayne Allard, Hon. Max Cleland, Hon. Jeff Sessions, Hon. Zell Miller, Hon. John Ensign, Hon. Ileana Ros-Lehtinen, Hon. Carrie Meek, and Hon. Silvestre Reyes.

Panel II: Callie V. Granade to be U.S. District Court Judge for the Southern District of Alabama; Marcia S. Krieger to be U.S. District Court Judge for the District of Colorado; James C. Mahan to be U.S. District Court Judge for the District of Nevada; Philip R. Martinez to be U.S. District Court Judge for the Western District of Texas; and C. Ashley Royal to be U.S. District Court Judge for the Middle District of Georgia.

Panel III: Mauricio J. Tamargo to be Chair of the Foreign Claims Settlement Commission of the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. CONRAD. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet to hold a closed conference with the House Permanent Select Committee on Intelligence on H.R. 2883, on Wednesday, December 5, 2001, at 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CRIME AND DRUGS

Mr. CONRAD. Mr. President, I ask unanimous consent that the Committee on the Judiciary Subcommittee on Crime and Drugs be authorized to meet to conduct a hearing on "Making America's Streets Safer: The Future of the COPS Program," on Wednesday, December 5, 2001, at 1:30 p.m., in SD226.

Witness List

Panel I: Viet D. Dinh, Assistant Attorney General, Office of Legal Policy, U.S. Department of Justice.

Panel II: Thomas P. Gordon, County Executive, New Castle County, Delaware; Colonel Lonnie Westphal, Chief, Colorado State Patrol, Vice President, International Association of Chiefs of Police; Steve Young, Lieutenant, Marion City Police Department, National President, Fraternal Order of Police; Mike Brown, Sheriff, Bedford County, Virginia, National Sheriffs' Association; Dr. Jihong Zhao, Professor, Department of Criminal Justice, University of Nebraska at Omaha; and David Muhlhausen, Policy Analyst, Heritage Foundation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY AND SPACE

Mr. CONRAD. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology and Space of the Committee on Commerce, Science, and Transportation be authorized to meet on Wednesday, December 5, 2001, at 9 a.m., on the response of the technology sector in times of crisis.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. LUGAR. Mr. President, I ask unanimous consent that Carol Olander, Dave White, and Benjamin Young, detailees to the Agriculture Committee from the Department of Agriculture, be granted privileges of the floor during the pendency of the farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to a period of morning business with Senators allowed to speak therein for a period not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRATULATIONS, VASSILI SULICH

Mr. REID. Mr. President, on Saturday evening, December 15, the Las Vegas Philharmonic will be recognizing the work of one of Nevada's true

cultural treasures, Vassili Sulich. I am pleased to speak of the vision and the accomplishments of this fine man.

In 1981, Vassili Sulich received the State of Nevada Governor's Arts Award for "Outstanding Individual Artist," an award which recognized his role in establishing the Nevada Dance Theatre and for bringing classical ballet to southern Nevada. This award is only one of many that have been bestowed upon Mr. Sulich, but it represents what he has meant, and still means for the cultural evolution of my home state.

Born on the island of Brac, Yugoslavia, Vassili Sulich began imagining and improvising performances from an early age. As a refugee in Egypt, during World War II, he joined a Yugoslav children's theatre, which continued performing in Europe after the war. He received classical dance training with the Zagreb Opera Ballet, and he remained in the theatre ever since.

In 1952, he received a scholarship to study in London. One year later, he moved to Paris to be a member of the Ballet de France de Janine Charrat. Paris became his home for eleven years, where he rose to the status of Danseur Etoile; first with Ballet des Etoiles de Paris and later with other companies and opera houses.

During this time, he performed as a principal dancer in many ballets, partnering such famous ballerinas as Ludmilla Tcherina, Zizi Jeanmarie, and Colette Marchand. He made many appearances on television and film, and starred in "Geraldine" with Geraldine Chaplin.

In 1960, Vassili was named the principal dancer at the Lido de Paris, and he began his choreographic career with "Suite Lyrique," "The Wall," and "Oedipe-Roi" with Jean Cocteau and composer Maurice Thiriet. In 1964, he came to New York as a principal dancer with "Folies Bergere" on Broadway and to study with Martha Graham.

That same year, he was offered a three-month contract by the producer of the "Folies Bergere" at the Tropicana Hotel in Las Vegas. It turned out to be a collaboration that lasted nine years. He was also named as ballet master, rehearsing and employing replacements for dancers and showgirls. The management of the Tropicana was always available to help, and even recreated a studio atmosphere in the theatre for ballet instruction in the afternoons and between shows.

After several years in Las Vegas, Sulich missed the beauty and focus of classical ballet, and he approached the University of Nevada, Las Vegas, offering to teach classical dance. That same year, he organized his first "Dance Concert" in the UNLV Judy Bayley Theatre, choreographing three ballets for 26 voluntary dancers from shows on the Las Vegas Strip. The program received such enthusiastic acclaim that

in May of 1973, he presented a second Dance Concert. The projects were labors of love: no one was paid, the dancers furnished their own costumes, and the university provided technical support.

In 1974, a board of directors was formed, and the Nevada Dance Theatre came into existence, with Vassili Sulich at the helm as Artistic Director. Within a few years, the Nevada Dance Theatre was home to 23 professional dancers, providing classical ballet at home and touring the United States to critical acclaim. The Company was even recognized by Dance Magazine as one of the 10 best regional ballet companies in America.

Since founding the Nevada Dance Theatre, Sulich has choreographed fifty-one ballets, ranging from classical to contemporary to dramatic works with wide audience appeal. One of his works, "Mantodea," received international acclaim in Bulgaria and Russia and was filmed for Belgrade television. He has staged "Mantodea" for ballet companies in Canada, New Zealand, Singapore, Hong Kong, Hungary, and the United States. And just this year, he was again commissioned to stage the ballet in Brazil.

After twenty-five years, Vassili Sulich retired from the Nevada Dance Theatre, but he has not retired from cultural service. He was instrumental in the forming of the Las Vegas Philharmonic, and he has recently penned an autobiography, "Vision in the Desert: A Dancer's Life."

I am proud to take this opportunity to congratulate Vassili Sulich for a lifetime of artistic achievement. He is indeed a cultural treasure and an ambassador for the arts in Nevada, our nation and the world.

EXPLANATION OF ABSENCE

Mr. LIEBERMAN. Mr. President, I inform the Senate that due to the funeral in New Haven, Connecticut of a long-time Connecticut aide and close friend, I was unable to be present for the votes scheduled on December 5, 2001.

James "Jimmy" O'Connell passed away on Saturday at the age 53. Jimmy, a former New Haven police officer, was like a brother to me. We worked together for over 30 years. I enjoyed his extraordinary intelligence, his warm wit and his wonderful loyalty. I will miss him dearly and believe it was only fitting for me to attend his funeral in New Haven.

Had I been present, I would have voted as set forth below. On none of the votes would my vote have affected the outcome.

On the motion to waive the Budget Act with regard to Daschle amendment No. 2170, I would have voted in favor. On the final passage of H.R. 10, I would have voted in favor of the bill. On cloture on the motion to proceed to S.

1731, I would have voted in favor of cloture.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred November 11, 2001 in Milwaukee, WI. A lesbian woman, Juana Vega, was brutally assaulted and shot five times at point-blank range. Pablo Parrilla, the brother of Vega's then-girlfriend, has been arrested in connection with Vega's murder. Mr. Parrilla objected to his sister's relationship with Vega, and reportedly threatened to kill Vega for "turning his sister gay."

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

HOLD ON NOMINATION

Mr. GRASSLEY. Mr. President, I have placed a "hold" on the nomination of General Claude Bolton, Jr. for the position of Assistant Secretary of the Army for Research, Development, Acquisition, and Technology as questions asked by the Iowa/Illinois Senate delegation remain unanswered.

MILITARY BUILD-UP IN BURMA

Mr. MCCONNELL. Mr. President, the Senate Appropriations Committee yesterday marked-up H.R. 3338, the FY 2002 Department of Defense Appropriations Bill. I authored language in the report accompanying that bill requiring the Pentagon to report to Congress on Thailand's defense needs in the wake of Burma's recent purchase of 10 MiG-29 fighter aircraft from Russia. I did so because of my grave concerns with regional security and stability—and with the welfare of the people of Burma who endure hardships and indignities under the oppressive misrule of the State Peace and Development Council (SPDC). In terms of oppressive regimes, the SPDC ranks right up there with the Taliban.

My colleagues should take note of the November 28 edition of *Jane's Defence Weekly* which states that Burma has "significantly expanded the country's military strength while most other [countries] in the region are pur-

suing force reductions . . . military modernization since 1988 has been heavily tied to China as the principal source of equipment—variously valued at between \$1 billion and \$2 billion. [The purchase of the MiGs from Russia] following up its 1996 purchase of Mi-17 helicopters, suggests that a new dimension could dominate the next phase of development . . . [the SPDC] has stated publicly that armed forces strength has been targeted to expand by a further 25 percent, to 500,000."

Lest my colleagues fail to understand what is happening in Rangoon today, let me sketch a quick outline:

The legitimately elected leader of Burma—Daw Aung San Suu Kyi of the National League for Democracy (NLD)—continues to be under house arrest in Rangoon, with up to 1,800 political prisoners languishing in Burmese prisons. While SPDC thugs and Suu Kyi are engaged in "talks", the junta is building up its military strength and purchasing billions of dollars of military hardware from Russia and China. To say that the defense build-up sends conflicting messages to the NLD and the world is a gross understatement.

Meanwhile, the people of Burma suffer from neglect and abuse at the hands of the SPDC who attached absolutely no importance to the welfare of Burmese citizens. None. And to make matters worse, Japan appears to be rewarding the SPDC by providing a grant aid to Burma for the repair of the Baluchaung Hydroelectric Power Plant in Karenni State. The Japanese government must understand that such assistance is not only premature, it is also misguided. Money is certainly the language of the thugs and thieves in Burma, but it cannot buy peace and stability in that mafia state.

I encourage my colleagues to read Fred Hiatt's excellent op-ed in Monday's edition of the *Washington Post*, and ask that it appear in the *RECORD* following my remarks.

There being no objection, the material was ordered to be printed in the *RECORD*, as follows:

[From the *Washington Post*, Dec. 3, 2001]

EYES WIDE OPEN

(By Fred Hiatt)

One inevitable reaction, as we hear now of the depredations of the Taliban regime, is: Where were we all while this was going on?

Oh, some feminists and human rights activists tried to call our attention to Afghanistan's gender apartheid. Journalists, including *The Post's* Pam Constable, reported from Kabul. We took note briefly when religious minorities were ordered to wear identifying marks and when those ancient statues were destroyed.

But for most of us, the recent revelations of Taliban brutality—of forced conscription, point-blank murder, scorched-earth destruction and merciless impoverishment of widows and children—have been just that, revelations. As the Bush administration rails righteously against a regime it barely seemed to notice before Sept. 11, we have to ask: Where were they—where were we—these

five long years? How could we have let it happen?

One way to answer the question is to look at places where it is happening still.

This week past Nobel Peace Prize winners will gather in Oslo to honor one missing laureate Aung San Suu Kyi, the rightful leader of the Southeast Asian nation of Burma, wasn't allowed to pick up her prize in 1991, and a decade later she remains under house arrest and cut off from the world. Her countrymen—some 48 million of them, more or less double Afghanistan's population—are preyed upon by their leaders much as Afghans were by theirs.

The facts are depressingly familiar to the relatively few who follow events in Burma (renamed Myanmar by the junta). A promising, resource-rich nation with a well-educated and peaceable population has been ground gradually toward poverty and ignorance by a succession of malevolent and misguided rulers.

In 1990 the ruling junta, apparently deluded about its popularity, as dictators frequently are, staged elections. The National League for Democracy, led by Aung San Suu Kyi, won four out of every five parliamentary seats, even though she was already under house arrest. Instead of letting the parliament meet, the generals put many of the winners in jail, where some remain to this day.

Among juntas, Burma's is particularly famous for its use of forced unpaid labor. As many as 1 million Burmese, by the estimate of the International Confederation of Free Trade Unions, have been press-ganged into building roads, railroads and military installations. Many of the conscripted are children. Many are forced to act as porters for the army, often in dangerous circumstances.

The generals, fearing the people they rule, maintain an army of 400,000. They have shuttered the country's universities for most of the past decade. People are jailed for possession of unlicensed fax machines. Media are controlled by the state. Some 1,500 people are in prison for political crimes, mostly for having sought to peacefully express opinions of which the regime did not approve. In a country where one in three children is malnourished, the generals recently agreed to buy from Russia a dozen advanced MiG-29 fighter jets.

The combined effect of repression and the military's incompetence is ever-worsening poverty. In the past year, the local currency has lost half its value. The only export on an upward curve is heroin. Vast acreages of rain forest have been destroyed to feed the generals' corruption. Just in the past two months, the BBC recently reported, food prices have doubled, and power outages have become routine. HIV-AIDS is spreading fast.

Despite democracy's advances around the world in recent years, the Burmese assuredly are not the only people still enchained. North Koreans, Chinese, Belarusians, Iraqis, Cubans—all are denied their freedoms, yet none is about to be liberated by U.S. bombing. There's a limit to what we can do, and what we should do.

Yet in all of those places the United States can and should press for freedom. In Burma, economic sanctions are beginning to have some effect. Concerned about their image and the economy, the generals have released some 200 political prisoners and at least entertained the efforts of a U.N. envoy, now on his sixth trip to the nation. If other countries remain steadfast in supporting Aung San Suu Kyi—refusing to provide aid, for example, except in consultation with her—there's some hope for more progress.

Burma, after all, would require no nation-building, no Bonn conferences, no search for a viable opposition. A qualified and democratically elected leader waits quietly in her lakefront Rangoon house, still committed after a decade to human rights and non-violent change. When she finally moves to the prime minister's office that belongs to her, and the Burmese people cheer their liberation as many Afghans have been cheering theirs, it would be nice if we could say at least: We're not surprised. We knew that terrible things were happening. We were with you all along.

ANDEAN TRADE PREFERENCE ACT

Mr. MCCAIN. Mr. President, the Andean Trade Preference Act (ATPA) expired yesterday. Signed into law in 1991 by the former President Bush, this Act established a unique approach to combating the War on Drugs in Latin America. Rather than assisting Bolivia, Colombia, Ecuador, and Peru solely through military assistance or direct financial aid, the supporters of ATPA sought to reduce drug trafficking through economic expansion. It was believed that increased trade would promote healthy economies, diversify export bases, and create jobs outside of the drug trade. Unlike other forms of aid, the expansion of free trade benefits everyone. American consumers benefit from a wider variety of lower-priced goods, while the citizens of Andean nations benefit from the creation of legitimate jobs outside of the drug trade.

Since the enactment of ATPA, positive changes have occurred within the region. Two-way trade between the United States and the Andean nations has doubled. Bolivia succeeded in eradicating 95% of its coca plantations. Recently, Peru experienced a peaceful democratic transition from autocratic rule. In Colombia alone, ATPA helped to create over 140,000 new jobs. Today, farmers in the region are choosing to plant coffee beans, asparagus, and flowers instead of coca. With the expiration of ATPA, these successes are now in jeopardy.

While our nation remains engaged in a battle against terrorism, we must not lose sight of the critical security risks that remain not far beyond our borders. The Andean region is not only the world's primary source of coca, it is also a haven for terrorism and terrorist groups that thrive on funding derived from the drug trade. I am a staunch supporter of our war efforts, but I am also fearful of the consequences of neglecting this troubled region within our own hemisphere.

We are now at a critical juncture. Failing to extend ATPA sends a message to terrorist groups, drug traffickers, and counter-revolutionaries, that the United States is no longer committed to the region, and this inaction could impact our national security. Terrorism lurks in abandoned and

hopeless regions, where good people resort to such measures out of desperation. As our nation's attention focuses on the war effort, we must not allow ourselves to neglect regions that still need our support and attention.

In March, Senator GRAHAM introduced S. 525, the Andean Trade Preference Expansion Act, of which I am a proud co-sponsor. That bill would expand and extend the current act, with the hope of furthering economic development and stability in the region. Unfortunately, that bill has yet to be debated on the Senate floor. While the Senate remains mired in partisan squabbling, the House of Representatives successfully passed a good bill on November 16 to extend and to expand ATPA. The expiration of ATPA should be a concern of all of us. I hope that the Majority leader will expeditiously move to schedule floor time for the consideration of an expansion of this important legislation before the fragile economies of the Andean region are left to falter.

EXECUTIVE SESSION

INTERNATIONAL CONVENTION FOR SUPPRESSION OF FINANCING TERRORISM

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed in Executive Session to the consideration of Executive Calendar No. 2, International Convention for Suppression of Financing Terrorism; that the treaty be considered as having advanced to its parliamentary status up to and including the presentation of resolution of ratification, and that the reservation, understandings, and conditions be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution of ratification is as follows:

INTERNATIONAL CONVENTION FOR SUPPRESSION OF FINANCING TERRORISM (TREATY DOC. 106-49)

Resolved (two-thirds of the Senators present concurring therein),

SECTION 1. ADVICE AND CONSENT TO RATIFICATION OF THE INTERNATIONAL CONVENTION FOR THE SUPPRESSION OF THE FINANCING OF TERRORISM, SUBJECT TO A RESERVATION, UNDERSTANDINGS, AND CONDITIONS.

The Senate advises and consents to the ratification of the International Convention for the Suppression of the Financing of Terrorism, adopted by the United Nations General Assembly on December 9, 1999, and signed on behalf of the United States of America on January 10, 2000 (Treaty Document 106-49; in this resolution referred to as the "Convention"), subject to the reservation in section 2, the understandings in section 3, and the conditions in section 4.

SEC. 2. RESERVATION.

The advice and consent of the Senate under section 1 is subject to the reservation, which shall be included in the United States instrument of ratification of the Convention, that

(a) pursuant to Article 24(2) of the Convention, the United States of America declares that it does not consider itself bound by Article 24(1) of the Convention; and

(b) the United States of America reserves the right specifically to agree in a particular case to follow the arbitration procedure set forth in Article 24(1) of the Convention or any other procedure for arbitration.

SEC. 3. UNDERSTANDINGS.

The advice and consent of the Senate under section 1 is subject to the following understandings, which shall be included in the United States instrument of ratification of the Convention:

(1) EXCLUSION OF LEGITIMATE ACTIVITIES AGAINST LAWFUL TARGETS.—The United States of America understands that nothing in the Convention precludes any State Party to the Convention from conducting any legitimate activity against any lawful target in accordance with the law of armed conflict.

(2) MEANING OF THE TERM "ARMED CONFLICT".—The United States of America understands that the term "armed conflict" in Article 2(1)(b) of the Convention does not include internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature.

SEC. 4. CONDITIONS.

The advice and consent of the Senate under section 1 is subject to the following conditions:

(1) TREATY INTERPRETATION.—The Senate reaffirms condition (8) of the resolution of ratification of the Document Agreed Among the States Parties to the Treaty on Conventional Armed Forces in Europe (CFE) of November 19, 1990 (adopted at Vienna on May 31, 1996), approved by the Senate on May 14, 1997 (relating to condition (1) of the resolution of ratification of the INF Treaty, approved by the Senate on May 27, 1988).

(2) PROHIBITION ON EXTRADITION TO THE INTERNATIONAL CRIMINAL COURT.—The United States shall not transfer any person, or consent to the transfer of any person extradited by the United States, to the International Criminal Court established by the Statute adopted in Rome, Italy, on July 17, 1998 unless the Rome Statute has entered into force for the United States, by and with the advice and consent of the Senate, as required by Article II, Section 2, Clause 2 of the United States Constitution.

(3) SUPREMACY OF THE CONSTITUTION.—Nothing in the Convention requires or authorizes the enactment of legislation or the taking of any other action by the United States that is prohibited by the Constitution of the United States as interpreted by the United States.

Mr. REID. Mr. President, I ask for a division vote.

The PRESIDING OFFICER. A division is requested.

Senators in favor of the resolution of ratification will rise and stand until counted.

Those opposed will rise and stand until counted.

On a division, two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

Mr. REID. Mr. President, in that division vote, did the Chair call those opposed to the ratification? I failed to hear that. Will the Chair do that again, please.

The PRESIDING OFFICER. A division is requested.

Senators in favor of the resolution of ratification will rise and stand until counted.

Those opposed will rise and stand until counted.

On a division, two-thirds of the Senators present and voting, having voted in the affirmative, the resolution of ratification is agreed to.

INTERNATIONAL CONVENTION FOR THE SUPPRESSION OF TERRORIST BOMBINGS

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Executive Calendar No. 3, the International Convention for the Suppression of Terrorist Bombings; that the treaty be considered as having advanced through its parliamentary stages up to and including the presentation of the resolution of ratification and that the reservation, understandings and conditions be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution of ratification is as follows:

INTERNATIONAL CONVENTION FOR THE SUPPRESSION OF TERRORIST BOMBINGS (TREATY Doc. 106-6)

Resolved (two-thirds of the Senators present concurring therein),

SECTION 1. ADVICE AND CONSENT TO RATIFICATION OF THE INTERNATIONAL CONVENTION FOR THE SUPPRESSION OF TERRORIST BOMBINGS, SUBJECT TO A RESERVATION, UNDERSTANDINGS, AND CONDITIONS.

The Senate advises and consents to the ratification of the International Convention for the Suppression of Terrorist Bombings, adopted by the United Nations General Assembly on December 15, 1977, and signed on behalf of the United States of America on January 12, 1998 (Treaty Document 106-6; in this resolution referred to as the "Convention"), subject to the reservation in section 2, the understandings in section 3, and the conditions in section 4.

SEC. 2. RESERVATION.

The advice and consent of the Senate under section 1 is subject to the reservation, which shall be included in the United States instrument of ratification of the Convention, that:

(a) pursuant to Article 20(2) of the Convention, the United States of America declares that it does not consider itself bound by Article 20(1) of the Convention; and

(b) the United States of America reserves the right specifically to agree in a particular case to follow the procedure in Article 20(1) of the Convention or any other procedure for arbitration.

SEC. 3. UNDERSTANDINGS.

The advice and consent of the Senate under section 1 is subject to the following understandings, which shall be included in the United States instrument of ratification of the Convention:

(1) EXCLUSION FROM COVERAGE OF TERM "ARMED CONFLICT".—The United States of America understands that the term "armed conflict" in Article 19(2) of the Convention does not include internal disturbances and tensions, such as riots, isolated and sporadic acts of violence, and other acts of a similar nature.

(2) MEANING OF TERM "INTERNATIONAL HUMANITARIAN LAW".—The United States of America understands that the term "international humanitarian law" in Article 19 of the Convention has the same substantive meaning as the law of war.

(3) EXCLUSION FROM COVERAGE OF ACTIVITIES BY MILITARY FORCES.—The United States understands that, under Article 19 and Article 1(4), the Convention does not apply to—

(A) the military forces of a state in the exercise of their official duties;

(B) civilians who direct or organize the official activities of military forces of a state; or

(C) civilians acting in support of the official activities of the military forces of a state, if the civilians are under the formal command, control, and responsibility of those forces.

SEC. 4. CONDITIONS.

The advice and consent of the Senate under section 1 is subject to the following conditions:

(1) TREATY INTERPRETATION.—The Senate re-affirms condition (8) of the resolution of ratification of the Document Agreed Among the States Parties to the Treaty on Conventional Armed Forces in Europe (CFE) of November 19, 1990 (adopted at Vienna on May 31, 1996), approved by the Senate on May 14, 1997 (relating to condition (1) of the resolution of ratification of the INF Treaty, approved by the Senate on May 27, 1988).

(2) PROHIBITION ON EXTRADITION TO THE INTERNATIONAL CRIMINAL COURT.—The United States shall not transfer any person, or consent to the transfer of any person extradited by the United States, to the International Criminal Court established by the Statute adopted in Rome, Italy, on July 17, 1998, unless the Rome Statute has entered into force for the United States, by and with the advice and consent of the Senate, as required by Article II, Section 2, Clause 2 of the United States Constitution.

(3) SUPREMACY OF THE CONSTITUTION.—Nothing in the Convention requires or authorizes the enactment of legislation or the taking of any other action by the United States that is prohibited by the Constitution of the United States as interpreted by the United States.

Mr. REID. Mr. President, I ask for a division vote.

The PRESIDING OFFICER. A division is requested.

Senators in favor of the resolution of ratification will rise and stand until counted.

Those opposed will rise and stand until counted.

On a division, two-thirds of the Senators present and voting, having voted in the affirmative, the resolution of ratification is agreed to.

Mr. REID. Mr. President, I ask unanimous consent that the motions to reconsider be laid upon the table, that any statements thereon be printed in the RECORD, that the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, I am pleased to present to the Senate two multilateral conventions, negotiated within the UN system, to combat two specific aspects of international terrorism.

The treaties, the International Convention for the Suppression of Terrorist Bombings, and the International Convention for the Suppression of the Financing of Terrorism, will provide important tools to the President in the global campaign against terrorism.

The two treaties are similar in approach: they require parties to criminalize the proscribed behavior—engaging in international terrorist bombings and fund raising for international terrorism—and to either extradite an alleged offender to another nation that has jurisdiction to prosecute or to submit the case for prosecution.

The conventions have received increasing support from the nations of the world. In the last several weeks, many nations have signed or ratified the treaties. For example, when the Committee on Foreign Relations held a hearing on the treaties in late October, 58 countries had signed the International Convention for the Suppression of the Financing of Terrorism, but just four had become parties to it. As of today, according to the web page of the United Nations, 125 countries have signed the Convention, and 15 have become party to it. It will enter into force when 22 nations become party to it, so the Senate's action today will be an important step in helping bring the Convention closer to entry into force.

I applaud and support the global campaign against terrorism that President Bush has waged to date. If we have learned anything about foreign policy since September 11, it is the global leadership and multilateral cooperation are essential to combating the terrorist networks. If we want to use air power in Afghanistan, we need over-flight rights from countries around the region. If we want Al-Qaeda cells to be investigated and arrested, we need our foreign partners to join us in the effort. If we want bank accounts of Osama bin Laden and his cohorts frozen, we need the assistance of foreign governments and foreign bankers. In short, we cannot wage this campaign by ourselves.

I am pleased that the administration strongly supports these conventions. They will provide additional weapons in the terrorism campaign. They set international standards—which we will expect foreign nations to embrace and enforce. The International Convention on the Suppression of the Financing of Terrorism will be of particular importance in our continuing effort to squeeze the financial lifeblood out of the international terrorism networks.

Despite this support for multilateral approaches, I find puzzling the Administration's failure to seize the initiative in other contexts, especially at this time when so many countries are lining up on our side in the present conflict. The vicissitudes of the war on terrorism also present opportunities to the United States, if only we will seize them.

For example, we all know that rogue states and terrorists are trying to obtain biological weapons. In response to this challenge, the Administration—which earlier scuttled a draft compliance protocol to the Biological Weapons Convention—proposes that countries enact national legislation criminalizing violations of the BWC, improve bilateral extradition agreements, and adopt strict standards for access to dangerous pathogens. But as recently as earlier this week, at the BWC Review Conference held every five years, the U.S. delegation was resisting the idea of a protocol calling on countries to take those actions. It is a mystery to me why the Administration cannot see the virtue of global adherence to a set of standards in the fight to prevent biological terrorism.

Mr. President, the Committee on Foreign Relations recommended, by a unanimous voice vote, that the Senate advise and consent to the two treaties now before the body. I am pleased that my colleagues have given their strong support to these conventions.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now return to legislative session.

MAKING FURTHER CONTINUING APPROPRIATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to H.J. Res. 76, the continuing resolution, just received from the House and now at the desk.

The PRESIDING OFFICER. The clerk will report the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 76) making further continuing appropriations for the fiscal year 2002, and for other purposes.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. REID. Mr. President, I ask unanimous consent that the joint resolution be read three times, passed, and the motion to reconsider be laid upon the table, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (H.J. Res. 76) was read the third time and passed.

EXPRESSING SOLIDARITY WITH ISRAEL IN THE FIGHT AGAINST TERRORISM

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Con. Res. 88, introduced earlier today by Senators BIDEN and HELMS.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 88) expressing solidarity with Israel in the fight against terrorism.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (S. Con. Res. 88) was agreed to.

The preamble was agreed to.

(The text of the concurrent resolution, with its preamble, is printed in today's RECORD under "Statements on Submitted Resolutions.")

APPOINTMENT

The PRESIDING OFFICER. The Chair, on behalf of the majority leader, pursuant to Public Law 96-114, as amended, announces the appointment of Kevin B. Lefton, of Virginia, to the Congressional Award Board.

MEASURE READ THE FIRST TIME—S. 1766

Mr. REID. Mr. President, I understand S. 1766, introduced earlier today by Senators DASCHLE and BINGAMAN, is at the desk, and I ask for its first reading.

The PRESIDING OFFICER. The clerk will read the title of the bill for the first time.

The legislative clerk read as follows:

A bill (S. 1766) to provide for the energy security of the Nation, and for other purposes.

Mr. REID. Mr. President, I now ask for its second reading and object to my own request on behalf of the minority.

The PRESIDING OFFICER. Objection is heard.

The bill will receive its second reading on the next legislative day.

THE DEMOCRATIC ENERGY BILL

Mr. DASCHLE. Mr. President, after months of hard work by the chairman of nine committees, we are today introducing legislation to establish a national energy policy. The bill we are introducing provides a blueprint for solving many of the nation's energy problems, and will provide the American people with clean, reliable, and affordable energy for generations to come.

This bill recognizes that the use of energy has profound consequences for economic health, environmental quality and national security. The energy policy we choose to adopt will have long-lasting consequences in each of these areas.

Today, we have an opportunity to dramatically reshape America's energy future, and it is an opportunity we cannot afford to lose.

The strength of our economy depends, in large measure, in the abundant and inexpensive supply of energy.

The periodic price shocks experienced by American drivers since the mid-1970s underscores the vulnerability associated with our growing dependence on foreign oil. At the same time, the rolling blackouts experienced by California last summer serves as a cautionary tale of the failure to guarantee reliable and abundant supplies of electricity.

One of the greatest environmental challenges that our nation—and the world—will face in the coming years is the rising tide of global climate change. The way we generate and use energy in the future will determine whether we effectively face this challenge and prevent the catastrophic impacts of global warming, and whether we can make the air we breathe cleaner and more healthy.

And finally, the success of our foreign policy and the security of our nation are inextricably linked to our future patterns of energy use.

In the last 12 years we have spent billions of dollars fighting two wars in the Middle East, both of which involved oil. When Iraq invaded Kuwait it endangered the oil fields that supplied a significant percentage of the world's energy. The U.S., in cooperation with much of the rest of the world, was forced to respond to that threat.

More recently, we have learned that much of Osama bin Laden's financial support came from supporters made rich by the oil-based economy of the Middle-East.

It is long past time when we take whatever steps we can toward freeing ourselves from our dependence on foreign oil, and the volatility associated with it.

The bill we are introducing today is intended to address these challenges by pursuing a thoughtful, progressive, and realistic energy policies.

I thank Chairman BINGAMAN for the job he has done in working with nine committees to produce this bill. In addition to his Energy and Natural Resources Committee, he also coordinated with: the Environment and Public Works Committee; the Commerce Committee; the Banking Committee; the Indian Affairs Committee; the Foreign Relations Committee; the Governmental Affairs Committee; the Agriculture Committee; and the Finance Committee.

The events of September 11 have dictated that committees which have jurisdiction over key elements of energy policy deal with the issues that demand our immediate attention. Those committees are now turning to their energy-related work, and will have

their provisions complete prior to floor debate.

For Example, the Commerce Committee has worked tirelessly to address aviation security and now is turning its attention to fuel economy. It will develop provisions designed to improve fuel efficiency of vehicles over the next 2 months and add them to this package.

The Finance Committee, which has spent so much time working on the economic stimulus legislation, will develop and add an energy tax component designed to spur investment in new, efficient energy technologies.

And the Environment and Public Works Committee will add provisions related to the protection and insurance of commercial nuclear facilities.

While those elements will continue to fall into place, the pieces of the bill already in place outline a balanced energy plan that will strengthen our economy, protect our environment, and provide energy security for our nation for decades to come.

The bill Senator BINGAMAN and I are introducing today includes provisions promoting renewable energy, clean coal use, oil and gas exploration, as well as greater efforts to improve the efficiency with which we use that energy. It will create hundreds of thousands of new jobs, while reducing our dependence on foreign oil.

Under our legislation, the federal government will lead by example—reducing consumption of energy by 20 percent by 2011 and purchasing 7.5 percent of its energy from renewable sources by 2010.

Our proposal requires utilities to generate and sell 10 percent of their electricity from renewable energy sources by 2020. It requires that five billion gallons per year of renewable fuels, such as ethanol and biodiesel, must be used in the nation's transportation fuels marked by 2012.

We increase funding for LIHEAP and state energy weatherization grants.

Our bill establishes permanent authority for the President to operate the Strategic Petroleum Reserves and request that it be filled. The bill overturns the air conditioner efficiency standard recently adopted by DOE and replaces it with a more aggressive standard.

We authorize up to \$10 billion in loan guarantees to encourage timely development of a pipeline to bring 35 trillion cubic feet of natural gas from Alaska to the lower 48 states. Construction of this pipeline is expected to generate 400,000 new jobs.

To keep our nation moving forward, our plan authorizes billions of dollars of additional funding for research and development of energy-efficient and renewable energy technologies, and more efficient use of fossil fuels.

By reducing emissions of carbon dioxide, our bill is designed to help re-

store American's tattered credibility with the international community on the issue of climate change.

This bill includes climate change provisions developed by the Committees on Energy, Environment, Agriculture, Governmental Affairs, Foreign Relations and Commerce.

I am pleased that Senator BINGAMAN has included the Byrd-Stevens climate change legislation. This is a bipartisan and voluntary proposal that was passed unanimously by the Government Affairs Committee earlier this year.

It requires the establishment of comprehensive national plan, including a renewed commitment to develop the next generation energy technologies. We have complemented the Byrd-Stevens proposal with other climate change proposals from members on both sides of the aisle.

I know many of my colleagues are eager to debate our energy policy, and I look forward to giving this issue the substantive debate it deserves shortly after the new year.

I look forward to working with the White House, Senate Republicans, and our colleagues in the House to shape a national energy policy that can be signed into law.

ORDERS FOR THURSDAY, DECEMBER 6, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 10:30 a.m. on Thursday, December 6; that immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate proceed to a period of morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. For the information of all Senators, we expect to go into executive session at approximately 11 a.m. tomorrow to consider executive nominations, with as many as three rollcall votes on judicial nominations. This will be prior to consideration of the Defense appropriations bill which will begin at or about noon tomorrow.

ADJOURNMENT UNTIL 10:30 A.M. TOMORROW

Mr. REID. If there is no further business to come before the Senate, I now ask unanimous consent the Senate stand in adjournment under the previous order. I appreciate the patience of the Presiding Officer.

There being no objection, the Senate, at 8:05 p.m., adjourned until Thursday, December 6, 2001, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate December 5, 2001:

DEPARTMENT OF THE TREASURY

RANDAL QUARLES, OF UTAH, TO BE A DEPUTY UNDER SECRETARY OF THE TREASURY, VICE EDWIN M. TRUMAN, RESIGNED.

IN THE ARMY

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT IN THE RESERVE OF THE ARMY TO THE GRADES INDICATED UNDER TITLE 10, U.S.C., SECTION 12203:

To be major general

BRIGADIER GENERAL DONNA F. BARBISCH, 0000
BRIGADIER GENERAL JAMIE S. BARKIN, 0000
BRIGADIER GENERAL ROBERT W. CHESNUT, 0000
BRIGADIER GENERAL RICHARD S. COLT, 0000
BRIGADIER GENERAL LOWELL C. DETAMORE, 0000
BRIGADIER GENERAL DOUGLAS O. DOLLAR, 0000
BRIGADIER GENERAL KENNETH D. HERBST, 0000
BRIGADIER GENERAL KAROL A. KENNEDY, 0000
BRIGADIER GENERAL RODNEY M. KOBAYASHI, 0000
BRIGADIER GENERAL ROBERT B. OSTENBERG, 0000
BRIGADIER GENERAL MICHAEL W. SYMANSKI, 0000
BRIGADIER GENERAL WILLIAM B. WATSON JR., 0000

To be brigadier general

COLONEL JAMES E. ARCHER, 0000
COLONEL THOMAS M. BRYSON, 0000
COLONEL PETER S. COOKE, 0000
COLONEL DONNA L. DACIER, 0000
COLONEL CHARLES H. DAVIDSON IV, 0000
COLONEL MICHAEL R. EYRE, 0000
COLONEL DONALD L. JACKA JR., 0000
COLONEL WILLIAM H. JOHNSON, 0000
COLONEL ROBERT J. KASULKE, 0000
COLONEL JACK L. KILLEN JR., 0000
COLONEL JOHN C. LEVASSEUR, 0000
COLONEL JAMES A. MOBLEY, 0000
COLONEL MARK A. MONTJAR, 0000
COLONEL CARRIE L. NERO, 0000
COLONEL ARTHUR C. NUTTALL, 0000
COLONEL PAULETTE B. RISHER, 0000
COLONEL KENNETH B. ROSS, 0000
COLONEL WILLIAM TERPELUK, 0000
COLONEL MICHAEL H. WALTER, 0000
COLONEL ROGER L. WARD, 0000
COLONEL DAVID ZALIS, 0000
COLONEL BRUCE E. ZUKASKAS, 0000

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES ARMY UNDER TITLE 10, U.S.C., SECTION 624:

To be colonel

ROBERT W. SIEGERT, 0000

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES ARMY IN THE VETERINARY CORPS UNDER TITLE 10, U.S.C., SECTIONS 624 AND 3064:

To be colonel

CATHERINE M. BANFIELD, 0000
MICHELLE C. ROSS, 0000
JAMES R. SWEARENGEN, 0000
CLIFFORD L. WALKER, 0000
JACK M. WEDAM, 0000

THE FOLLOWING NAMED OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE UNITED STATES ARMY IN THE MEDICAL SPECIALIST CORPS UNDER TITLE 10, U.S.C., SECTIONS 624 AND 3064:

To be colonel

MARY CARSTENSEN, 0000
LAURA H. KOSTNER, 0000
MARY S. LOPEZ, 0000
DEBORAH M. STETTS, 0000
WILLIAM L. TOZIER, 0000

CONFIRMATION

Executive nomination confirmed by the Senate December 5, 2001:

EXECUTIVE OFFICE OF THE PRESIDENT

JOHN P. WALTERS, OF MICHIGAN, TO BE DIRECTOR OF NATIONAL DRUG CONTROL POLICY.

HOUSE OF REPRESENTATIVES—Wednesday, December 5, 2001

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. GILLMOR).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
December 5, 2001.

I hereby appoint the Honorable PAUL E. GILLMOR to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer: Lord, we seek Your blessing upon all Members of the House of Representatives and the people of this Nation.

Once Abram responded to Your call of faith he was given Your promise: "I will make you into a great nation. I will bless you and make your name so great that it shall be used in blessings."

You fulfilled Your promise to our father in faith even as now You fulfill Your promise in us and in our time. Ever since the founding of this Nation in faith, You have blessed this land and its people. As in the past, so now and forever, we seek Your blessing and hope that these United States will be the Nation You design; the place where Your promise is fulfilled.

In turbulent times, Lord, do not allow us to lose our primal focus: It is You who will make us into a great Nation.

In present circumstances of war and economics, let us not simply react as if we alone counted, but guide us to wisely respond as a great Nation. By Your blessing upon us and our daily work, make us a great people called to do noble deeds and truly be a blessing upon the world both now and forever. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from New York (Mr.

MCNULTY) come forward and lead the House in the Pledge of Allegiance.

Mr. McNULTY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

AMERICA NEEDS STIMULUS BILL

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, how low will the Democratic Party go? I read in USA Today that the gentlewoman from New York (Mrs. LOWEY), the chairman of the DCCC, was planning on running ads blaming President Bush for the recession, calling it his recession. Well, for those Americans who are out of work and unemployed, it is a personal recession; and I take great umbrage at the gentlewoman for running ads at a time when we are in a national crisis fighting an evil enemy in Afghanistan and would make this a political opportunity to attack our Commander in Chief. It is regrettable, it is shameful, and it is out of bounds.

Mr. Speaker, Members should cease these kind of play games and start working. On the other side of this building, the Senate dawdles, fails to address a stimulus bill because the majority leader wants to run for President of the United States. If he was President now, we would have real problems because he cannot make a basic decision. I urge my colleagues to insist that the Senate pass a stimulus bill so we can repair the economy and move forward, and say to the Democrats and the DCCC, take your ads and shove them.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Members are reminded not to criticize the Senate in their remarks.

CONGRATULATIONS TO THE UNIVERSITY OF TENNESSEE

(Mr. CLEMENT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLEMENT. Mr. Speaker, President Bush has said let us get back to normal as much as we possibly can. We had a football game, the gentleman from Tennessee (Mr. DUNCAN) and I

know, that happened in Florida between the University of Tennessee and Florida, and we had not beaten Florida in 30 years in Florida, in Gainesville, but we won that battle.

Mr. Speaker, we were an 18-point underdog, but we did very well and now are playing for the SEC championship, and I want to congratulate the University of Tennessee, my alma mater. I am a former college president at Cumberland University, and I want my colleagues to know that we hold the distinction at Cumberland of being defeated worse in football than any other school in America: Cumberland 0, Georgia Tech 222.

If Members want to know more about that game, there is a book written about that game, "You Dropped It, You Pick It Up." One of the Cumberland players dropped the ball during the game. The Cumberland player said, "Pick it up, pick it up." Another Cumberland player said, "You dropped it, you pick it up."

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The previous speaker and all Members are reminded to observe proper decorum in the House during 1-minute speeches.

MILITARY TRIBUNALS

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, much debate has occurred recently on President Bush's decision to utilize military tribunals to hold all terrorists responsible for their actions. I come to the floor to state my whole-hearted support for his decision. Let us get one thing straight. Terrorists do not, by definition, conduct themselves as lawful combatants. They began this war with us; and, consequently, they should be treated as war criminals if captured.

Mr. Speaker, I strongly disagree with the arguments of the other side that say using military tribunals would not ensure a fair trial. To the contrary, it allows for an appeals process through all levels of the military courts and ultimately to the United States Supreme Court.

I remind my colleagues that President Bush's decision to use military tribunals as a means of bringing terrorists to justice has historical precedence dating back to Presidents Franklin

Roosevelt, Abraham Lincoln, and even George Washington.

Mr. Speaker, terrorists are not abiding by the rules of a civil society. They should be held accountable for their actions as war criminals.

AMERICA'S STEEL INDUSTRY IS DYING

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, Congress has bailed out everybody, airlines, insurance companies, even car makers. Chrysler is now owned by Germans. Bailout for almost everyone except America's steel industry, which is dying. Since 1998, 25 American steel companies have filed for bankruptcy, with thousands and thousands of unemployed steelworkers losing their benefits, losing their health care, losing their families, losing their homes. Unbelievable. Meanwhile, Daimler Chrysler is now lighting up cigars. Beam me up.

Mr. Speaker, I yield back the fact that America cannot build smart bombs with Styrofoam; and we had better take a look at our domestic ability to produce steel for our national defense.

CLONING BAN MUST BE PASSED BY SENATE

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, Congress' job is to represent the people. That does not mean that we should be a rubber stamp for every poll that is taken. The American people expect us to exercise our judgment; and, in fact, that is our constitutional duty. But when the Gallup organization tells us that 88 percent of the American people oppose cloning, it is pretty hard to deny the will of this country.

Mr. Speaker, creating human life through cloning is unethical, and it is bad science. Creating human life with the intent to kill it in experiments is even worse. Yet that is the justification we are hearing. The scientists that are cloning human beings say that it is okay as long as they kill them off before they reach maturity. That is sick. It is time to demonstrate that at least we can still tell right from wrong.

Mr. Speaker, the House has already passed a ban on human cloning. The other body needs to act immediately. There is no time to wait.

HOMELAND SECURITY NEEDS TO BE STRENGTHENED

(Mrs. CHRISTENSEN asked and was given permission to address the House

for 1 minute and to revise and extend her remarks.)

Mrs. CHRISTENSEN. Mr. Speaker, the war that our country is waging in response to the attacks of September 11 and to eliminate the terrorists who are responsible for it is, without question, necessary and important. But so are our homeland security needs.

The U.S. Customs Service, Immigration and Naturalization Service, the Coast Guard and regional defense forces need more staff, assets and funding. Our public health infrastructure, which will be our frontline biological and chemical defense, is full of holes and needs to be strengthened, especially in poor communities.

Our children, who must be prepared to carry out the long-term security mission, are being undereducated in rundown schools and need a major investment of our time and capital.

The biggest obstacles to meeting our obligations for security for our communities, including access to quality health care and a sound education for our children, is the tax cut. The insistence that we move forward and, worse, move it up at this time is putting our country and every citizen at risk.

Mr. Speaker, we need to roll back the tax cut so that we can properly prepare this country to meet our critical health, education and security needs.

PASS TRADE PROMOTION AUTHORITY

(Mr. LINDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LINDER. Mr. Speaker, more than 95 percent of the world's population lives outside of the United States. For most American businesses this means that, in order to remain competitive, they must be allowed to market their goods and services across borders. This is particularly true for small business. There are more than 25 million small businesses in America, and they employ more than half the country's private workforce. Small businesses create three out of four new jobs and account for half of the America's annual economic production. Undoubtedly, small businesses are vital to the United States, and trade in turn is vital to them.

Mr. Speaker, nearly 97 percent of U.S. merchandise exporters are small- and medium-sized businesses. Companies with less than 20 employees account for more than two-thirds of all U.S. exporting firms. Further, the number of American small businesses that export grew by more than 200 percent between 1987 and 1997.

The United States is the single most competitive nation in the world. Tomorrow, Congress will have an opportunity to enable America's small businesses to prove their global competi-

tiveness. We must pass Trade Promotion Authority and allow our small businesses to compete.

PASS TRADE PROMOTION AUTHORITY

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, I, too, rise in strong support of the bipartisan Trade Promotion Authority that this House will take up tomorrow. Just like a labor union designates one person to negotiate its contract with management, America needs one voice empowered to put our interest first at the world trade negotiating table.

As my colleague from Georgia just expressed so well, Trade Promotion Authority is in the interest of small business. Ninety percent of exports come from companies with less than 500 employees. For every \$1 billion in increased exports, we create 20,000 new jobs that pay an average of 17 percent more than the domestic economy.

Mr. Speaker, the only question for my colleagues is simply this: Do Members trust this President to put America's interests first at the trade negotiating table? I say proudly, along with some 80 percent of the American people, I trust this President. President Bush deserves a vote of confidence from this House. He deserves Trade Promotion Authority, and I urge a "yes" vote tomorrow.

□ 1015

DECREASING DELAY AND INCREASING SECURITY AT AIRPORTS

(Mr. DUNCAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNCAN. Mr. Speaker, I rise today to commend the National Air Transportation Association and its leader, James K. Coyne, for coming up with an innovative Sky ID program. This plan would identify frequent flyers on commercial and general aviation planes and aviation personnel who could be classified as trusted travelers. They would have to undergo an intensive background check to be included in this program, but it would be completely voluntary, and people would be free to choose whether to participate or not. Their carry-on and other bags would still be screened, but this plan would be a significant step toward the goal of shortening the lines and reducing the delays at our Nation's airports.

The plan would use advanced digital identification technology and would produce smart cards with biometric template information so they could not be used by others. This plan would be

similar to security systems used in very sensitive areas by the Department of Defense.

I want to encourage and urge the FAA to work closely with the National Air Transportation Association in this effort to decrease delays and, at the same time, increase security in a very low-cost way at our Nation's airports.

SUPPORT TRADE PROMOTION AUTHORITY

(Mr. ISAKSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ISAKSON. Mr. Speaker, 10 weeks ago this Congress, with one lone dissenting vote, granted the President of the United States the authority to send our sons and daughters in harm's way, to root out and bring justice to the terrorists or take justice to them.

Tomorrow, this House will have the chance to vote on Trade Promotion Authority for our President, an exact comparable authority for the President of the United States to do for the global economy what we have allowed him to do militarily across the ocean and in Afghanistan.

If there were ever a time for us to ensure prosperity in the long-term in the 21st century, it is to give the President the same power to make the American economy the strongest weapon for peace and security and for employment of all our citizens.

I urge my colleagues to support Trade Promotion Authority tomorrow when it reaches the floor of the House of Representatives.

CREATING AN ENVIRONMENT OF GROWTH

(Mr. TOOMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TOOMEY. Mr. Speaker, we all know we have got a weak economy right now. The slowdown that began in September of 2000 accelerated in September of 2001, and the result is that hundreds of thousands of Americans have lost their jobs as a result.

What is our responsibility in Congress? I think it is to help to create an environment of growth and hope and opportunity to enable our neighbors to get back to work, and there are two vital ways we can do that.

One is to pass an economic stimulus package that lowers the tax burdens that are keeping people out of work. We have done that in the House. The President supports that. I hope the rest of the necessary steps are taken soon.

The second thing we can do is pass Trade Promotion Authority tomorrow. Give this President the authority to lower the barriers to open up foreign markets to American goods and serv-

ices and help people get back to work producing those goods and services. The fact is, Mr. Speaker, that the American workforce is the most productive workforce in the world. If we are given a chance to compete, we win.

Let us give this President the opportunity to open up those markets, give our workers the opportunity to compete and let people get back to work.

BEEFING UP RESEARCH TO STIMULATE ECONOMIC GROWTH

(Mr. SMITH of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Michigan. Mr. Speaker, yesterday I introduced a bill, H.R. 3400, that I think moves in the direction of establishing spending priorities. That legislation provides for beefing up the kind of research that is going to stimulate economic growth. A companion bill develops extra protection against cyber terrorism.

I chair the Subcommittee on Research of the Committee on Science. The bill increases our emphasis on basic research for information technology and networking, which has been so important in our economic expansion. The other bill increases our research effort to counter cyberterrorism. We will take up these two bills tomorrow in the Committee on Science.

As we approach additional spending on defense, we need to understand that defense spending has gone down while social spending since 1991 has increased by about 30 percent; and we need to start setting priorities that are going to help the two main goals that this Congress should be looking at: one is the defense and security of the people of this country, and the other is continued economic growth.

Our goal should be to reduce spending that is lower priority so as to accommodate security and economic needs without mounting huge deficits.

SMALL BUSINESS AND TRADE IN ILLINOIS

(Mrs. BIGGERT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BIGGERT. Mr. Speaker, today I rise to talk about the success of a small business in Illinois, a business that can continue to offer products and services to foreign markets if we pass H.R. 3005, a bill to renew Trade Promotion Authority.

W.S. Darley & Company, a Melrose Park, Illinois-based, family-owned small business will have to hire more workers to fill a \$12.8 million order for 40 fire trucks, spare parts and services from the Ghana National Fire Service. The company, founded in 1908, over-

came stiff foreign competition to win Ghana's government contract, which is expected to lead to substantial additional business.

Passing H.R. 3005 is a necessary step in continuing to expand exports to foreign markets, including new and emerging marketplaces. W.S. Darley & Company is just one of more than 14,000 Illinois companies that rely on exports and are eager to find new opportunities in the global marketplace. Passing TPA will give U.S. negotiators the credibility they need to make agreements that will create those opportunities.

GRANT TRADE PROMOTION AUTHORITY TO PRESIDENT

(Mr. OXLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OXLEY. Mr. Speaker, I rise this morning to speak on granting Trade Promotion Authority to the President. Free trade is good for our overall economy; but as chairman of the Committee on Financial Services, I would like to focus this morning on how important trade is to our country's vital financial services sector.

Ambassador Zoellick gave a compelling presentation to our committee just recently on the advantages of trade and services. Note, for example, that our financial services trade surplus was \$8.88 billion last year. That is a surplus. Financial services exports have seen an overall net increase of 273 percent over the last 10 years.

Clearly, we want to encourage continued growth in this vital industry. In my home State of Ohio, Columbus has had the distinction of being one of the fastest growing cities in the country, partly because of its emergence as a financial services center. But U.S. exports of financial services also help to promote the development of capital markets, open economies and democracy across the world.

When the President does not have Trade Promotion Authority, other countries are reluctant to enter into new agreements with the United States, so it is more difficult to get the kind of trade agreements that open up new markets for our financial services companies; and ultimately, that threatens U.S. preeminence in the international financial world.

We cannot afford to lose that standing. It is just one reason why this Congress needs to approve TPA tomorrow.

OPPOSE FAST TRACK TRADE AUTHORITY

(Ms. MCCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. MCCOLLUM. Mr. Speaker, tomorrow the House will vote on a bill

offered by the chairman of the Committee on Ways and Means which concedes to the executive branch this body's constitutional authority to negotiate trade agreements. My role in Congress is to represent the voices and values of the working men and women of Minnesota's fourth district, not to abdicate my vote to the President.

I want an opportunity to have input on agreements that promote global trade. Trade agreements are essential to our economic well-being, to our role as a global leader in promoting workers' rights, human rights and healthy environment. This Fast Track trade authority requires no congressional approval prior to the signing of a trade agreement, only consultations. This body may only vote to certify that the administration has failed to consult with Congress.

I was not elected to Congress to be a consultant. We are the House of Representatives, not the House of Consultants. I urge my colleagues to oppose H.R. 3005.

TIGHTENING BORDER CONTROL

(Mr. GRAVES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAVES. Mr. Speaker, we have taken many good steps since September 11 toward protecting our country. As our focus returns to the domestic issues, let us not overlook one critical piece missing from our Nation's security plan, tightening border control.

Each day, countless travelers freely cross our borders without proving their right to be in our country. Our ability to screen these people, even when this is an option, is severely compromised and must be addressed by bolstering the technology and intelligence capabilities at our ports of entry.

I, along with some of my colleagues, have introduced the Enhanced Border Security Act to strengthen our border security and monitor foreign nationals, particularly those on student visas visiting our country.

Our legislation would allow government law enforcement and intelligence agencies to share background information through a shared database. Additionally, this legislation will track foreign students receiving visas from educational institutions to ensure they are accounted for upon their arrival, during their study, and when their visa expires.

I urge my colleagues to join me in supporting this comprehensive legislation that will help ensure the safety of our Nation.

SUPPORT TRADE PROMOTION AUTHORITY

(Mr. CRANE asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. CRANE. Mr. Speaker, I just heard the gentlewoman from Minnesota commenting about Trade Promotion Authority, and there were a couple of comments that she made that I think need clarification.

One of these is the President has trade negotiating authority and has always had trade negotiating authority. What TPA does is let us participate in the process during the negotiating process, with consultation before, during and after the agreement is reached with another country.

The important thing to keep in mind is we had President Clinton go forward with his executive authority to negotiate that agreement with Jordan. He did bring it back, and we ultimately have the authority to vote it up or vote it down; that authority is retained.

I hope the gentlewoman will look at this, because TPA gives us greater opportunity for involvement in the process than anything that we have done in the past. Please, we need support on both sides of the aisle. It is a bipartisan issue.

FREEZING COPAY FOR VETERANS' PRESCRIPTION COSTS

(Mr. STRICKLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRICKLAND. Mr. Speaker, I think veterans across this country would be upset to learn that at a time when we are giving multi-billion dollar tax breaks to wealthy corporations, we are in fact contemplating increasing the cost of prescription medications available to our veterans by a whooping 250 percent. We are in the process of increasing the copay for our veterans from \$2 per prescription to \$7 per prescription.

Now, many veterans receive 10 or more prescriptions per month. Ten times seven is \$70 a month. This is absolutely outrageous and unacceptable, when we are providing billions of dollars in tax breaks to profitable corporations, we would burden the veterans in our country by increasing the copay for their medications by 250 percent.

This House should support my bill, H.R. 2820, which would freeze the copay for 5 years at its \$2 per prescription level.

THANKING THOSE SERVING AND WHO HAVE SERVED IN THE MILITARY

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, it has been quoted as saying that war is hell.

We mourn the reported deaths of our soldiers in Afghanistan. We know the risks of combat. We know that wars are fought and won on the battlefield, and it is only on the rarest of occasion that in warfare we do not lose some of our own.

The military accepts these risks, the military and our government. We do not like it, but it is reality. To serve and protect, that is what they do. Duty, honor, country. Our liberty is paid for by the blood of our sons and daughters.

I pause to thank those who are serving in the military and those who have served in the past.

APPOINTMENT OF CONFEREES ON H.R. 2883, INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 2002

Mr. GOSS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2883) to authorize appropriations for fiscal year 2002 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

□ 1030

The SPEAKER pro tempore (Mr. GILLMOR). Is there objection to the request of the gentleman from Florida?

The Chair hears none and, without objection, appoints the following conferees:

From the Permanent Select Committee on Intelligence, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Messrs. GOSS, BE-REUTER, CASTLE, BOEHLERT, GIBBONS, LAHOOD, CUNNINGHAM, HOEKSTRA, BURR of North Carolina, and CHAMBLISS; Ms. PELOSI, Mr. BISHOP, Ms. HARMAN, and Messrs. CONDIT, ROEMER, HASTINGS of Florida, REYES, BOSWELL, and PETERSON of Minnesota.

From the Committee on Armed Services, for consideration of defense tactical intelligence and related activities: Messrs. STUMP, HUNTER and SKELTON.

There was no objection.

GENERAL LEAVE

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.J. Res. 76, and that I may include tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2002

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations be discharged from further consideration of the joint resolution (H.J. Res. 76) making further continuing appropriations for the fiscal year 2002, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. OBEY. Mr. Speaker, reserving the right to object, I would first yield to the gentleman from Florida for an explanation of his request, after which I have a series of questions I would like to put to him about it.

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman for yielding. This continuing resolution extends the current CR until December 15. The terms and conditions of the previous CR will remain in effect. All ongoing activities will be continued at current rates under the same terms and conditions as fiscal year 2001, with the exception of the agencies covered by fiscal year 2002 appropriations bills that have been enacted into law.

Mr. Speaker, this CR is non-controversial, and I urge the House to move the legislation to the Senate so that the government can continue to operate smoothly and efficiently and so that we can continue our work to finish those few regular appropriations bills that are still remaining.

Mr. OBEY. Mr. Speaker, continuing under my reservation, I would like to ask the gentleman several questions.

It is my understanding that the defense appropriations bill, and I do this because I think there are a lot of unrealistic expectations which are being directed at this committee by people who I do not think have sufficient appreciation for the detailed work that is required in order to produce legislation on, for instance, something as complicated as the defense bill.

My understanding is that that bill is 197 pages long and is expected, by the time the Senate is finished deliberating on it, to contain literally thousands of differences between the House and the Senate; is that not correct?

Mr. YOUNG of Florida. Mr. Speaker, the gentleman is correct.

Mr. OBEY. Mr. Speaker, let me ask another question under my reservation. Assuming that the Senate could pass the Department of Defense bill immediately, how long, in the gentleman's experience, does it usually take for the staff to put together the conference notes so that members of the conference understand what the dif-

ferences are, and how long does it take usually after the conclusion of the conference for the staff to put together the required papers so that we know that what we vote on is what we actually agreed to in the conference?

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. OBEY. Surely.

Mr. YOUNG of Florida. Mr. Speaker, the answer is, of course it depends on the bill and the situation with that bill. In the case of the defense bill that we are dealing with now, the basic bill, the \$317 billion defense bill, probably will not be that difficult to conference. Where there will be difficulty will be in the \$20 billion supplemental that we have dealt with here in the House and that the other body is now dealing with and is possibly changing considerably. So it could take 4 or 5 working days, or longer, just to get that bill ready to go to conference.

Once the agreements are actually reached in conference, it could take as many as 10 days in order to complete consideration of this bill. It is a major bill. Of our discretionary accounts, it is half of our discretionary spending. In most years we do not have a lot of differences going into conference on that bill, but this year, because of the \$20 billion supplemental that is a result of the September 11 attacks, there are substantial differences between the House-passed bill and what the Senate is probably going to consider today or tomorrow.

Mr. OBEY. Mr. Speaker, continuing under my reservation, I thank the gentleman for his comments. I think that they are most accurate and, to me, what it demonstrates is that, under the most optimistic assumptions, if the Senate could proceed virtually immediately to conclude its action on that bill, we are talking about at least a week after that point before we could possibly have this bill close to coming back to the House and probably a significant number of additional days.

I would add to that that, obviously, the Senate is not going to be in a position, based on what has been happening over there, to conclude this bill today.

So I have asked these questions, Mr. Speaker, in order to indicate my judgment that the date of December 15 for the expiration of this continuing resolution is incredibly optimistic. I do not think it, in fact, recognizes reality, and that it seems to me that if we are trying to extend this CR to the point where we think that the Congress will actually finish its work for this year that the date would have to be significantly later, I regret to say.

I would also say, continuing under my reservation, that with respect to the homeland security issue which the gentleman has mentioned, as I think has been obvious around this town for years, Congress often loses the off button at the end of the session. I do not

know who has it, but, obviously, it is a whole lot easier to hit the start-up button for a congressional session than it is to find the off button at the end of the year, and whoever has that off button, I wish they would come forward, or we are going to be sitting here Christmas Eve still not having our work done.

I would also say that I think one of the keys to finding that off button is a willingness to compromise. I wish I thought I could see that on the part of the White House, especially on the part of OMB, with respect to the homeland security package. What is at stake in that package is, very simply, the security of every American citizen on the home front. With something that is that important, in order for Congress to finish its business on that item, for instance, we need a spirit of cooperation on both sides.

I must say I do not find that kind of spirit of cooperation coming from the White House on this item when we are called down to the White House for a meeting and, before we can get a word out of our mouths to explain what it is that our concerns are about home-based security, we are told immediately, "Fellows, no matter what you are about to say, we are going to veto anything that you are thinking before we have even heard what it is you are thinking of." I do not think that is a way to promote compromise, and I do not think that creates the right atmosphere for resolving differences.

So I would simply say that I believe that, while I am not going to object to this, Mr. Speaker, I think December 15 is unreasonably optimistic, unless we have a major attitude adjustment on the part of OMB, and I have not detected a spectacular capacity of that agency to provide that.

Mr. OBEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 76

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 107-44 is further amended by striking the date specified in section 107(c) and inserting in lieu thereof "December 15, 2001".

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will now put the question on three motions to suspend the rules on which further proceedings were postponed yesterday.

Votes will be taken in the following order:

H. Con. Res. 242, by the yeas and nays;

H.R. 3348, by the yeas and nays;

H. Con. Res. 102, by the yeas and nays.

H. Res. 298 will be postponed until later today.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

RECOGNIZING RADIO FREE EUROPE/RADIO LIBERTY'S SUCCESS IN PROMOTING DEMOCRACY

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 242.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. LEACH) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 242, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 404, nays 1, not voting 28, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

The title of the concurrent resolution was amended so as to read: "Concurrent resolution encouraging the development of strategies to reduce hunger and poverty, and to promote free market economies and democratic institutions, in sub-Saharan Africa."

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER
PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Any record votes on postponed questions will be taken after debate has concluded on all motions to suspend the rules.

BEAR RIVER MIGRATORY BIRD
REFUGE VISITOR CENTER ACT

Mr. HANSEN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3322) to authorize the Secretary of the Interior to construct an education and administrative center at the

Bear River Migratory Bird Refuge in Box Elder County, Utah.

The Clerk read as follows:

H.R. 3322

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Bear River Migratory Bird Refuge Visitor Center Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) The Bear River marshes have been a historical waterfowl oasis and an important inland waterfowl flyway for thousands of years.

(2) Congress created the Bear River Migratory Bird Refuge as one of the first National Wildlife Refuges, for the purpose of protecting waterfowl habitat and migratory birds, educating the public regarding, and enhancing public appreciation of, waterfowl habitat and migratory birds.

(3) The Bear River Migratory Bird Refuge was virtually destroyed by the devastating floods that occurred between 1983 and 1985.

(4) Refuge employees, aided by volunteers, have taken valiant actions to rebuild the Refuge by restoring habitat, increasing its attractiveness to waterfowl, reducing waterfowl botulism, and providing recreational and educational opportunities to the public.

(5) The Bear River Migratory Bird Refuge lacks a functional education and administrative center.

(6) The creation of such a facility would significantly enhance public appreciation of waterfowl and the need to preserve waterfowl habitat.

(7) Congress has taken significant steps to provide funding for the construction of an education and administrative center.

SEC. 3. DEFINITIONS.

For the purpose of this Act, the following definitions apply:

(1) SECRETARY.—The term "Secretary" means the Secretary of the Interior.

(2) REFUGE.—The term "Refuge" means the Bear River Migratory Bird Refuge in Box Elder County, Utah.

(3) EDUCATION AND ADMINISTRATIVE CENTER.—The term "Education and Administrative Center" means the facility identified in the Environmental Assessment dated 1991 and entitled "Restoration and Expansion of the Bear River Migratory Bird Refuge".

SEC. 4. AUTHORIZATION OF CONSTRUCTION OF
THE EDUCATION CENTER.

(a) CONSTRUCTION.—The Secretary shall construct the Education and Administrative Center at the Refuge for the purposes of providing for the interpretation of resources of the Refuge for the education and benefit of the public, the advancement of research, protection, and health of waterfowl habitat, and for the administration of the Bear River Migratory Bird Refuge.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated \$11,000,000 to carry out subsection (a).

SEC. 5. MATCHING CONTRIBUTIONS REQUIREMENTS.

(a) DONATION OF FUNDS AND SERVICES.—The Secretary may accept donations of funds and services from nonprofit organizations, State and local governments, and private citizens for the construction of the Education and Administrative Center.

(b) MATCHING FUNDS.—The Secretary may not require matching funds or contributions in kind with a combined total value of more than \$1,500,000 for construction of the Education and Administrative Center.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Utah (Mr. HANSEN) and the gentleman from the Virgin Islands (Mrs. CHRISTENSEN) each will control 20 minutes.

The Chair recognizes the gentleman from Utah (Mr. HANSEN).

Mr. HANSEN. Mr. Speaker, I yield myself such time as I may consume.

The Bear River marshes in the northern portion of the Great Salt Lake have been a waterfowl oasis and an important inland waterfowl flyway for centuries, and I am pleased that the House is taking action to improve research opportunities and educational experiences at the refuge.

To give a little history of the Bear River marshes, in 1843, explorer John C. Fremont described the area by saying "The waterfowl made a noise like thunder, as the whole scene was animated with waterfowl." Later, settlers moved in and began draining the marshes so slowly that no one noticed until 1910 when botulism killed over 2 million birds and another deadly outbreak in 1920 killed 1.5 million birds. In 1928, at the urging of many individuals and organizations, Congress turned this unique area into a National Wildlife Refuge. The refuge soon became a popular attraction for various groups from sportsmen and school groups to wildlife photographers.

Then came Utah's 100-year floods of 1983 and 1985 when there was a man-made river running down State Street in Salt Lake City and Glen Canyon Dam was spilling over. Those wet years also caused the rising Great Salt Lake to breach the refuge dikes and saltwater contaminated wildlife habitat, destroyed marsh vegetation and destroyed the newly constructed visitors and administrative facilities.

In 1989, the water finally receded, and since that time refuge employees and scores of volunteers have worked tirelessly cleaning debris, moving 1 million cubic yards of earth, restoring 47 water control structures and 47 miles of dikes, and purchasing easements to restore the habitat to its previous condition.

□ 1130

Mr. Speaker, thanks to their good efforts, the refuge once again attracts hundreds of waterfowl and an increasing number of human visitors. There are 221 species of birds that have been recorded at the refuge, and 206 of those constantly come back each year. However, the refuge still lacks a functional education and administrative center which denies the public a rich educational opportunity.

I have worked with my colleagues on the Committee on Appropriations and with the Senate Committee on Appropriations to provide funding for the reconstruction of these facilities. Local communities, the Friends of Bear River

Bird Refuge and other nonprofit groups have demonstrated their interest and dedication to a research and education center by raising an additional \$1.5 million for the project.

This bill recognizes the efforts of the refuge staff, the community, and the local Friends group to rebuild the refuge. Between the prior appropriations and the contribution from local supporters, over 80 percent of the funding has already been secured. This is a good bill.

Finally, I would like to compliment Al Trout, the refuge manager, who has worked so diligently to put this together, a truly dedicated public servant.

Mr. Speaker, I reserve the balance of my time.

Mrs. CHRISTENSEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to support the legislation of the distinguished gentleman from Utah (Mr. HANSEN) which would authorize the construction of a new education and administrative center at one of our Nation's oldest migratory bird refuges. It was unfortunate that floods destroyed the center nearly 18 years ago. I understand the frustration of the gentleman from Utah (Mr. HANSEN) that a new facility has not been built to replace the original building.

As Members may recall, the 1997 National Wildlife Refuge Improvement Act established environmental education and resource interpretation as priority uses at all national wildlife refuges. Education centers like the one planned for Bear River are essential to ensure that the Fish and Wildlife Service promotes the wildlife wonders throughout our national wildlife refuge system and generates public awareness and appreciation for these resources.

Mr. Speaker, I urge Members to support this legislation. I look forward to working with both the gentleman from Utah (Mr. HANSEN) and our ranking member, the gentleman from West Virginia (Mr. RAHALL), who adds his commendation and support for the bill to improve visitor services within our national wildlife refuges.

Mr. MATHESON. Mr. Speaker, it is with great pleasure that I rise today in support of the Bear River Migratory Bird Refuge Visitor Center Act. This legislation will allow the Refuge to construct an educational and administrative headquarters. It is my hope that bird enthusiasts throughout the West will be able to come to see the thousands of birds that visit the area each year and hear what explorer John C. Fremont called "a noise like thunder."

The Refuge was created by Congress in 1928 to ensure the survival of the birds and natural wetlands of the area. Unfortunately, due to massive flooding in the 1983 to 1985, the entire Refuge was destroyed and the wetlands completely covered with water.

Today, the Refuge consists of 74,000 acres. In 1993, land acquisition added nearly 9,000

acres of uplands, wetlands, and mudflats. The historic 65,000 acres of the Refuge, consisting mainly of marsh, open water, and mudflats, have slowly seen salt deposits from the flood flushed out. Now, the wetland is on the verge of full recovery, and with marsh plants thriving, birds are returning in increasing numbers to the Refuge.

I am excited to see this legislation come before the body. I strongly believe that this bill will be beneficial to the Bear River Migratory Bird Refuge habitat by increasing its attractiveness to birds, and to people.

Mrs. CHRISTENSEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HANSEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. GILLMOR). The question is on the motion offered by the gentleman from Utah (Mr. HANSEN) that the House suspend the rules and pass the bill, H.R. 3322.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

FERN LAKE CONSERVATION AND RECREATION ACT OF 2001

Mr. RADANOVICH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2238) to authorize the Secretary of the Interior to acquire Fern Lake and the surrounding watershed in the States of Kentucky and Tennessee for addition to Cumberland Gap National Historical Park, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2238

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fern Lake Conservation and Recreation Act of 2001".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds the following:

(1) Fern Lake and its surrounding watershed in Bell County, Kentucky, and Claiborne County, Tennessee, is within the potential boundaries of Cumberland Gap National Historical Park as originally authorized by the Act of June 11, 1940 (54 Stat. 262; 16 U.S.C. 261 et seq.).

(2) The acquisition of Fern Lake and its surrounding watershed and its inclusion in Cumberland Gap National Historical Park would protect the vista from Pinnacle Overlook, which is one of the park's most valuable scenic resources and most popular attractions, and enhance recreational opportunities at the park.

(3) Fern Lake is the water supply source for the city of Middlesboro, Kentucky, and environs.

(4) The 4500-acre Fern Lake watershed is privately owned, and the 150-acre lake and part of the watershed are currently for sale, but the Secretary of the Interior is precluded by the first section of the Act of June 11, 1940

(16 U.S.C. 261), from using appropriated funds to acquire the lands.

(b) PURPOSES.—The purposes of the Act are—

(1) to authorize the Secretary of the Interior to use appropriated funds if necessary, in addition to other acquisition methods, to acquire from willing sellers Fern Lake and its surrounding watershed, in order to protect scenic and natural resources and enhance recreational opportunities at Cumberland Gap National Historical Park; and

(2) to allow the continued supply of water from Fern Lake to the city of Middlesboro, Kentucky, and environs.

SEC. 3. LAND ACQUISITION, FERN LAKE, CUMBERLAND GAP NATIONAL HISTORICAL PARK.

(a) DEFINITIONS.—In this section:

(1) FERN LAKE.—The term "Fern Lake" means Fern Lake located in Bell County, Kentucky, and Claiborne County, Tennessee.

(2) LAND.—The term "land" means land, water, interests in land, and any improvements on the land.

(3) PARK.—The term "park" means Cumberland Gap National Historical Park, as authorized and established by the Act of June 11, 1940 (54 Stat. 262; 16 U.S.C. 261 et seq.).

(4) SECRETARY.—The term "Secretary" means the Secretary of the Interior, acting through the Director of the National Park Service.

(b) ACQUISITION AUTHORIZED.—The Secretary may acquire for addition to the park lands consisting of approximately 4,500 acres and containing Fern Lake and its surrounding watershed, as generally depicted on the map entitled "Cumberland Gap National Historical Park, Fern Lake Watershed", numbered 380/80,004, and dated May 2001. The map shall be on file in the appropriate offices of the National Park Service.

(c) AUTHORIZED ACQUISITION METHODS.—

(1) IN GENERAL.—Notwithstanding the Act of June 11, 1940 (16 U.S.C. 261 et seq.), the Secretary may acquire lands described in subsection (b) by donation, purchase with donated or appropriated funds, or exchange. However, the lands may be acquired only with the consent of the owner.

(2) EASEMENTS.—At the discretion of the Secretary, the Secretary may acquire land described in subsection (b) that is subject to an easement for water supply facilities and equipment associated with the withdrawal and delivery of water by a utility from Fern Lake to the city of Middlesboro, Kentucky, and environs.

(d) BOUNDARY ADJUSTMENT AND ADMINISTRATION.—Upon the acquisition of land under this section, the Secretary shall revise the boundaries of the park to include the land in the park. Subject to subsection (e), the Secretary shall administer the acquired lands as part of the park in accordance with the laws and regulations applicable to the park.

(e) SPECIAL ISSUES RELATED TO FERN LAKE.—

(1) PROTECTION OF WATER SUPPLY.—The Secretary shall manage public recreational use of Fern Lake, if acquired by the Secretary, in a manner that is consistent with the protection of the lake as a source of untreated water for the city of Middlesboro, Kentucky, and environs.

(2) SALE OF WATER.—

(A) CONTRACT WITH UTILITY.—Upon the Secretary's acquisition of land that includes Fern Lake, the Secretary shall enter into a contract to sell untreated water from the lake to a utility that delivers and distributes water to the city of Middlesboro, Kentucky, and environs. The Secretary shall ensure

that the terms and conditions of the contract are equitable, ensuring a balance between the protection of park resources and the delivery and distribution of sufficient water to continue meeting the water demands of the city of Middlesboro, Kentucky, and environs.

(B) PROCEEDS FROM WATER.—The Secretary shall negotiate a reasonable return to the United States for the sale of the water, which the Secretary may receive in the form of reduced charges for water service. Proceeds from the sale of the water, reduced by any offsets for water service to the park, shall be available for expenditure by the Secretary at the park without further appropriation.

(f) CONSULTATION REQUIREMENTS.—In order to better manage Fern Lake and its surrounding watershed, if acquired by the Secretary, in a manner that will facilitate the provision of water for municipal needs as well as the establishment and promotion of new recreational opportunities made possible by the addition of Fern Lake to the park, the Secretary shall consult with—

- (1) appropriate officials in the States of Kentucky, Tennessee, and Virginia, and political subdivisions of these States;
- (2) organizations involved in promoting tourism in these States; and
- (3) other interested parties.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. RADANOVICH) and the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) each will control 20 minutes.

The Chair recognizes the gentleman from California (Mr. RADANOVICH).

Mr. RADANOVICH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2238 was introduced by the gentleman from Kentucky (Mr. ROGERS) and would authorize the Secretary of the Interior to acquire Fern Lake and its surrounding watershed in Tennessee and Kentucky from willing sellers for addition to the Cumberland Gap National Historical Park. The boundary expansion would enhance the visitors' recreational experience and allow the National Park Service to preserve the 4,500 acre Fern Lake watershed and the water supply for the city of Middlesboro, Kentucky. Since the early 1900s, Fern Lake has been the sole source of drinking water for the city of Middlesboro, Kentucky.

Cumberland Gap, located where the borders of Tennessee, Kentucky and Virginia meet, forms a major break in the Appalachian Mountain chain. The park commemorates the story of the first gateway to the West, first used by the Native Americans and then by pioneers.

Mr. Speaker, during the subcommittee hearing on H.R. 2238, concerns were raised by the National Park Service on how it is to manage the water system once it acquires Fern Lake. At the Committee on Resources markup, I offered an amendment to address the water issue. The amendment was adopted and supported by both the majority and minority of the com-

mittee. However, since that time, the National Park Service has continued to express concern with the water management section of the bill.

Mr. Speaker, late yesterday afternoon the administration, the majority and the minority of the committee and the gentleman from Kentucky (Mr. ROGERS) agreed to the amendment before us. I believe the amendment further clarifies for the Service its responsibility protecting the resources in the park, while assuring the city of Middlesboro, Kentucky, that their continued water needs will be met.

H.R. 2238 is a unique and complex bill. The gentleman from Kentucky (Mr. ROGERS) has worked hard to accommodate the concerns raised by the administration, while remaining focused on his priority of ensuring long-term protection for Fern Lake and a continued supply of water for his constituents. I urge my colleagues to support H.R. 2238, as amended.

Mr. Speaker, I reserve the balance of my time.

Mrs. CHRISTENSEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Cumberland Gap National Historical Park serves two important purposes: The park preserves an absolutely beautiful area, while also allowing people to explore the important historical role played by the Cumberland Gap. The gap, located at the intersection of the Kentucky, Tennessee and Virginia borders, was first a passageway for large game animals, then Native Americans, and finally hundreds of thousands of American settlers heading to the American West.

Like the park itself, H.R. 2238 serves two important purposes. The bill would authorize the Secretary of the Interior to acquire for addition to the park an approximately 4,500 acre parcel known as the Fern Lake Watershed. During the hearings we held on this matter, photographs showed it to be a lush, undeveloped area, and the administration testified as to its eagerness to add the land to the park.

In addition, passage of H.R. 2238 will ensure a reliable, long-term water supply for a community that depends on Fern Lake. The Secretary would be authorized to grant easements over the newly acquired property to facilitate the continued use of the lake as the municipal water supply for the town of Middlesboro, Kentucky, and to contract with the utility for the sale and distribution of the water to the town and its environs.

Mr. Speaker, we realize this is a somewhat unusual arrangement. However, the lake will be a valuable addition to the park, and we feel sure that the National Park Service, the utility and the town will develop a good, mutually beneficial working relationship.

Mr. Speaker, our ranking member, the gentleman from West Virginia (Mr.

RAHALL), joins me in commending the gentleman from Kentucky (Mr. ROGERS) for his hard work on this legislation, and we urge support for H.R. 2238.

Mr. Speaker, I reserve the balance of my time.

Mr. RADANOVICH. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky (Mr. ROGERS), who is the sponsor of the legislation.

Mr. ROGERS of Kentucky. Mr. Speaker, I am pleased and honored to have the opportunity to rise in support of H.R. 2238, the Fern Lake Conservation and Recreation Act of 2001. This has been a long road, but with the help and services of the gentleman from Utah (Mr. HANSEN) and the gentleman from California (Mr. RADANOVICH), as well as the gentleman from West Virginia (Mr. RAHALL) and the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) on the floor this morning, we have come together and crafted an excellent bill that is worthy of the Chamber's support. I appreciate their efforts in getting this legislation to the floor in such a timely manner and making the necessary corrections to it that enables it to become, I think, a successful bill.

Mr. Speaker, the bill before the House today is an essential piece of legislation which will forever protect one of the most pristine areas in the Commonwealth of Kentucky, indeed the Nation, for future generations. The bill aims to incorporate, as has been said, Fern Lake, an unspoiled body of water nestled in the Appalachian Mountains, into the Cumberland Gap National Historical Park.

The photographs that stand before us this morning are simple testimony to the absolute beauty of this pristine area. For those who are not familiar with this part of the world, the Cumberland Gap National Park is 20,000 acres of virtually untouched frontier, mountains and countryside, established by Congress in 1940. It is, as some have said, the first frontier, where Daniel Boone blazed the Cumberland Gap Trail in the late 18th century leading the way for thousands and tens of thousands of other settlers hoping to find a fresh start in this new world, moving from the Eastern Seaboard, 13 colonies, into the hinterlands of this great Nation. This is where they first came through.

Congress rightly recognized the importance of permanently protecting this frontier, and today we will hopefully vote to continue these endeavors by approving this Fern Lake addition. In short, this bill will protect the lake as a clean and safe source of rural water for the city of Middlesboro, Kentucky, its only source, enhance the scenic, recreational, wildlife, cultural value of the park, and increase tourism opportunities in the tristate areas of Kentucky, Tennessee and Virginia.

As one can see from the pictures on display, the lake and the surrounding watershed are of unparalleled beauty, and these pictures capture the essence of what thousands of park visitors see each year. This spectacular landscape is visible from Pinnacle Overlook, the highest point, the most popular attraction in the national park, and it is typical of what many of our ancestors experienced as they trudged forward through this uncharted territory over 200 years ago.

Just from the photos alone, it is not hard to understand why Congress should act today to ensure the preservation of this pristine area. Because of the conditions set forth in the original Cumberland Gap legislation, no appropriate funds can be used to purchase additional acreage unless specifically authorized by Congress. H.R. 2238 provides that authorization and paves the way for an additional 4,500 acres to be included in the park if willing sellers appear and appropriations become available.

One of the principal goals of the legislation that we have before us is to ensure the continued use of the lake as a clean and safe water supply for the city of Middlesboro, Kentucky, a small city which borders the Cumberland Gap Park.

The dam was constructed in 1893, forming the lake, and that 150-acre lake has been privately owned for most of its existence, but it has been for sale on the open market since last year. Given the fact that the lake serves as the sole water source for the city, there is considerable concern that a new owner may not share the same interest as the community.

As our local resident witness testified before the hearings here, many businesses in the area rely on the uncommon purity of the water for their livelihood. With that in mind, the bill we crafted provides a valuable resource for the park, while at the same time ensuring that the city's water demands are sufficiently met.

□ 1145

We expect the Park Service to act in good faith with this community, so that the citizens of Middlesboro will be secure with the knowledge that their water supply source will always be there. I am confident the Park Service will prove to be a valuable and responsible partner in this regard.

Lastly, Mr. Speaker, it cannot be overstated how important this legislation is to the economic well-being of the citizens of rural Appalachian Kentucky. This proposed Federal investment in our rich cultural heritage would certainly bring added tourism revenue and jobs to this impoverished area. Tourism is an essential part of our region's economic development, and we must seize every opportunity to further strengthen this sector.

In conclusion, Mr. Speaker, I want to extend my special gratitude and thanks to everyone who has made this day possible. The committee and the subcommittee have been very forthcoming, the staff has been extraordinarily helpful in this respect, and we appreciate it on both sides of the aisle.

I want to extend a special thanks to Middlesboro Mayor Ben Hickman and County Executive Jennifer Jones, who first brought this idea to my attention, and also Mrs. Karla Bowling, the president of the Bell County Chamber of Commerce, who traveled not just once but twice to this city to provide her expert testimony in support of this bill. We are grateful especially for their service.

Mr. Speaker, I strongly urge passage of this important legislation. I thank Members for their support.

Mrs. CHRISTENSEN. Mr. Speaker, I yield myself such time as I may consume to just thank the distinguished gentleman from Kentucky. He has brought the wonderful pictures and really laid out all of the reasons why this bill should be supported.

We would also like to add our congratulations on his having passed the transportation appropriations bill with such a broad consensus and such a strong vote.

Mr. Speaker, I yield back the balance of my time.

Mr. RADANOVICH. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. GILLMOR). The question is on the motion offered by the gentleman from California (Mr. RADANOVICH) that the House suspend the rules and pass the bill, H.R. 2238, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

RECLAMATION WASTEWATER AND GROUNDWATER STUDY AND FACILITIES ACT AMENDMENT

Mr. RADANOVICH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2115) to amend the Reclamation Wastewater and Groundwater Study and Facilities Act to authorize the Secretary of the Interior to participate in the design, planning, and construction of a project to reclaim and reuse wastewater within and outside of the service area of the Lakehaven Utility District, Washington.

The Clerk read as follows:

H.R. 2115

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LAKEHAVEN, WASHINGTON, WASTEWATER RECLAMATION AND REUSE PROJECT.

(a) AUTHORIZATION.—The Reclamation Wastewater and Groundwater Study and Fa-

cilities Act (Public Law 102-575, title XVI; 43 U.S.C. 390h et seq.) is amended by adding at the end the following:

“SEC. 1635. LAKEHAVEN, WASHINGTON, WATER RECLAMATION AND REUSE PROJECT.

“(a) AUTHORIZATION.—The Secretary, in cooperation with the Lakehaven Utility District, Washington, is authorized to participate in the design, planning, and construction of, and land acquisition for, a project to reclaim and reuse wastewater, including degraded groundwaters, within and outside of the service area of the Lakehaven Utility District.

“(b) COST SHARE.—The Federal share of the cost of the project authorized by this section shall not exceed 25 percent of the total cost of the project.

“(c) LIMITATION.—The Secretary shall not provide funds for the operation and maintenance of the project authorized by this section.”.

(b) CLERICAL AMENDMENT.—The table of sections in section 2 of such Act is amended by inserting after the item relating to section 1634 the following:

“Sec. 1635. Lakehaven, Washington, Water Reclamation and Reuse Project.”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. RADANOVICH) and the gentleman from Washington (Mr. SMITH) each will control 20 minutes.

The Chair recognizes the gentleman from California (Mr. RADANOVICH).

Mr. RADANOVICH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 2115, as sponsored by the gentleman from Washington (Mr. SMITH), would authorize the Bureau of Reclamation to add the Lakehaven Utility District reclamation projects to its current list of 25 specifically authorized projects under title XVI of the Reclamation Wastewater and Groundwater Study and Facilities Act.

Lakehaven Utility District is proposing a water reclamation program that would result in the reduction or elimination of local secondary wastewater to the Puget Sound, conjunctive use of reclaimed water, groundwater and surface water, and enhancement of existing wetlands and fish habitat.

Lakehaven has two secondary wastewater treatment plants currently discharging over 6 million gallons of water a day to the Puget Sound. They would use reclaimed water to manage groundwater levels, thereby enhancing the reliability of existing water supplies. The project would result in the construction of additional treatment systems at the district's two wastewater treatment plants and would further purify all or portions of the plant's secondary effluent.

Lakehaven is also planning the construction of transmission and distribution pipeline systems to transport water to reuse areas where facilities will be developed to direct the water to the aquifer. This would be done

through injection wells, sub-surface infiltration galleries and land applications in areas that are currently wetland restoration project areas.

The cost for these facilities is estimated to be \$38 million. Under title XVI, the Federal portion of the cost of constructing facilities cannot exceed 25 percent, with a maximum of \$20 million.

Mr. Speaker, I reserve the balance of my time.

Mr. SMITH of Washington. Mr. Speaker, I yield myself such time as I may consume.

Mr. SMITH of Washington. Mr. Speaker, first of all I want to thank the chairmen of the subcommittee and the full committee for bringing this issue through the committee and to the floor. It is an issue that is very, very important to my district.

The Lakehaven Utility District is one of the largest utility districts that I represent and have some critical wastewater needs, as was mentioned. The projects that they have put forward are very innovative and show a great deal of promise in developing new technology to help us deal with wastewater, both in terms of recycling it and properly disposing of it.

Some of the problems that we have in this country that do not get as much attention or are not as well noticed are some of the critical infrastructure problems. When most people think of infrastructure, they think of transportation, they think of airports, maybe they think of education; but wastewater treatment is one of the more critical infrastructure issues that our country faces, and we are facing a critical backlog of projects that need help and support.

This bill would give us the authorizing language that we need in order to move forward in this project. We are fully aware of the fact we also have to get in line with the other 25 projects to try to get it appropriated, but this is the first necessary step in that process.

I really want to compliment the Lakehaven Utility District and their commissioners, who have worked so hard on this project. I think they have been very forward-thinking, and the project they have put forward looked at new technologies and new ways to deal with wastewater in ways that hopefully will help become a model for the country and move forward.

They are fully prepared to fund, obviously, a portion of this project and just need a little Federal help to make it happen.

Again, I want to thank the chairman, I want to thank all the people on the committee, for allowing this to come forward, and, again, the folks in Lakehaven for doing the work.

Lastly, I am going to take a personal moment. It is my wife's birthday today; and, unfortunately, she is back home in my district. So this is my only

opportunity to say happy birthday to her in any sort of visual format. So, happy birthday.

Again, I thank the chairman for bringing this bill up, and urge passage.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. RADANOVICH. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. RADANOVICH) that the House suspend the rules and pass the bill, H.R. 2115.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RADANOVICH. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the three bills just considered, H.R. 3322, H.R. 2238, and H.R. 2115.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

NATIVE AMERICAN SMALL BUSINESS DEVELOPMENT ACT

Mr. MANZULLO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2538) to amend the Small Business Act to expand and approve the assistance provided by Small Business Development Centers to Indian tribe members, Native Alaskans, and Native Hawaiians, as amended.

The Clerk read as follows:

H.R. 2538

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Native American Small Business Development Act".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds the following:

(1) Approximately 60 percent of Indian tribe members and Alaska Natives live on or adjacent to Indian lands, which suffer from an average unemployment rate of 45 percent.

(2) Indian tribe members and Alaska Natives own more than 197,000 businesses and generate more than \$34,000,000,000 in revenues. The service industry accounted for 17 percent of these businesses (of which 40 percent were engaged in business and personal services) and 15.1 percent of their total receipts. The next largest was the construction industry (13.9 percent and 15.7 percent, respectively). The third largest was the retail trade industry (7.5 percent and 13.4 percent, respectively).

(3) The number of businesses owned by Indian tribe members and Alaska Natives grew by 84 percent from 1992 to 1997, and their

gross receipts grew by 179 percent in that period. This is compared to all businesses which grew by 7 percent, and their total gross receipts grew by 40 percent, in that period.

(4) The Small Business Development Center program is cost effective. Clients receiving long-term counseling under the program in 1998 generated additional tax revenues of \$468,000,000, roughly 6 times the cost of the program to the Federal Government.

(5) Using the existing infrastructure of the Small Business Development Center program, small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians receiving services under the program will have a higher survival rate than the average small business not receiving such services.

(6) Business counseling and technical assistance is critical on Indian lands where similar services are scarce and expensive.

(7) Increased assistance through counseling under the Small Business Development Center program has been shown to reduce the default rate associated with lending programs of the Small Business Administration.

(b) PURPOSES.—The purposes of this Act are as follows:

(1) To stimulate economies on Indian lands.

(2) To foster economic development on Indian lands.

(3) To assist in the creation of new small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians and expand existing ones.

(4) To provide management, technical, and research assistance to small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians.

(5) To seek the advice of the governing bodies of Indian tribes, corporations organized pursuant to the Alaska Native Claims Settlement Act and other Alaska Native entities, and Native Hawaiian organizations on where small business development assistance is most needed.

(6) To ensure that Indian tribe members, Alaska Natives, and Native Hawaiians have full access to existing business counseling and technical assistance available through the Small Business Development Center program.

SEC. 3. SMALL BUSINESS DEVELOPMENT CENTER ASSISTANCE TO INDIAN TRIBE MEMBERS, ALASKA NATIVES, AND NATIVE HAWAIIANS.

(a) IN GENERAL.—Section 21(a) of the Small Business Act (15 U.S.C. 648(a)) is amended by adding at the end the following:

"(7) ADDITIONAL GRANT TO ASSIST INDIAN TRIBE MEMBERS, ALASKA NATIVES, AND NATIVE HAWAIIANS.—

"(A) IN GENERAL.—Any applicant in an eligible State that is funded by the Administration as a Small Business Development Center may apply for an additional grant to be used solely to provide services described in subsection (c)(3) to assist with outreach, development, and enhancement of small business startups and expansions that are owned by Indian tribe members, Alaska Natives, or Native Hawaiians and that are located in Alaska or Hawaii, or on Indian lands in the 48 contiguous States.

"(B) ELIGIBLE STATES.—For purposes of subparagraph (A), an eligible State is a State that has a combined population of Indian tribe members, Alaska Natives, and Native Hawaiians that comprises at least 1 percent of the State's total population, as shown by the latest available census.

“(C) GRANT APPLICATIONS.—An applicant for a grant under subparagraph (A) shall submit to the Associate Administrator an application that is in such form as the Associate Administrator may require. The application shall include information regarding the applicant's goals and objectives for the services to be provided using the grant, including—

“(i) the capability of the applicant to provide training and services to a representative number of Indian tribe members, Alaska Natives, and Native Hawaiians;

“(ii) the location of the Small Business Development Center site proposed by the applicant;

“(iii) the required amount of grant funding needed by the applicant to implement the program; and

“(iv) the extent to which the applicant has consulted with the governing bodies of Indian tribes, corporations organized pursuant to the Alaska Native Claims Settlement Act and other Alaska Native entities, and Native Hawaiian organizations, as appropriate.

“(D) APPLICABILITY OF GRANT REQUIREMENTS.—An applicant for a grant under subparagraph (A) shall comply with all of the requirements of this section, except that the matching funds requirements of paragraph (4)(A) shall not apply.

“(E) MAXIMUM AMOUNT OF GRANTS.—No applicant may receive more than \$300,000 in grants under this paragraph in a fiscal year.

“(F) REGULATIONS.—After providing notice and an opportunity for comment and after consulting with the Association recognized by the Administration pursuant to paragraph (3)(A) (but not later than 180 days after the date of enactment of this paragraph), the Administrator shall issue final regulations to carry out this paragraph, including regulations that establish—

“(i) standards relating to educational, technical, and support services to be provided by Small Business Development Centers receiving assistance under this paragraph; and

“(ii) standards relating to any work plan that the Associate Administrator may require a Small Business Development Center receiving assistance under this paragraph to develop.

“(G) DEFINITIONS.—In this paragraph, the following definitions apply:

“(i) ASSOCIATE ADMINISTRATOR.—The term ‘Associate Administrator’ means the Associate Administrator for Small Business Development Centers.

“(ii) INDIAN LANDS.—The term ‘Indian lands’ means, in the 48 contiguous States, land that is a ‘reservation’ for the purposes of section 4 of the Indian Child Welfare Act of 1978 (25 U.S.C. 1903) and land that is an ‘Indian reservation’ for the purposes of section 151.2 of title 25, Code of Federal Regulations (as in effect on the date of enactment of this paragraph).

“(iii) INDIAN TRIBE.—The term ‘Indian tribe’ means a federally recognized Indian tribe.

“(iv) INDIAN TRIBE MEMBER.—The term ‘Indian tribe member’ means an individual who is a member of an Indian tribe.

“(v) ALASKA NATIVE.—The term ‘Alaska Native’ means an individual who is—

“(I) a ‘Native’ for the purposes of section 3(b) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(b));

“(II) a descendant of an individual who is a ‘Native’ for the purposes of section 3(b) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(b)); or

“(III) a Tsimshian Indian who is an enrolled member of the Metlakatla Indian Community.

“(vi) NATIVE HAWAIIAN.—The term ‘Native Hawaiian’ means any individual who is a descendant of the aboriginal people, who prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii.

“(H) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this paragraph \$7,000,000 for each of fiscal years 2002 through 2004.

“(I) FUNDING LIMITATIONS.—

“(i) NONAPPLICABILITY OF CERTAIN LIMITATIONS.—Funding under this paragraph shall be in addition to the dollar program limitations specified in paragraph (4).

“(ii) LIMITATION ON USE OF FUNDS.—The Administration may carry out this paragraph only with amounts appropriated in advance specifically to carry out this paragraph.”.

SEC. 4. STATE CONSULTATION WITH LOCAL TRIBAL COUNCILS.

Section 21(c) of the Small Business Act (15 U.S.C. 648(c)) is amended by adding at the end the following:

“(9) ADVICE OF GOVERNING BODIES OF INDIAN TRIBES, ALASKA NATIVE CORPORATIONS AND OTHER ENTITIES, AND NATIVE HAWAIIAN ORGANIZATIONS.—A State receiving grants under this section shall request the advice of the governing bodies of Indian tribes, corporations organized pursuant to the Alaska Native Claims Settlement Act and other Alaska Native entities, and Native Hawaiian organizations, as appropriate, on how best to provide assistance to Indian tribe members, Alaska Natives, and Native Hawaiians and where to locate satellite centers to provide such assistance.”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. MANZULLO) and the gentleman from New Mexico (Mr. UDALL) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. MANZULLO).

GENERAL LEAVE

Mr. MANZULLO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 2538.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MANZULLO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to join with my good friend, the gentleman from New Mexico (Mr. UDALL), in offering this bill today.

While many Americans are justifiably anxious about a one-half percent jump in the unemployment rate, about 60 percent of our Native American population lives in or adjacent to Indian lands that suffer from an average unemployment rate of 45 percent. This past summer I had the opportunity to visit Santa Fe in the heart of the district of the gentleman from New Mexico (Mr. UDALL); and at that time we held a hearing involving the contracting practices of one of our labs out there, the Los Alamos lab.

The evidence adduced at the hearing pointed out quite significantly that the Native American tribes are not getting

their share of the amount of Federal dollars that are being poured into the Los Alamos facility.

One of the purposes of this bill is to extend the facilities of the SBCDs, the Small Business Development Centers, of which there are over 1,000 in this country, for the purpose of business counseling and technical assistance to the Native Americans who may wish to become involved in the procurement process.

What is good about this bill, Mr. Speaker, is the fact that this is a self-help program, it involves the outlay of a relatively small amount of money, it is aimed directly at the Native Americans that really need the assistance, and it is the type of learning of business techniques that makes the Native Americans better able to compete to go after these Federal contracts and in the private sector.

So I join in the support of this bill and would encourage my colleagues to support H.R. 2538.

Mr. Speaker, I reserve the balance of my time.

Mr. UDALL of New Mexico. Mr. Speaker, I yield myself such time as I may consume.

First of all, let me thank the majority leader for allowing this legislation to come before the House for consideration. I also would like to thank the gentleman from Illinois (Chairman MANZULLO) and the ranking member, the gentlewoman from New York (Ms. VELÁZQUEZ), for their work and commitment to expanding small business opportunities for all Americans.

H.R. 2538 will establish a 3-year pilot program for providing grants to Small Business Development Centers for assisting Native American, Native Alaskan and Native Hawaiian populations with their small business development needs.

Today we have demonstrated how important small business is to the health of our economy, but there are still places in this country where economic prosperity has often failed to reach. These areas deserve our attention and assistance.

Consider this: nowhere in America has poverty persisted longer than on or near Native American reservations, which suffer an average unemployment rate of 45 percent. However, the number of businesses owned by Indian tribe members and Native Alaskans grew by 84 percent from 1992 to 1997, and their gross receipts grew by 179 percent in that period. This is compared to all businesses which grew by 7 percent, and their total gross receipts grew by 40 percent in that period.

I would like to continue this growth and expansion of small enterprise through this legislation. My bill ensures that Native Americans, Native Alaskans and Native Hawaiians seeking to create, develop and expand small businesses, have full access to the

counseling and technical assistance available through the SBA's SBDC program. The business development tools offered by SBDCs can assist Native Americans with the information and opportunity to build sustainable businesses in their communities.

The Native American Small Business Development Act would permit State Small Business Development Centers to apply for Federal grants to establish one or more Native American Small Business Development Centers. In an effort to ensure the quality and success of the program, the proposal requires grant applicants to provide the SBA with their goals and objectives, including their experience in assisting entrepreneurs with the difficulties in operating a small business.

In addition, the applicant must show their ability to provide training and services to a representative number of Native Americans, Native Alaskans and Native Hawaiians. Most importantly, applicants must seek the advice of the local native population on specific needs and the location of services they will provide.

It is clear we can do more to aid Native American entrepreneurs. Not enough has been done to assist Native Americans in building their businesses, which in turn helps benefit their communities.

□ 1200

I hope to change that with this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. MANZULLO. Mr. Speaker, I yield myself such time as I may consume. I want to acknowledge the work of my colleagues on the Committee on Resources, in particular the gentleman from Utah (Mr. HANSEN). They contributed immensely to this bill in order to make sure that we are helping as many native Americans as possible, and particularly in clarifying the language as it applies to Alaska natives. I thank them for their contribution to this important legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. UDALL of New Mexico. Mr. Speaker, I yield such time as she may consume to the gentlewoman from New York (Ms. VELÁZQUEZ), our ranking member and a very hardworking member on this piece of legislation.

Ms. VELÁZQUEZ. Mr. Speaker, I rise in strong support of H.R. 2538, the Native American Small Business Development Act. This is an important piece of legislation which we need now more than ever. I thank the gentleman from New Mexico for his hard work on this issue, and I congratulate him for bringing it to the floor today.

In the past decade, our economy has created more than 15 million new jobs and the greatest boom time on record. American small business has been an

integral part of this growth. Small companies and entrepreneurs employ half our workers, create jobs 75 percent faster than large firms, and make up nearly half our gross domestic product. They are the key to our success and will be the key to our economic recovery.

But the prosperity many Americans have enjoyed failed to reach some places in our country. Certain regions and communities peer over an ever-widening canyon that separates them from those better off. These areas deserve our attention and our help to fill that gap.

Nowhere in America is poverty more persistent than on and near Native American reservations where citizens suffer a staggering average unemployment rate of 45 percent. Over a third of reservation inhabitants live below the poverty line.

But one of the bright spots on many reservations during the past decade has been the growth of small business. From 1992 to 1997, the number of businesses owned by Native Americans grew by 84 percent. Their gross receipts also grew during that time by 179 percent. Those rates dwarf national figures for small business. Clearly, Native American enterprise is a powerful engine for renewal.

While such spirit is innate, success is learned. We know from consistent and incontrovertible evidence that technical assistance helps small companies. Entrepreneurs who learn business skills are twice as likely to succeed.

The gentleman from New Mexico (Mr. UDALL), my good friend, understands this principle, which is why he introduced his innovative and valuable legislation. I commend him for his leadership and stewardship of this bill.

The Native American Small Business Development Act will provide the technical assistance and aid needed to spur and perpetuate an extraordinary burst of enterprise. It ensures that those seeking to develop small businesses will have full access to counseling and technical assistance provided by the SBA's Small Business Development Program.

With the economy in a downturn, we need this bill now more than ever, because enterprise is the engine of recovery. These hardworking entrepreneurs deserve the best service available to build and grow. This legislation will ensure they receive that aid which will help spread and sustain prosperity to every corner of our country.

Mr. Speaker, I urge all of my colleagues to support this legislation.

Mr. UDALL of New Mexico. Mr. Speaker, I yield 3 minutes to the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN).

Mrs. CHRISTENSEN. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, today I join my colleagues in support of H.R. 2538, the Na-

tive American Small Business Development Act. Within the past decade, America's small businesses have experienced unprecedented growth and have contributed greatly to our Nation's economic upswing prior to September 11. Now they will be an important engine for recovery.

As the premier technical assistance providers to America's entrepreneurs, Small Business Development Centers are responsible, in large part, for the successes of small businesses.

We know that many of these businesses operate near or at their profit margin and do not have the additional resources to hire legal or technical experts. This is where the SBDCs step in to provide free or, in a few instances, low-cost technical assistance. Research shows that small businesses that receive this technical assistance are twice as likely to succeed as those which do not.

Mr. Speaker, for too long our Nation's Native American population, the first Americans, have been, as they have often been referred to as, the "forgotten people." As a member of the Committee on Resources, like the gentleman from New Mexico (Mr. UDALL), and as a person with Native American lineage myself, I want to commend the gentleman from New Mexico for introducing this bill, and I am pleased to support it, and I look forward to its passage today.

While our country has experienced economic prosperity over the past decade, the Native American community, including the Alaskan Natives and Native Hawaiian communities, continue to lag behind. For example, the average unemployment rate for Native American communities, particularly on reservations, averages about 45 percent, with one-third of Native Americans living below the poverty level. With only limited help, Native American small businesses have grown at a rate of 84 percent over the past 5 years, but we need to help them more. We need to help them do better.

Mr. Speaker, H.R. 2538 will provide \$7 million to fund a 3-year pilot program to provide technical assistance to Native American, Native Alaskan, and Native Hawaiian businesses. This program will give these businesses better access to the SBDC network, no matter where they are located. It will help to sustain and, hopefully, boost the growth of Native American, Native Alaskan and Hawaiian Native businesses which, in turn, will spur the much-needed economic growth in these communities.

Once again, I would like to commend the gentleman for championing this cause and bringing this legislation to the floor, and I urge my colleagues to support it.

Mr. UDALL of New Mexico. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. DAVIS).

Mr. DAVIS of Illinois. Mr. Speaker, first of all, let me congratulate the gentleman from New Mexico (Mr. UDALL) on the introduction of this bill. I also want to commend the chairman and ranking member for the efficient manner in which they have moved this legislation to the floor.

Mr. Speaker, I rise in support of H.R. 2538, the Native American Entrepreneurial Development Act. This legislation would provide \$7 million to fund a 3-year program for technical assistance to Native American businesses.

Mr. Speaker, the reality is that when we provide an opportunity for Native American businesses to grow and develop, to experience some sense of technical knowledge, to be able to come into the mainstream, then we are really doing the work, I think, that we were sent here to do.

I do not want to be redundant, but I certainly want to commend again the gentleman from New Mexico for his sensitivity and understanding and recognition of the needs of the people that he represents. Again, I commend the chairman, the gentleman from Illinois (Mr. MANZULLO), and the ranking member for the efficiency and the good work of this Committee on Small Business. With all due respect to other committees, Mr. Speaker, I think that this is probably one of the most bipartisan, one of the most efficient committees in Congress, and we all do an outstanding job on it.

Mr. UDALL of New Mexico. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mrs. JONES).

Mrs. JONES of Ohio. Mr. Speaker, I thank the gentleman for his leadership on this issue, and I thank the chairman for his leadership on the committee.

I just rise very quickly to say that I had an opportunity to visit Ship Rock, New Mexico, with President Clinton when we went on the tour of the Digital Divide. At that time, I had a chance to visit an Indian reservation, and I had a chance to speak with and discuss with the people there the issues of small business. I am so happy that the gentleman has chosen and has had an opportunity to address this issue.

Secondly, I had a chance to visit the Small Business Development Center in Hawaii where they were doing innovative things on a lot of little small islands where they were able to put the counselor for the Small Business Development Center on a computer at one end and the people on the small islands at the other end to engage in counseling. So I am so happy that the gentleman has taken the leadership in this area, and I rise in support of him and congratulate him on the work he is doing, and the chairman as well.

Mr. UDALL of New Mexico. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just thank the chairman of the committee, the gen-

tleman from Illinois (Mr. MANZULLO), once again. I want to echo what has been said earlier, that we have one of the most bipartisan committees in the Congress, and I know because of all of the chairman's hard work we have gotten this bill through and gotten this done.

I want to take the opportunity to thank the staff on both sides and my staff member, Tony Martinez, who has worked very hard on this.

Members from both parties talked about visiting my district and learning from those experiences out there, and I think one of the things they learned is that we can make a real difference for Native American entrepreneurs with this piece of legislation.

So let me once again just thank the gentleman from Illinois (Mr. MANZULLO) for all of his hard work.

Mr. RANGEL. Mr. Speaker, I rise today in support of the bill H.R. 2538, an important piece of legislation for the Native American small businesses community.

Now, more than ever, we need to develop and expand the Native American private sector. Industries employ a growing number of individuals on reservations. The expansion of small businesses positively impacts these communities by putting money directly into their hands and places them directly in control of their destinies.

In addition to creating new small businesses and enlarging existing ones we must provide management, technical, and research assistance to Native Americans who seek to create, develop, or expand small businesses. Only by providing them full access to the necessary business counseling and technical assistance can we ensure their success, a success that is so important to the future of those communities.

With our priority to support the Native American small business community, we build a stronger economy and provide jobs to tribal members. This will, in turn, open the doors for the future of the tribal Nations. Native Americans face various challenges and we have the obligation to actively pursue methods to improve the Native American standard of living.

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of H.R. 2538 as amended, and wish to clarify how the program authorized in this bill operates with respect to my Alaska Native constituents.

H.R. 2538 as amended does not differ in substance from the bill as reported by the Committee on Small Business. Rather, the measure under consideration today simply recognizes the unique Native American policies that Congress has implemented in the State of Alaska, and clarifies how the grant program the bill authorizes will be implemented in that State.

In the 48 contiguous States, Congress's policy on Native Americans has focused on recognizing groups of Native Americans as "federally recognized tribes" that are distinct political entities and a majority of whose members reside on reservations and other land that is owned by the United States in trust.

However, while Congress has routinely designated groups of Alaska Natives as "tribes,"

it has done so for the sole purpose of ensuring that Alaska Natives are eligible for programs and services that the United States provides to Native Americans because of their status as Native Americans.

Congress has not recognized any group of Alaska Natives as a "federally recognized tribe" that is a distinct political entity.

Instead, since 1884 Congress has required Alaska Natives to be, at all locations in Alaska, subject to the same criminal and civil state laws that non-Native Alaskans are required to observe.

Consistent with that policy, in 1971 when it extinguished Alaska Native aboriginal title by enacting the Alaska Native Claims Settlement Act, Congress required Alaska Natives to organize business corporations under the laws of the state of Alaska and then directed the Secretary of the Interior to convey the corporations fee title to 44 million acres of Federal land.

The amendments made to H.R. 2538 as reported by the Committee on Small Business simply acknowledge that Congress' Alaska Native policy is quite different from the Native American policy that Congress has implemented in the 48 contiguous States. It will also ensure that the intent of H.R. 2538 can be effectively met in Alaska for the benefit of Alaska Natives.

I would like to thank the gentleman from New Mexico and the chairman and ranking members of the Small Business Committee, and their staff, for their assistance in making appropriate changes to the language in the bill as reported.

These amendments will ensure the programs authorized by H.R. 2538 assist Alaska Natives as intended. I support H.R. 2538 as amended.

Mr. MATHESON. Mr. Speaker, it is with great pleasure that I rise today to support H.R. 2358, the Native American Entrepreneurial Development Act. This legislation is a great step forward for the small businesses owned and operated by Native Americans.

As many of us know, there are over 1,000 Small Business Development Centers across the United States serving over 600,000 businesses. Over 30 percent of those businesses are minority-owned. Unfortunately, while small businesses helped in our Nation's economic boom in the 1990s, Native American communities have lagged behind. Unemployment, especially on reservations, continues to be a rampant 45 percent. Even worse, nearly one in three Native Americans live far below the poverty line.

This legislation focuses on a \$7 million pilot program that will provide technical assistance to Native American businesses. Since Native American businesses have grown at a rate of 84 percent over the last 5 years, H.R. 2358 will help more Native Americans find success as they launch companies and access the Small Business Development Center's network.

I appreciate the work and leadership of my colleagues on this legislation. As we work together, I believe that we will find more positive solutions that will help Native Americans throughout the United States become more successful. I ask my colleagues to support H.R. 2358, the Native American Entrepreneurial Development Act, and give Native

American businesses the opportunity to access capital, hire strong, skilled workers, and successfully negotiate Federal, State, and local laws and regulations.

Mr. KILDEE. Mr. Speaker, as co-chairman of the Congressional Native American Caucus, I rise in strong support of H.R. 2538, a bill that amends the Small Business Act to expand and improve the assistance provided by the Small Business Development Centers (SBDC) for Native American tribal members. Alaska Natives and Native Hawaiians. I want to thank my good friend from New Mexico, Congressman TOM UDALL, for introducing this bill. I am proud to be an original cosponsor.

Mr. Speaker, the bill establishes a 3-year pilot project that allows any SBDC in a State, whose Native American tribal members, Alaska Native, or Native Hawaiian populations are 1 percent of the State's total population, to apply for grants from the Small Business Administration. The grants will help the SBDCs to assist the small business owners with their entrepreneurial needs.

The purpose of this bill is to create jobs and to foster economic development on tribal lands. It is my hope that by using the existing structure of the Small Business Administration's SBDC program, small businesses on tribal land will have a better chance for success. Due to limited resources, the SBDC program has had a difficult time providing counseling and technical assistance to small business owners on tribal land. This bill will provide SBDC the adequate resources it needs to reach out to small business owners in Indian country.

Mr. Speaker, I ask my colleagues to support this measure.

Mrs. MINK of Hawaii. Mr. Speaker, I rise today in support of H.R. 2538, the Native American Small Business Development Act.

Native people throughout our country continues to struggle because they lack the basic economic infrastructure to support businesses. Consequently, the poverty rate for native people remains at an unacceptable level. According to the Census Bureau, the poverty rate for American Indians and Alaska Natives averaged 25.9 percent from 1998 through 2000.

In Hawaii, census data indicates that Native Hawaiians continue to be clustered in the state's poorest areas. According to the State of Hawaii's Office of Hawaiian Affairs, Native Hawaiians significantly lag behind the state's averages for family income and high school graduation rates. The unemployment rate for Native Hawaiians living in Hawaii during 2000 was 7.2 percent, well above the state average of 4.3 percent.

Despite these sobering statistics, native people continue to show a strong entrepreneurial spirit. These businesses are gateways allowing individuals to find their way out of poverty.

H.R. 2538 creates a 3-year pilot program to support this entrepreneurial spirit by providing grants to Small Business Development Centers that assist the small business needs of native people.

Under this bill, Small Business Development Centers can obtain \$300,000 grants to assist with outreach, development, and enhancement of small businesses owned by Indian tribe members, Native Alaskans, and Native Hawai-

ians. The bill will target the grants to businesses located on or near native lands, which will create new job opportunities for native people living in these areas.

The bill require states to consult with local native groups to determine the best way to provide assistance and where to locate satellite business centers. The cooperative nature of the relationship between the Small Business Development Centers and native people will help ensure the success of the program.

I urge my colleagues to vote for H.R. 2538 and help provide small business opportunities to Native Americans throughout America.

Mr. UDALL of New Mexico. Mr. Speaker, I yield back the balance of my time.

Mr. MANZULLO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SHIMKUS). The question is on the motion offered by the gentleman from Illinois (Mr. MANZULLO) that the House suspend the rules and pass the bill, H.R. 2538, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to amend the Small Business Act to expand and improve the assistance provided by Small Business Development Centers to Indian tribe members, Alaska Natives, and Native Hawaiians."

A motion to reconsider was laid on the table.

EXPRESSING SENSE OF CONGRESS IN HONORING THE CREW AND PASSENGERS OF UNITED AIR- LINES FLIGHT 93

Mr. MICA. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 232) expressing the sense of the Congress in honoring the crew and passengers of United Airlines Flight 93.

The Clerk read as follows:

H. CON. RES. 232

Whereas on September 11, 2001, acts of war were committed against the United States, killing and injuring thousands of innocent people;

Whereas these attacks were directed at the World Trade Center in New York, New York, and the Pentagon in Washington, D.C., which are symbols of the Nation's economic and military strength;

Whereas United Airlines Flight 93 was hijacked by terrorists as part of these attacks;

Whereas while Flight 93 was still in the air, passengers and crew, through cellular phone conversations with loved ones on the ground, learned that other hijacked airplanes had been used in these attacks;

Whereas during these phone conversations several of the passengers indicated that there was an agreement among the passengers and crew to try to overpower the hijackers who had taken over the aircraft;

Whereas it is believed that it was this effort to overpower the hijackers that caused Flight 93 to crash in southwestern Pennsylvania, short of what is believed to have been its intended target: Washington, D.C.; and

Whereas the crash resulted in the death of everyone on board the aircraft: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) on September 11, 2001, the passengers and crew of hijacked United Airlines Flight 93 possibly averted the use of that aircraft in a further terrorist attack on the United States by attempting to overpower the hijackers;

(2) the United States owes its deepest gratitude to the passengers and crew of Flight 93, and extends its condolences to the families and friends of Captain Jason Dahl, First Officer Leroy Homer, flight attendants Lorraine G. Bay, Sandra W. Bradshaw, Wanda A. Green, Ceecee Lyles, Deborah A. Welsh, and passengers Christian Adams, Todd Beamer, Alan Beaven, Mark Bingham, Thomas Burnett, William Cashman, Georgine Corrigan, Joseph Deluca, Patrick Driscoll, Edward Felt, Jane C. Folger, Colleen Fraser, Andrew Garcia, Jeremy Glick, Kristin Gould, Lauren Grandcolas, Donald Greene, Linda Gronlund, Richard Guadagno, Toshiya Kuge, Hilda Marcin, Waleska Martinez, Nicole Miller, Louis J. Nacke, Donald Peterson, Mark Rothenberg, John Talignani, Honor Elizabeth Wainio, and 9 passengers whose families wish them to remain anonymous; and

(3) a memorial plaque to these victims should be placed on the grounds of the Capitol, and a copy of the wording of the plaque, together with a copy of this resolution from the Congressional Record, should be sent to a designated survivor of each victim.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Florida (Mr. MICA) and the gentleman from Illinois (Mr. LIPINSKI) each will control 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. MICA).

Mr. MICA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution was introduced by the gentleman from Kentucky (Mr. FLETCHER). As of yesterday, it had 131 cosponsors, and I know many others are interested in cosponsoring this important resolution.

The resolution was introduced on September 20, 2001, 9 days after the September 11 attack on America.

In my view, all the victims who gave their lives on September 11 are American heroes. Of course, much attention has been rightfully focused on the heroes that took heroic actions in the World Trade Center and also in the Pentagon. But, Mr. Speaker, the passengers of United Flight 93 deserve special recognition.

As the fourth plane hijacked on that day, the passengers, unfortunately, knew the fate that awaited them. Rather than accept that fate, however, the passengers of Flight 93 acted. We know they courageously fought back against the terrorists. While they did not succeed in saving the aircraft or their own lives, they were able to prevent hijackers from achieving their horrible objectives. In that process, Mr. Speaker, they lost their lives, and they lost their lives conducting heroic actions.

While we may never confirm the targets of those terrorists, we know they were headed, in fact, to Washington and, more than likely, this very Capitol building. The heroic actions of the passengers and crew of Flight 93 saved many lives. Therefore, it is entirely fitting that we, my colleagues in the Congress today, honor the crew and passengers on Flight 93 with both this resolution and also with a memorial plaque on the grounds, as called for in this resolution.

□ 1215

I want to take this opportunity to again congratulate our colleague, the gentleman from Kentucky (Mr. FLETCHER), for his initiative in introducing this significant resolution, and urge its adoption in the House.

Mr. Speaker, I reserve the balance of my time.

Mr. LIPINSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am very proud and privileged to rise today to support this resolution. These American heroes launched the first offensive action of the United States of America's war on terrorism. They truly are American heroes. They knew the odds were overwhelmingly against them; yet motivated by patriotism, love of God, family, and country, they attacked the terrorists to protect other Americans in America.

Someone once said, "Responsibility is a wine press that brings forth strange juices." The juices that came from these passengers on United Flight 93 were unbelievable strength and unlimited courage.

Like those Americans on Bataan, Corregidor, and Wake Island, these Americans sacrificed for their country and their families. No American should ever forget what they accomplished.

Mr. Speaker, I reserve the balance of my time.

Mr. MICA. Mr. Speaker, I am pleased to yield 5 minutes to the gentleman from Kentucky (Mr. FLETCHER), who is also the author of this resolution.

Mr. FLETCHER. Mr. Speaker, I thank the gentleman from Florida for his work on the Committee on Transportation and Infrastructure.

Mr. Speaker, as we look at this, I rise today to encourage my colleagues to vote for this measure; and I really do not think it will take a lot of encouragement because we have had an overwhelming expression of enthusiasm regarding those on Flight 93 and their heroic activities.

Mr. Speaker, this is a resolution expressing a sense of Congress that a memorial plaque be established on the grounds of the Capitol. It is an expression of our thanks and condolences to the passengers and crew of United Flight 93.

I also want to thank my staff member, Phillip Brown, who has worked

very hard to get this done. It was originally his idea. I think it is very appropriate as the families and survivors, and not only that, all of us, as we go about these Capitol grounds, I think it will be the appropriate thing to do. I think it will be great for posterity as they see a plaque that honors those on Flight 93 that I do believe had a significant part in saving probably our Capitol.

On September 11, United Airlines Flight 93, piloted by Captain James Dahl, departed from Newark International Airport at 8:01 on a routine flight to San Francisco with six other crew members and 38 passengers on board. Shortly after departure, the flight was hijacked by terrorists.

The hijacking was one of four, as we all remember, on the morning of September 11. We all remember that date because it was a horrible day and a turning point in our Nation's history. Four of our own planes were hijacked and targeted on buildings that define our Nation and symbolize our freedom and values and symbolize our Nation's economic and military strength. Three of these planes hit their marks, resulting in an incomprehensible tragedy and loss of innocent life on a scale not seen in this country since the Civil War.

We know that the passengers and crew learned through cellular phone conversations with loved ones on the ground of the deliberate acts of the destruction and murder occurring in New York City and Washington, D.C., and that hijacked aircraft had been used in these terrorist acts of war.

During these phone conversations, several of the passengers indicated that there was an agreement among the passengers and crew to try to overpower the hijackers who had taken over the aircraft. It is believed that it was this effort to overpower the hijackers that caused Flight 93 to crash at 10:37 a.m. in southwestern Pennsylvania near Schwenksville, short of what is believed to have been its intended target, Washington, D.C., and probably, this very Capitol building we stand in today.

These efforts of these individuals on this plane heroically limited the damage the terrorists could inflict, losing their lives for their country in the process. We owe the passengers and the crew our gratitude and our honor.

The participants of the resistance on board Flight 93 showed selfless courage and patriotism.

Passengers like Todd Beamer, whose young widow is here today in Washington. He told a telephone operator how much he loved his expecting wife and two sons, and he asked her to call them. He asked her to pray the Lord's Prayer and Psalm 23 with him. He told her, "I am going to have to go out in faith," and his now famous words "Let's roll" have become a rallying cry in America.

Passengers like Tom Burnett, who left what he knew would be likely his last conversation with his wife saying, "Okay, we are going to do something."

Passengers like Jeremy Glick, who told his wife that the passengers and crew had taken a vote and agreed to try to take back the plane.

Crew members like Sandra Bradshaw, who told her husband of the plan to rush the hijackers and take back control of the plane, and that she was boiling water to use as a weapon against the terrorists.

The passengers and crew, all of whom are survived by loved ones, husbands, wives, children, and parents, very likely averted the destruction of the U.S. Capitol and the symbol this institution has become for the democratic process of government, and in the process, saving hundreds, perhaps thousands of lives.

By their heroic acts, Lady Liberty still stands at the top of our noble dome, and the light of freedom still shines brightly here in the Capitol.

This resolution expresses the sense of Congress that a memorial plaque to honor, and I would like to read these names, Captain Jason Dahl, First Officer Leroy Homer, flight attendants Lorraine G. Bay, Sandra W. Bradshaw, Wanda A. Green, Ceecee Lyles, Deborah A. Welch, passengers Christian Adams, Todd Beamer, Alan Beaven, Mark Bingham, Thomas Burnett, William Cashman, Georgine Corrigan, Patricia Cushing, Joseph DeLuca, Patrick Driscoll, Edward Felt, Jane C. Folger, Colleen Fraser, Andrew Garcia, Jeremy Glick, Christine Gould, Lauren Grandcolas, Donald Greene, Linda Gronlund, Richard Guadagno, Toshiya Kuge, Hilda Marcin, Waleska Martinez, Nicole Miller, Louis J. Nacke, Donald Peterson, Jean Peterson, Mark Rothenberg, Christine Snyder, John Talignani, and Honor Elizabeth Wainio.

This plaque should be crafted and placed here on the grounds of the United States Capitol expressing our thanks and condolences; and a copy of the plaque, together with a copy of this resolution from the CONGRESSIONAL RECORD, should be sent to a designated survivor of each victim.

I am confident with the passage of this resolution that the Speaker of the House, the House minority, the Senate majority leader, and the Senate minority leader will ask and direct the Architect of the Capitol to begin plans for design, crafting, and placement of this plaque, to begin as soon as possible.

I also want to thank my colleagues for their support of this resolution; and after this vote, I intend to send a letter to the leadership regarding this sense of Congress, and I invite my colleagues to join me.

Mr. LIPINSKI. Mr. Speaker, I yield 2 minutes to the gentlewoman from Hawaii (Mrs. MINK).

Mrs. MINK of Hawaii. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I rise today to join in strong support of House Concurrent Resolution 232, in honor of all of the passengers and the crew on United Flight 93 that were lost on that fateful day, September 11, 2001.

Mr. Speaker, I rise today because two of those who lost their lives came from Hawaii: Georgina Corrigan and Christine Snyder.

Nothing could be more appalling than the spectacle of the airplanes crashing into the World Trade Center, and then to learn that a plane had also crashed in the Pentagon, and to learn about the crash in the fields in Pennsylvania. But the most devastating news for the people of Hawaii was to learn the names of all of the individuals from Hawaii who were lost in all of the four sites.

The two who lost their lives at Pennsylvania in United Flight 93 are especially endeared to all of us here in the Capitol because there is nothing to discount the basis of information that we have that that plane, had it not been overtaken by those passengers, was destined to Washington, D.C. and quite probably the Capitol building itself. We would not be standing here today, we would not be part of this great legislative body if the people on Flight 93 had not taken the heroic stand that they did.

So I stand here on behalf of all of the grateful people of this Capitol and its vicinity and of the government here in Washington, D.C. to especially pay tribute to those who lost their lives in Flight 93, United, and especially to remember the two women from Hawaii whose beloved ones, their friends and relatives, have all already had memorial services for them. They were distinguished in the lives and careers they had. So I am here today to express on behalf of their families and all of their friends our gratitude and our everlasting love and devotion in their memory.

Mr. MICA. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from California (Mr. ROHRABACHER).

Mr. ROHRABACHER. Mr. Speaker, I rise in strong support of this resolution honoring the crew and passengers of United Flight 93. But, Mr. Speaker, my colleagues must be aware that as we honor these passengers we are honoring them for disregarding government policy. That government policy related to how one deals with a hijacking situation. That government policy mandated that we have full cooperation of the passengers and the crew with any potential hijackers.

Amazingly, the FAA has still not changed that policy, despite the obvious changes in circumstance that make this policy ridiculous.

Of all the precautions that we have been taking or could be taking to make sure that there are not any more hijackings, there are only really two

things that matter: to secure the aircraft cockpits so they cannot be broken into; and, most importantly, to make sure that the crew and passengers never again cooperate with hijackers, and never open the door to that cockpit to any hijacker, no matter what may be happening in the cabin.

Nothing else, not the banning of tasers or knives or even strip searches, is going to make air travel any safer than that.

As we honor these people who gave their lives and were so brave and courageous, let us admit that perhaps we have made some mistakes in Congress in dealing with this crisis. The fact is that we have moved forward in response to these horror stories on September 11 and the bravery on Flight 93 and the other planes that were hijacked, and we have put in place policies that may be backfiring right now.

Instead of saving the industry, we may be killing the airline industry, and that is the very last thing we should do to honor these brave people on Flight 93, who more than any other fellow Americans stand for freedom to travel. Instead of saving our airline industry, we have people who are being now so inconvenienced that they are giving up airline travel. This makes no sense at all. We should today, as we honor these heroes of Flight 93, reexamine what we put in place so our airlines can serve people.

As the gentleman from California (Mr. FILNER) mentioned to me a few moments ago, we are losing more passengers to this incredible, nonsensical way that we are hindering people from getting on the plane to the inconvenience that we have created that is not making travel any safer than we are losing passengers for fear of terrorism.

So today, let us honor these people who fought so bravely, these Americans on Flight 93, United 93; and let us say that what they were fighting for was the freedom to travel. Let us back up the airline industry. Let us not do something that just makes us feel good or makes the American people feel good; but instead, let us put in practice some of the changes in policy needed to make airline transportation safer, but is not some sort of show that makes things more inconvenient, thus killing the airlines.

□ 1230

Mr. LIPINSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania (Mr. MASCARA).

Mr. MASCARA. Mr. Speaker, I thank the gentleman from Illinois (Mr. LIPINSKI) for yielding me the time.

Mr. Speaker, I rise to honor American heroes. Since September 11 our Nation has learned a lot about heroes. Not surprisingly, they are everywhere across this great country of ours. Some of the first heroes to stand up for

America on the tragic day were the men and women of United Flight 93.

When the 44 men and women aboard Flight 93 discovered what was intended for that plane, they united to make the ultimate sacrifice for their Nation. Their valor thwarted either an attack on this building or on the Nation's White House. These brave passengers and crew members knew that if they did not act the terrorists would strike another blow against the country they love.

Flight 93 went down just outside of my district. That is now hallowed ground. Family and friends of the passengers and crew of Flight 93 visit that site to continue to remember their loved ones.

This Congress should make sure that their brave actions will never be forgotten by their family and friends and every citizen of this Nation for generations to come. This Congress should show our Nation's gratitude by passing this resolution and erect a memorial plaque on the Capitol grounds in honor of the men and women of Flight 93. These citizens were true American heroes.

Mr. MICA. Mr. Speaker, may I inquire as to the time remaining?

The SPEAKER pro tempore (Mr. SHIMKUS). The gentleman from Florida (Mr. MICA) has 8 minutes remaining. The gentleman from Illinois (Mr. LIPINSKI) has 15 minutes remaining.

Mr. MICA. Mr. Speaker, I am pleased to yield 3½ minutes to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I thank my good friend, the gentleman from Florida (Mr. MICA), for yielding me the time.

Mr. Speaker, I rise today in very strong support of this resolution to honor the heroes on Flight 93 who undoubtedly gave their lives so that other people, perhaps people in this building, perhaps all of us, would be able to live.

Words, it seems to me, seem inadequate to express the deep emotions that we feel for the loss suffered by the surviving family members of those who perished on September 11. We offer our sincere condolences, and we pray that God may supernaturally intervene with healing, comfort, and peace for them, especially during this holiday season.

Mr. Speaker, we will not forget the action of those on Flight 93. Like I said, they probably saved the lives of many people here in Washington. Capitol Hill was a very busy morning on September 11. Many congressional hearings were taking place. As a matter of fact, as chairman of the Committee on Veterans Affairs, at 10 o'clock I was convening a hearing with the American Legion, and there were several hundred legionnaires in attendance at that hearing.

On the Senate side, the First Lady was preparing to testify on a hearing on early childhood development.

Their lives were saved, the lives of all of the employees here in the Capitol were probably saved from a horror because of their very heroic action.

The planned destruction of buildings was prevented. The Capitol, the White House, the many monuments, we are not sure what the final destination was. There is a great deal of conjecture, but the odds were that they were coming here.

Our Nation, Mr. Speaker, owes these passengers and crew an enormous debt of gratitude, and, again, their sacrifice will be remembered for many, many years to come.

I would like to just point out that there were at least seven people who lived in or near my own central New Jersey district who were on that flight. Some of the family members and friends have contacted my office, and we have tried to work on their behalf. Their names are in the resolution, but out of respect and gratitude I would like to read their names again: Flight Attendant Lorraine Bay; Todd Beamer, who was in the district just north of me, in the gentleman from New Jersey's (Mr. HOLT) district; Patrick Driscoll; Edward Felt; Jeremy Glick; Richard Guadagno. Donald and Jean Peterson were also on board that flight.

And one final point. Earlier the gentleman from California (Mr. ROHRABACHER) mentioned the fact that the crews, especially the pilots, were admonished, more than admonished, they were told by the FAA that they were to cooperate if there was a hijacking and go to wherever it is the hijackers wanted them to go. My own brother is an airline pilot. He is a 757 captain with a major airline, and he, too, has told me how obnoxious it is that that was the policy, take them to Cuba, take them to Tripoli, take them to where it is they want to go because they have got to put the safety of the passengers first. It is obnoxious now more than ever because we know that there are different designs on those planes being carried out.

I just want to make it very clear, it is my sense and a sense that this will not happen, that whether it be the crew or whether it be the passengers—or not—that we will never see another airliner turned into a cruise missile again because there will be action taken; and, again, Flight 93 has set a precedent that will live on forever, that people will not stand idly by when they know that they are going to be part of a terrorist action unwittingly, as were the other flights.

Again, I want to commend the maker of the resolution, the gentleman from Kentucky (Mr. FLETCHER), my good friend, for offering it.

Mr. LIPINSKI. Mr. Speaker, I yield myself the balance of my time.

In conclusion, I once again would like to salute the crew and the passengers of United Airlines Flight 93 and

express my personal condolences to all their family members.

I would also, though, like to refer to some references that an earlier speaker made here. Since this tragedy on September 11, the United States Government has voted \$5 billion to airlines in this country. We have voted \$10 billion in loan guarantees to airlines in this country, and we have passed an extremely strong aviation security bill in this country. I believe all of those efforts are to improve not only the safety and security of American aviation but to get people back into the air, get people back flying.

I also believe that in the security bill that we passed we spent a considerable amount of time talking about the training on terrorist attacks that crews should receive. So I think that since this horrendous terrorist attack on September 11 we in the House and the Senate and the executive branch of government have done a great, great deal to improve aviation security and safety and, also, as I said earlier, to get Americans back into the air.

Let us hope and pray and work towards the day when American aviation will be perfectly secure and no one will have any hesitation about flying.

Once again, my sincere condolences to the family of United Flight 93, the passengers, the crew; and, once again, I salute those courageous American heroes who tried to retake that flight and perished in their attempt. I thank them.

Mr. MICA. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, it is indeed fitting that we honor and recognize the heroic efforts of the passengers and crew of Flight 93. This memorial resolution and the proposed plaque are indeed fitting, again, for those heroic actions.

I must say, Mr. Speaker, that since September 11 many of us have been concerned about the welfare of some of those families left behind from Flight 93. My wife Pat and other congressional spouses and some in Congress have also been involved in trying to meet some of the financial needs of the families. Some of them were children left behind. The resolution and plaque are a great tribute from Congress, but these families, particularly in the time of holidays and their own personal needs, are in dire straits.

Again, they have not gotten the attention of the victims of the World Trade Center or the Pentagon, but, nonetheless, they were great heroes, and they are now in need.

I urge my colleagues and others to contact a Web site, www.capitolheroes.org. That is www.capitolheroes.org, to aid those families. So today we fittingly recognize those families with this resolution and those heroes with this plaque, but we also try to remember those left behind as survivors, and not only this

resolution but our thoughts and prayers go out to the survivors and family left behind.

Mrs. ROUKEMA. Mr. Speaker, I rise today with a heavy heart in support of this resolution that honors the great bravery, courage, and patriotism of the crew and passengers aboard United Airlines Flight No. 93, including Jeremy Glick of West Milford, NJ. Though we may never know what took place in the final minutes on that flight, we can be certain that because of Jeremy's actions, along with other passengers and crew members, lives were saved. Not only do the passengers and crew of Flight No. 93 deserve the highest of honors, but they deserve our immense gratitude.

One of my constituents, Jeremy Glick, was among the 37 passengers and 7 crew members on board United Airlines Flight No. 93 that on September 11, 2001, departed from Newark International Airport at 8:01 a.m., on its scheduled route to San Francisco, CA. Shortly after departure, the plane was hijacked by terrorists. It is clear from the evidence that after learning that other hijacked planes had been used to attack the World Trade Center in New York City, Jeremy and others onboard United Airlines Flight No. 93 decided to fight the terrorists for control of the plane. Their brave defiance appears to have caused United Flight No. 93 to crash prematurely, potentially saving hundreds or thousands of lives. The White House or the Capitol clearly could have been the intended target of the terrorists.

I would like this Chamber to know about one of the men who saved lives, possibly lives in this House, on September 11. Jeremy Glick was a devoted family man. His wife Lyzbeth had recently given birth to their daughter Emerson. Anyone who has seen the picture of Jeremy holding his baby daughter can clearly see the deep love that was in his heart.

Jeremy was a man who loved life. Lyz, his brother Jared, or any of his friends could tell you endless stories that end in laughter. Ironically, Jeremy and his buddies dressed up like their favorite super heroes a couple of weeks ago. Jeremy dressed up as the Green Lantern. Little would we know that on September 11, 2001, Jeremy became a super hero.

Soon after the terrorists took over the plane, Jeremy called his wife on his cell phone. Jeremy told his family about the terrorists and the location of the plane. Jeremy's family relayed the information to the police over another phone line. After Jeremy learned that other terrorists crashed planes into the World Trade Center he left his phone for a while and returned to say that the men voted to attack the terrorists. He left the phone and said he would be back—he never came back on the line.

It is not hard to imagine Jeremy deciding to join with other passengers to fight the terrorists. He was well over six feet and was a college judo champion. It was reported that Jeremy faced the terrorists armed only with a plastic knife from an airline meal. I believe that Jeremy did not even need the plastic knife because he had courage and bravery on his side when he fought with the cowards who commandeered the plane.

Jeremy's last words to his wife were, "Lyz, I need you to be happy." It should be the hope and prayer of all Americans that Lyz will be happy. Lyz said after the crash, "I think

God had a larger purpose for him, He was supposed to fly out the night before, but couldn't. I had Emmy one month early, so Jeremy got to see her. You can't tell me God isn't at work there." I believe God is at work with the Glicks.

One thing that Lyz can definitely be, as we all are, is proud. The incredible courage and bravery that Jeremy showed in the face of certain danger is an inspiration to us all. When Jeremy died, he did it on his own terms—fighting against evil, with a brave heart, and boundless courage to sacrifice himself so others could live. For this reason, I have introduced a resolution urging the Congress to grant Jeremy the Congressional Gold Medal. On behalf of our country, let us recognize this man who served us in one of our most horrific hours. Jeremy Glick truly deserves the highest of our Nation's honors.

Now our Nation faces a long and hard struggle to rid the world of the evil that took Jeremy's and so many others lives on September 11. Many thousands of our men and women in uniform are meeting that challenge. Jeremy—though not expecting to—became one of the first "soldiers" in this crusade. I will forever remember and honor Jeremy as a true American superhero.

Mr. Speaker, I urge passage of this measure.

God bless Jeremy Glick and God bless America.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. MICA) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 232.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. MICA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

TODD BEAMER POST OFFICE BUILDING

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3248) to designate the facility of the United States Postal Service located at 65 North Main Street in Cranbury, New Jersey, as the "Todd Beamer Post Office Building".

The Clerk read as follows:

H.R. 3248

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TODD BEAMER POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 65 North Main Street in Cranbury, New Jersey, shall be known and designated as the "Todd Beamer Post Office Building".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the Todd Beamer Post Office Building.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Virginia (Mrs. JO ANN DAVIS) and the gentleman from Illinois (Mr. DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from Virginia (Mrs. JO ANN DAVIS).

GENERAL LEAVE

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 3248.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Virginia?

There was no objection.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 3248 introduced by our distinguished colleague, the gentleman from New Jersey (Mr. HOLT). This measure designates the facility of the United States Postal Service located at 65 North Main Street in Cranbury, New Jersey, as the "Todd Beamer Post Office Building". Members of the entire House delegation from the State of New Jersey are cosponsors of this legislation.

Mr. Speaker, many heroes emerged on September 11, from firefighters and policemen to military personnel at the Pentagon to citizens such as Todd Beamer. Todd Beamer, a resident of Cranbury, was one of the passengers on the hijacked United Flight 93 who gave their lives fighting the hijackers and denying them their deadly mission on September 11.

Mr. Beamer was a husband, father, a businessman and a citizen. He is survived by his wife, Lisa, and their two children and a third child who is expected in about 2 weeks. His courageous acts and the acts of all of the passengers on Flight 93 are an inspiration to all Americans. Their acts saved countless lives.

Mr. Speaker, I urge adoption of H.R. 3248.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a member of the Committee on Government Reform, I am pleased to join my colleague, the gentlewoman from Virginia (Mrs. JO ANN DAVIS), in consideration of H.R. 3248, legislation naming a post office in Cranbury, New Jersey, after Todd Beamer.

H.R. 3248 was introduced by the gentleman from New Jersey (Mr. HOLT) on

November 7, 2001. I would like to begin my remarks by thanking the gentleman from New Jersey (Mr. HOLT) for continuing the tradition of naming post offices after individuals of accomplishment and people who have given up much to the betterment of their community and of their Nation.

Naming a postal facility after Todd Beamer sets a very high standard indeed; for Todd Beamer not only accomplished much, he gave his life in defense of our country.

The consideration of H.R. 3248 on the heels of H. Con. Res. 232 is important, important because we in the Congress express our appreciation to the passengers and crew of the hijacked United Airlines Flight 93 for diverting the use of that aircraft from its intended target, Washington, D.C., possibly headed for the White House or the Nation's Capitol. As the resolution states, we in the Congress extend our condolences to the victims, families and friends. We also place a memorial plaque honoring the victims of Flight 93 on the Capitol grounds.

□ 1245

Acknowledging the heroic struggle aboard Flight 93 leads us to the consideration of H.R. 324, and the fateful telephone call from Todd Beamer to a telephone operator. Todd Beamer, along with other passengers on the plane, organized resistance to the hijacking after learning the fate of three planes, two of which flew into the World Trade Center and one which hit the Pentagon.

Mr. Speaker, on September 11, Flight 93 took off from Newark, New Jersey, bound for San Francisco, with Captain Jason Dahl in the pilot's seat. Along the way, it suddenly and unexpectedly detoured, heading for Washington, D.C.

Before I conclude my comments, I would like to express my sincere condolences to the widow of Todd Beamer. She has handled the loss of her husband extremely well. But in addition, Lisa Beamer has become a real activist, organizing assistance for victims and the families of those who were victimized. She is in Washington this day, trying to generate support for the families of those who lost loved ones. Her children and family can take great comfort in knowing that their father and son was a hero and a master of his fate. His actions have left behind a great legacy, a legacy of patriotism, a legacy of love, a legacy of courage, and a legacy of leadership. Mr. Speaker, I often define leadership as the ability to do what needs to be done, but to do it first.

In closing, I am proud to support H.R. 3248. I thank the chairman of the Committee on Government Reform, the gentleman from Indiana (Mr. BURTON), and the ranking minority member, the gentleman from California (Mr. WAXMAN), for moving quickly to schedule

this bill. I also again express my appreciation to my colleague, the gentleman from New Jersey (Mr. HOLT), for introducing this legislation.

In what has been quoted as the final immortal words of Todd Beamer, I close, Mr. Speaker, by asking America, "Are you ready? Let's roll." I urge the swift passage of H.R. 3248.

Mr. Speaker, I reserve the balance of my time.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOLT), who is the sponsor of this legislation.

Mr. HOLT. Mr. Speaker, I thank my colleague and friend from Illinois for yielding me this time, and I rise to speak in favor of H.R. 3248, legislation to designate the United States Post Office in Cranbury, in my home district, as the Todd Beamer Post Office.

I too want to express my appreciation to the chairman of the committee, the gentleman from Indiana (Mr. BURTON), and the ranking member, the gentleman from California (Mr. WAXMAN), as well as the majority leader, the gentleman from Texas (Mr. ARMEY), for allowing this bill to come to the floor; and I thank my colleagues for their eloquent remarks.

This is, I think, very appropriate. America has found a hero in Todd Beamer, one of the passengers on hijacked Flight 93. We all mourn the loss of Todd Beamer and the others on that flight; and our hearts and prayers go out to Lisa Beamer, who is here with us in the gallery now, and to their two fine children, whom I have observed, and to all the other families of people on that plane. We hold up the memory of Mr. Beamer as one who represents what is good about America. All of America knows of his reciting the 23rd Psalm, the Lord's Prayer, and his words, "Let's roll."

At a time like this, we seek to draw lessons for us Americans who are left behind after September 11. For a couple of centuries observers from around the world, from Alexis de Toqueville to Winston Churchill, have spoken about the marvelous ability of Americans to rise to meet a challenging situation, the ability of individual Americans to step from their ordinary lives to do extraordinary things. You will notice I do not say ordinary Americans, because, in fact, that is the essence of what makes this country. There are no ordinary Americans. There are Americans who will, at one time or another, rise to do extraordinary things.

I attended a memorial service for Todd at the church in Plainsboro, New Jersey, where the Beamer family worships. And from the remembrances delivered lovingly by friends and family, I learned a lot about the character of

this national hero. He was an outstanding athlete who led and inspired his athletes and who said he always seemed to somehow find a way to come up with a critical run. He was a fine businessman who stood out in a national company. He was an involved and loving father of David, 3 years old, and 1-year-old Andrew, and was looking forward to the upcoming birth of his third child. But especially, especially I learned that he was a man of deep religious faith, a faith that allowed him to look past death to act so courageously on board Flight 93.

We believe that the band of passengers who fought the hijackers, Todd's father calls them freedom fighters, saved hundreds, perhaps thousands of lives that would have been taken if that plane had made its fiery descent into the hijackers' intended target. And it is worth noting that none of those people whose lives were saved know who they are. We will never know. But all Americans can be grateful.

Ours is a diverse country, with a rich religious tradition, a very diverse religious tradition. And September 11 was a particularly tough day for Muslims. They find that day hard because there were some people who wanted to say that those were Muslims who hijacked the plane. But good Muslims assure me that no follower of Mohammed would have done that. Because it is written not only in the Judeo-Christian tradition but also in the Koran. In the Talmud it says, "Whoever saves a single life is honored as though he saved an entire world." And in the Koran, "If anyone saved a life, it would be as though he saved the life of the whole people."

The memory of the people on board Flight 93 reminds us that this is not the last time that America will need heroes. Andrew and David can grow up knowing that their father acted heroically. They can also see it in the way their mother has borne this hard time. The survival of American ideals, though, beyond the immediate Beamer family, depends day in and day out on ordinary Americans stepping out of their ordinary lives to do extraordinary things, courageous things. It is appropriate, I think, that people will be able to find inspiration as they look at the Federal post office in Cranbury and pause for a moment to reflect on the essence of America, what we can extract from our diversity, and also to reflect on the meaning of religious faith in our lives.

It is only fitting that a memorial for Todd be established in Cranbury, where he and his family live.

First settled in 1697, the town of Cranbury is one of the oldest towns in New Jersey. It derived its name from the brook on whose banks it had its beginning. Over 80 soldiers from the Revolutionary War are buried in the town. While it today is in close proximity to

some of our Nation's largest metropolitan areas, Cranbury retains its unique village character.

The opportunity comes to every American to do courageous things. I want to repeat that. To every American. Now, most of us will never have the chance, thank God, to have to face down an armed hijacker. But many will have the opportunity in their neighborhoods or among their friends to face down bigotry, intolerance, or injustice. The memory of people like Todd Beamer helps us meet those challenges.

This legislation is one small honor for Todd Beamer and for all the heroes on Flight 93 and elsewhere around the country on September 11. It is not the last time America will need heroes.

I urge my colleagues to join me in passing this bill, and I also urge that we honor the survivors and families left after the atrocities through appropriate compensation and tax relief.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Although the Chair understands the gentleman's sentiment, the Chair must remind all Members not to introduce or bring to the attention of the House any occupant in the gallery.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I am pleased to yield 3½ minutes to my distinguished colleague, the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I thank the gentlewoman from Virginia for yielding me this time.

Let me just say, Mr. Speaker, I rise in very strong support of H.R. 3248, to designate the United States Postal Service facility in Cranbury as the Todd Beamer Post Office Building, and want to thank the gentleman from New Jersey (Mr. HOLT) for sponsoring the legislation that is before us today.

Mr. Speaker, when Congress names particular facilities in honor of someone, we do it because they have made an outstanding contribution to society. I can think of no one who deserves that honor more than Todd Beamer. The accounts of his heroism aboard Flight 93 fill us with awe and gratitude and inspire us. And by all accounts, it was Todd's faith in the Lord that inspired him to act with such decisiveness and tenacity and with such courage.

Todd's deeds and the actions of his fellow passengers aboard Flight 93 have become powerfully etched into the psyche of America itself. Flight 93 has become a symbol of the American spirit, the spirit of courage and selfless sacrifice, of standing up to cowards who would kill in the middle of the night or by using aircraft as cruise missiles.

When faced with the ultimate test of character, Todd Beamer did not flinch for one moment. He took bold action to stop an act of terrorism in progress. On his last phone call from the aircraft, Todd told Lisa Jefferson, the GTE air

phone supervisor working out of the Illinois facility, that he and his other passengers aboard Flight 93 were planning to overpower the hijackers and to stop their suicide attack. Miss Jefferson cautioned him to consider carefully what he was saying: "Are you sure that that is what you want to do, Todd?" Todd's response: "It's what we have to do."

Mr. Speaker, how often do we hear those words—this is something I have to do—the notion that someone is acting out of a moral imperative is astonishing in this day and age. Well, Todd did it and did it with great distinction and courage.

Many in America before September 11 had become jaded about the notion of selfless sacrifice, Mr. Speaker, of doing what is right even when you know it may cost you your very life. We know from the Scriptures that our Lord Jesus Christ said, "There is no greater love than he who lays down his life for his brother or for his sister," and that is exactly what Todd Beamer has done. Surely he has, is and will be greatly blessed in Heaven for his sacrifice.

Mr. Speaker, the cowardly terrorists counted on both the element of surprise and on the element of intimidation to achieve their awful end, but they did not count on meeting face to face with the likes of Todd Beamer. Todd Beamer was an extraordinary man on what should have been an ordinary flight. And when faced with a horrific set of circumstances, Todd stepped up to the plate and he did what had to be done. And he never, not for a moment, by all accounts, even hesitated.

Instead, Todd drew his courage and strength from his faith. He told Lisa Jefferson, "I don't think we're going to get out of this thing. I'm going to have to go out on faith." Mr. Speaker, his last words, as we all know, and as President Bush has quoted, was "Let's roll." And those words, I think, have mobilized and motivated and inspired all Americans in our current fight in Afghanistan. "Let's roll." Let's stop these terrorists.

Let me finally remind Members of Todd's embrace of Psalm 23, which surely was in Todd's heart in those final moments, where it is said by King David, "The Lord is my shepherd; I shall not want. He maketh me to lie down in green pastures; he leadeth me beside the still waters. He restoreth my soul; he leadeth me in the paths of righteousness for His name's sake. Yea, though I walk through the valley of the shadow of death, I fear no evil; for thou art with me; thy rod and staff they comfort me."

A post office memorializing Todd Beamer is the least we in Congress can do to honor his supreme sacrifice. He was a great man; and we honor his widow Lisa—a strong woman in her own right and his family.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself the balance of my time.

Somehow or another, heroes arise in times of great need. Heroes arise in times of great need. At a time of crisis and great need, Todd Beamer and his fellow passengers rose up. And because they rose up, we have the ability to continue to stand up on this floor and protect the rights of Americans and of people all over the world.

So we take this moment not only to designate a post office in honor of Todd Beamer, but we say, "Thank you, Todd. Thank you, passengers and crew of Flight 93."

Mr. Speaker, I yield back the balance of my time.

□ 1300

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. TANCREDO).

Mr. TANCREDO. Mr. Speaker, every time we hear of the deeds of the folks like Todd Beamer on Flight 93, we are left with the kind of introspection that can be very challenging. We have to say to ourselves, what would I have done? How would I have reacted under similar circumstances? We all want to think that we would have done what Mr. Beamer and others did. We can only hope that is the case, but we can also only hope that we will not have to face that challenge.

But if we do, if something like that ever comes up again, the fact is that any American who has read the story, becomes acquainted with the actions of the people on Flight 93, we can sincerely believe that the possibility for us to do the right thing under those circumstances, to do what they did, is greater because we know what they did, and because of what it does for us internally, because of the way it changes us, because of the courage, perhaps, that they have given us.

Mr. Speaker, we also are able to put faces together with names now of people who were on the plane. I take this opportunity also to think about and to speak for just a moment about Captain Jason Dahl. Mr. Dahl chose to be on the plane that day. He scheduled himself for Flight 93. From everything we have learned about Mr. Dahl, it is certainly understandable and it is quite probable that it was his decision even to take the plane into the ground rather than into any other edifice.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I commend the gentleman from New Jersey (Mr. HOLT) for introducing this legislation and for working so hard to ensure its passage. I encourage all Members to support this resolution. Mr. Speaker, to quote Todd Beamer, "Let's roll."

Mr. TANCREDO. Mr. Speaker, I rise in support of H.R. 3248 and wish to fully express my gratitude to the crew of United Flight 93, and

especially its captain, Jason M. Dahl. It was with immense sadness that I learned that the Dahl family and indeed all of Colorado had been robbed on September 11th of a good man and a good father. Mr. Dahl's family, to paraphrase President Lincoln, must feel enormous pride for having laid such a costly sacrifice upon the altar of freedom.

According to a friend, Dahl learned to fly before he learned to drive. A neighbor remembered Dahl's football and baseball games in the street with neighborhood children and his commitment to his family and his community. Having read the statements of those who eulogized him, I cannot help but conclude that the gentleman flying that plane was one of America's best—a great father and husband alike. Since September 11th, America has rediscovered the importance of family, and turned to family members for comfort and understanding. It is no small tragedy that the Dahl family does not have this luxury, having been left incomplete on September 11th.

Most of us saw evil on that day watching the pictures of the two planes collide with the World Trade Towers in New York City. Jason Dahl almost surely saw evil in a different form. He must have seen it in the faces of the hijackers and known that it was in their hearts.

The loss of Mr. Dahl and all of the passengers aboard Flight 93 will not be forgotten—certainly not by this body. This morning, we passed a resolution calling for a plaque to be placed on the grounds of the Capitol memorializing their deaths. I would suggest that their memory will go much farther. The fact that this great building and its dome—two irreplaceable symbols of American democracy—still stand today will always be a living memorial to their sacrifice.

My prayers, Mr. Speaker, are with all of the innocent civilians who died aboard that plane, and especially Jason Dahl and his family.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SHIMKUS). The question is on the motion offered by the gentlewoman from Virginia (Mrs. JO ANN DAVIS) that the House suspend the rules and pass the bill, H.R. 3248.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

EXPRESSING SOLIDARITY WITH ISRAEL IN THE FIGHT AGAINST TERRORISM

Mr. HYDE. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 280) expressing solidarity with Israel in the fight against terrorism.

The Clerk read as follows:

H. CON. RES. 280

Whereas 26 innocent people in Israel were murdered in cold blood and at least 175 wounded by Palestinian terrorists, all within 14 hours, during the weekend of December 1–2, 2001;

Whereas this is the equivalent, on a proportional basis, of 1,200 American deaths and 8,000 wounded;

Whereas United States Middle East envoy Anthony Zinni has labeled the terrorism of December 1-2, 2001, "the deepest evil one can imagine";

Whereas this bloody weekend is part of an ongoing terror campaign often targeted at youth and families and perpetrated by the Islamic fundamentalist groups Hamas and Palestinian Islamic Jihad and other Palestinian terrorist groups;

Whereas President Bush declared at a joint session of Congress on September 20, 2001, that "Every nation, in every region, now has a decision to make. Either you are with us, or you are with the terrorists. From this day forward, any nation that continues to harbor or support terrorism will be regarded by the United States as a hostile regime"; and

Whereas President Bush declared on December 2, 2001, that "Chairman Arafat must do everything in his power to find those who murdered innocent Israelis and bring them to justice"; Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) condemns the vicious terrorist attacks resulting in the death of 26 and the wounding of at least 175 innocent people in Israel within 14 hours during December 1-2, 2001, and extends its deepest sympathies to the Israeli nation and to the families of the victims;

(2) expresses outrage at the ongoing Palestinian terrorist campaign and insists that the Palestinian Authority take all steps necessary to end it;

(3) demands, specifically, that the Palestinian Authority take action immediately to—

(A) destroy the infrastructure of Palestinian terrorist groups;

(B) pursue and arrest terrorists whose incarceration has been called for by Israel; and

(C) either—

(i) prosecute such terrorists, provide convicted terrorists with the stiffest possible punishment, and ensure that those convicted remain in custody for the full duration of their sentences; or

(ii) render all arrested terrorists to the Government of Israel for prosecution;

(4) urges the President to take any and all necessary steps to ensure that the Palestinian Authority takes the actions described in paragraph (3), including, if necessary, suspending all relations with Yasir Arafat and the Palestinian Authority;

(5) further urges the President to insist that all countries harboring, materially supporting, or acquiescing in the private support of Palestinian terrorist groups end all such support, dismantle the infrastructure of such groups, and bring all terrorists within their borders to justice;

(6) commends the President for his strong leadership against international terrorism, his forthright response to this most recent outrage, and his swift action to freeze additional sources of terrorist funds; and

(7) expresses the solidarity of the United States with Israel in our common struggle against the scourge of terrorism.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

Mr. DINGELL. Mr. Speaker, I rise in opposition to H. Con. Res. 280.

The SPEAKER pro tempore. Is the gentleman from California (Mr. LAN-

TOS) in opposition to the motion to suspend the rules?

Mr. LANTOS. Mr. Speaker, I strongly support the resolution.

The SPEAKER pro tempore. As a Member opposed to the motion, the gentleman from Michigan (Mr. DINGELL) may control the 20 minutes reserved for opposition.

Mr. HYDE. Mr. Speaker, I ask unanimous consent to divide my time with the gentleman from California (Mr. LANTOS).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. LANTOS. Mr. Speaker, I ask unanimous consent that each side be given an additional 10 minutes in view of the fact that we have a number of speakers.

Mr. DINGELL. Mr. Speaker, parliamentary inquiry. Each side, I would like to know what that means?

The SPEAKER pro tempore. Does the gentleman from Michigan object?

Mr. DINGELL. Mr. Speaker, I do not. I simply reserve the right. That means 10 minutes more for those supporting the motion and 10 minutes more for the opposition?

The SPEAKER pro tempore. The Chair would state that it would make the motion debatable for an hour evenly divided.

Mr. DINGELL. Mr. Speaker, I do not object to that.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. HYDE) will control 15 minutes, the gentleman from California (Mr. LANTOS) will control 15 minutes, and the gentleman from Michigan (Mr. DINGELL) will control 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. HYDE).

GENERAL LEAVE

Mr. HYDE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H. Con. Res. 280, the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HYDE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, yesterday the House leadership would have met with Israeli Prime Minister Sharon in the United States Capitol to discuss the status of the peace process. Instead, he had to return home to Israel, and we are here on the floor of the House joining with the people of Israel in their grief over the losses from the horrific terrorist attack of the past weekend.

As Israel buries its dead, comforts its bereaved and begins to heal its wounded, we send through this resolution a signal of sincere condolence and solidarity with the people and the government of the State of Israel.

The American people also join in President Bush's forthright expression of support for Israel's right of self-defense. Mr. Speaker, yesterday the President took additional actions to cut off funding for terrorists, funds which originated here in the United States. Hamas is now understood to be a terrorist organization of global reach, even if that reach is mainly from Iran, Syria, or Lebanon into Israel.

This resolution calls on Palestinian Authority Chairman Arafat to do what the President's spokesman said he could have done in the past, to really crack down on those who would deliberately murder women, children and men as they go about their business on the streets.

We ask the President to act sharply against the Palestinian Authority if it does not heed our request. This is not an action we should rush to take, because the Palestinian people have chosen Chairman Arafat as their leader, and it is important that we maintain a relationship with him if at all possible. But as we do not provide aid to the Palestinian Authority itself, we cannot cut off assistance as a way of showing displeasure. A customary way of showing extreme displeasure with a foreign authority is to cut off our diplomatic relationship and compel some or all of their envoys to return home.

It seems clear that the actions or inaction of the Palestinian Authority to date merit the President's taking all appropriate actions, which could include the cutting off of our quasi-diplomatic relationship should we not see some serious action on their part.

Mr. Speaker, I believe that Chairman Arafat has a historic role to play. He needs to lead his people by stopping the violence and beginning the negotiating process. He needs to do this not because we asked him to, not because of Israel's interest, but the interests of his own people. He needs to clearly convey to his people that the way of violence is not the way forward.

I sincerely hope he chooses the path of peace, takes risks for peace, and finds a way out of his present dilemma. The United States and its friends can and should do all it can to help him, but the choice ultimately is one that he and his colleagues must make and take responsibility for.

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield myself 7 minutes.

Mr. Speaker, I rise in regretful opposition to the resolution. It is clear we have an opportunity to pass a resolution which will contribute in a significant way to the peace process. It is

very clear that we have a duty to oppose terrorism, which I have always done and which I continue to do. It is also equally clear that the United States has a long-standing commitment to the freedom and independence to the State of Israel, and I strongly support that undertaking.

But I would note that here the resolution contributes very little to the accomplishment of those purposes. What this resolution does is to essentially set up a situation where the United States appears and in fact does and will be viewed by people in the area as having taken sides. The interests of the United States here are to bring to a halt terrorism and to create a lasting viable negotiated peace. That is best done by attacking the root causes of terrorism, not the least of which are the thousands or hundreds of thousands of Palestinians and others feel themselves to be unfairly, badly, and improperly treated. Their homes are destroyed. Their orchards are destroyed. Their lands are settled in defiance of their wishes their people are driven to poverty and killed. International agreements which they have made in their names are not being honored.

The duty of the United States here is a very simple one, and that is to work for peace in the Middle East. Our single most important concern in that area is peace: peace for Israel, security for Israel, peace and security for the Palestinians, an end to the fighting, a termination of terrorism. How is that done? Is it done by shooting up Arafat's helicopters? Is it done by terror bombings of people who are committing suicide to kill Israelis? No. Only one way leads to this course, the strongest possible leadership by the United States functioning as an impartial honest broker between people who find little reason not to hate each other.

Mr. Speaker, this will be done by a long process of negotiation in which the parties must come together to negotiate their differences under the strong leadership and guidance of the United States. This resolution accomplishes nothing in that end. It does nothing to move forward the peace process which came so close under the leadership of President Clinton during the last days of his administration. It does nothing to strengthen our friends in the area, the Governments of Egypt and Jordan. And it does nothing to make it possible for Mr. Arafat to provide the necessary leadership towards meaningful discussions. Rather it, and other actions leave Arafat weaker and less capable of effective participation in the peace process.

The question Members have to ask is: How is it that Arafat is to be better disposed to move forward towards peace when his people are angry and when his helicopters are bombed and when his headquarters is threatened? The answer is, not at all. But, it goes

beyond this. How is the peace process, or how are our concerns about peace in the area moved forward by weakening Arafat and by making him appear to be incapable of leading the Palestinian people? Or making the Palestinian people less willing to follow his leadership in the peace process?

Mr. Speaker, I hold no brief here for any side, none for Mr. Arafat, none for the Israelis or anybody else. I think the United States has to look to one thing. Let us look to our principal interest. Our principal interest is peace in the area. How is that to be achieved? Only in one way and no other. There is only one country in the world that has the prestige and the ability to do that and the military capability to bring that about. When it gets down to the point, we, and we alone, acting as leader of other Nations also dedicated to peace have the capacity to do what has to be done, to bring about real meaningful and final negotiations to settle the problems.

The issue here is how we bring the parties forward to begin a long and difficult a process. We must use the most intense pressure of the United States to abate and to terminate the terrible events which we are seeing in Israel, in Palestine, in the occupied territories in the Middle East. Negotiations between the parties are the only way.

I think Members can anticipate that the terrible events which occurred the other day in Israel with scores of people injured and killed are going to be replicated again and again. Angry, frustrated, bitter people are going to use that method because that is the only method that is available to the weak.

□ 1315

Again how are we going to bring the terrible events in the Middle East to a halt? By seeing to it that the problems that exist between the Israelis and the Palestinians and the others in the area are abated by negotiations between them. Is this going to be easy? Of course not. But is there an alternative way? The answer is there is no other way that that could be accomplished.

Certainly the resolution which is before us offered, by good friends of mine, for whom I have great respect, with, I am sure, the best of intentions, does not carry out the mechanisms for bringing peace and it does not offer us the prospects of seeing progress going forward. Nor does it offer this Nation the opportunity to know that we have done something which will abate the root causes of terrorism in that world which are causing deaths in the United States as well as Israel, Palestine, and other places. We have committed ourselves to a massive effort in Afghanistan, which has caused us to spend billions of dollars and to put at risk our military personnel.

I support that effort, and each year I support massive funding to help

Israelis to maintain their statehood and to deal with their security problems.

This resolution is counterproductive. It does not move us forward towards world peace. It does not move us forward towards a resolution of the controversy of the differences which are major causes of terrorism, heartache, death and suffering, for Israelis and for Arabs alike, and on September 11, Americans.

This leaves us with a large new group of people who are going to say the United States sides with Israel, and that this country is not concerned about peace in the Middle East, and not concerned about addressing the enormous problems which divide the people there. We thus ignore some of the terms most important to our national security. We are talking here about an area which has the potential for the next world war occurring. Terrorism can bring it about at any time. It could happen; and if it does, the results to Israel will be calamitous. Five million Israelis, or a few more, in a small country surrounded by millions of Arabs, is facing terrible risk and danger in the event that there is significant trouble.

I am not sure that the United States can address any of the problems that we have with peace in the area easily, or that we can address the problems of assuring our own security. But we must. We have already learned the bitter anger that causes suicide bombers will kill large numbers of Israelis and Americans through terrorist tactics. I would urge my colleagues to choose a better mechanism for assuring peace in the area and the security of the United States, a negotiated settlement by the parties, driven by our leadership, and effort, with the support of the other peace loving Nations.

Mr. Speaker, I reserve the balance of my time.

Mr. HYDE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to say to my distinguished friend, the gentleman from Michigan (Mr. DINGELL), for whom I have enormous admiration, that he has a much more spacious view of the purpose of this resolution. We do not pretend to have an answer to the Middle East conflict; and I pray that if the gentleman does, he will come forward with it so that peace might be moved closer in that troubled part of the world.

What this resolution does is a very narrow, simple thing, and that is it shows solidarity with the Israeli people who were victimized on December 1 with an atrocity, namely the killing of 26 people, randomly, in a shopping mall, and the wounding of at least 175 of them, in the wake of what happened to our country on the 11th of September in the worst act of terrorism in recorded history in the memory of man.

So Israel and the United States are both victims of a terrible act of terrorism; and in that co-victimhood we attempt to show solidarity. That is not a mindless thing; it is not an empty gesture. It focuses on this new form of war, which is beyond contempt. I think that is very useful and necessary.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I first want to pay tribute to the leadership of the chairman of the Committee on International Relations, our distinguished colleague, the gentleman from Illinois (Mr. HYDE), in bringing this resolution before us.

I should also mention, Mr. Speaker, that as we speak, a parallel resolution is being considered in the other body, introduced by the chairman and the ranking member of the Senate Foreign Affairs Committee.

Mr. Speaker, I rise in strong support of the Hyde-Lantos resolution expressing solidarity with the State of Israel and the Israeli people in their fight against terrorism.

Mr. Speaker, this past weekend, Israel experienced the most deadly eruption of Palestinian terrorist assassinations that country has seen in years. Some 26 utterly innocent civilians were killed, most of them young people, and 175 wounded, within a 14-hour period as a result of ruthless suicide bombs in both Jerusalem and Haifa. Once again, Palestinian terrorists targeted people on a bus and people in a shopping mall.

We as Americans, ourselves recently victimized, fully share the Israelis' sense of anger, outrage, and violation. The horror of this past weekend was, as President Bush's Middle East envoy, General Zinni, stated, "the deepest evil one can imagine."

Israel's casualty figures from the 14 hours of carnage are the equivalent on a proportional basis of 1,200 American dead and 8,000 American wounded. The horrors of this past weekend only underscore a relentless campaign of murder carried out by Hamas, Islamic jihad and elements of Arafat's own Fattah movement. In fact, Mr. Speaker, since that fateful date, September 11, the equivalent of 2,700 Israelis have fallen victim to Palestinian terrorism.

Each human life is a treasure far beyond what any statistic can express. Both the Jewish and Islamic traditions poignantly declare that the saving of one human life is the equivalent of saving the world and the murder of one human life is the equivalent of destroying the world. I cite the proportional figures only as a means to illustrate, Mr. Speaker, the impact these killings have on a small nation of just 6 million people.

This Congress and the American people are angry, frustrated, and fed up

with Arafat's cynical support of murderous criminals and his failure to act to prevent the killing of both Israelis and Palestinians. But Arafat's failure does not only lead to death; it leads to the danger that a bloodbath will ensue in the entire region.

We know, Mr. Speaker, that Arafat is capable of stopping terror. We have seen him do so when under sufficient international pressure. Until he does end the terror, and end it for good, we must conclude that he supports it.

It is no longer good enough, indeed, it never was, Mr. Speaker, for Arafat to run a revolving prison door, arresting a few low-level terrorists for a few days until the world diverts its glance and moves on to other issues.

The Hyde-Lantos resolution provides that the Palestinian Authority should arrest, prosecute, and punish the perpetrators of this monstrous act or turn over these terrorists to the Government of Israel for prosecution. Our resolution urges the President of the United States to take any and all steps necessary to ensure that the Palestinian Authority complies with all of our demands. If it does not, we call on our President to terminate relations with Arafat and the Palestinian Authority.

Mr. Speaker, in his historic speech to our joint session on September 20, President Bush said that nations will be judged as either being against terrorists or being for them. In this hour of their grieving, Israelis should know that the American Congress and the American people stand resolutely with them in our joint struggle against international terrorism.

Mr. Speaker, I reserve the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from California (Mr. ISSA).

Mr. ISSA. Mr. Speaker, I rise in opposition to this piece of legislation. Not because it is completely flawed, it has great value in some of the things it says, but it has flaws.

Before I go on to those flaws, I would like to point out that the previous speaker misstated this resolution. I would ask the gentleman from California (Mr. LANTOS) to use some of his remaining time to restate correctly this resolution.

This resolution in its original form very outlandishly called on the Palestinian Authority, as though they were the perpetrators of this crime. It has been changed, because they are not.

Hamas committed these two terrible attacks, for which Hamas should be hunted down and punished, as the President is seeking to do. But in fact, the Palestinian Authority is also a victim of these attacks. They have had loss of life as a result of this. And going to the larger picture of the Middle East, Israel continues to find ways to punish and diminish the Palestinian

Authority's ability to enforce the very laws that they ask to be enforced by bombing their police headquarters in retaliation for what was taken credit by Hamas to be their act.

Hamas is, in fact, an organization formed in opposition to the Palestinian Authority's very own party. I would ask that these inaccuracies be corrected, because in fact Hamas would like to see the PLO out of power. Hamas is an extreme organization with a very different bent than the Palestinian Authority's general way of doing business.

More importantly, I would call on everyone to look at item four, where it urges the President to take any and all necessary steps to ensure the Palestinians take the actions described. That was added, and it was added for a good and valid reason that I hope we will all remember should this otherwise in some ways misguided resolution pass.

The President could restore the \$900 million that the Israeli Government has withheld from the Palestinian Authority. Those dollars were designed to allow them to enforce their laws, and yet that has been unlawfully and in violation of the agreement that they have made withheld.

The President could see that the Palestinian Authority, who today only has two answers to a riot, yell at them or shoot them, because they are prohibited and withheld the kind of riot control equipment that would allow them to enforce these very sanctions that we want to see that they do to root out Hamas. They have no riot control equipment; they have no billy clubs; they have no tear gas.

So I ask that we look at this somewhat erroneous resolution for what it might do for the administration, if the administration takes the initiative and does some positive things to undo the damage that has been done by Israel in breaking down the very authority that they now call on the United States to insist that they take these steps.

We were just in the West Bank on a CODEL. We saw how little ability the PLO now has, what the effects of 14 months of not receiving the funding they need to do their job are.

□ 1330

This is not a perfect document. It has been improved. I would call, once again, on the gentleman from California (Mr. LANTOS) to make those corrections so that we fairly and accurately state what item 4 and the rest of this document says, which is a call on Hamas, the Palestinian Islamic Jihad and other organizations, terrorist organizations, of which the Palestinian Authority is not one.

Mr. HYDE. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from New York (Mr. GILMAN).

Mr. DINGELL. Mr. Speaker, out of extraordinary respect and affection for

the gentleman from New York (Mr. GILMAN), my good friend, I yield him an additional 1 minute.

The SPEAKER pro tempore (Mr. BASS). The gentleman from New York (Mr. GILMAN) is recognized for 3 minutes.

Mr. GILMAN. Mr. Speaker, I rise to urge my colleagues to fully support H. Con. Res. 280 so that the Congress can demonstrate that it stands in strong support of Israel as it confronts terrorism threats similar to the ones we have been confronted by our own Nation. I thank our distinguished chairman, the gentleman from Illinois (Mr. HYDE), and the gentleman from California (Mr. LANTOS), our ranking minority member, for bringing this measure to the floor in a timely manner.

We should be reminded that Israel has lived with these kinds of threats and terrorism for most of its existence, not just since September 11, and which have escalated just in the past few days, killing so many innocent civilians. Palestinian leader Chairman Arafat needs to know that he will receive no more second opportunities and no more benefits of doubt. This resolution does just that by demanding that Chairman Arafat root out the infrastructure of Palestinian terrorist organizations operating within its territory that is controlled by the Palestinian Authority.

This resolution demands that Chairman Arafat either prosecute Palestinian terrorists and ensure that they remain in custody, or turn over the terrorists to Israel for prosecution. These are steps that Arafat, despite repeated demands from Israel and, to some extent, from our own Nation, that he has to undertake at this time but has refused to. Our resolution urges the President to suspend relations with Mr. Arafat, the Palestinian Authority, until they, once and for all, root out the terrorist infrastructure. We must not do business as usual with Mr. Arafat while he continues to allow Palestinian suicide bombers to roam freely, enabling them to carry out more destruction against civilians.

Mr. Arafat has refused to crack down on these terrorist groups, believing that he can keep peace with the Palestinian Authority if he stands down from confronting the militants.

However, these groups actually have been undermining Mr. Arafat's leadership by provoking Israel and preventing negotiations from yielding peace and prosperity for the Palestinian people.

Mr. Speaker, this resolution puts other governments on notice that we in the Congress are watching their behavior toward Palestinian terrorism as well. Governments such as Syria and Iran must not be permitted to fund, to arm and to harbor Palestinian terrorist groups with immunity and then hide behind tepid words of support for the

United States' efforts against the Taliban and bin Laden. Syria has allowed Hamas and the Palestinian Islamic Jihad to maintain their headquarters in Damascus and to operate training camps in the Bekaa Valley of Lebanon. Iran provides about 10 percent of Hamas' total budget and virtually all of the funds used by Palestinian Islamic Jihad, according to a wide variety of reports and analyses. It also funds weapons to Hizbollah in Lebanon, an organization that helps train Hamas and Palestinian Islamic Jihad.

In conclusion, let me say, Mr. Speaker, that the passage of this resolution will send to Chairman Arafat a clear, strong message that our patience with him is at an end. As some Israeli leaders have noted, Mr. Arafat should be told to either surrender the terrorists, or surrender his power. The same policies that we are pursuing against Osama bin Laden in Afghanistan should be applied to Mr. Arafat. I urge my colleagues to fully support this measure.

Mr. LANTOS. Mr. Speaker, before yielding to the gentlewoman from Nevada, I want to make some observations on the speaker prior to the gentleman from New York (Mr. GILMAN).

I do not take back one single word of my statement. Units of Arafat Palestinian Authority have participated repeatedly in the most heinous terrorist acts and claimed credit for it. Arafat paid tribute to mass murderers and assassins on a repeated basis. He is part and parcel of the terrorist cabal.

Let me also say, with respect to sanctimonious statements about peace, there was an opportunity for peace when, under President Clinton's leadership and at his urging, former Prime Minister Barak made sweeping and phenomenal concessions to the Palestinian Authority, and instead of accepting those or coming up with a counteroffer, he started a 14-month mass murder, sweeping the region, with hundreds of Israelis and Palestinians being killed, the Palestinian economy in shambles, tourism in the whole region from Egypt to Lebanon dead. All of it because of terrorism and violence.

Mr. Speaker, I am delighted to yield 2½ minutes to the gentlewoman from Nevada (Ms. BERKLEY), my distinguished colleague and good friend.

Ms. BERKLEY. Mr. Speaker, I rise in strong support of the Hyde-Lantos resolution.

I would like to personally thank both the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) for bringing this measure to the floor and for their excellent leadership on our committee.

Mr. Speaker, after the vile terrorist attacks perpetrated by Palestinian suicide bombers this weekend in Israel, many are claiming that this is the moment of truth for Yasar Arafat. The

fact is, Chairman Arafat has had too many moments of truth, and he has failed them all.

The patience of the United States has been abused time and again by the Palestinian leadership. It is far past time for Chairman Arafat to start producing results. He started this Intifada over a year ago after rejecting Prime Minister Barak's generous calls for peace and, since then, has chosen to ignore America's calls for negotiation in favor of blowing up discos and pedestrian malls. Mr. Arafat and the entire Palestinian leadership must listen very clearly to the message that we are sending: You have gained nothing by killing innocent teenagers, except the wrath of America, Israel and the civilized international community.

Palestinian apologists have tried to link these terrorist attacks to Israeli policies. Let me say loud and clear that those who make this argument are the same, in many instances, who claim that the attacks on America on September 11 were motivated by America's foreign policy. Only the most despicable or deliberately blind human beings can rationalize the murder of innocent teenagers for a supposed political cause.

Mr. Speaker, our patience with the Palestinian leadership has run its course. American policy is clear that our enemies are terrorists everywhere and all governments that support them. This resolution says once and for all to Chairman Arafat, what side are you on? Do you support terror, or will you immediately and permanently dismantle the terrorist organizations that act freely within your territory?

Hamas and other terrorist organizations operate with a free hand because Arafat allows them to. If Arafat cannot control these terrorists, then why are we propping him up and pretending that he has the ability to negotiate with Israel for peace? If Chairman Arafat fails to act, then it is time to regard the Palestinian Authority as supporters of terror and deal with them as such. The choice, as it has always been, is Chairman Arafat's to make.

Mr. HYDE. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Arizona (Mr. FLAKE).

Mr. FLAKE. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, Yasar Arafat says that he cannot control the terrorists. It seems that we have a relatively easy decision to make. Why do we not take him at his word? If he cannot control the terrorists, then he should not pretend that he can bring peace, and we ought to stop negotiating with him. We need to look elsewhere among the Palestinians for negotiating partners. If Yasar Arafat is responsible, then terrorists under his control over the

weekend killed 26 Israelis. If he is responsible, he needs to be held accountable for his actions. We need to remember that Arafat has never outlawed Hamas, he has never confiscated its weapons, he has never shut down its training camps, and he has never even publicly condemned it by name.

In 1997, then Secretary of State Madeleine Albright said that Arafat had a revolving door justice system when it came to handling terrorists. Things have not changed.

Again, the U.S. simply needs to determine, is Arafat in control, or is he not? I would suggest that, in either case, we ought to stop negotiating with him.

Further, there are better uses for taxpayer dollars than to prop up terrorists and their regimes. If we find that he is not in control, stop negotiating with him. If he is in control, hold him accountable. We ought to begin the post-Arafat era.

Mr. DINGELL. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in opposition to the resolution and not, obviously, because it condemns violence. We all condemn the violence. But there is more to this resolution than just condemning the violence. I have a problem with most resolutions like this because it endorses a foreign policy that I do not endorse, and it does that by putting on unnecessary demands. So the demands part of this resolution is the part that I object to, not the condemnation of violence.

By doing this, we serve to antagonize. We hear today talk about having solidarity with Israel. Others get up and try in their best way to defend the Palestinians and the Arabs. So it is sort of a contest: Should be we pro-Israel or pro-Arab, or anti-Israel or anti-Arab, and how are we perceived in doing this? It is pretty important.

But I think there is a third option to this that we so often forget about. Why can we not be pro-American? What is in the best interests of the United States? We have not even heard that yet.

I believe that it is in the best interests of the United States not to get into a fight, a fight that we do not have the wisdom to figure out.

Now, I would like to have neutrality. That has been the tradition for America, at least a century ago, to be friends with everybody, trade with everybody, and to be neutral, unless somebody declares war against us, but not to demand that we pick sides in every fight in the world. Yet, this is what we are doing. I think our perceptions are in error, because it is not intended that we make the problem worse. Obviously, the authors of the resolution, do not want to make the

problem worse. But we have to realize, perceptions are pretty important. So the perceptions are, yes, we have solidarity with Israel. What is the opposite of solidarity? It is hostility. So if we have solidarity with Israel, then we have hostility to the Palestinians.

I have a proposal and a suggestion which I think fits the American tradition. We should treat both sides equally, but in a different way. Today we treat both sides equally by giving both sides money and telling them what to do. Not \$1 million here or there, not \$100 million here or there, but tens of billions of dollars over decades to both sides; always trying to buy peace.

My argument is that it generally does not work, that there are unintended consequences. These things backfire. They come back to haunt us. We should start off by defunding, defunding both sides. I am just not for giving all of this money, because every time there are civilians killed on the Israeli side or civilians killed on the Palestinian side, we can be assured that either our money was used directly or indirectly to do that killing.

□ 1345

So we are, in a way, an accomplice on all of this killing because we fund both sides. So I would argue we should consider neutrality, to consider friendship with both sides, and not to pretend that we are all so wise that we know exactly with whom to have solidarity. I think that is basically our problem. We have a policy that is doomed to fail in the Middle East; and it fails slowly and persistently, always drawing us in, always demanding more money.

With the Arabs, we cannot tell the Arabs to get lost. The Arabs are important. They have a lot of oil under their control. We cannot flaunt the Arabs and say, get lost. We must protect our oil. It is called "our oil." At the same time, there is a strong constituency for never offending Israel.

I think that we cannot buy peace under these circumstances. I think we can contribute by being more neutral. I think we can contribute a whole lot by being friends with both sides. But I believe the money is wasted, it is spent unwisely, and it actually does not serve the interests of the American people.

First, it costs us money. That means that we have to take this money from the American taxpayer.

Second, it does not achieve the peace that we all hope to have.

Therefore, the policy of foreign non-interventionism, where the United States is not the bully and does not come in and tell everybody exactly what to do, by putting demands on them, I think if we did not do that, yes, we could still have some moral authority to condemn violence.

But should we not condemn violence equally? Could it be true that only in-

nocent civilians have died on one side and not the other? I do not believe that to be the case. I believe that it happens on both sides, and on both sides they use our money to do it.

I urge a no vote on this resolution.

Mr. Speaker, like most Americans, I was appalled by the suicide bombings in Israel over the weekend. I am appalled by all acts of violence targeting noncombatants. The ongoing cycle of violence in the Middle East is robbing generations of their hopes and dreams and freedom. The cycle of violence ensures economic ruin and encourages political extremism; it punishes, most of all, the innocent.

The people of the Middle East must find a way to break this cycle of violence. As Secretary of State Colin Powell told the House International Relations Committee in October, "You have got to find a way not to find justifications for what we are doing, but to get out of what we are doing to break the cycle."

Mr. Speaker, I agree with our Secretary of State. The Secretary also said that we need to move beyond seeing the two sides there as "just enemies." I agree with that too. But I don't think this piece of legislation moves us any closer to that important goal. While it rightly condemns the senseless acts of violence against the innocent, it unfortunately goes much further than that—and that is where I regrettably must part company with this bill. Rather than stopping at condemning terrorism, this bill makes specific demands in Israel and the Palestinian areas regarding internal policy and specifically the apprehension and treatment of suspected terrorists. I don't think that is our job here in Congress.

Further, it recommends that the President suspend all relations with Yasir Arafat and the Palestinian Authority if they do not abide by the demands of this piece of legislation. I don't think this is a very helpful approach to the problem. Ceasing relations with one side in the conflict is, in effect, picking sides in the conflict. I don't think that has been our policy, nor is it in our best interest, be it in the Middle East, Central Asia, or anywhere else. The people of the United States contribute a substantial amount of money to both Israel and to the Palestinian people. We have made it clear in our policy and with our financial assistance that we are not taking sides in the conflict, but rather seeking a lasting peace in the region. Even with the recent, terrible attack. I don't think this is the time for Congress to attempt to subvert our government's policy on the Israeli-Palestinian conflict.

Finally, the bill makes an attempt to join together our own fight against those who have attacked the United States on September 11 and Israel's ongoing dispute with the Palestinians. I don't think that is necessary. We are currently engaged in a very difficult and costly effort to seek out and bring to justice those who have attacked us and those who supported them, "wherever they may be," as the president has said. Today's reports of the possible loss of at least two of our servicemen in Afghanistan drives that point home very poignantly. As far as I know, none of those who attacked us had ties to Palestine or were harbored there. Mr. Speaker, I think we can all condemn terrorism wherever it may be without committing the United States to joining endless ongoing conflicts across the globe.

Mr. GILMAN. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Maryland (Mrs. MORELLA).

Mrs. MORELLA. Mr. Speaker, I thank the gentleman for yielding time to me, and I thank him for his leadership.

I also want to commend the gentleman from Illinois (Chairman HYDE) and, again, the chairman of the subcommittee, the gentleman from New York (Mr. GILMAN), and the gentleman from California (Mr. LANTOS) for the work they have done.

I rise in strong support of this resolution to express solidarity with Israel and the fight against terrorism. We have had leadership on the Committee on International Relations that has helped us to ensure our support for Israel, and I want to thank them all for their leadership.

The citizens of Israel know too well the threat of terrorism. This past weekend was another brutal example: 26 Israeli citizens were murdered and 175 were wounded by the terrorist group Hamas and the Palestinian jihad, all within 14 hours. This bloody weekend was part of an ongoing campaign aimed at youth and families, unacceptable acts of terrorism.

To bring an end to terrorism in Israel, Chairman Arafat has to live up to his agreements, including commitments made to stop this violence against civilians. That means fulfilling promises of prosecutions. His ability to maintain the rule of law would finally demonstrate a Palestinian interest in engaging in discussions of peace.

Without serious action to eliminate, even harness terrorism, Arafat cannot expect any opportunity for negotiations.

So the United States stands united with Israel in the effort to eliminate the terrorist attacks against our citizens. Our continued unification with other nations on this issue must not cease to be heard around the world. Our Arab allies, indeed, must understand our position and encourage Chairman Arafat to take the necessary steps against known terrorist organizations, and support him publicly when he does.

I encourage all my colleagues to support House Concurrent Resolution 280 to express our support and solidarity for the citizens of Israel.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from New York (Mr. ACKERMAN), the distinguished ranking member of the Committee on International Relations.

Mr. ACKERMAN. Mr. Speaker, I am outraged by the statement of one of the previous speakers who has now left the floor who said, with his unique sense of justice, that we should treat everybody equally; that we should

treat the terrorists and victims the same; that we should treat Hamas the same way and look at them in the same way that we treat little girls going to a disco, or grandmothers taking their grandchildren out for pizza for lunch. That is not justice; that is ridiculous.

Mr. Speaker, I rise in strong support of the resolution. I would like to thank the chairman, the gentleman from Illinois (Mr. HYDE), and the ranking member, the gentleman from California (Mr. LANTOS), for their outstanding efforts in crafting this resolution and getting it to the floor in so timely a fashion.

I believe it is critically important at this moment, this moment of truth, for the House of Representatives to speak out against the Palestinian terrorism which has cost so many innocent Israelis their lives.

It is well past time for Congress to say enough, enough killing, enough terror, and finally, enough duplicity, excuses, and lies. Palestinian terrorism is not an accident; it is not an uncontrollable cycle. In fact, it is the result of a deliberate, deliberate refusal by the Palestinian Authority to crack down on terrorist groups like Hamas and the Palestinian Islamic jihad.

It is the result of the Palestinian Authority's revolving-door prison policy, and the Palestinian leadership's unconscionable refusal to arrest terrorists whose names and addresses are made familiar by endless Israeli requests for action, requests that have been confirmed by our own government.

Hamas is a terrorist group, and the PA harbors them. Our President says there is no difference, that the Palestinian Authority must be held accountable for these grotesque decisions which make any hope of peace an impossibility.

The Palestinian people have legitimate grievances and they have a right to express them; but they have no right, no right, no right to blow up and murder innocent men, women, and children.

Mr. Speaker, the United States cannot work during the day with Palestinian leaders on "the peace of the brave" while in the evening they turn a blind eye to terrorist bombings, shootings, and mayhem. As President Bush made so clear in his address to this Congress and to the American people, the time has come for every Nation and national group to choose: they are either with us or they are with the terrorists.

The Palestinian Authority has exactly that choice to make now. Either they destroy the infrastructure of Hamas, Islamic jihad, and other terrorist groups, or they will lose their relationships with the Congress, lose their relationship with the United States, and in the end, stand to lose much more than that.

Mr. Speaker, we must pass this excellent resolution. Again, I want to thank the gentleman from Illinois (Chairman HYDE) and the gentleman from California (Mr. LANTOS) for helping the House to find its voice on this very critical issue.

Mr. GILMAN. Mr. Speaker, I ask unanimous consent that each side be given an additional 5 minutes, since we have some additional speakers.

The SPEAKER pro tempore (Mr. BASS). Is there objection to the request of the gentleman from New York?

Mr. DINGELL. Mr. Speaker, reserving the right to object, I just want to hear again what my good friend said.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Speaker, I would tell the gentleman, I am asking for an additional 5 minutes for each side, since we have additional speakers.

Mr. DINGELL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. GILMAN), the gentleman from Michigan (Mr. DINGELL), and the gentleman from California (Mr. LANTOS) will each be recognized for an additional 5 minutes.

Mr. GILMAN. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from California (Mr. ROHRABACHER).

Mr. ROHRABACHER. Mr. Speaker, I will be voting for House Concurrent Resolution 280. This bill reflects my abhorrence and total condemnation of terrorist attacks on innocent Israelis, noncombatants. That attack, carried out on December 1 and 2, mutilated and killed 26 noncombatants, and 175 were wounded. These were human beings: men, women, and children, young people, and seniors. This monstrous atrocity must be condemned by all who believe in morality, all who believe in God, all who seek a better world and seek peace.

We condemn this as we condemn all attacks which have targeted Israelis and noncombatants in the decades past. This unconditional condemnation of such attacks on Israel, on their noncombatants, is totally justified.

But that is not enough. If America is to be a peacemaker in the Middle East, if we are to take a principled stand that will then be taken seriously by both sides when we condemn terrorism, we must condemn with equal moral outrage the murderous assaults on Palestinian noncombatants.

There are piles of bodies in the Middle East today, piles of bodies of innocent people. The Economist Magazine recently noted that the number of Palestinian noncombatants who have been

killed in these last 6 weeks far outnumber the number of Israeli victims.

But there have been victims on both sides; and we need to equally, with equal fervor, condemn these attacks on innocent people. We should have zero tolerance, zero tolerance of this brutal terrorism that has kept the Middle East in such turmoil.

But let me note that does not mean, because we condemn this terrorism, that we close our eyes to the fact that Israeli soldiers are mowing down young boys who are doing nothing more than throwing rocks, a nonlethal weapon, and they use deadly force.

There are people in this body who are, with me, dedicated to human rights who would never permit a regime anywhere in the world to use such deadly force against people who are simply throwing rocks in order to call the public attention to their seeking justice for their cause. The killing of an Israeli soldier does not justify the shelling, indiscriminate shelling, of Palestinian villages, which has been part of their policy in the past, as well.

If we are to be taken seriously about condemning terrorism, if we are to be a peacemaker in the Middle East, and that is what we should be whenever there is an act of terrorism, we need to step forward; and we have not done it when the Palestinians are the victims.

Today I am going to vote for this resolution because I wholeheartedly condemn the killing that we are talking about here, with these poor Israeli people, 26 of them, and 175 wounded. These young people who are wounded probably have no legs, young people being disfigured all their lives. This is a horror story.

But it is an equal horror story when those things are done on Palestinians by the Israeli soldiers, and we need to be a peacemaker and not just give blanket approval to everything Israel does.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to tell my good friend, the gentleman from California, that there is an enormous difference between targeting innocent civilians and collateral damage.

Today, as we speak, American soldiers were killed, killed in Afghanistan by our own forces inadvertently. There is a difference of the whole world between deliberately killing innocent civilians and retaliating, doing one's utmost to avoid killing civilians and, tragically, mistakes occurring. I think this distinction must be made on this floor.

Mr. Speaker, I am pleased to yield 2 minutes to my good friend, the distinguished gentleman from Maryland (Mr. CARDIN).

Mr. CARDIN. Mr. Speaker, I thank the gentleman for allowing me this time.

Let me also thank the gentleman from California (Mr. LANTOS) for his

leadership in bringing forth this resolution and thank the gentleman from Illinois (Mr. HYDE), as well.

Mr. Speaker, some of our colleagues are concerned about taking a side. We are taking a side; we are taking a side against terrorists. We cannot be neutral when it comes to terrorists. Our President has said it very clearly: they are either on our side in the fight against the terrorists, or they are on the side of the terrorists.

This resolution is very straightforward. It supports the resolve of the people of Israel, and it lends the support of our Nation in their war against terrorists.

□ 1400

That is exactly what the President and we asked of the American people after the attack on our country on September 11. We asked for the resolve of our people and their national support. There should not be a different standard here. We all should be opposed to the terrorist activities and support this war.

Mr. Arafat must make a choice. He either will join us in rooting out the terrorists in the Middle East or he will continue to be an ineffective leader. If he wants to be the leader of the Palestinian people that brings peace to the Middle East, then he must engage us, as this resolution calls upon him to do, to root out terrorists in the Middle East.

Mr. Speaker, this is a resolution that I hope all of us would support. It shows that we will not compromise with terrorists. It shows that we are united as a Nation, we are united in our international coalition to root out terrorist activities, whether they occur in the United States, whether they occur in Israel, or wherever they occur. Innocent people should not be targets. We cannot compromise that issue.

This resolution speaks to that, and I urge my colleagues to support the resolution, to put this body on record against terrorism.

Mr. GILMAN. Mr. Speaker, I am pleased to yield 30 seconds to the gentleman from California (Mr. ISSA).

Mr. ISSA. Mr. Speaker, I want to make it clear that this resolution started off as one that I could not support, and, in its final form, it is one that I will vote for, not because anything I said was less accurate. There are unsaid things. There are, in fact, challenges that the Israeli government has not met that I would hope they meet, but I would say that in the final analysis that we as a body must speak about the wrong actions that occurred, regardless of what is not in this document or any flaws that remain.

Mr. LANTOS. Mr. Speaker, I am delighted to yield 2 minutes to our distinguished colleague, the gentleman from New York (Mr. CROWLEY).

Mr. CROWLEY. Mr. Speaker, I stand up to say, enough is enough. I rise in

strong support of this resolution, and I am proud to be a cosponsor. I commend the gentleman from Illinois (Mr. HYDE), the chairman, and the gentleman from California (Mr. LANTOS), our ranking member, for bringing this measure before us this afternoon.

I was both saddened and infuriated by the events that transpired in Jerusalem and Haifa this past weekend. Saddened because 26 people were murdered and 175 were injured in a cowardly terrorist attack. Infuriated because Yasser Arafat and his Palestinian Authority have done nothing to prevent these attacks since the peace process began.

Arresting low-level Hamas operatives to demonstrate that he is doing something is fooling absolutely no one. Arafat's declaration that he is cracking down on Palestinian terrorists is about as effective as the police inspector played by Claude Rains in Casablanca when he said, round up the usual suspects, while Humphrey Bogart got away.

The revolving door policy at Palestinian jails must end immediately. After years of negotiating with Arafat and the Palestinian Authority to no avail, it may be time to ask if Arafat is truly a partner interested in peace. As the old adage goes, actions speak louder than words. Arafat's actions suggest that we have been wasting our time in dealing with him.

Mr. Arafat, our patience has finally run out. You have no more bargaining chips left. President Bush issued a challenge to the world when he said, you are either with us or you are with the terrorists. Clearly, you have chosen.

Following the events of September 11, Americans have experienced what the Israelis have been dealing with since 1948. The Israeli government was there for us on 9/11, and we need to be with the Israelis today.

I urge all of my colleagues to support this resolution.

Mr. HYDE. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Virginia (Mr. CANTOR).

Mr. CANTOR. Mr. Speaker, I rise today in strong support of H. Con. Res. 280; and I thank the gentleman from Illinois (Mr. HYDE), the chairman; the gentleman from California (Mr. LANTOS), the ranking member; and the gentleman from New York (Mr. GILMAN) for bringing this measure to the floor so quickly.

As was stated earlier, this past weekend we witnessed some of the bloodiest and most gruesome terrorist attacks on Israeli citizens by Palestinian terrorist organizations. These terrorist attacks are just another reminder that Palestinian Authority Chairman Yasser Arafat and his closest confidants continue to be the largest obstacle to peace in the Middle East by contributing to the reign of terror.

Each and every day Israelis and now Americans face disruptions to our normal civilized daily lives by the constant threat and now reality of suicide bombers and terrorist attacks. I commend President Bush for his actions yesterday in freezing the assets of the Holy Land Foundation for Relief and Development, which poses as a charitable organization but, in fact, funnels millions of dollars annually to Hamas.

In response to an earlier speaker who asked, when are we going to start acting in the U.S. interests, I pose and ask, are not we acting in the interests when we shut down organizations as that who are operating within our borders? Those organizations are using our laws to operate to raise money for terrorist activities which can just as easily take place in Israel and as we saw on 9/11 here in America.

We in America, under the leadership of President Bush, have set out to make Americans and freedom-loving people safer against the terrorists. As stated in the Bush doctrine, there is no distinction between the terrorists and those who harbor them. Just as al-Qaida receives support and sanctuary from the Taliban, Hamas, Palestinian, Islamic Jihad, Hezbollah and others are provided a sanctuary and with land to operate and with support from Mr. Arafat and his confidants.

Mr. Speaker, the time has come for the United States to stop talking about waiting for Arafat to fulfill certain conditions. How many times will we demand he reign in the terror and stop the killing? How many U.S. taxpayer dollars must we spend and entrust to Arafat and his Palestinian Authority as they continue to harbor the terrorists?

Mr. Speaker, the United States and Israel share common values and freedom of choice, and I believe this resolution signals what should be the end of the road for American patience with Mr. Arafat.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Speaker, I rise in strong support of this resolution condemning the terrorist outrages committed by the Palestinian terrorist groups and expressing our solidarity with Israel.

Mr. Speaker, there can be no peace and no real negotiations as long as such terrorist attacks continue. Mr. Arafat denounces these terrorist attacks but operates a revolving door prison system, that encourages the terrorists to continue. He then lionizes the terrorist murderers and, in fact, gives death benefits and pensions to the families of the suicide bombers.

He is obviously not honest in his opposition to terrorism, and he permits it to continue and, indeed, promotes it.

Mr. Speaker, there can be no moral equivalency between the deliberate at-

tacks of the terrorists on Israeli civilians and the unfortunate deaths of civilians who are victims when Israel attempts to attack the terrorists to prevent further terrorist attacks.

Mr. Arafat must now be held to destroy the terrorist infrastructure now. If Arafat does not do this very quickly, then Israel in all likelihood will take upon itself the necessity of doing so. Israel will have to exercise its inherent right of self-defense, as the United States is now doing in Afghanistan, and that will greatly escalate the situation.

The key to the Oslo agreement for peace talks was the renunciation of violence by both sides as leverage in negotiations. Israel has renounced that violence. Arafat, obviously, has used it as a tool. After Prime Minister Barak made a breathtaking offer of concession to Israel last year, Arafat reacted not by agreeing, not by a counteroffer, but by starting a war which has escalated into a war against civilians.

I support this resolution. We must stop that war. Israel, if necessary, must exercise its right of self-defense to stop that war against civilians, and no one on earth can tell a sovereign nation not to fight to protect its citizens against the kind of terrorist murderers who murdered people in Jerusalem last week and in New York City on September 11.

Mr. HYDE. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Speaker, there comes a time in the life of a democracy when their leaders must respond to terror by unleashing a terrible, swift sword. That is this time for our allies in Israel.

Under the previous prime minister, Yasar Arafat was offered a choice. At Camp David and again at Taba, he chose between an offer of 97 percent of the territories or the gun. He chose the gun.

Many Americans thought that Arafat could make a courageous decision like Nelson Mandela to surrender the gun and govern a state, or Arafat could follow the path of Fidel Castro and preside over increasing isolation and destruction. Arafat chose unwisely and conducted a wave of violence against teenagers and commuters.

His apologists say that Arafat has no power. They are wrong. He has no judgment. President Bush put the question clearly after September 11, you are either with the terrorists or you are with the West. You cannot condemn the Taliban and hug Hezbollah. Egypt and Jordan chose wisely: Peace with Israel. Arafat chose war.

He is now harvesting the wrath of a democracy and her American ally. Americans are best when we stand with our democratic allies, and now is the time to stand with Israel. Together, we will show that the way of the suicide bomber leads nowhere, and only nego-

tiations with the democratically elected leaders of Israel can lead to peace.

I want to thank the gentleman from Illinois (Mr. HYDE) and the gentleman from New York (Mr. GILMAN) and especially the gentleman from California (Mr. LANTOS) for his leadership on this.

The SPEAKER pro tempore (Mr. OTTER). The Chair would announce that the gentleman from Illinois (Mr. HYDE) has 3 minutes left. The gentleman from Michigan (Mr. DINGELL) has 17 minutes left. The gentleman from California (Mr. LANTOS) has 3 minutes left.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 2 minutes to our distinguished colleague from New York (Mr. WEINER).

Mr. WEINER. Mr. Speaker, Lewis Carroll wrote about a language where down is up, black is white as jabberwocky, and some of the opponents of this resolution are engaged in it today.

The very distinguished gentleman from Michigan (Mr. DINGELL) talks about the despair of the Palestinian people as if it is a rationale for dynamite laced with nails in the middle of a busy square in front of a pizzeria and an ice cream parlor, as if the slaughter of innocents is somehow a legitimate form of political speech.

My friend from California says, oh, we have got the wrong villain. It is not the Palestinian Authority, it is not Arafat, it is Hamas, and if only you give him the chance and the tools to stamp out Hamas, he can do it.

Well, he asked for control of the territories. The Palestinian Authority has it; 95 percent of those that live in the territories are under Palestinian control. He says, I need a police force to control violence. The Israelis gave him a police force, gave him guns, gave those fighting against them guns. He said, that is not enough. He said, I need a list of the terrorists. Well, the Israelis gave him that, too. They refuse to arrest them, and then they go and slaughter innocents. We cannot have it both ways.

Some say Arafat is powerless. Well, if he is powerless, let us adopt President Bush's admonition and toss him upon the dust heap of history; and if he is powerful enough to be a partner for peace, let me ask why is it in his entire history he has not given a single speech in Arabic telling his people that it is time to live in peace with Israel. Not a single one.

Ask him why it is that he has never stopped educating the young people in the Palestinian territories to hate from their very youngest age. He even stopped a program called Seeds of Peace which let young people from Israel and from the territories get together and share their common interests.

On September 11, we in the United States learned what it was like to live in Israel. We would not think of saying

to Osama bin Laden, well, let us negotiate, let us take it easy, let us give him a chance. We would never think about giving them Texas and Louisiana if only they would go away. We would never think of that then. We should not even consider that today.

We should pass this very strong resolution, and we should do even more in the future.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would like to remind the House that Members should address their comments to the Chair and not to other Members in the second person.

Mr. LANTOS. Mr. Speaker, I ask unanimous consent that all persons who control time be given equally an additional 10 minutes. I know some of my colleagues do not need it, but in the spirit of collegiality, we do not want to stifle discussion.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. MURTHA. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

□ 1415

Mr. LANTOS. In view of the objection heard, Mr. Speaker, I ask unanimous consent that each side be given an additional 5 minutes.

The SPEAKER pro tempore (Mr. OTTER). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from New York (Mr. ENGEL).

Mr. ENGEL. I thank my colleague from California, the ranking member, for yielding me this time; and I also thank the chairman.

I rise in very, very strong support of this resolution. I want to read a quote from President Bush right from his resolution, when he stated on September 20: "Every Nation and every region now has a decision to make. Either you are with us or you are with the terrorists. From this day forward, any Nation that continues to harbor or support terrorism will be regarded by the United States as a hostile regime."

Mr. Speaker, we are in Afghanistan going after the Taliban not because we think the Taliban plotted and planned the terrorist attacks on September 11, but because the Taliban harbored Osama bin Laden and al Qaeda, which planned these attacks. Well, if it is okay for the United States to knock off the Taliban because they did nothing to prevent terrorist acts and indeed harbored the terrorists, then Israel has the same right to go after Yasar Arafat because he has done nothing to stop terrorism.

No one is saying he sits there and plans and plots the terrorist attacks,

but he certainly does nothing to stop them. Either he cannot stop them, at which point what is the point in talking to him; or he refuses to stop them, which at the same point there is no sense talking to him. He has had time.

My colleagues have mentioned where there were generous peace proposals, far beyond what any Israeli prime minister could have offered, and Yasar Arafat rejected the peace proposals of then Prime Minister Barak, and, worse than rejecting it, he walked away from the process. He did not make any counterproposal. He did not try to squeeze a few more concessions out of the Israelis. He walked away and he unleashed the intifada. As far as I am concerned, I am at my wits' end with Yasar Arafat, because he has not shown that he is a partner for peace. In order to be a partner for peace, it takes two to tango. As far as I am concerned right now, Israel is without a partner to negotiate peace.

Now, Hamas, Islamic jihad, all the terrorists have had revolving-door justice from Mr. Arafat. He arrests them and lets them out the back door. The game is played time and time and time again. He will come here to Washington, and he will issue statements in English condemning terrorism. He does not issue those statements in Arabic. He does not call for peace with Israel in Arabic. He does not do anything to help the plight of his own people. In fact, Islamic jihad and Hamas represent at least as much a threat to him and his authority and his people as they do to Israel.

We have to condemn terrorism with every force we have. And for the question before that was asked, what is in the best interest of the United States, the best interest of the United States is to go after terrorists wherever they rear their ugly head, in the United States, in Israel, or anywhere around the world. I wholeheartedly support this resolution and urge its passage.

Mr. HYDE. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Indiana (Mr. PENCE).

Mr. PENCE. Mr. Speaker, I thank the chairman for yielding me this time, and I commend him and the ranking member for their outstanding leadership on this very timely resolution.

Twenty-six innocent people in Israel murdered in cold blood, 175 wounded by Palestinian terrorists all within 14 hours. On a proportional basis, as our resolution provides, this would represent 1,200 American deaths and 8,000 wounded. Today, I rise as a proud and humbled cosponsor of House Concurrent Resolution 280 expressing solidarity with Israel in its fight against terrorism.

I submit to you, Mr. Speaker, that we should do no less than we will do in this Chamber today: condemn the vicious terrorist attacks that have resulted in the deprivation of sons and

daughters, husbands and wives, and grandparents of the families in Israel; expressing outrage today, as we do, of the ongoing Palestinian terrorist campaign, which is not, as some in the media say, a cycle of violence; but it is violence against the people of Israel and the self-defense of Israel. And we also demand today that the Palestinian Authority destroy the infrastructure of Palestinian terrorist groups, pursue and arrest terrorists, and bring them to justice; and our efforts both commend the President and urge all necessary steps be taken to ensure such actions by the Palestinian Authority are timely indeed.

I rise today, Mr. Speaker, as a Christian American from the heartland of this country, the great State of Indiana. And I am here to say that I represent hundreds of thousands of Americans who still believe that He will bless those who bless Israel. It is from this tender regard of the American people that this nation sprang back into existence in its historic homeland in 1948, and the enemies of Israel should know that that regard remains to this day.

I pray for the peace of Jerusalem. May there be peace within her walls and security within her citadels. May the grieving families hear from this Congress today the voice of sympathy and the voice of solidarity, and I urge all of my colleagues to support this resolution.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 1½ minutes to my good friend and distinguished colleague from Maryland (Mr. WYNN).

Mr. WYNN. Mr. Speaker, I thank the gentleman for yielding me this time and also for his outstanding leadership on this issue. I rise in strong support of Israel's fight against terrorism.

The blood of combatants is unfortunate but understandable. The blood of innocents is intolerable and unacceptable. Today, we deal with that blood; and we first have to say that we must not have and shed the blood of innocents on either side. Now, the gentleman from California (Mr. LANTOS) correctly made the distinction that sometimes in the course of collateral damage innocent Palestinian blood has been shed, and we must say in all sincerity that that is truly a tragedy. But today we address a different situation, the targeted and deliberate shedding of innocent blood of Israelis, Israeli youth in many instances; and that is unacceptable.

But it is not enough to come down here today and condemn from afar. I think we also have to today say, in addition to the fact that we condemn terrorism, we have to examine our role as a country, our foreign policy. We cannot stand on the sidelines. We have to have more engagement. We have to press for a workable and serious ceasefire. We have to continue the peace process, because it is only through the

peace process that we can end the shedding of innocent blood. And we have to have accountability for individuals and countries, some of whom are our allies, who tolerate, incite, and ignore the proposals of hatred within their own borders. Because it is this cycle of hatred that really causes the violence that we decry today.

So we need to both condemn today the terrorism that caused these tragic deaths and also look inside our own foreign policy to see how we can do more to combat this problem that is affecting the Middle East today.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 1½ minutes to our distinguished colleague, the gentleman from Pennsylvania (Mr. HOEFFEL).

Mr. HOEFFEL. Mr. Speaker, I thank the gentleman for yielding me this time, and I rise in strong support of this resolution today.

The increased violence in the Middle East and the horrible acts of terror against Israelis have recaptured the attention of the world. And as we refocus on the Middle East, and in our mutual search for peace, we have to be willing to denounce and decry the horrible acts of violence against civilians. The inexcusable terror directed against Israelis must be condemned by the world.

We must hold Yasar Arafat responsible for stopping that terror. Israel surely has a right to hold him responsible, the United Nations and the United States must hold him responsible, and the world must hold him responsible.

Israel surely has a right to defend herself, and we are seeing that today. She surely has a right to act firmly to prevent further acts of terror. But we must, as we criticize appropriately Yasar Arafat, we have to keep our eyes on the ball, which is not so much Yasar Arafat and his terrible failings, but the hope that is offered by George Mitchell and George Tenet. The Mitchell plan and the Tenet principles to restart the peace process have to be the focus of this country.

We need to move forward with a cooling off period, a cease-fire, of confidence-building measures and must restart the peace process. That is the highest priority, and I call on the House to give our full support to it.

Mr. LANTOS. Mr. Speaker, I am pleased to yield 1½ minutes to our distinguished colleague, the gentleman from Florida (Mr. DEUTSCH).

The SPEAKER pro tempore (Mr. OTTER). The Chair would advise that the gentleman from California (Mr. LANTOS) has 1 minute remaining.

Mr. DINGELL. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. DEUTSCH).

The SPEAKER pro tempore. The gentleman from Florida (Mr. DEUTSCH) is recognized for 2 minutes.

Mr. DEUTSCH. Mr. Speaker, I thank the ranking member of the Committee

on International Relations as well as the ranking member of the Committee on Energy and Commerce for yielding me this time.

I urge my colleagues to read the resolution. I urge my colleagues to read it because I think when they read it, there should be no votes against it on the floor. I know a number of Members have spoken against it today; but I urge them to read the specifics, because I do not think there is anything in this resolution that any Member in good faith can be against.

There are things that Members can object to about Israeli policies, and there is a debate that we can go and we should articulate. But what this resolution is really talking to is specifically acts of terrorism, acts of terrorism that, as Mr. Zinn has said, and I quote, "the deepest evil one can imagine." And that is what we are condemning today, to show that this Congress and the American people are grieving, are feeling some of the pain, although not as significant as the pain that Israelis individually and families are feeling today.

We have a unique role to play as America, as the world's only superpower, as a linchpin of Israel's survival and security. In fact, our role as Members of Congress are as linchpins of any potential peace in the region.

I have not given up hope. This week, Jews throughout the world are going to read a passage in the Torah about Joseph being thrown into slavery and being in a prison, and it looks as if the worst possible time exists for him. Yet at that worst possible time, by our faith and by our belief, we understand that there is hope for peace.

But I urge all of my colleagues to support the resolution.

Mr. DINGELL. Mr. Speaker, I yield myself 7 minutes.

This is a very important debate and one which merits the careful attention of all of our colleagues. And it is one on which the body here should remain focused on the issues which are before us.

What is the real issue that confronts the United States? Is it this resolution, or is it real and lasting peace in the Middle East? The answer is our concerns are peace in the Middle East, peace for the Israelis, peace for the Palestinians, peace for the other Arab and Muslim countries in the area. And without that, there will be no peace and no security for the United States, as September 11 shows us.

I have heard a number of my colleagues say, that, you are either for us or against us on terrorism. I am aware of no one in this body who does not join me in opposition to terrorism. And I am aware of no one in this body who does not feel that peace is in the best interest of all. I am also aware of no member here who is not supportive of the continued existence of the State of

Israel, and who does not feel that this should be a part of American policy and concern.

I am troubled, however, when I hear some of my colleagues, as they have done in this debate, talk about how the issue here is terrorism, and you are either with us or against us on terrorism. Not so! The issue is peace and how to achieve it. That must be our debate and our focus.

□ 1430

Peace is the important issue, and it is the one that concerns us above all others in the Mid East. It is one which we have addressed in our resolutions earlier and which we are addressing now through actions diplomatically and militarily.

Now what should be the focus of the debate here is something quite different, and that is how we focus the efforts and the energies of the United States to bring about peace. I have introduced H. Con. Res. 253 which expresses support for the Mitchell Commission Report. No action has been taken by the Committee on International Relations, and yet that is something which the United States should be speaking and upon which this body should be speaking.

I have heard nothing in this debate from the other side about what they propose to do to bring about a real peace. Is the termination of the existence of Mr. Arafat as the head of the Palestinian Authority in the best interests of the United States? Will that resolve the controversies? No, it will simply eliminate somebody who is a potential participant in meaningful peace talks, and one who with proper support can provide useful leadership.

What we suggest here is to bring all of the parties together and make them talk. Let us use the full prestige and the power of United States to accomplish that purpose. That is far better. Each day that passes means more risk of the kind of terrible crimes that we saw in the killing of scores of Israelis and the wounding of many, many more.

This is what we are talking about. The best interests of Israel, the best interests of the Palestinians, and the best interests of the United States are found most powerfully in the resolution of the controversies there. These controversies create bitter and angry people who are going to engage in terrorist activities and are the real risk to the people of the world, and to world peace.

I am surprised that my colleagues are not more publicly aware of this. We are not talking for or against Israel. We are not talking for or against the Palestinians. We are talking about two things: one, peace; and, two, a process which has to be bottomed on justice and a sense of justice by all of the parties in the area.

I do not know what I have to do to have my colleagues here understand

that the interest of the United States will never be served by the conflict which exists in the Middle East, or what I have to do to have my colleagues understand that this kind of Resolution really does nothing to resolve those kinds of problems, or to make my colleagues understand that peace and security for Israel or the United States or Palestine lies only in one thing and that is a negotiated settlement in which they have come to an agreement themselves. This is something which can only be forced by the United States.

Mr. Speaker, I see nothing of that kind moving forward in this discussion. I see only further actions taken by the United States to continue what is going on now, to see the killings in Israel going on, to see frustrated, angry people going out to commit suicide just to kill a few people that they hate, lets understand that this is a risk which has already visited the United States on September 11. To begin to force the peace process to work is the one interest that we should discuss in the United States today. Regretably we are not doing so.

We could be discussing how we are going to bring these people to the table. I have heard a rich abundance of denunciation of Mr. Arafat. I remind all here I do not rise to defend Mr. Arafat, but he is the leader of the Palestinian people. We have none other to do this and no assurance that his successor will be more able or compliant.

Killings going on, and innocent people on both sides, Israelis, Palestinians and others, are being killed. I have heard great concern about the Israelis, and I share that concern. What happened the other day is terrible, it is criminal and indefensible. I have heard very little about what has transpired with the Palestinians. And I have heard even less of an awareness in this body. The failure of the United States to address this matter vigorously and to see to it that the root causes and the differences of the Israeli people and the people of the occupied territories are negotiated away is a real interest of the United States which must be addressed.

Why is it that there are so few in this body that cannot understand that? Why is it that we are debating the faults of Mr. Arafat unless we have a better alternative and a better leader acceptable to the Palestinian people. Why is it that we are failing to discuss peace and a really meaningful way of achieving that peace?

That is the end to terrorism and killing. That is the beginning of peace for Israel. It is a beginning of an end to the sorrows and misfortunes of the Israelis. It is also a beginning of an end to the sorrows and the travails that are felt by the Palestinian people.

We should be discussing these matters, and we should begin to set a pol-

icy in the United States where we are forcibly going to address these concerns and where we are finally taking meaningful action to ensure lasting peace.

I am not asking my colleagues to embark on an easy trip. I am asking them to look to find what alternative there are and then to join me and other decent people in an American effort to bring peace to the Middle East for the Israelis, and for the people of the occupied territories. We must assure we do this while we still have friends who are leading countries in the area and while we still bring all parties to the table to commence a meaningful and strong effort for peace.

I ask with each passing day, does the cause of peace get stronger with the killing of innocent Israelis in Israel or the killing of innocent Palestinians in the occupied territories? Do the frustrations and angers and the bitterness and the hate that is building over there add a single thing to our prospects for peace? I suggest not. I do suggest that we commence the beginning of a meaningful process forced with every effort that this country can put into it to abate this terrible situation.

Mr. Speaker, I reserve the balance of my time.

Mr. HYDE. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. GREEN).

Mr. GREEN of Texas. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I have had the opportunity to visit Israel and meet with the leaders and also meet with Chairman Arafat both in 1995 and 1999. In the times I was there and even up until last year, the United States was engaged in the peace process to the point of putting the prestige of this country and the Presidency to try to bring peace to Israel and the Palestinian question.

What happened, though, was that Chairman Arafat walked away. Whatever the reason, all of the reports from the United States is that he walked away from a peace process. The Government of Israel changed in response to that; and, of course, now we have been in the latest infatada with the loss of lives on both sides.

I add my voice in support for this resolution because as we see the loss of innocent life in Israel it condemns terrorism, whether it is on the street of New York, on the streets of Washington, or in Ben Yehuda in Jerusalem. Our country is at war because of terrorism. We lost thousands of people because of terrorism. Killing and injuring innocent people should be stopped, and it should be stopped whether it is Washington, New York, or Jerusalem or Tel Aviv.

Our friendship with Israel has not even been considered. We have been a friend of Israel for many years, and

that is strong. There is no way we can condone or encourage or be silent in the loss of the innocent people that happened this last weekend.

I have an opportunity to walk the streets of Jerusalem at the very spot those bombs went off, and I think this resolution is mild compared to what should be done. I am proud of this Congress and the President of the United States in condemning the terrorism, again whether it is here in our country or anywhere in the world.

Mr. DINGELL. Mr. Speaker, I yield 7 minutes to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. Mr. Speaker, I thank the gentleman from Michigan for yielding me this time and for his excellent leadership on the question before us today.

Mr. Speaker, I strongly condemn the horror that was inflicted upon innocent Israeli men, women and children by suicide bombers. I condemn that violence at all times and all places.

I think it is important to note that we can either oppose or vote present on this resolution today and still be considered a supporter of the State of Israel and a friend of Israel and a supporter of the long-standing relationship between the United States and Israel, and do not let any outside group in this town try to characterize Members in any other way, because it is possible.

Secretary Powell said it best when he phoned Chairman Arafat after the latest bombings and said this was an attack upon Arafat's authority as well as an attack upon innocent men, women and children. I think that has been lost today. In all of the demands that Arafat must go, we have lost sight that these suicide bombers were indeed attacking Chairman Arafat himself.

As I condemn the horror of the past weekend, I strongly condemn the horror that has been inflicted upon innocent Palestinians, men, women and children, carried out by the Israeli Occupation Forces, including, within the last 2 weeks, five innocent Palestinian schoolboys killed in the Gaza refugee camp just within the last 2 weeks. Such terror, such disproportionate use of power and force, continued humiliation, demolition of homes and one's livelihood by destroying their crops on their own land, such daily restriction of one's movements of the Palestinians by the Israeli Defense Forces, and I could go on and on, all of which have been accelerated over the past 14 to 15 months, but all of these events, both sides should be just as equally deplored by those concerned about human rights abuses around the world, about fairness and about peace. Every one of these attacks should be condemned.

Some in the Israeli government obviously very clearly by their own words want to get Arafat. Some statements today have alluded very strongly to the

fact that we have got to get Arafat. But such action, indeed such action as this resolution today and those that call for Arafat's demise, will do zero, will do nothing to reach that just peace and may even exacerbate and take us backward from achieving that just peace that we all want to achieve.

Getting Arafat is no solution. Continued humiliation is no solution. This is the method of operation of bullies, not of those who want to return to the peace process, to the negotiating table, where, as any individual involved in negotiations knows, each party has to give a little. There is a give and take in the negotiating process. Is that the real fear here?

The military option will not secure a peace in the Middle East. The military option will not work. No peace can be achieved; and indeed, as I read through this resolution, and there are good points in this resolution about condemning terrorism, but I fail to find the word "peace" mentioned once in this resolution. Peace.

□ 1445

Peace. Maybe I need to read it without my glasses, but I have not found the word "peace" mentioned once in this resolution before us today.

Now, it is all good, or some of it is good, not all good, but some of it is good. Yes, prosecute such terrorists. Provide them with the stiffest possible punishment. Yes, ensure that they remain in custody.

Well, my question is, the Israelis today are bombing all the Palestinian police stations, their security operations. Where is Arafat going to keep those he arrests, in the living room by the fireplace in his home? So the Israelis are making it impossible to fulfill the demands that are being placed upon Arafat in this resolution today.

What if every demand in this resolution were met by 9 o'clock tomorrow morning? Would that end terrorism? Would we have peace?

Indeed, I might announce to my colleagues, as we speak, an announcement has been reached of a cease-fire, a 12-hour cease-fire, just announced between Chairman Arafat and the Israelis; and he has until whatever the 12-hour expiration time is to arrest certain militants. So let us let the parties work their will.

So, let us look at the consequences of our actions here today, and, indeed, actions of this body, regardless of whether they have the force of law or not, which this, of course, does not. But they do send a message to the participants in the Middle East.

I have traveled the region enough, extensively, including less than 2 weeks ago, having met with Chairman Arafat, President Mubarak, the Prime Minister of Lebanon, President Assad of Syria; and I know that they get a

wrong signal when we pass resolutions of this nature.

So I say to my colleagues, let us truly get at the roots of terrorism. We know the causes of hatred in this part of the world. Secretary Powell said it in his speech of November 19. The occupation must end. The occupation must end, the continued expansion and building of new settlements. That is confiscation of Palestinian land.

Mr. Speaker, I say to my colleagues, please understand, that is the root of the problem here. That is what we should be addressing in this very good debate. And I commend all sides for conducting this debate today. But let us not ignore the true roots of the problem, if we indeed want to restart the peace process.

Mr. ROHRABACHER. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from California.

Mr. ROHRABACHER. Mr. Speaker, one of the issues that seems to be at the heart of one of the discussions going on here today is whether or not the terrorism which we are condemning in this resolution, which I support wholeheartedly, is intentional, which we understand, but whether or not those actions on the part of the Israeli Government which result in the death of noncombatants, whether that is just collateral damage.

The gentleman has been in the Middle East many times and knows many of the players. From a firsthand point of view, does the gentleman believe that the damage that is being done to noncombatants by the Israeli army is unintentional?

Mr. RAHALL. Mr. Speaker, reclaiming my time, the gentleman asks a good question; and certainly in the eyes of many in the region, those who suffer from this infliction of horror, their answer would be yes, that it is intentional. That would be their response. That is something we must understand from our perspective, if we truly want to end the horror and the violence that comes from all sides. Indeed, there is no side that is lily white in the Middle East. Make no mistake about it, we must truly look at the causes of terrorism.

Mr. LANTOS. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, closing the debate on our side, there is no moral equivalence between terrorists and the victims of terrorism. What this resolution does, and I am proud to join the gentleman from Illinois (Chairman HYDE) in being the principal sponsor of this resolution, what this resolution does is it expresses the solidarity of the American people who were victims of terrorism on September 11 with the people of Israel who were victims again just this past weekend.

We want peace, but we will not get to peace as long as there is an attempt to

create a moral equivalence between a corrupt dictatorship and its terrorist tactics and the democratic ally of the United States.

I urge all of my colleagues to vote for this resolution.

Mr. Speaker, I yield back the balance of my time.

Mr. DINGELL. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, it is hard to help my colleagues understand the defect of this legislation, which is that it takes sides. It does this in a way which does not need to be taken, in a fashion and at a time when it is not in our National interest.

I condemn terrorism, and I condemn the killing of the innocent Israelis in Israel just recently, just as I do the killing of thousands of Americans on September 11. The roots of the events were somewhat the same: frustration, anger, ill will, hatred, and all of the things that are generated by the kind of situation that has gone on too long in the Middle East.

These are events which are not blameable on one person or another, and I do not believe that the blood of the small Palestinian boy who died in his father's arms from Israeli gunfire is any more pleasing in the eye of the almighty God than is the death of the scores of Israelis who died the other day in Israel because of a terrorist bomb. But those are really not the questions that we should be addressing here.

I just want my colleagues to keep this in mind: if the problems of the Mideast are to be resolved and if peace is to be achieved there, it is going to take an enormous effort by the United States and by every other peace loving Nation. I would note to my colleagues that it is not done by attacking other Members of this body because of their concern, and it is not done by rejecting the opportunity to use different people who are major players in that area.

If we are to succeed, we must call on everyone, the Israeli leadership, Yasar Arafat, the Palestinians, the people of Israel, the people of the United States, Lebanon and the countries like Jordan and Egypt, to help get their assistance in bringing about a viable, lasting peace, negotiated between the parties. We will also need the help of other countries in Africa, Europe, Asia and the two American continents.

I see nothing of that kind in this resolution. This resolution, as the gentleman from West Virginia mentioned, does not even use the word "peace." This is what we should be talking about if we are really interested in serving the best interests of the United States. Peace, peace in the Middle East, peace with dignity and honor and respect, for and from all of the parties of that unfortunate area, and how we are to achieve it for all.

That is our interest. And that is what we should be addressing. We cannot

gain anything by castigating or criticizing anyone here, or elsewhere. Our role must be that of an honest impartial broker. We must travel the long and hard path for peace; and we must start it now, not tomorrow, not sometime in the future. And we must do it by making the parties negotiate these differences out themselves, so that there can be contentment and peace and security in Israel, but also in the occupied territories; so no longer is there frustration, hunger, unemployment, misfortune in the occupied territories, and so no longer is there risk of death and destruction in Israel. That is what the interests of the United States should be and calls upon us to do. We do not serve our country well if we fail to start this effort—Now! And with great resolve.

The passing of a resolution of this kind simply shows the Arab people that the United States again is taking sides in a confrontation. It is not in the interests of this country to take sides. It is in the interests of this country to be an honest broker, who can be trusted by all of the parties there, because securing peace can only be done by the efforts of the United States leading the peace loving Nations of the world in a great and difficult effort. The bombing and killing by suicide bombers is not going to get peace. The rockets and missiles and helicopter attacks by the Israelis are going to achieve nothing. Nor will suicide bombing by terrorists. The only solution to this is negotiations between the parties to resolve the issues.

Why is it that my colleagues do not understand this simple fact. Why are we not here talking about how we remove the root causes of trouble and get down to the business of bringing about a real and lasting peace that benefits all of the people of the area and benefits the interests of the United States? That is the question we should be asking.

Taking sides benefits us not at all, but getting lasting peace does. This is not the way to get lasting peace. This is simply the way to alienate more people in the area and cause ourselves more enemies, more trouble, more risk, more peril, more killings, more misfortune for Israelis and Palestinians alike, and a longer time to achieve peace.

Mr. Speaker, I yield back the balance of my time.

Mr. HYDE. Mr. Speaker, I yield myself the balance of my time.

The SPEAKER pro tempore (Mr. OTTER). The gentleman from Illinois is recognized for 3½ minutes.

Mr. HYDE. Mr. Speaker, well, this has been a stimulating debate, and it has been educational. I would like to respond as much as I can to some of the critics of the resolution.

My good friend, the gentleman from Michigan (Mr. DINGELL), describes a resolution which my resolution never

was. He wants to head it in the direction of a comprehensive peace in the Middle East, something that has eluded some of the finest minds in the world for hundreds of years, certainly since 1948 with the founding of Israel. Many, many people, including the former President of the United States, spent hours and hours with the parties trying to get peace. Everybody is for peace; but in the words of Patrick Henry, "Peace, peace, there is no peace."

So, I did not pretend, I was not arrogant enough to decide I would set out a formula for peace. If I could do that, I certainly would do it. All I am trying to do is respond to the famous lines in Arthur Miller's play, "Death of a Salesman," where Willie Loman's wife, Linda, says, "A man is dying. Attention must be paid." Attention must be paid to what is going on in Israel.

How would you like to be a mother, and every day wonder if your little girl going to school will come home with all her limbs, with her life? It is a hellish way to live. I simply was trying to call attention to the horror, the indescribable horror of acts of terrorism, and show solidarity as a co-victim of horrible acts of terrorism. It is American to put your arms around a fellow democracy and not turn your back on them in their hour of need. That is what we were doing.

This simply says that when acts of terror occur, attention must be paid. It must be pointed out. We must shout about it, we must make an example of it, we must show the world the horror of what is going on. And maybe, just maybe, one day we will all get so sick of it we will not tolerate it anymore.

The gentleman from Michigan sets up a straw man. Not one word about peace. Everything we do is about peace, and objecting to terrorism is about peace, and showing solidarity to the Israeli people and to the Palestinian people.

The next time, if any, there is an atrocity, an act of terror by the State of Israel, bring a resolution to the floor. We will debate it. We will debate it. But I have not heard one. I have not seen one. Bring it to the floor and let us debate it.

Mr. RAHALL. Mr. Speaker, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from West Virginia.

Mr. RAHALL. Mr. Speaker, the gentleman just mentioned the Palestinian people. I wonder if that was mentioned in the resolution, expressing the concern for their plight as well. I wonder if that was in the resolution and I happened to overlook it.

Mr. HYDE. Mr. Speaker, reclaiming my time, the Palestinian involvement in the atrocity of last Saturday is mentioned, because this focuses on what happened in Jerusalem, when 26 women and children and men were killed and 1,200 were injured. That is what we are talking about.

Mr. Speaker, support our expression of solidarity with the victims of this horrible act of terrorism. Support the resolution.

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois (Mr. HYDE) be granted 2 additional minutes, because the gentleman mentioned me and I would like to have his attention on that matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Michigan.

□ 1500

Mr. DINGELL. Mr. Speaker, I do not propose to rebut what my dear and valued friend has said about me. I do not remember setting up a straw man, but I would like to say the gentleman has mentioned H. Con. Res. 253 which I sponsored earlier and with which the gentleman has suggested a great deal of sympathy. I wonder if maybe the committee could bring that proposal to the floor. It is a fair and even-handed statement. It is supported by the administration. It urges that the United States have as its policy the carrying forward of the Mitchell report. Why is it that we cannot have something like that before us?

Mr. HYDE. Mr. Speaker, I have no idea. If the staff will bring it to my attention, we will give it the most careful scrutiny. The gentleman from California (Mr. LANTOS) and I will do it together.

Mr. DINGELL. Mr. Speaker, I would be delighted to have the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) put that bill on the floor so that perhaps we could be together on something that is in the interest of the United States.

Mr. HYDE. Mr. Speaker, it would also be a pleasure to be with the gentleman from Michigan (Mr. DINGELL).

Mr. WAXMAN. I rise in strong support for H. Con. Res. 280 and join my colleagues in condemning Yasser Arafat and the Palestinian terrorists responsible for the massacre of innocent Israeli civilians.

In the past six months alone, Hamas suicide bombers have murdered teenagers at the discotheque in Tel Aviv, commuters on a rush hour bus ride in Haifa, pedestrians at a busy intersection in Afula, families eating lunch at a pizza store in Jerusalem, and a street filled with young Israelis and Americans out for a Saturday night in the heart of the nation's capital.

On a daily basis, the Tanzim and Force 17, Yasser Arafat's Fatah paramilitary forces, shoot at Israeli motorists on their way to work, school, or returning to their homes.

Instead of arresting, prosecuting, and outlawing these terrorists, Yasser Arafat has deliberately given them free reign, safe harbor,

and license to organize and carry out heinous attacks. Instead of condemning anti-Israel incitement in Palestinian media, schools, and mosques, he has contributed the free flow of hatred that seeks to legitimize violence. And in doing so, he has turned the Palestinian Authority into nothing short of the Taliban.

The horrific events of September 11 have tragically brought home to all Americans the terrorism that Israel has long been suffering. Our solidarity has never been stronger or more important.

Now more than ever, we must renew the common purpose, strategic goals and democratic ideals that are the cement of strong U.S.-Israel relations. We must join together with Israel in defending our citizens, our values, and our future from the shadow of terrorism.

That is why this resolution determines that the United States should break off all diplomatic relations with the Palestinian Authority unless immediate action is taken to destroy the Palestinian terrorist network and arrest the perpetrators of these terrorist crimes.

Yasser Arafat must be held accountable, and there is no reason to contemplate the creation of a Palestinian state unless he can demonstrate that the terrorism will end. So far he has been unwilling to achieve this for even seven days, giving neither Israel nor the United States reason to be confident that he has the will or ability to do so permanently.

But one thing is certain—Israel as a sovereign nation has the right to take all measures necessary to defend its citizens, and it is in the interest of the United States to support its ability to do so.

Now is the time for us to pressure Yasser Arafat to crush the terrorist networks within his grasp, and urge all civilized nations of the world to abandon the ongoing efforts by Arab and Islamic states to isolate Israel in this time of crisis.

Just hours ago in Geneva, an international conference convened to condemn Israel for violations of the Fourth Geneva Convention, which was adopted in response to Nazi atrocities during the Holocaust. The agenda included biased determinations on the final status of Jerusalem, Palestinian refugees, and the imposition of a United Nations observer force.

Only yesterday, the U.N. General Assembly overwhelming voted for resolutions advocating the creation of a Palestinian state, Israeli withdrawal from the Golan Heights, and rejecting Jerusalem's status as the capital of Israel as "illegal and therefore null and void."

These one-sided determinations are irresponsible and counterproductive. They devastate the constructive role the international community could play in ending the violence and terrorism that have taken so many American and Israeli lives.

I commend the Administration for staunchly opposing these forums, and I applaud its actions yesterday to freeze the assets of the charities and banks raising funds in the United States to support the terrorist activities Hamas and other Palestinian groups.

Today we must do more. We must pass H. Con. Res. 280 and let Yasser Arafat and the Palestinian terrorist organizations know that there is a line that separates outlaws from the

rest of civilized society and they have crossed it.

Ms. SCHAKOWSKY. Mr. Speaker, I rise in strong support of House Concurrent Resolution 280, and urge all members to vote in support of this measure that expresses our solidarity with the people of Israel at this difficult time.

Now we know; now we understand. As Americans, we know. We see the people running down the street in panic and it looks all too familiar. Now we know.

We hear the sirens and see the dead and injured, and as much as thought we knew, now we know.

We sometimes joked about Israelis and their cell phone, and now we know how it must feel to wait for the call from your teenager who is out for the evening with friends saying, "Mom, I'm OK," or just waiting for that call.

We now know the rage and frustrations of being attacked by those who prefer to die than live, and who plot and scheme to take innocent life with them.

We now know the courage and determination it takes to "just live your life" when "just going shopping, out to eat or riding the bus can be life threatening.

And while hopefully we will not know what it is like to live for half a century and more on constant high alert, we understand better now intolerable that must be.

And now that it happened to here, in a place many believed was immune to such an attack, we know that terrorists must be answered, and those who harbor or support terrorists must be held accountable.

And we know, as we pray for peace, leave space for peace, continue to work for the miracle of peace in this holiday season, we know that we must defend ourselves and our children.

And we know, as Americans who love Israel, that as people, as a community, and as nations we must be united more than ever before in defense of that tiny and precious plot of land, surrounded day in and day out by hatred and danger, where our brothers and sisters want only one thing, and that is to live in peace and freedom.

I commend the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) for introducing this important measure and I urge all of my colleagues to support it.

Mr. CRANE. Mr. Speaker, I rise today in support of H. Con. Res. 280. Like the recent attacks on our country, the terrorist bombings in Israel are horrific. Once again innocent civilians have been brutally murdered by terrorists. Israel is a democracy under siege. As the world's leading democracy the United States cannot, in good conscience, stand idly by while a democratic ally is being brutally attacked by evildoers.

For too long the Palestinian Authority has preached peace while terrorists use its territory as a safe haven. Even after President Bush endorsed the idea of a Palestinian state the attacks continued. If the Palestinian Authority wants to be a government it must act like one by stopping these suicide bombings from being planned and launched from its territory. The Palestinian Authority's leader, Yasser Arafat, has condemned the attacks. But he has done so before and the attacks

against Israel continue. Chairman Arafat must do more than offer sympathetic remarks. I applaud and support President Bush's response and hope that Chairman Arafat's actions will back up his words and stop these attacks.

Mr. FORBES. Mr. Speaker, I rise in strong support of H. Con. Res. 280, which extends our deepest sympathies to the people of Israel for the recent string of deadly terrorist attacks in their nation and expresses our sense of solidarity with them in this difficult time.

The people of Israel have long had to live with terror on their street, and the world has largely stood by and felt great sympathy but little need to act upon it. But these attacks come at a time of heightened awareness around the globe of the necessary of riding our communities of the evil face of terrorism. Peaceful people have been made prisoners in their own communities by those who give no thought to the deadly consequences of their actions and who spread venomous hatred for their fellow man.

On September 11th, those free and peaceful people said with one resounding voice that they would no longer allow that kind of evil to destroy our world.

The war against terrorism is not America's war alone. It is a fight that we lead for freedom-loving people everywhere. Though there may be fewer dead and less extensive damage, the horrific attacks that occurred over a 14-hour period this weekend in Israel are no less atrocious than the attacks our nation suffered on September 11th. The mothers and fathers who lost their children in each of those attacks cry the same tears and feel the same pain.

We, as a nation, must stand beside our friend, Israel, in this time of need and support her in the fight to provide a prosperous, peaceful, and secure future for her people. I urge my colleagues to support Israel by supporting this resolution.

Mrs. MCCARTHY of New York. Mr. Speaker. I rise in support of H. Con. Res. 280, of which I am a cosponsor.

On Saturday, December 1st, suicide bombers killed 10 teenage Israelis and wounded more than 150 others in downtown Jerusalem. On Sunday morning, just 14 hours after the first horrific attack, a suicide bomber boarded a local bus route in the northern port city of Haifa, killing 15 and wounding 35. The victims of these attacks range in age from 14 to 75; they include students, senior citizens, and a Filipino nanny. The terrorist organization Hamas claimed responsibility for their cowardly attacks.

Since September 11th, international attention has been deflected from the everyday acts of violence in Israel to the United States' war on terrorism. Recently President Bush brought the Arab-Israeli conflict back under public purview by sending U.S. peace envoy General Anthony Zinni to the region to promote a cease-fire and possible resumption of peace talks.

When Palestinian terrorists killed 26 and wounded 175 Israelis within a matter of 24 hours, Palestinian Authority Chairman Arafat's commitment to find and prosecute terrorists was called into question, and Israel subsequently launched its own war against terrorism. Twenty-four hours after the suicide

bombing in Haifa, and 36 hours after the bombings in Jerusalem, Israel retaliated against the Palestinian Authority by bombing chairman Yasser Arafat's headquarters in Gaza Strip, and police buildings in the West Bank town of Jenin.

I rise in agreement with Prime Minister Sharon and President Bush. As the chairman of the Palestinian Authority, Yasser Arafat has on more than one occasion voiced his commitment to peace, and his desire to fight terrorism. Yet words alone are not enough; they necessitate action. Yasser Arafat must take an active and responsible role in tracking and arresting those involved in terrorist activities. As the leader of the Palestinian people, Yasser Arafat must utilize his power to reign in the extraneous terrorist factions that continue to lash out at innocent Israeli civilians.

This resolution, H. Con. Res. 280, holds Arafat responsible for the actions of all his people, including Palestinian terrorists. It expresses the United States' solidarity with Israel during this difficult and emotional time. Now, more than ever, we must stand strong with our democratic allies to fight terrorist groups worldwide.

Ms. KILPATRICK. Mr. Speaker, today, I voted "present" on this Concurrent Resolution because it is my belief that the United States through the House of Representatives should remain a fair and honest broker in the Middle East. At a time when hostilities in the Middle East are escalating and all parties are looking to American officials to negotiate a fair and equitable solution, I believe that this Resolution is ill timed and diminishes the credibility of the negotiation process. It is imperative that all steps we take in this House secure our position as an impartial broker in the Middle East and this measure does not do this.

Make no mistake. I stand against terrorism and the killing of innocent civilians such as those that occurred in Israel this past weekend. I condemn them wholeheartedly. Both sides in the conflict, however, have the blood of innocents on their hands. Both sides in this conflict must make extraordinary and concerted efforts to come to the negotiating table and resolve the problems of the region. I support the findings of the Mitchell-Tenet Commission, which recommended that Congress not approve such resolutions. I regret that Congress is ignoring that recommendation. By doing so, the action of this chamber only serves to prolong the hostilities in that region and discourages both sides from engaging in the negotiation process. I strongly urge the parties to cease hostilities and do all they can to move forward with the Mitchell-Tenet recommendations.

Mr. Hyde, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. OTTER). The question is on the motion offered by the gentleman from Illinois (Mr. HYDE) that the House suspend the rules and agree to the concurrent resolution H. Con. Res. 280.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has concluded on all motions to suspend the rules.

Pursuant to clause 8, rule XX, the Chair will now put the question on motions to suspend the rules on which further proceedings were postponed yesterday and earlier today.

Votes will be taken in the following order:

H. Res. 298, by the yeas and nays;

H. Con. Res. 232, by the yeas and nays; and

H. Con. Res. 280, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

EXPRESSING SENSE OF HOUSE OF REPRESENTATIVES THAT VET- ERANS DAY CONTINUES TO BE OBSERVED ON NOVEMBER 11

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the resolution, H. Res. 298.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Maryland (Mrs. MORELLA) that the House suspend the rules and agree to the resolution, H. Res. 298, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 415, nays 0, not voting 18, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

EXPRESSING SENSE OF CONGRESS IN HONORING THE CREW AND PASSENGERS OF UNITED AIR- LINES FLIGHT 93

AMENDMENT OFFERED BY MR. MICA

Mr. MICA. Mr. Speaker, I ask unanimous consent that the text of House Concurrent Resolution 232, as proposed to be adopted under suspension of the rules, be modified by the amendment that I have placed at the desk.

The SPEAKER pro tempore (Mr. OTTER). The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MICA:

Whereas on September 11, 2001, acts of war were committed against the United States, killing and injuring thousands of innocent people;

Whereas these attacks were directed at the World Trade Center in New York, New York, and the Pentagon in Washington, D.C., which are symbols of the Nation's economic and military strength;

Whereas United Airlines Flight 93 was hijacked by terrorists as part of these attacks;

Whereas while Flight 93 was still in the air, passengers and crew, through cellular phone conversations with loved ones on the ground, learned that other hijacked airplanes had been used in these attacks;

Whereas during these phone conversations several of the passengers indicated that there was an agreement among the passengers and crew to try to overpower the hijackers who had taken over the aircraft;

Whereas it is believed that it was this effort to overpower the hijackers that caused Flight 93 to crash in southwestern Pennsylvania, short of what is believed to have been its intended target: Washington, D.C.; and

Whereas the crash resulted in the death of everyone on board the aircraft: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring). That it is the sense of the Congress that—

(1) on September 11, 2001, the passengers and crew of hijacked United Airlines Flight 93 possibly averted the use of that aircraft in a further terrorist attack on the United States by attempting to overpower the hijackers;

(2) the United States owes its deepest gratitude to the passengers and crew of Flight 93, and extends its condolences to the families and friends of Captain Jason Dahl, First Officer Leroy Homer, flight attendants Lorraine G. Bay, Sandra W. Bradshaw, Wanda A. Green, Ceecee Lyles, Deborah A. Welsh, and passengers Christian Adams, Todd Beamer, Alan Beaven, Mark Bingham, Deora Bodley, Thomas Burnett, William Cashman, Georgine Corrigan, Patricia Cushing, Joseph Deluca, Patrick Driscoll, Edward Felt, Jane C. Folger, Colleen Fraser, Andrew Garcia, Jeremy Glick, Kristin Gould, Lauren Grandcolas, Donald Greene, Linda Gronlund, Richard Guadagno, Toshiya Kuge, Hilda Marcin, Waleska Martinez, Nicole Miller, Louis J. Nacke, Donald Peterson, Jean Peterson, Mark Rothenberg, Christine Snyder, John Taligiani, and Honor Elizabeth Wainio; and

(3) a memorial plaque to these victims should be placed on the grounds of the Capitol, and a copy of the wording of the plaque, together with a copy of this resolution from the Congressional Record, should be sent to a designated survivor of each victim.

Mr. MICA (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 232, as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. MICA) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 232, as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 415, nays 0, not voting 18, as follows:

Mr. BONIOR changed his vote from “present” to “yea”.

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

EXPRESSING SOLIDARITY WITH ISRAEL IN THE FIGHT AGAINST TERRORISM

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, H. Con. Res. 280.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. HYDE) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 280, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 384, nays 11, answered “present” 21, not voting 17, as follows:

□ 1550

Mr. STARK changed his vote from “yea” to “present.”

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

HOUR OF MEETING ON THURSDAY, DECEMBER 6, 2001

Mr. ARMEY. Mr. Speaker, I move that when the House adjourns today it adjourns to meet at 9 a.m. tomorrow.

The SPEAKER pro tempore (Mr. OTTER). The question is on the motion offered by the gentleman from Texas (Mr. ARMEY).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BROWN of Ohio. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 322, noes 82, not voting 29, as follows:

[Roll No. 475]

NOES—82

NOT VOTING—29

□ 1611

Mr. MEEKS of New York changed his vote from "aye" to "no".

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. PENCE). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

□ 1615

AMIGOS TOGETHER FOR KIDS

The SPEAKER pro tempore (Mr. PENCE). Under a previous order of the House, the gentlewoman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, one of the most special aspects of our everyday lives is to be blessed with true friends. Amigos Together for Kids is an organization that has been in existence since 1991, and under the direction of Jorge Plasencia serves the needs of south Florida's forgotten children, those who are abused, neglected and abandoned.

Now celebrating its 10th anniversary, Amigos has many friends who have committed their energies toward the success of its programs, including Roxana Fernandez, Mirta Fuentes, Paul Hanson, Victoria Rodriguez, Daniel Rodriguez-Cuesta and Jorge Rouco, to name just a few.

The Amigos programs include Amigos Doctors for Kids, Children Helping Children, The Birthday Club, The Holiday Toy Drive, The Back-to-School Drive, and a new and ambitious program to serve adolescents in our area in south Florida.

Congratulations, Amigos Together for Kids. You are definitely fulfilling your mission of making south Florida's less fortunate young people feel truly loved. We really appreciate your dedication to our community's future, our children.

OPPOSE FAST TRACK
LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. LYNCH) is recognized for 5 minutes.

Mr. LYNCH. Mr. Speaker, I rise again in opposition to the so-called Fast Track legislation that will be debated in this House over the next 2 days. I do so for several reasons.

Firstly, because Fast Track contradicts the clear requirement of the United States Constitution, which vests the responsibility in this body, in the House of Representatives, to regulate trade with foreign nations. It also vests the power in the Congress to make any necessary laws for the exercise of that authority.

Secondly, I oppose Fast Track because it requires that these negotiations, very detailed, complicated negotiations, with great impact for not only our generation but those to come, it requires that these negotiations occur in secret; not in open debate on the floor of the House, but in secret.

I also oppose Fast Track because of our own past experience. We have seen what Fast Track has brought us, and we have been shown that it is a poor way to conduct, establish, and implement trade policy.

We have seen what it has done for workers, both in the United States and Mexico, through the example of NAFTA. We see now multinational corporations, General Motors, closing down plants in the U.S. and moving them over the border into Mexico, where our own auto workers are now forced to compete with auto workers in Mexico making 67 cents an hour. That is what Fast Track has brought us.

We have seen what it has brought to our environment, where corporations are continuing to seek to escape, avoid and evade responsible environmental standards in this country in order to go to other countries and to make a profit, make a profit by avoiding responsible environmental behavior.

We have seen what it has done to our food safety standards, where right now in this country under Fast Track legislation we can no longer keep out foods that do not meet our own food safety standards.

But last of all and most importantly, I oppose Fast Track because I think it is the single greatest threat to our representative form of democracy. It takes the power that has been vested in this body as representatives of the voters and gives it to the United States Trade Representative, who then, through agreements again in secret, delegates the authority to the World Trade Organization in Geneva, Switzerland. I think every Member in this body knows the chances of their own constituents exercising any right to petition to the WTO representatives in Geneva, Switzerland.

I think this is a bad policy for America. I think that we have a responsibility here to our constituents. I know they did not send me down here to give away the rights of the constituents in the Ninth Congressional District of Massachusetts, and I assure you that no Representative in this Congress has been so directed by their Congress.

THE LOCAL LAW ENFORCEMENT HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, I rise today to encourage the Republican leadership to bring the bill offered by the gentleman from Michigan (Mr. CONYERS), H.R. 1343, The Local Law Enforcement Hate Crimes Prevention Act, to the House floor. It is time to take action against crimes that are motivated by hate.

I appreciate all of my colleagues that are coming here this evening that are going to take their time and to speak in support of H.R. 1343.

In the past 3 months, crimes against Muslims, Arabs, Sikhs, Southeast Asians and anyone resembling these nationalities have increased significantly. The Council on Arab and Islamic Relations has compiled more than 1,400 reports of hate crimes since September 11. This represents a 51 percent increase in reported crimes against those of Middle Eastern descent since the attacks.

Our children are watching in horror as they and their moms and their dads, their brothers, their sisters and close friends, are being harassed, spit on, beaten and, even worse, killed. These hate crimes are happening in their neighborhoods, at their schools, and their places of worship. This Congress does not want to stand by and let our children be subjected to this kind of hate. We cannot. We should not. The 107th Congress must recognize the

problem at hand and must take effective measures to reverse this trend, and we can do that by bringing H.R. 1343 forward.

The stories of these hate crime victims are disheartening. In Poughkeepsie, New York, a high school student was harassed and attacked while another student yelled "I hate you, dirty Afghani," as he pelted him with rocks and plants.

In Dumfries, Virginia, a mother and her son attacked two Afghani American brothers, age 16 and 17. During school the son and a group of his friends approached the two Afghani teenagers and began taunting and hitting them. The mother entered the fight and hit the 17-year-old youth in the head. Luckily, both boys escaped into a neighbor's home and luckily neither was seriously injured.

In San Mateo, California, a gasoline bomb was thrown through the window of a Sikh family's home hitting a 3-year-old. Fortunately, the bomb failed to explode.

These stories are both unbelievable and intolerable. But, sadly, these acts of hate are rampant, and people of Middle Eastern descent are not the only victims affected by ignorance and hate.

Just a week ago, a hate crime occurred in my district. Three sophomores at a high school in my district assaulted a 17-year-old student because he was openly gay. The apparent leader of the assault paid two other boys \$10 each to beat up the victim. Our children cannot be subjected to such violence and such hate.

No one in America should live in fear because of his or her ethnic background, because of religious affiliation, because of gender, disability or sexual preference. This is especially true of our children.

That is why it is important to pass meaningful hate crime legislation, and to pass it now. We need to strengthen our existing laws, and we must protect people against all hate crimes. We must send a message, especially to our children, that hateful behavior is wrong and it will not be tolerated.

Our law enforcement officials need vigorous tools to fight and prosecute hate crimes. Yet existing Federal law is inadequate. That is why I am a strong supporter of the bill offered by the gentleman from Michigan (Mr. CONYERS), the Local Law Enforcement Hate Crimes Prevention Act.

For the first time under Federal law, this measure would add sexual orientation, gender and disability. In addition, it would expand Federal civil rights law to allow prosecution of hate crimes even if no federally protected activities were involved, such as voting or attending school. Also the bill would expand the circumstances under which the Federal Government could offer assistance to State and local governments to help prosecute these crimes.

Even though the bill is cosponsored by over 200 bipartisan Members, it has been cast aside. We must bring it to the floor, and we must pass it now.

HONOR THE FALLEN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Virginia (Mrs. JO ANN DAVIS) is recognized for 5 minutes.

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, today I would like to again take up the effort to pay tribute and honor the fallen who perished as a result of the attacks on September 11, 2001.

This growing list of over 3,000 names is comprised of many of the victims of the recent horrific attacks on our Nation, including the firefighters and policemen who willingly gave their lives in an attempt to rescue others. I intend to read these names for as many days as it takes to bring honor and recognition to those individuals who lost their lives or are still missing:

Alok Mehta; Raymond Meisenheimer; Manuel Emilio Mejia; Antonio Melendez; Mary Melendez; Manny Melina; Christopher D. Mello; Yelena Melnichenko; Stuart Todd Meltzer; Diarelia J. Mena; Dora M. Menchaca; Charles Mendez; Lizette Mendoza; Shevonne Mentis; Wolfgang Menzel; Steve Mercado; Wesley Mercer; Ralph Mercurio; Alan H. Merdinger; Yamel Merino; George Merino; Michael Dermott Mullan; Dennis Michael Mulligan; Peter Mulligan; Michael Joseph Mullin; James Donald Munhall; Nancy Muniz; Carlos Mario Munoz; Theresa "Terry" Munson; Robert M. Murach; Cesar Augusto Murillo; Marc A. Murolo; Raymond E. Murphy; Patrick Jude Murphy; Christopher William White Murphy; James Francis Murphy, IV; Brian Joseph Murphy; James Thomas Murphy; Edward C. Murphy; Kevin James Murphy; Charles Murphy; Robert Murphy; Susan D. Murrar; John Murray; Susan D. Murray; John "Jack" Murray; Fall Mustafa; Richard Todd Myhre; Louis J. Nacke; Robert Nagel; Mildred Naiman; Takuya Nakamura; Alexander J.R. Napier, Jr.; Frank Naples; John Napolitano; Catharine Nardella; Mario Nardone; Manika Narula; Shawn Nassaney; Narendra Nath; Karen S. Navarro; Joseph Michael Navas.

Mr. Speaker, today I heard as others were honored who were on United Flight 93, and it did my heart good to know we have them all in the CONGRESSIONAL RECORD.

Again, Mr. Speaker, I urge all my colleagues to join me in remembering these brave heroes, so that their names will go down in the CONGRESSIONAL RECORD, and they will not be just remembered as numbers, but will be remembered as people.

□ 1630

PASS H.R. 1343, THE HATE CRIMES PREVENTION ACT OF 2001

The SPEAKER pro tempore (Mr. PENCE). Under a previous order of the House, the gentlewoman from Maryland (Mrs. MORELLA) is recognized for 5 minutes.

Mrs. MORELLA. Mr. Speaker, as an original cosponsor of H.R. 1343, the Hate Crimes Prevention Act, I am committed to seeing this legislation enacted into law. It is really important. I also want to thank the gentlewoman from California (Ms. WOOLSEY), my friend and colleague, for her leadership on this issue.

Mr. Speaker, last year hate crimes legislation passed the Senate in a bipartisan 57 to 42 vote on June 20. We had over 190 bipartisan cosponsors in the House, regrettably not enough to gain House passage. Many fear that this legislation would create a new area of law, and this is simply not true.

H.R. 1343, which currently has 199 bipartisan cosponsors, will enhance the ability of Federal law enforcement to provide assistance to State and local prosecution of hate crimes and, in certain limited cases, ease the ability of Federal law enforcement to prosecute racial, religious, ethnic and gender-based violence.

The FBI has reported approximately 50,000 hate crimes have been committed in the past 5 years, with nearly 8,000 reported last year alone. And although these statistics are alarming, even more disturbing is the fact that groups monitoring such crimes report that the FBI's data collection method has routinely missed tens of thousands of cases, and the number of hate crimes is probably closer to 50,000 a year.

Why the discrepancy? Because participation in the FBI's annual hate crimes statistics report is voluntary, and several States do not fully participate. The FBI collects the data from local jurisdictions under the 1990 Hate Crime Statistics Act; and, unfortunately, little money has been allocated to train police officers to determine whether a crime was fueled by hate.

Mr. Speaker, now more than ever we need to provide law enforcement the tools and the resources they need to both report and fight against these senseless acts of hate and violence. These crimes are uniquely destructive and divisive. Their perpetrators seek not only to harm the immediate victim but to make a statement to an entire community.

Hate crimes are a disturbing barometer of the state of a nation. Notably, antiblack hate crimes accounted for 35.6 percent of all racial bias; anti-semitism accounted for 75 percent of all religious incidents; and people with substantial disabilities, approximately 15 percent of the population, suffer from violent and other major crimes at rates

many times higher than that for the general population. Research shows that this population is over four times as likely to be victims of crime than are people without disabilities.

Hate crimes based on sexual orientation also continue to rise and currently make up the third highest category after race and religion. Additionally, in the wake of the September 11 terrorist attacks, the Arab-American Anti-discrimination Committee has investigated, documented and referred to Federal authorities over 450 incidents of hate-related crime. Moreover, the Council on American-Islamic Relations has compiled over 1,200 complaints of hate attacks directed against American Muslims.

State and local authorities currently prosecute the overwhelming majority of hate crimes, and they will continue to do so with enhanced support of the Federal Government under the Hate Crimes Prevention Act.

Mr. Speaker, hate crimes represent an attack on the American ideal that we can forge one Nation out of many different people and requires a determined response from law enforcement. The Hate Crimes Prevention Act is a constructive and measured response to a problem that continues to plague our Nation: violence motivated by prejudice. Let us pass H.R. 1343. It is long overdue.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 10. An Act to provide for pension reform, and for other purposes.

PREVENTION OF TERRORISM ORDINANCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

Mr. PALLONE. Mr. Speaker, I am concerned about recent statements made by one of my colleagues, the gentleman from Indiana (Mr. BURTON), with regard to India. We will soon be voting on the Foreign Operations appropriations bill which will be providing very limited aid to India, the world's largest democracy and our strong friend in the politically unstable Southeast Asia region.

The gentleman from Indiana (Mr. BURTON) recently made critical statements to the press about India in an effort to persuade Members to not provide aid to India or to resume sanctions against India. He specifically referenced the Prevention of Terrorism Ordinance, or POTO, and stated that it was the most repressive law that India has ever considered.

Mr. Speaker, for the past 50 years, India has been forced to deal with severe cross-border terrorism in Kashmir and an upsurge of terrorist attacks throughout their nation. Since the September 11 attacks here in the U.S., India has experienced heightened terrorism in Kashmir; and, quite frankly, I have been reading about murders of innocent Kashmiris by Islamic militants on nearly a daily basis.

Just this morning I read about two new incidents that occurred yesterday. Suspected terrorists shot and killed a judge in Kashmir, along with his friend and two guards. This is the first attack on the judiciary of Jammu and Kashmir State.

The other incident was a suicide squad of a Pakistani-based guerilla group that killed at least five people at an Indian Army camp in Kashmir. This latest suicide attack is to be added to a long series of suicide attacks that have killed many innocent Kashmiris.

Mr. Speaker, as a result of violent terrorist attacks against India, the Indian President has issued the Prevention of Terrorism Ordinance, POTO. POTO would make provisions for Indian law enforcement officials to prevent and deal with terrorist activities. The current criminal justice system in India is not sufficient in prosecuting terrorists and, with passage of POTO, India will be provided the necessary law enforcement tools to prevent and effectively deal with terrorism.

I am not suggesting, Mr. Speaker, that the gentleman from Indiana (Mr. BURTON) or anyone else should not be able to speak out against POTO if they desire. We know that India is a vibrant democracy with an open political system. Its free press and democratic nature allows all voices and opinions to be heard. But I think the criticism is undeserved at this time.

I would like to draw an analogy between what is happening with POTO in India and what is happening with the Provide Appropriate Tools Required to Intercept and Obstruct a Terrorism Act, or PATRIOT Act, in the United States. This analogy was conveniently overlooked by the gentleman from Indiana.

In October of this year, the U.S. Congress passed the PATRIOT Act, which gave law enforcement officials more tools to detect, apprehend, and prosecute terrorists. In the aftermath of September 11, Congress was required to act quickly to pass measures to address the immediate and long-term security, recovery, and financial needs of the country.

There was controversy and there still remains criticism of the PATRIOT bill from both the right and the left. Members protested that it would grant the government too much power and endanger civil liberties. However, the administration called for immediate action and, while moving the bill through

Congress, several provisions were either dropped or modified and a bill did pass.

From what I understand, the Indian Parliament is planning on going through a similar process of modifying some provisions in their ordinance. It is likely that the bill will pass and be enacted into law, thereby affording Indian officials the authority to deal with the growing terrorist threat facing India that the normal criminal justice system could not address sufficiently.

Mr. Speaker, I believe that unusual circumstances in the U.S. call for these types of measures, and the same holds true for India. A true parallel can be drawn here for the two largest and most vibrant democracies in the world. Unfortunately, both of these countries are now combating terrorism.

The gentleman from Indiana (Mr. BURTON) I think is incorrect in accusing India of being repressive by enacting this law. His strategy to bash India is clearly a pattern. It is no surprise that these types of statements come at a time when we are providing aid to India. There is no justification for ending the limited aid that we provide to India, and there is no rhyme or reason to cutting back or putting back in place the sanctions against India that should have been lifted a long time ago.

My point, Mr. Speaker, is that the gentleman from Indiana's efforts to implement such things are simply wrong. We do not need to go back to the sanctions, and we certainly should not punish India for essentially doing the same thing that the United States has done in the aftermath of September 11.

U.S. SHOULD PRIORITIZE SPENDING TO AVOID DEFICIT SPENDING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SMITH) is recognized for 5 minutes.

Mr. SMITH of Michigan. Mr. Speaker, the question I would like to ask my colleagues is how much more, how much deeper should we go in debt in this country?

The current authorized debt that we passed several years ago is \$5,950 billion, and we were actually projecting just a few months ago, last May, that we would not have to increase the debt limit. Our current debt, the debt limit as passed by law is \$5,950 billion. The current debt is \$5,860 billion. So if we implement what we are talking about for next year's budget, if all of the bills that have been passed in the House were implemented, then we are going back into deficit spending, which means we are going to have to increase the debt of this country.

It seems to me that we should be budgeting in a way that every family

has to budget, that every business has to budget, and that if something comes up that is very important we look at other portions of that budget that we might reduce in order to accommodate the higher priority spending. In this case, I would suggest, Mr. Speaker, to my colleagues that the higher priority spending is to assure security and to do what we can to make sure that the economy again comes back strong as quickly as possible.

But if we do that without going into debt like we were some years ago, driving the debt of this country up, if you will, driving the mortgage that our kids and our grandkids are going to have to pay off because of our excessive spending, if we are not to go back into that kind of deficit spending, then we are going to have to prioritize.

How do we prioritize? Is there some spending of this Congress, is there some pork spending, is there some spending that is less important than driving us deeper into debt? Let me just suggest, as we discuss economic stimulus packages, at what point of overspending that is going to result in higher interest rates. Overspending means the government has to borrow more money. We go into competition with business and individuals for that available money supply out there; and, in fact, Congress bids up interest rates to get what they want. So at what point do we decide that increased interest rates are as much of a downer for economic recovery as maybe some stimulus package or some spending that some Members say are important to their economy locally? At what point does it balance? How much should we go in debt in future spending?

I would suggest to my colleagues that the gimmick of the lockbox that we passed, Democrats and Republicans together, was a good effort, suggestion, indication, that we would not go back to spending the Social Security surplus. This year, Social Security is going to bring in a surplus of about \$160 billion. But the way we are going, we are going to spend all of that Social Security surplus. I say this is not good. I say that belt-tightening is called for, and prioritization of spending is called for.

So I would not only suggest to this Chamber but certainly to the Senate, certainly to the President and the administration, to start prioritizing spending so that we minimize the amount that we are going to drive our kids and our grandkids into indebtedness that sometime, someplace, somehow, they are going to have to pay off.

Last May, let me just tell my colleagues how rapidly things have changed. Last May, the Congressional Budget Office, the CBO, estimated that our surplus for this 2002 fiscal year would be \$304 billion. \$304 billion surplus. Now, with the bills that have

passed the House, with the bills that have passed the Senate, all of them have not passed the Senate, but with all of the appropriation bills and the stimulus package, we are actually now deficit spending, spending all of the Social Security surplus, spending all of the Medicare-Medicaid surplus and going back into debt, which means that sometime our kids are going to have to come up with either the increased taxes or the reduced living standards from government that we have provided to date.

Mr. Speaker, in conclusion, let me say that I think there are a lot of areas of spending that are of lesser importance, and simply because the lockbox has now been, if you will, broken open, is not the excuse to spend all kinds of money for all kinds of projects.

□ 1645

IN SUPPORT OF INCREASED FUNDING FOR HOMELAND SECURITY

The SPEAKER pro tempore (Mr. PENCE). Under a previous order of the House, the gentleman from Rhode Island (Mr. LANGEVIN) is recognized for 5 minutes.

Mr. LANGEVIN. Mr. Speaker, yesterday the Senate Appropriations Committee passed the defense appropriations bill containing \$35 billion in funding to enhance our Nation's efforts to combat terrorism.

Last week, the House missed an opportunity to do the same. The ranking member of the Committee on Appropriations had proposed an amendment to the defense appropriations act to add \$7.2 billion for homeland security. Unfortunately, the rule failed to protect this amendment from a point of order, and the House was prevented from voting on one of the most important issues facing Americans today.

Considering the Bush administration issued a third terror alert on Monday, it is imperative that Congress act now to provide greater security for the American people. Since September 11, States and cities have been forced to dig deep into their coffers to pay for unexpected emergency programs. I have met with Rhode Island officials to learn how they have responded to this crisis and to gauge their need for additional counterterrorism and security improvements.

In the 6 weeks following the terrorist attacks, my State spent \$18 million on homeland security and needs \$56 million more to upgrade emergency response in public health systems. State and local governments have done an exceptional job at pinpointing and prioritizing areas in need of improvement to ensure the safety of their citizens, and Congress must act now to provide them with the resources that they require.

Rhode Island's leaders recognize that law enforcement and emergency responders represent the first line of defense in the domestic fight against terrorism. As a result, they hope to invest \$5.8 million for improvements in coordinated emergency response efforts. Through new equipment and training for hazmat teams, the State will be better prepared to deal with the threat of weapons of mass destruction.

Also, the anthrax attacks highlight the need for a strong public health infrastructure. Rhode Island has proposed a \$48 million plan to enhance medical surveillance, research, and investigation. Our health officials must be prepared to identify a biological attack in its early stages, respond swiftly to the threat, and prevent further contamination.

As an original cosponsor of the Bioterrorism Prevention Act of 2001, which would provide \$7 billion to improve our national public health infrastructure, I applaud the gentleman from Wisconsin (Mr. OBEY) for proposing funding to address the threat of bioterrorism in our communities.

One particularly important provision included in the Obey amendment was a budget increase for the Coast Guard, which has now taken on new responsibilities since September 11. Daily life of Rhode Island is intricately tied to the ocean and Narragansett Bay. Commercial fishing netted \$79 million for the State's economy in 1999, and recreational boating is a popular pastime among our residents.

The Coast Guard's dependable presence and its work to keep our seaways safe have made them well respected among our boaters and our residents. However, the Coast Guard has been plagued by dwindling budgets in recent years, preventing personnel increases and equipment improvements. As a result, of the 41 nations with coastal patrols, the U.S. Coast Guard now has the 39th oldest fleet.

Nonetheless, the Federal Government expects the Coast Guard to patrol the Nation's 361 ports and increase inspections of foreign vessels, and 121 Rhode Island reservists have been called to this mission. Commandant Admiral James Loy has pleaded with Congress for years to raise funding levels for the Coast Guard, but we have again taken the wind out of their sails.

Moreover, the Obey amendment would have provided critical funding to strengthen our border patrol. Each day, 1.25 million people, 500,000 vehicles, and 50,000 containers cross our borders; yet far too few vehicles, containers, packages, and other possessions are properly checked. We must provide the Border Patrol with the resources needed to detect and prevent terrorism at our borders.

Although the House was not able to address these and many other concerns by voting on the Obey amendment, I

strongly encourage my colleagues to continue pushing for increased homeland security funding so that we may provide Americans the protection and peace of mind that they demand and that they deserve.

Mr. FILNER. Mr. Speaker, will the gentleman yield?

Mr. LANGEVIN. I yield to the gentleman from California.

Mr. FILNER. Mr. Speaker, I want to thank the gentleman for raising these issues, especially his statement about the Coast Guard. I represent San Diego, California; and we only inspect less than 10 percent of the ships coming in. We need more positions for the Coast Guard. I thank the gentleman for his efforts here.

Mr. LANGEVIN. I could not agree more.

HATE CRIMES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

Mr. CONYERS. Mr. Speaker, since the April 3, 2001 introduction of H.R. 1343, the Hate Crimes Prevention Act, more than 200 members (202) from both sides of the aisle have added their voices to the call for comprehensive legislation that will provide assistance to state and local law enforcement and amend federal law to streamline the investigation and prosecution of hate crimes.

This legislation is a constructive and measured response to a problem that continues to plague our nation—violence motivated by prejudice. The legislation is designed to address two significant deficiencies in the existing bias crime law enforcement framework. First, the legislation loosens the overly restrictive federally protected activity requirement under existing hate crimes law. Second, the legislation expands the jurisdiction of the federal government to reach violent conduct aimed at victims on the basis of their gender, sexual orientation or disability status.

Title 18, United States Code, Section 245, is one of the primary statutes used to combat racial and religious violence. At the time of its passage in 1968, a number of members of Congress wanted to limit the reach of the statute. They accomplished their goal by including a dual intent requirement. To establish a violation under Section 245, a federal prosecutor must prove that a defendant acted, for example, because of the victim's race and because the victim was exercising one of a limited category of federally protected rights (e.g., serving on a jury, voting or attending public school).

The original version of the statute contained a less restrictive, but still substantial, intent requirement that the government prove the defendant acted while the victim engaged in a federally protected activity.

This dual intent requirement has substantially hampered the hate crimes enforcement by the Department of Justice. There are numerous examples of heinous acts of violence that DOJ has either been unable to prosecute, or has been unsuccessful in prosecuting, due to the limitations of Section 245.

One of the most egregious examples of the problems under current federal law occurred in a 1994 Texas hate crimes prosecution. A federal jury acquitted three white supremists of civil rights violations arising out of an incident where they stalked the street of Fort Worth hunting for African-American victims. Although the jury agreed that the defendants' actions were racially motivated, they acquitted the assailants because they could not conclude that they intended to deprive the victims of a federally protected right.

The Hate Crimes Prevention Act would correct this deficiency by expanding the reach of federal jurisdiction to cover serious, violent bias crimes. Under the bill, hate crimes that cause death or bodily injury because of prejudice can be investigated federally, regardless of whether the victim was exercising a federally protected right.

This legislation will also address inconsistencies in the coverage of current federal, state and local bias crime provisions. Current law does not permit federal involvement in a range of cases involving crimes motivated by bias against the victim's sexual orientation, gender or disability. This loophole is particularly significant given the fact that five states have no hate crime laws on the books, and another 21 states have extremely weak hate crimes laws.

Our bill will expand the jurisdiction of federal law to cover sexual orientation, gender or disability, so the federal government will no longer be handicapped in its efforts to assist in the investigation and prosecution of hate crimes.

In addition, through an Intergovernmental Assistance Program, federal authorities will be able to provide technical, forensic or prosecutorial assistance to state and local law enforcement officials. In addition, the legislation authorizes the Attorney General to make grants to state and local law enforcement agencies that have incurred extraordinary expenses associated with the investigation and prosecution of hate crimes.

The Hate Crimes Prevention Act is endorsed by notable individuals and over 175 law enforcement, civil rights, civic and religious organizations, including: President Bush's Attorney General Dick Thornburgh; 22 State Attorney Generals; National Sheriffs' Association; International Association of Chiefs of Police; U.S. Conference of Mayors; Presbyterian Church; Episcopal Church; and the Parent's Network on Disabilities.

Poll after poll continues to show that the American public supports hate crimes legislation, including legislation inclusive of sexual orientation. A new Kaiser Family Foundation poll released last month shows that 73 percent of Americans support hate crime legislation that includes sexual orientation.

Passage of a comprehensive law banning hate violence is long overdue. It is a federal crime to hijack an automobile or to possess cocaine, and it ought to be a federal crime to drag a man to death because of his race or to hang a man because of his sexual orientation. These are crimes that shock and shame our national conscience and they should be subject to federal law enforcement assistance and prosecution.

THE LOCAL LAW ENFORCEMENT HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Wisconsin (Ms. BALDWIN) is recognized for 5 minutes.

Ms. BALDWIN. Mr. Speaker, I rise today to urge the House to pass H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act. Passage of hate crimes legislation is long overdue.

As the House of Representatives fails to act, the list of victims of hate crimes grows every day. One such victim was murdered in Milwaukee, Wisconsin, last month on November 11. Juana Vega was shot repeatedly by her girlfriend's brother outside her girlfriend's family home. According to friends of the victim, the suspect made repeated threats, explicitly stating that he would kill the victim because of her sexual orientation.

Unfortunately, Mr. Speaker, this tragic situation repeats itself far too often in our country. We must act to address it now. It is unfortunate that hate crimes occur, but they do. It is irresponsible to deny that there are individuals who seek to commit violence against an individual because they may be gay, lesbian, a woman, or disabled, the people that we seek to protect with the passage of this legislation.

It has been argued that we cannot see into a criminal's heart or mind, that we cannot determine their motive and intent, and therefore, cannot dole out appropriate justice. Yet, the most ancient concepts of justice still with us today consider the intent of those perpetrating a crime. Should we not consider the intent of a man or woman who kills or maims because of their hatred of an entire group, class, or race of people?

A Member of the other body, the former chairman of the Senate Committee on the Judiciary, said last year, "A crime committed not just to harm an individual but out of the motive of sending a message of hatred to an entire community is appropriately punished more harshly or in a different manner than other crimes."

Hate crimes are different than other violent crimes because they seek to instill fear in an entire community, be it burning a cross in someone's yard, the burning of a synagogue, or a rash of beatings of people in proximity to gay-identified establishments. This sort of domestic terrorism demands a strong Federal response because this country was founded on the premise that persons should be free to be who they are without the fear of violence.

Mr. Speaker, this House needs to pass the Local Law Enforcement Hate Crimes Prevention Act as expeditiously as possible. We need to do everything that we can to prevent hate crimes like the murder of Juana Vega.

EXPRESSING SUPPORT FOR PAS- SAGE OF MEANINGFUL HATE CRIMES PREVENTION LEGISLA- TION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. MCGOVERN) is recognized for 5 minutes.

Mr. MCGOVERN. Mr. Speaker, I rise today to join with the gentlewoman from California (Ms. WOOLSEY), the gentlewoman from Maryland (Mrs. MORELLA), the gentleman from Georgia (Mr. LOUIS), the gentlewoman from Wisconsin (Ms. BALDWIN), and others here today to express my strong support for the passage of meaningful hate crimes prevention legislation, and in particular, the Local Law Enforcement Enhancement Act of 2001, which I am proud to be a cosponsor of.

During these difficult times, it is critical that we stand together as one people united against a common enemy. In the past months we have witnessed the worst of humanity. On September 11, over 3,500 of our fellow human beings were murdered by extremists whose sole motivation was a pure hatred of America and the freedom and diversity that define our Nation. We must combat this horrible act by holding those responsible to account, and we must combat this horrible act by sending a powerful and clear message to the world that we are a Nation that values tolerance, acceptance, understanding; and we are a Nation that celebrates our diversity.

At no time in the great history of this Nation has it been more important for us to take a stand against hatred, scapegoating, and prejudice that can affect and destroy a society. Never has it been more important for us to reach out to our friends and neighbors of Arabic descent or of the Islamic faith, demonstrating how much we value them as members of our community.

Nothing would aggravate and undermine the forces that committed the horrible atrocities of September 11 more than redoubling our efforts to protect and respect and uphold the rights of all.

Mr. Speaker, since September 11, hate crimes against Muslim and Arab Americans and immigrants have increased all over the country. From small towns to large cities, we have seen incidents of physical and verbal abuse. More than 1,200 cases of hate-motivated attacks or assault against members of the Muslim and Arab communities have been documented in just 3 months.

As Members of Congress, we must act now to reassure our American Muslim and Arabic communities that they and their families are safe and welcome and we value their presence in our country.

America has always been a Nation of tremendous diversity. As our men and women in uniform risk their lives to protect our way of life, nothing could

send them a stronger message of support than an America that finds strength in the differences in heritage and beliefs that make us uniquely American. Bias, bigotry, scapegoating, prejudice, discrimination, and hateful persecution have no place in American society. It is time we solidified such a position with the full force of the law.

Dr. Martin Luther King, Jr., once said, and I quote, "Injustice anywhere is a threat to justice everywhere." Mr. Speaker, as we fight to bring those who have attacked us to justice, we must not overlook the injustices that are still present in our own society. Hate crimes are serious and well-documented problems, yet they remain inadequately recognized. The current Federal hate crimes statute is limited to crimes motivated by discrimination on the basis of race, religion, color, or national origin. Unfortunately, hate crimes committed in this country are broader than that. Current law excludes other communities of individuals who are victimized just as often for other reasons.

The importance of congressional action on this crucial issue cannot be overemphasized. Unlike other crimes, hate-motivated crimes not only affect individuals or families, they permanently scar entire communities. Only by recognizing and combatting these crimes can we all begin to eradicate the bias and bigotry that remains all too prevalent in today's society.

We must work to rid our schools and our neighborhoods and our communities of hatred. We owe it to ourselves, we owe it to each other, and we owe it to our children who look to us for guidance.

The time has come to break down the walls of ignorance once and for all and replace them with communities built on tolerance, justice, and compassion. The perpetrators of hate crimes are not the only guilty parties. Silence, complacency, and indifference in the face of such brutal attacks are allies, as well.

Mr. Speaker, I urge all my colleagues to join in the fight for a Nation united against the evils of bigotry and hate directed against anyone in our society. Let us bring this legislation to the floor that has been championed by the gentleman from Michigan (Mr. CONYERS) so valiantly over the years. Let us pass it through this House, and let us send a message to the rest of the world that the United States of America will not tolerate hate crimes. It is a message that needs to be sent now.

A TRIBUTE TO DR. KAMLESH GOSAI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MASCARA) is recognized for 5 minutes.

Mr. MASCARA. Mr. Speaker, I rise today to recognize Dr. Kamlesh B.

Gosai, this year's winner of the Country Doctor of the Year Award.

Let me begin by saying that Dr. Gosai best exemplifies and illustrates the Hippocratic oath he took upon entering the practice of medicine. He is a shining example of what that oath is all about. He is a great human being.

This award was created to recognize outstanding rural physicians throughout the United States, and Dr. Gosai definitely is deserving of this recognition.

□ 1700

This is a tribute to his dedication, skill and caring for his patients, a rare commodity in a time when health care is undergoing questionable change.

Dr. Gosai always has time for his patients. He practices out of the Southwest Medical Center in Bentleyville, Pennsylvania, a small community of about 2,300 people where I met my wife Dolores. While many physicians choose to practice medicine in larger, more populated areas, Dr. Gosai has chosen to make his home in the Mon Valley region of southwestern Pennsylvania.

Dr. Gosai is the perfect example of how a good country doctor can change a community in a positive way. He brought a state-of-the-art medical center to Bentleyville and recruited many specialists to enter his practice. He also opened a medical center in 1993 in nearby Charleroi, Pennsylvania, ironically where I live, which now employs nearly 100 and offers a wide range of specialty practices.

In addition to being on call 24 hours a day, it is not uncommon for Dr. Gosai to see 75 patients a day in his office or make himself available for last-minute exams or emergencies; and, yes, he still makes some house calls.

As key health care providers for more than 60 million people, country doctors are an integral part of America's health care system, and the people of the 20th District of Pennsylvania are very fortunate to have a dedicated physician like Dr. Gosai living in their own backyard.

Mr. Speaker, I know the entire House of Representatives joins me in congratulating Dr. Gosai on this well-deserved honor. He is a credit to his profession.

TRIBUTE TO THE LIFE OF PATRICIA A. JONES

The SPEAKER pro tempore (Mr. PENCE). Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I rise to pay tribute to an outstanding woman, Mrs. Patricia A. Jones, who in her own right provided immeasurable services, especially to children and social service agencies in Chicago, Illinois, and its surrounding suburbs.

In addition to that, Mrs. Jones is also the beloved wife of the Senate Demo-

cratic Leader of Illinois, Emil Jones, Jr. She passed away Sunday past at 11 p.m. at St. Francis Hospital, a young woman, only 63 years old.

She was as much a partner in her husband's public life as she was in his private life. Emil and Patricia Jones were wed on December 4, 1974. She was born in New Orleans, Louisiana, on August 9, 1938, the third of eleven children. She went through the New Orleans school system where she became a teacher.

Of course, ultimately, she came to Chicago and is survived by her husband; two sons, John Sterling and Emil Jones III; and a nephew, Emil Alvarez Jones, whom she raised. She is also survived by a number of other relatives.

She attended Loyola University in Chicago and graduated from Chicago State University.

As a young adult, Mrs. Jones moved with her family to Chicago. She was employed by the City of Chicago, administering the Title 20 program for a number of years, which included preschool, Head Start. She also taught in the preschool program at the YMCA in Chicago.

She served on the school board as President of Holy Name of Mary Catholic School in Morgan Park. She was active in her church, Holy Name Mary Catholic Church in Morgan Park, where she was a former member of the Ladies Guild. She was a member of AKA Sorority and a board member of the Beverly Arts Center.

We extend our condolences to the minority leader in the Illinois Senate, Emil Jones, on the death of his wife, but we value her contributions and know that they will long remain not only a part of Chicago but a part of the Nation.

FOLLOW THE WILL OF CONGRESS: REMOVE MEXICAN SEWAGE FROM U.S. SOIL AND WATER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. FILNER) is recognized for 5 minutes.

Mr. FILNER. Mr. Speaker, I rise today to tell my colleagues about an incredible situation that is going on in my district in San Diego, California. I have running through my district 50 million gallons of raw sewage a day. I doubt that any congressman in America could say that, 50 million gallons of raw sewage coming through his or her district.

This is because of the nature of the geography in southern California and the unfortunate situation that our sister city across the Mexican border, Tijuana, does not have facilities to treat all its sewage, so sewage which is untreated eventually finds its way into the Tijuana River Valley, across my district and then empties into the Pa-

cific Ocean. It is a terrible environmental problem which both countries are trying to solve.

I have worked on this problem for over a decade as a member of the San Diego City Council and as a member of this Congress. We found a win-win-win way to deal with this issue that had been plaguing us for 50 years.

A joint U.S.-Mexico private firm made a proposal to build a sewage treatment plant using the most advanced environmental techniques to build such a plant in Mexico where the water could be treated to a level that could be reclaimed for agriculture, commercial or even drinking use, which Mexico desperately needs, and this treatment would be paid for by the United States government.

It is the citizens of this country that are being affected by the potential disease and the environmental problems. So we thought, given the situation, that a private firm working with both countries could not only treat the sewage, but solve the U.S. environmental problem, and help recycle water to Mexico.

My former colleague and I, Mr. Bilbray, convinced this Congress that such a plan was workable, and, in fact, this Congress a year ago passed a law, Public Law 106-457, to do exactly what I just outlined, to solve a 50-year-old problem. Title VIII of that law authorized the International Boundary and Water Commission to begin negotiations with Mexico to provide for the treatment of Mexican sewage that flows into the United States. This Congress decided that unanimously.

Recently, the new commissioner that was appointed by President Bush for the International Boundary and Water Commission, Mr. Carlos Ramirez from El Paso, decided on his own, without talking to any of us here in Congress, ignoring decades of litigation by environmental groups, ignoring all the work that had been done by the political leaders, local, State and Federal, in San Diego and in Mexico, repeatedly said recently in public meetings and to the press that that law had no force, that he was not required to, in fact, undertake those negotiations and build the treatment plant mandated by Congress. In fact, he said we are going to do it with an expensive process that this Congress and our whole border community rejected a decade ago.

I do not know why the new commissioner started off his work in this fashion. I offered to meet with him. No meeting could be arranged, but I took this problem to the chairman of the subcommittee that had worked out this legislation a year ago, the gentleman from Tennessee (Mr. DUNCAN), and he agreed to hold an oversight hearing on the implementation of the law that required the sewage treatment plant to be built cooperatively with Mexico.

This hearing will be scheduled for this Wednesday, December 12. I hope that the administration spokesman, Mr. Ramirez, his employer, the State Department, the Office of Management and Budget will explain why a law that was passed by Congress a year ago has not been implemented.

This law is environmentally sound. It is good for the taxpayers of this Nation. It solves a problem that has been with us for 50 years. What Mr. Ramirez wants to do is treat half the problem, do it more expensively and in an environmentally insensitive way. I do not understand that at all, and I am glad the gentleman from Tennessee (Mr. DUNCAN) agrees with me that he should explain this to Congress.

So we will have this oversight hearing which is the role of Congress to have. It is about time the International Boundary and Water Commission followed the will of this Congress.

CHANGING THE PRESCRIPTION COPAY FOR VETERANS

The SPEAKER pro tempore (Mr. SIMMONS). Under a previous order of the House, the gentleman from Ohio (Mr. STRICKLAND) is recognized for 5 minutes.

Mr. STRICKLAND. Mr. Speaker, I wanted to take a few moments this evening to explain something that is happening to veterans that I think many Members of this House may not be aware of and would like to correct.

Currently, a veteran who receives prescription medications as an outpatient for a service-connected disability is charged a \$2 copay per prescription, and the Veterans Administration is contemplating increasing that copay from \$2 per prescription to \$7 per prescription, a 250 percent increase in one fell swoop.

Why are we doing this? I have checked with the Chilicothe, Ohio, Veterans Hospital and talked with their CEO. He tells me that, at that hospital, the average veteran who gets prescription medications takes, on average, at least 10 prescriptions per month. If we take \$7 per prescription and multiply it by 10, that is \$70 a month; and then many veterans get their prescriptions for 3 months at a time. So 70 times 3 finally starts adding up to a sizeable amount of money, especially for a veteran with a service-connected disability who is trying to live on a fixed income.

It is unconscionable to me that at this time in our Nation's history, when we are paying honor to those who are fighting for us and for those who have fought for us, that we would increase the costs of prescription medications; and we are doing it at a time, quite frankly, when we are making huge, multibillion dollar tax breaks available to wealthy corporations.

Who do we care about in this House? Wealthy corporations or the men and

women who have served this country honorably and who are sick and in need of medication and who oftentimes cannot afford that medication, even with a \$2 copay?

I have introduced H.R. 2820, and it is a simple bill. It just simply says that the Secretary of the Veterans Administration cannot increase this copay amount beyond the \$2 for the next 5 years. Surely, surely, we can find the resources to do this good thing. I am calling upon my colleagues, and I am doing this on behalf of those who have served our country, the men and women who have paid the price, given of their time, given of their bodies and been willing to give of their very lives to make sure that those of us who serve in this Chamber can do so in freedom.

So I call upon my colleagues to join me in cosponsoring H.R. 2820. It is the least we can do for those who have done so much for us.

ECONOMIC STIMULUS PACKAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. CUNNINGHAM) is recognized for 5 minutes.

Mr. CUNNINGHAM. Mr. Speaker, I do not plan on taking the full 5 minutes. But we have just gotten through with the defense bill and the Select Committee on Intelligence has just passed its conference report, and our Nation is at war, and above the regular amount the President has seen fit to give a \$40 billion supplemental to try not only to help people in New York, people at the Pentagon, but this Nation heal itself.

Post-September 11 has seen over 700,000 jobs lost, and yet we still have 99 percent of the American people that have their jobs, but if someone is one of those of that 1 percent that has lost their job, it is critical to them. Many of the people in my own district that has happened to.

We tried to protect those jobs, and I think that we need to do more. We also need to help people temporarily. But even more important than that, Mr. Speaker, we need to stimulate the growth of the new and the old jobs through different measures, economic measures.

□ 1715

Seventy-five percent of the jobs created are created by small business in this country, and I believe that tax relief for businesses will act as a stimulus that will enable those businesses to hire more people, to hire back some of those 700,000 that have lost their jobs.

We all know that a company does not just fire people because it wants to; it is because they are working with a margin. And when they start losing

money, either because they are overtaxed or because of the system or something like September 11 happens, they are forced to let people go. I have people in the hotel industry that only have about a 25 percent occupancy right now. That is devastating to those industries, and this has happened across the board.

So the things we can do to stimulate the economy is, one, tax relief for those businesses. That is important in an economic stimulus package, as well as direct pay to some of those folks that need the help immediately.

Secondly, there has been a lot of debate on trade in this House, and I think very positively, both those for and opposed. But I believe whether you are a union worker or come from the private sector, our workers in this country are second to none. Given fair trade and given an equal chance, they can compete with any nation.

Some people debate and look at the trade deference. Well, ask anybody, they would rather be from a country that has higher pay, that has higher quality, that has higher technology than a country that has low pay, low technology, but yet is able to flood the markets. It just stands to reason. It is common sense.

Trade is also important to my State, California. The number one commodity in California is agriculture. Those that say they are friendly to agriculture should have no second thought on the vote that is coming to us tomorrow or the next day on the trade bill sent down by the President. The bill tomorrow will improve existing and future trade agreements. Not necessarily new trade agreements, but it will enable the President to shore up problems that many of my colleagues on the other side have brought forward, and I think in some cases rightfully so.

Mr. Carville, who used to work for President Clinton, once said, "It's the economy, stupid." If we can give tax relief to businesses and stimulate jobs, if we can pass trade agreements that will help benefit our workers and shore up existing problems, I think that will help.

My constituents want three kinds of security: they want personal security; they want to be safe in their schools and on their streets; they want to be able to open up a piece of mail that does not have anthrax in it; they want economic security, to know they are not going to lose their job; and they want national security. For those things, Mr. Speaker, I ask my colleagues to support both the economic package, the stimulus package that was passed out of this House, and to support the trade agreement that will be brought forward this week.

SUPPORT H.R. 1343, LOCAL LAW ENFORCEMENT HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore (Mr. PENCE). Under a previous order of the House, the gentleman from Texas (Mr. RODRIGUEZ) is recognized for 5 minutes.

Mr. RODRIGUEZ. Mr. Speaker, I am here today to call attention to the dramatic rise of hate crimes and voice my support of H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act.

Last Congress, we came closer to enacting legislation that would have reaffirmed our commitment to prosecuting those who commit hate crimes. The Senate passed the hate crimes amendment on the defense appropriations act. The House subsequently passed a motion, which the majority of us supported, to instruct the conferees to retain the language contained in the Senate version of the defense authorization bill. Unfortunately, the conference committee ignored the will of the House and the Senate and chose not to retain the hate crime provisions in the final conference report.

Opponents of the hate crime measure have charged that it grants preferential treatment to certain groups. This is totally a false presumption. Heinous crimes that target victims solely on the basis of their race, their color, religion, national origin or sexual orientation deserve enhanced punishment. Because hate crimes are as diverse as the persons who commit them, we are all vulnerable to becoming victims. Hate crime legislation is a reaffirmation, not a denouncement of our Nation's commitment to civil rights and equal protection under the law for all Americans.

Furthermore, I reject the notion that a hate crimes bill would undermine one of the most important constitutional tenets, the freedom of speech. This could not be further from the truth. Racist groups and other extremists would have the constitutional right to preach and spread their propaganda. However, if those views translate into premeditated violence against a person or persons because of their ethnicity, their religion, or their sexual orientation, then those perpetrators should be held justly accountable for their acts.

The Texas legislature passed a hate crimes bill earlier this year after failing to do so during the previous legislative session. The bill was named to commemorate James Byrd, Junior, an African American man who was dragged to his death in Jasper, Texas, in 1998 by three white men solely because of the fact that he was black.

During the 1999 legislative session, the Texas House also passed a hate crimes bill. Unfortunately, opponents blocked consideration of the measure in the Texas Senate. Even more disappointing was that then-Governor George Bush was silent on the issue and refused to pledge his support for

the bill. I am pleased that this year the legislature in Texas was able to remove the previous roadblocks and secure passage of the bill.

However, now that Texas has committed itself to hate crimes prevention, it needs the tools to facilitate the enforcement. For this reason, I am proud to be a cosponsor of H.R. 1343, the Local Law Enforcement Hate Crimes Prevention Act, which has been introduced by the gentleman from Michigan (Mr. CONYERS). H.R. 1343 provides the technical, forensic, as well as prosecutorial tools local law enforcement needs to combat this type of violence.

H.R. 1343 has garnered the support of over 202 co-sponsors. Now more than ever we need the Federal hate crimes bill. Since September 11, hate crimes, especially those targeting Arab Americans and Muslim Americans have dramatically increased. This is unfortunate, and we need to make sure that this does not occur. While I am sure that we are all angry and frustrated, and have a great deal of anxiety as a result of what has transpired and what a lot of Americans are feeling, such feelings cannot ever, and I repeat, such feelings cannot ever justify senseless acts of violence against innocent people.

I ask my colleagues and the Republican leadership to speak out against these hate crimes and secure passage of H.R. 1343 as immediately as possible.

CONGRESS MUST PASS HATE CRIMES PREVENTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEWIS) is recognized for 5 minutes.

Mr. LEWIS of Georgia. Mr. Speaker, now is the time to pass the Hate Crimes Prevention Act. Congress must stand up and pass this legislation to send an important message to the American people and the world, that hate crimes will not be tolerated.

From the Justice Department demanding interviews from thousand of Arab-American men simply because of their heritage, to secretly detaining hundreds more, this country is sending the wrong message to its people and the world. Since September 11, we have seen a tendency in our citizens to strike out against those who they believe to be responsible. We continue to hear reports of harassment and discrimination against Arab Americans and Muslims. There has been a rise in all types of hate crimes. Congress must act now to send the right message. It must pass the Hate Crimes Prevention Act before we adjourn.

America is Christian, Jewish, Muslim, black, white, Hispanic, Asian American and Native American. We are gay and we are straight. We are one Nation. We are one people. We all must

continue to live and work together to create one house, one family: the American house, the American family.

The President has preached a message of tolerance and respect and has urged all Americans to be sensitive in this difficult time. This country, as a whole, must heal and move forward together as one Nation. We can do that by embracing the idea, the concept of the beloved community, a community based on hope, compassion, and justice, a community at peace with itself. We must renounce racism, we must renounce hate, we must renounce violence and embrace diversity. We must teach not just tolerance; we must teach acceptance and love. Only then can we achieve the concept of the beloved community, a community that is free of hate based on race, religion, national origin, or sexual orientation.

Passing the Hate Crimes Prevention Act is a step, a major step in the right direction, a step down a long road. It sends an important message. We must show the world the great Nation that we are, a Nation where all men and women are created equal. It is time to pass the Hate Crimes Prevention Act. So, Mr. Speaker, I call on all of my colleagues to lead by example and pass this bill before we leave.

IN OPPOSITION TO FAST TRACK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BACA) is recognized for 5 minutes.

Mr. BACA. Mr. Speaker, I stand in opposition to the Fast Track legislation that is being proposed. Our country is at war. We must prioritize safety and security of the American people. There are lingering concerns of biological contamination. The American people continue to worry about anthrax, about new reports from the administration to be on high alert. Now is not the time to move forward on the Thomas Fast Track legislation.

The U.S. has officially entered an economic recession. Millions of workers are suffering: unemployed, no health coverage, and jobs lost. Terrorists have struck the American people in their pocketbooks. The holidays are approaching. Hundreds are fearful of imminent layoff. Do you know what it is like to be laid off, not being able to make your payments, not being able to put food on the table, feed your children, stand up with pride? It is very difficult for many Americans who are being laid off, who are now trying to figure out a way to pay their bills. Now is not the time to move forward with this Fast Track legislation. Expediting a trade negotiation is the last priority for the American people, the last priority for the American people in these trying times.

International trade directly affects the lives and the livelihood of increasing numbers of Americans. Congress

cannot be confined to the back bench. We in Congress must be active and participate in all international trade negotiations. The Thomas bill would have us serve merely as consultants. That is not what we were elected to do. We were elected to voice and protect the interests not only of my district but of the American people in general. The Thomas Fast Track bill is an unfortunate manipulation of trade policy.

Since September 11, broad bipartisanship has been a top priority.

□ 1730

This bill serves in dividing the line. This bill is driving a wedge between the Democrats, the Republicans, between the Democrats and the high-tech community. The partisan tactics of the proponents of the Thomas Fast Track bill stands in stark contrast to the President's statement last week that the passage of Trade Promotion Authority would send a signal that Congress and the administration are united on trade. Congress is not united on trade. Now is not the time to move forward with the Thomas Fast Track legislation.

Mr. Speaker, I would support legislation granting President Bush Fast Track negotiation powers provided it addressed effectively the key issues of labor and the environment and the role of Congress. I am not against free trade. Unfortunately, this bill we will vote on tomorrow fails to address the new realities of trade in an effective and realistic manner.

The Thomas bill endangers a rare opportunity to build a bipartisan consensus in support of tearing down trade barriers in a way that would create jobs and raise living standards around the world. Labor and environmental considerations are not merely social considerations. The truth is that inclusion of labor and the environmental issues has real commercial significance for the terms of trade.

A growing number of people around the world, having experienced the negative effects of free trade agreements, we can look back at NAFTA, are opposing accords such as the proposed free trade agreements because we know what we have experienced from many of the jobs lost in the auto industry, the manufacturing industries, and many other areas where people lost their jobs.

We need a different kind of trade agreement, one that would benefit working people and the environment in every country. We can no longer give free reign to the over-exploitation of the workers who abuse not only workers but children and the environment. We must protect the interests of hard-working Americans and the hard-working individuals in our global community.

PASS HATES CRIMES LEGISLATION

The SPEAKER pro tempore (Mr. SIMMONS). Under a previous order of the House, the gentleman from New York (Mr. OWENS) is recognized for 5 minutes.

Mr. OWENS. Mr. Speaker, I rise in support of the Hate Crimes Prevention Act offered by the gentleman from Michigan (Mr. CONYERS), H.R. 1433. I think there is nothing more important that we are doing here in this session than this Hate Crimes Prevention Act. We are wasting our time passing junk resolutions, in many cases, and we do not address an important piece of legislation like this. More than 200 Members have signed on as cosponsors of this legislation.

Mr. Speaker, I think that every legal or legislative step that can be taken to combat hate should be taken. Hate is a strong force in the world. It is a monster expressing itself in many ways. The hate monster has us by the neck all over the world, but terrorists that we are fighting in Afghanistan, bin Laden, the al Qaeda network throughout the world, is motivated by hate. Hate seems to generate more fervor than love. People who are pushing love and want to do things differently do not seem to have the same kind of motivation or energy. The people who want to destroy our democracy, they hate us because we will not cover our women in public, they hate us for a thousand different reasons, and we need to meet that with tactics and with strategies that are as strong as the hatemongers.

We need to have in every way blanket condemnations of hatred, intolerance, and we need to be very detailed in this country. In this country we can get into the details of what is wrong. We need to condemn intolerance, and we need to specifically condemn intolerance that relates to sexism or intolerance that relates to race or disability. There are some people who, some men in particular, who are very adamant in terms of the workplace, and they cannot stand intolerance or oppression by the boss or management, but they will exploit and oppress women.

There are some people in certain races who certainly will speak out against racial intolerances, and they will also oppress women. There are some women who will certainly defend the rights of women to be equal, but they will oppress or be intolerant of people of other races. All of these things add up to a situation that is very complex. We cannot stop it by legislation, but legislation plays a key role. We are the catalytic agent in the process of helping people to deal with hate, making our society as a whole deal with hate.

Nationality or ethnic origin is certainly unacceptable for hatemongers,

also; and, unfortunately, in our agencies of government, bureaucracies sometimes express a bit of intolerance and sometimes get into hate. Under the President's pressures of terrorism, as we mount our campaign against terrorism, I have seen in my own district Pakistanis rounded up because they are Muslim, and those Pakistanis when they were interrogated, they may have some immigration problems, they have been put in holding pens and jails in New Jersey outside of New York City. About 200 people in a 2-month period have been rounded up and held for 2 or 3 weeks merely because they have an infraction related to immigration but not a serious crime. They asked to go home, and, instead of being immediately processed out and sent home, they were held. One man even died there because there is an intolerance in the FBI bureaucracy under the pressure of the present situation to combat terrorism.

We should not let our guard down and become intolerant of any particular group. Immigrants in general are being put on the spot. I have a large number of people in my district from the Caribbean. Through World War I, World War II, Korea, Vietnam, they never found a single Caribbean espionage agent from Haiti or any other Caribbean nation. Why are they penalizing and putting those people on the spot and profiling them in the situation that presently exists?

It is intolerant, unreasonable and from our own agencies we should not tolerate it. Let us take every step possible. H.R. 1433 is an important step. We do not need more hate in the world. We need in our official conduct as well as our personal conduct to do everything possible to combat hate.

POSTAL WORKERS PROVE DETERMINATION TO GET JOB DONE IS SECOND TO NONE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HILL) is recognized for 5 minutes.

Mr. HILL. Mr. Speaker, "Neither snow, nor rain, no heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds."

These words ring truer now than ever before. In recent weeks, our country's postal workers have once again proven that their determination to get the job done is second to none.

Thankfully, the anthrax scare that recently gripped the Nation has subsided. This does not mean that we should be less diligent when it comes to looking for lessons to draw from these acts of terrorism. Even now, it is clear that commerce in this country is inextricably linked to confidence in our mail system. Maintaining confidence in the system requires that we

do whatever is necessary to ensure the mail's safety.

I was reminded of this a few weeks ago as I toured postal facilities in southern Indiana. Simply, I got an earful. Foremost in the minds of these dedicated Hoosiers was the question of when would the mail facilities receive the help needed to purchase and install anti-biological irradiation equipment.

I hope the answer to that particular question is sooner rather than later. The Postal Service needs our help. In the meantime, I have no doubt that Postal Service employees will continue to brave the elements and the unknown and deliver the mail.

FUTURE ROLE OF WOMEN IN AFGHANISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. MILLENDER-MCDONALD) is recognized for 5 minutes.

Ms. MILLENDER-MCDONALD. Mr. Speaker, I rise to continue to speak out on the critical issue of women in Afghanistan and their plight during these perilous times. As Democratic Chair of the Congressional Caucus on Women's Issues, I have made it a priority to address the House each week to provide a voice to the women who have been silent far too long. It is also my intention to continue to raise awareness about the current state and the future state of women and children in Afghanistan.

Today marks the conclusion of the Bonn negotiations for a post-Taliban government in Afghanistan. A new interim administrator will be in place by December 22. While few women were involved in the current negotiations, I am happy to learn that women will take part in the rebuilding of their country. The new administration will include five deputy prime ministers and 23 other members for negotiation. Of the five deputy prime ministers, one is a woman. Women are also expected to occupy up to five other ministerial portfolios. One minister is to be established solely for women and children. I am happy to report that there is progress being made.

Under the proposed agreement, a special commission will be appointed within a month to organize the calling of an emergency legislature or traditional constituent assembly of provisional leaders and notables. It should be called within 6 months and would have the right to revise the new interim executive and create other bodies that would serve for up to 2 years.

The commission is also to ensure that due attention is paid to the presence in the governing body of a significant number of women. The proposed agreement foresees the drafting of a new constitution to be ratified by another legislature, with elections to

take place at the end of that 2-year period.

As women strive both inside the country and outside to contribute towards shaping a meaningful future, we must demonstrate our resolve to help those Afghanistan leaders be involved in all political and economic negotiations from the outset. It is extremely important that there are not just a few women used as tokens but as real partners and equal partners. Women need to be involved in every aspect of that country's fabric.

As I have said before, Afghan women must be ensured of their basic human rights once more such as access to safe drinking water and sufficient food; to receive decent health and maternal care; and, foremost, to again move freely in their society without being subject to harassment and abuse. Above all, they must be allowed to practice their religious beliefs as Islamic women without retribution.

It will be important to see that women are involved in the emergency *laya jerga* since it appears that this is a real place where power and authority will be exercised.

Mr. Speaker, I am pleased to present this report this evening.

□ 1745

HATE CRIMES

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise this evening to offer my thoughts on the importance of passing in this body hate crimes legislation, but also to ask this House to prioritize its work. Inasmuch as we can spend an enormous amount of time on some very valid initiatives, I do believe that hate crimes legislation, the passage of hate crimes legislation that has been offered in two previous congressional sessions, is long overdue and it is not being passed.

I heard a colleague of mine just earlier today talk about the climate in which we live. All of us have stood up against terrorism and have given to the President the authority to ferret out terrorism and to bring to justice those who perpetrated the unspeakable crime on September 11, 2001. But, likewise, we have spoken against the indictment of the Islamic faith and all Muslims. We realize that Muslims are not the crux of our problem inasmuch as the virtues of their faith talk about peace and justice.

I would say that we experienced over the past weekend some terrible tragedies, terrible loss of life in the Mideast. It does us no good as well to speak hate against either the Israelis or the PLO. In fact, it is most important that we look to speak to the issues of peace and

reconciliation and bringing people together.

Our first step to acknowledge to the world that we will not harbor hate is to pass our own hate crimes legislation so that we can say to the world we argue and fight against hate in this Nation, and we will stand against hate in the world. We cannot cry in a one-sided manner. We must cry for all of those who lose their life.

So, as we talk about the passage of hate crimes legislation, let us be reminded that we have those brothers and sisters within our boundaries who feel that they have been discriminated against because of their faith. We may have brothers and sisters around the world who feel that these tragedies that have occurred, that we have somewhat not understood their crisis and that we do not look to seek peace. I would argue that we can find peace here in this Nation and a recognition and reconciliation of our opposition to hate by passing the hate crimes legislation, and we can do so by speaking to all parties who would come to the table of peace to design peace in the Mideast and to design peace in Afghanistan.

The hate crimes legislation that is so needed in this country would address the question of Leonard Clark, a 13-year-old African American teenager who was riding his bicycle one day in Chicago when he was accosted and brutally beaten by three white teenagers. The perpetrators have been charged with attempted murder, aggravated battery and hate crimes under the Illinois State law. However, the irony in this case is that one of the key witnesses to the beating remains missing. A Federal hate crimes law would have allowed for the full involvement of the FBI in this case, thereby increasing the chances of capture and justice.

In my own congressional district in Houston in 1995, Fred Mangione, a homosexual, was stabbed to death, and his companion was brutally assaulted. The two men who were charged with Mangione's murder claimed to be members of the German Peace Corps, which has been characterized in media reports as a neo-Nazi organization based in California. At the time, this crime did not meet the State of Texas threshold for trial as a capital offense because the murder did not occur during the commission of a rape or robbery. Justice failed us during that time frame.

I am very gratified to say that since that time and since the brutal beating and killing and dismemberment of James Byrd, Jr., we have passed the James Byrd, Jr., Hate Crimes Act in Texas. It was passed by Republicans and Democrats and signed by a Republican Governor.

So I speak tonight not in one voice. I speak to all of my colleagues, and I am gratified that the gentleman from Michigan (Mr. CONYERS) has offered

legislation and the gentlewoman from California (Ms. WOOLSEY) continues to bring us together so that we can speak in one voice.

But even as we speak, we are still facing attacks on our own American citizens and those within our boundaries, such as the statistics of 1995, 2,212 attacks on lesbians and gay men were documented, an 8 percent increase over the previous year. There have also been numerous attacks on people of various backgrounds, whether they have been Jews or Asians, Hispanics, Native Americans or anyone that has been different in our community. The hate crimes prevention act will protect these groups from targeted attacks because they are members of these groups. They likewise would protect women and others on the grounds of difference.

Mr. Speaker, I join with my colleagues today in simply saying we can fight hatred with our own changed hearts, but as well we can provide changed laws for America and pass the Hate Crimes Prevention Act of 2001 or 2002.

Mr. Speaker, the tragic events of September 11 have compelled this great country of ours to join efforts and resources in healing the wounds and rebuilding lives. Our love for America was never more evident than in the days and months subsequent to September 11. Flags are flown daily even embroidered on clothing. We cannot stop showing our love for our country.

Yet expressing our deep affections for our country and what we have had to endure, must include ALL Americans. It must not be exclusionary, but rather include all races, creeds, gender, and sexual orientation.

When Thomas Jefferson wrote the Declaration of Independence he stated that, "We hold these truths to be self evident that all Men Are created Equal." Women, African Americans, Native Americans, Hispanic Americans, Asian Americans, and Jewish Americans have been too often historically, culturally, and prospectively excluded from inclusion in that declaration.

President Abraham Lincoln stated so eloquently in his Gettysburg Address, "Our Nation must struggle . . . in order to create a more perfect union". The problem with our struggle today is our judiciary system's inability to effectively address violent acts of hate crime in our society. It is particularly difficult because there is no current law that makes a hate crime a federal offense. We need Hate Crimes legislation to "create a more perfect union."

Early in 1987, a public controversy developed between William Bradford Reynolds, Assistant Attorney General, Civil Rights Division, and prominent civil rights advocates. Reynolds stated that racial violence was not increasing, basing his assertion on informal surveys of Federal prosecutors and the number of civil rights complaints being filed with the Justice Department. Civil rights advocates asserted the contrary, that racial violence was in fact increasing, basing their assertions on data supplied by the Justice Department's own Com-

munity Relations Service, which reportedly indicated a rise from 99 racial incidents in 1980 to 276 in 1986.

This controversy ultimately led to the passage of the Hate Crime Statistics Act, enacted April 23, 1990. This law required the FBI to collect, compile, and publish statistics on hate motivated crime. Since then, Federal legislation has moved beyond data collection on the incidence of hate crime activity, to include new provisions requiring stiffer penalties for bias-motivated criminal activity. Also, it has designated a new category of individuals, to include those with disabilities.

According to the Hate Crimes Statistics Act, a hate crime is defined as acts which individuals are victimized because of their "race, religion, sexual orientation, or ethnicity." In this statute, hate crimes are those in which "the defendant intentionally selects a victim, or in the case of a property crime, the property that is the object of the crime, because of the actual or perceived race, color, religion, national origin, ethnicity, gender, disability, or sexual orientation of any person."

But despite our historical progress and despite our laws, how far have we really come? Just when we thought that our Nation had built a foundation for peace and harmony, three attackers in a small town in Texas, shattered the illusion with an atrocity beyond imagination. The so-called "dragging" murder DEFIES the very fabric of the moral code that all Americans innately support. The moment that Mr. Byrd's tormentors chained his body against the cold, lifeless metal of their truck, they became something savage, something inhuman, and the very embodiment of hate criminals.

African-Americans have historically been the most frequent targets of hate violence in the United States, and they are among its principal victims today in many states. From lynching to cross-burning, and church-burnings, antiblack violence has been, and still remains, the prototypical hate crime—an action intended not simply to injure individuals but to intimidate an entire group of people. Hate crimes against African-Americans impact upon the entire society not only for the hurt they cause, but for the tragic history they recall and perpetuate.

In March of 1997, Leonard Clark, a 13-year-old African-American teenager was riding his bicycle home one day in Chicago, when he was accosted and brutally beaten by three white teenagers. The perpetrators have been charged with attempted murder, aggravated battery and Hate Crimes under Illinois state law. However, the irony in this case is that one of the key witnesses to the beating remains missing. A federal hate crimes law would allow for the F.B.I.'s full involvement in this case, thereby increasing the chances of capture, and thus, justice.

In my Congressional District in Houston in 1995, Fred Mangione, a homosexual, was stabbed to death, and his companion was brutally assaulted. The two men who were charged with Mangione's murder, claimed to be members of the "German Peace Corps," which has been characterized in media reports as a neo-Nazi organization based in California. This crime did not meet the State of Texas' threshold for trial as a capital offense, because the murder did not occur during the commission of a rape or robbery.

In recent years, attacks upon gays and lesbians are increasing in number and in severity. During 1995, 2,212 attacks on lesbians and gay men were documented—an 8% increase of the previous year.

There have also been numerous attacks against Jews, Asians, Hispanics, and Native Americans. Fortunately, the Hate Crimes Prevention Act would protect these groups from targeted attacks because they are members of these groups.

Examination of hate crimes statistics sadly reveals that Mr. Byrd's murder was not an isolated incident. The FBI releases the totals each year for hate crimes reported by state and local law enforcement agencies around the country based on race, religion, sexual orientation or ethnicity. These national totals have fluctuated—6,918 in 1992, 7,587 in 1993, 5,852 in 1994, 7,947 in 1995, and 8,759 bias-motivated criminal incidents reported in 1996. Of the 8,759 incidents, 5,396 were motivated by racial bias; 1,401 by religious bias; 1,016 by sexual-orientation bias; and 940 by ethnicity/national origin bias.

A Hate Crimes Prevention Act would send a message that perpetrators of serious, violent hate crimes will be prosecuted to the fullest extent of the law. Hate crimes that cause death or bodily injury because of prejudice should be investigated federally, regardless of whether the victim was exercising a federally protected right.

It is time for the Congress to act. Violence based on prejudice is a matter of national concern. Federal prosecutors should be empowered to punish if the states are unable or unwilling to do so.

OPPOSING FAST TRACK

The SPEAKER pro tempore (Mr. SIMMONS). Under the Speaker's announced policy of January 3, 2001, the gentleman from Ohio (Mr. BROWN) is recognized for 60 minutes as the designee of the minority leader.

Mr. BROWN of Ohio. Mr. Speaker, earlier today I joined a number of my colleagues from the House and leaders of the most influential environmental groups in the United States to express opposition to so-called Fast Track, granting the President Trade Promotion Authority. The presence of this coalition highlighted quite impressively the solidarity of the environmental community on this critical vote.

Another thing that underscores the solidarity of the environmental community against the Thomas bill is the stern warning issued by the League of Conservation Voters that it will likely score this vote. The LCV takes its scoring seriously and to ensure balance in its ratings only scores environmental votes for which there is absolute unanimity in the environmental community. The League of Conservation Voters has never before scored a trade vote. That means the environmental community has never been so focused on and so unanimously supportive of and so involved in a trade vote in this country's history.

Why is there such urgency in the environmental community in opposition to the Thomas Fast Track proposal? Because this bill would do nothing, would do nothing to prevent countries from lowering their environmental standards to gain unfair trade advantages. It would do nothing to require that the environmental provisions be included in the core text of our trade agreements, because it would do nothing to ensure that the environmental provisions in future trade agreements are enforceable by sanctions.

Instead, it would transfer the burden to consumers and to regulators to prove that the science underlying domestic regulation is beyond dispute, resulting in a downwards harmonization of our environmental laws, a rollback of environmental laws, a weakening of environmental regulation. It would encourage Western companies to build manufacturing plants in countries with the least stringent environmental laws, and, as a result, cost skilled American workers good-paying jobs.

It would allow future trade agreements to include provisions like NAFTA's chapter 11, encouraging so-called regulatory tax claims by foreign companies and threatening hard-won democratically enacted laws and regulations that protect our natural resources.

This investor-state relationship cast by chapter 11 of the North American Free Trade Agreement exemplifies the greatest imaginable abuse of our democratic principles. It allows private corporations to sue a sovereign government and overturn domestic health and safety laws.

Think about that for a minute. A country can pass a law that that country's democratically elected legislative body contends, believes, will in fact help the environment and promote public health. A company in another country, a privately owned large corporation in another country, can go to court and sue the government, the democratically elected government, even force that democratically elected government to repeal its environmental law to weaken its public health regulations.

U.S. Trade Representative Bob Zoellick, a Bush appointee, is committed to including those same anti-consumer, anti-environmental, anti-public health, anti-combat-bioterrorism provisions in Fast Track. Under this provision, not only can laws be overturned, but taxpayers of the subject nation can be liable for damages if a NAFTA tribunal rules that a law or regulation causes an unfair barrier to free trade.

That sounds pretty outrageous. It makes one incredulous. It sounds like it could not happen, but it actually happened. When Canada passed a law to promote clean air in automobile emissions, Canada's public health commu-

nity said this is important to fight cancer in Canada. A U.S. company sued Canada in a NAFTA tribunal. The U.S. company won the case against Canada, which had passed a public law protecting the public health. Canada had to repeal its public health law. Canada had to pay this American company \$13 million.

Sometimes it will be against Canada and a democratic law there, sometimes it will be against the United States and a public law here, sometimes against Mexico, France, Germany or wherever.

I am joined today by my friend, the gentleman from Ohio (Mr. STRICKLAND), and the gentleman from Michigan (Mr. BONIOR). The three of us worked many years ago in opposition to NAFTA, and the gentleman from Michigan (Mr. BONIOR) in those days, as he has continued to, has led the opposition to these agreements.

I yield to the gentleman from Ohio (Mr. STRICKLAND).

Mr. STRICKLAND. I would like to say to my friend from Ohio that as I am standing here listening to what you are saying, it causes me to think there are some in this Chamber who are willing to relinquish their responsibilities to protect the ability of this country to make sovereign decisions in the best interests of the people that we were elected to represent.

I mean, to think that we in this body as representatives of the people could come together in a deliberative process, make a decision that we collectively feel is in the best interests of the health and safety of our Nation, and then to have entered into an agreement that would allow a for-profit foreign corporation to bring suit against our government based on their objections to what we think is best for the United States of America, it seems to me if we were to allow that we are relinquishing our constitutional responsibilities.

Who are we responsible for representing and protecting, some foreign national company, a multinational company with no particular allegiance to any country, any democratic principles, any form of government, but whose bottom line is in fact profit? It just seems almost unbelievable to me that we would ever allow that to happen. It is an unconscionable thing. It is difficult to even contemplate that this government would ever permit that.

What the gentleman says, I assume, is an accurate interpretation of what the circumstances would be.

Mr. BROWN of Ohio. Even people that support Trade Promotion Authority acknowledge that that is what that provision does. When it was put into NAFTA in 1993, when this Congress in a very narrow vote passed NAFTA in November of that year, people did not quite understand that provision.

That provision was sold to the Congress and to the American public. Even though the three of us all voted against

NAFTA that are talking this evening, this afternoon, that provision was sold to protect American investors in Mexico where the government might expropriate or take their properties.

But in fact it is clear that the way that has worked is time after time after time corporations have sued foreign governments, in this case Canada, Mexico, the United States, a corporation in one of the three countries has sued a government in one of the other two, and each time, in almost every case, the government has lost, the government which passed these laws to protect in most cases the public health, sometimes the environment, sometimes consumer protection law, but laws that were passed by those governments were repealed. It is almost so unbelievable that you cannot believe that this Congress would do it.

Mr. STRICKLAND. I was just thinking very recently, in fact, just a few days ago, we were able to get an amendment in the defense bill that would require that any steel used in the military apparatus that would be purchased with funds in that bill would have to be American-made steel.

I remember as we were discussing and debating that possibility, there were those who said, well, this would be acceptable, because there is an exemption for these kinds of decisions that relate specifically to national security. But what the gentleman is saying, I believe, is that in most cases there could be a decision made by this House of Representatives, the Senate of the United States, legislation signed into law by the President, and if it was interpreted to be in violation of these trade agreements as providing perhaps protections to our citizens that under the international trade laws would be deemed inappropriate or inconsistent with those laws, that there could actually be legal action taken against our government by a foreign corporation to try to force a change in the domestic law of this land. Is that a correct interpretation?

Mr. BROWN of Ohio. The correct interpretation in this case, it is very possible that a steel company in Mexico or Canada might sue the U.S. Government for passing a provision like that, saying that is an unfair trade practice, and might be able to get the NAFTA tribunal, the three-judge panel, to overturn U.S. law.

□ 1800

One of the reasons they do that and one of the reasons these three-judge panels have decided against public health laws, against environmental protections passed by a majority of this House and Senate and signed by the President, or consumer protection or any of those laws, is because of the nature of those three-judge tribunals, those panels. They are made up of trade lawyers, not public health experts, not consumer protection experts,

not environmental experts. They are made up of trade lawyers.

They meet behind closed doors. They do not accept petitions or testimony from third parties, and they then can turn around and repeal a sovereign nation, as we are, as Mexico is, as Canada is. They can repeal a sovereign nation's public health and environmental laws.

So when we have these panels made up of trade lawyers who typically sit in downtown offices and rule on trade issues and decide the arcane minutia of trade issues but do not have any real expertise or any real interest in environment or public health issues and policy and laws, we lose time after time after time. We have lost public health laws and environmental laws repeatedly in the World Trade Organization with those same secret panels making those decisions. We do not know anything about the proceedings and, all of a sudden, it is in the paper. We get a notice.

Mr. Speaker, I yield to the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR. Mr. Speaker, to follow up on this very good discussion on sovereignty here, it gets to not only the question of multinational corporations, foreign corporations in the example that the gentleman from Ohio (Mr. STRICKLAND) gave, but there is also a taking away of local units of government's power and State units of government's power.

For instance, we have a particular problem in my State of Michigan with trash, garbage, coming in from Canada. Toronto has decided that it is much easier, more economical, less hassle, to bury all of their waste in Wayne County, Michigan, which is the county the City of Detroit is located in. So they haul their garbage across the Ambassador Bridge, the Bluewater Bridge in my area up in Port Huron. We have a couple hundred trucks a day that come across there with garbage, and God knows what is inside these facilities, and they take it to a dump, and they dump it there.

Now, let us assume that we try to overturn the basic law of this country which says that garbage companies are free to move garbage anywhere they want to vis-a-vis the Interstate Commerce Clause of the Constitution. There was a court ruling that was made in 1992, I believe, on the Fort Gratiot landfill case which went all the way to the U.S. Supreme Court.

If we decided in this institution or the State of Michigan decided in their legislature to say, no, you cannot do that, you cannot bring your garbage and make Michigan a dumping ground, that company or those companies, those trash haulers, those garbage companies could go to court and say, well, wait a minute. This is an impediment on free trade. This is an impediment of moving commerce. And those kinds of panels that the gentleman

from Ohio (Mr. BROWN) just alluded to could make the decision that what we do here or what they do in the State of Michigan is irrelevant, because it impedes trade.

Now, there are hundreds of U.S. laws on the environment, as the gentleman pointed out, on food safety, on antitrust, on just laws that deal with people expressing themselves at the local level about a policy on human rights that they may object to, which may be taking place in a regime that is persecuting its people abroad that could be struck down as a result of empowering international panels and taking away the power from this institution, local and State governments.

So this is real serious stuff, and it goes way beyond just dollars and cents in trade. We are talking, as the gentleman pointed out, about food safety, health care, human rights, antitrust, labor law. You name it. It is all kind of wrapped up here.

If I could make one other point and then yield back to those who have the time, that is the broader issue here of relinquishing our power as a Nation and as a State and as governments. But the more internal debate to that is what this institution, this U.S. House of Representatives is doing in terms of receding from the powers that the Constitution gives us in Article I, Section 8, which is the power to deal with trade laws. We are handing that over to the executive branch. It is very, very disturbing, the change in the balance of power switching over to the executive branch and to corporate America, basically, here. That is what is going on.

This may seem a little arcane to people, a little not too clear because of its legalistic implications and language, but I can assure my colleagues that it gets right back down to whether or not we are going to have garbage buried in our backyard or out our window, or whether or not we are going to be able to go to the supermarket and get food that we are assured is going to be safe for us to feed our families.

I mean, it gets down to some really basic things here. We are trying to bring the argument and trying to make the American people see that under the cloak or the disguise of this legalese debate we are having here on "fast track," that it is going to affect everybody in this country in a dramatic way.

Mr. Speaker, I thank my colleagues for raising the issue.

Mr. BROWN of Ohio. Mr. Speaker, none of the three of us is a lawyer; and we are explaining, in a sense, a legal procedure here that really is pretty simple. It is a question of increasing corporate powers by turning over our sovereignty, turning over our ability to make democratic determinations, whether it is where a community puts its trash, whether it is a food safety law, whether it is a clean air regula-

tion, whether it is a public health program. We are saying in these agreements that we will cede power from a democratic government to a private corporation.

Mr. Speaker, when we come to this institution, we have seen this kind of corporate power in this institution. There is not much doubt that corporations wield huge amounts of power when we try to pass strong food safety laws, we try to pass good public health laws, clean air laws, bioterrorism laws, protections for our food supply, labor standards, minimum wage. Whenever we try to pass a bill like that, it is always met with huge resistance from the largest corporations in the country, the largest corporations in the world. So we, in many cases, overcome that resistance and do what is right for the public.

I wear this lapel pin which symbolizes a lot of things to me. It is a canary in a birdcage. One hundred years ago the miners used to take a canary down in the mines in a birdcage, and if the canary died, the miners they had to get out of the mine. It was the only protection they had. The government did nothing to help them.

In these 100 years, when 100 years ago the average child born in this country could live to be about 47 in terms of the average, in those 100 years this institution has passed minimum wage laws, safe drinking water, pure food laws, Medicare, Social Security, clean air laws, worker protections, mine safety. We have done all of those things against great resistance from the wealthiest, most privileged people in society. We have been able to do that in this institution.

Now, even when we do that, we are going to see corporations in one country try to overturn the laws we have done. So we passed them with great difficulty against huge campaign contribution dollars and lobbying and all of the special interest groups that fight progressive, good government that helps the public, and then these groups turn around now, these big companies, and they sue democratic governments to stop, to overturn their environmental laws and weaken their food safety laws and hurt their labor laws and try to devastate so many of the protections that we have been able to accomplish as a society, with people pushing their Congress to do the right thing.

Now some faceless bureaucrats on a trade panel, a NAFTA tribunal can, out of the public light, in a back room, simply wipe away those kinds of environmental laws.

Mr. BONIOR. And then, Mr. Speaker, go to the lowest standard, go to the lowest standard. That is what they are after. They want to take us back to where we were when people used to take canaries down in a birdcage. They

go to the lowest standard, and the lowest standard is often in the developing world.

It is in countries that are trying to develop a body of law but cannot get there because of the international corporate pressure not to go there, to keep wages low, to keep standards low. They cannot get there because labor unions cannot form because of that same kind of pressure. They cannot get to our standard.

So because they cannot get to our standards because of institutional pressures within their own country, these corporate entities now have bonded together with them and are trying to bring down our standard here.

Mr. BROWN of Ohio. Mr. Speaker, before I yield to the gentleman from Ohio (Mr. STRICKLAND), we are joined by three other Democrats, and they are the gentleman from New Jersey (Mr. PASCRELL); the gentlewoman from Texas (Ms. JACKSON-LEE); and the gentlewoman from California (Ms. SOLIS).

Let me yield to the gentleman from Ohio, and then the rest can join in.

Mr. STRICKLAND. Mr. Speaker, I will be very brief. But I think it is important for those who are listening to us to understand why we are here tonight, and it is because we are going to be called upon tomorrow to cast a vote, and we are going to cast a vote that will protect the sovereignty of our Nation, or we will cast a vote that potentially will turn over all the decision-making that is important to all of the multiple millions of people that we collectively represent to this three-panel assemblage.

Now, I would like to ask the gentlewoman from Texas, and I think I know the answer, but which American citizens are able to vote and select any of those three persons that would be in a position to make decisions regarding the health and safety and security of this Nation? Is any American citizen ever going to be in a position to cast a vote to select these persons who are going to be making decisions for all Americans?

Mr. BROWN of Ohio. Mr. Speaker, before the gentlewoman from Texas answers, here is an additional question. Is anybody even going to know the names of the people that sit on that panel?

Ms. JACKSON-LEE of Texas. Mr. Speaker, obviously, absolutely not. And as the gentleman makes that point, the people's House, the representatives that come to the people's House, are themselves barred from even speaking on behalf of the people for having any oversight into this kind of legislative initiative. So I see no opportunity for the people to speak about this legislation.

Mr. Speaker, I would be happy to further the point of the distinguished gentleman, because I think it is a very valid point. I rise to suggest to my colleagues in a bipartisan manner that a

far better approach would have been if we had accepted both the offer and the interest some years back of the gentleman from New York (Mr. SWEENEY). I do not come to the floor to quote or to put words in the gentleman's mouth at all, but I do remember some years back when these discussions were coming about and there was some interest to be able to hear the vital points that labor had to offer about how we can truly have the working people's trade bill. I believe that he had some very meritorious points that would have allowed us, even to this point, to come together with a bill that would have answered many of the concerns that are totally ignored in H.R. 3005, which is the Thomas bill.

That is, if I can point out, number one, there are no labor standards whatsoever. Right now in my district I have 4,000 people laid off by one of our very vital companies. We may have a total of 10,000. I would venture to say that those constituents are really looking for jobs right here, and their priorities are more about how they are going to survive over the holiday season.

I have taken trade on a case-by-case basis, looking to see opportunities where we could work together. In this instance, I have higher priorities, and that is to be able to assist those individuals in finding jobs, keeping jobs, and providing for their families.

Tomorrow we are going to be asked, rather than dealing with those needs, the unemployment needs of America, to put forward a bill that disallows any type of labor standards so that countries with poor labor standards will maintain those standards; and, in fact, under the present bill that we have, the underlying bill, countries with poor labor standards are not required to have or implement any of the five core standards. So no labor standards whatsoever. That suggests to me that, rather than benefit from jobs being generated, we will lose by jobs being lost to other places, because someone will try invariably to avoid following any labor standards.

Might I also say that, in talking to many corporations, I have heard them saying that we wish we could have worked in a bipartisan way. We wish we could have had more people at the table. As it relates to the environment, we are finding out that there is no addressing of the environment in the Thomas bill.

□ 1815

There are no legal or technical incentives to make sure we strengthen the environmental laws and regulations.

Then I would like to speak to, as I sort of draw to a close, the idea of the point that the distinguished gentleman from Ohio (Mr. BROWN) made; that is regarding the oversight, the voice of the people, the people's House being able to speak.

With a narrow three-person body, there is no opportunity in the bill that will be on the floor tomorrow for us to have congressional oversight, for there to be an involvement of the people's voice; for the voters who have voted for those in this body and elsewhere to be able to have oversight over whether or not human rights is being protected, whether or not we are using child labor, whether or not we are using slave labor.

And believe me, Mr. Speaker, it exists. In Afghanistan, children are making bricks who are 8 years old and 7 years old. As we went to Bangladesh and other places around the world, there is child labor. We are trying to work against that.

However, the point is if Congress has no oversight, and we have a small body that does not have to listen to us, then who is to say that these violations will not be promoted?

I am going to vote for the Rangel substitute because I believe we have ways of making a difference, but I am ashamed that we would put forward legislation like this that does not answer the question of labor, working with those who believe working people deserve a decent place to work; and does not address the environment, because I am ashamed that if I have a minimal amount of a good quality of life here in America, that I would put on others a devil-may-care attitude: Who cares about how you function and how you live?

Finally, I would say that we who have been elected by the people of this great Nation, who cast their vote for us to go to the people's body, are totally blocked and excluded from any oversight to protect the values of the people who we represent, from human rights to the rights of children to the rights of women to the fairness in the judicial system or court system. None of that comes to us now. We just abdicate our responsibilities. I believe that we cannot do that and that we must stand up and be heard.

I thank the gentleman from Ohio (Mr. BROWN) for his untiring work on this issue, bringing to the people the point that none of us coming from our districts disown our business communities. We work with them; and we do a lot for them, I believe, in many, many different aspects, because they are our communities.

But we cannot disown our values tonight and tomorrow, and we must be able to say that the two of those could have come together if we would have had a process where all of our voices could have been heard.

Mr. BROWN of Ohio. Mr. Speaker, I thank the gentlewoman of Houston, Texas, who always articulates so well her views on this and so many other things.

When we talked about articulating our values and representing those values, I think about what the President's

Trade Representative, Robert Zoellick, has been saying the last month or so.

He has been really saying that those of us, whether it is the gentleman from New Jersey (Mr. PASCRELL), the gentlewoman from California (Ms. SOLIS), the gentleman from Ohio (Mr. STRICKLAND), the gentleman from Michigan (Mr. BONIOR), any of us in this institution, Republicans and Democrats alike, who oppose this trade agreement, he really has questioned our commitment to American values and whether we want to join the antiterrorism movement.

In fact, when one supports the position we have taken against these trade agreements, we in fact are supporting American values, because American values are things like free elections and believing in the Constitution and supporting workers around the world, and building a better environment and more consumer safety and food safety, and all of that.

That is why it is too bad that their campaign in support of this and their arm-twisting, especially in the last 72 hours, has taken on a tone of "you are either with us or against us; you are either against terrorism or you are for terrorism, or you are against American values or for American values."

We are joined by two other people. The gentlewoman from California (Ms. SOLIS) is a freshman member who has devoted her entire career to fighting for social justice. The gentleman from New Jersey (Mr. PASCRELL) raised some very important constitutional questions of sovereignty that we touched on and the gentleman from Ohio (Mr. STRICKLAND) touched on earlier, all four of us.

He has really attracted a lot of interest in his views of the Constitution and why this Trade Promotion Authority really does undercut our constitutional provisions and sovereignty.

Mr. Speaker, I yield to the gentlewoman from California (Ms. SOLIS).

Ms. SOLIS. Mr. Speaker, I thank the gentleman for yielding to me. It is an honor to be here tonight to talk about this very important issue, one that hits home directly for me.

As a former State Senator in California, back in 1995 I had the dubious distinction of representing a district where it was found that 72 Thai women workers were held hostage, slave labor here in our own country, 72 women. Some had been there for 7 years. Some were not paid overtime. Some were not even paid minimum wage.

My whole opinion on this matter is that if we do not have enough support here in our own borders at times, how can we also, with all honesty and integrity, go out and expect other countries that have records that are much more egregious than ours to meet these standards that we want to set, that the American public wants to set?

I can tell Members firsthand how difficult it is trying to secure rights for

workers now, for immigrant workers in our own country, along the border and in East Los Angeles, and the city of El Monte in the San Gabriel Valley, which I represent, that people are even being paid minimum wage, and they are sometimes not allowed to bargain or join a union.

I know in Mexico and other parts of Central America and South America and other parts of the world, people are not allowed to join a union. In fact, they are tortured, they are harassed, they are told why they cannot and that they will be fired and they will lose their jobs and they will go hungry.

These are the kinds of things that the public should know.

Mr. PASCRELL. Mr. Speaker, if the gentleman will yield for a comment, the gentlewoman from California has brought up a very important point. Is it not ironic that the very people we invite to our shores, "Give us your tired, your hungry," come here from countries that we are now transporting jobs to?

We are talking out of both sides of our mouth, and the gentlewoman from California has to deal with it, as many of us on both sides of the aisle have to deal with unemployment problems. It is growing. We are losing our manufacturing base.

It just struck me when the gentlewoman was speaking, that very example, that very anecdotal story the gentlewoman is presenting to America, and her heart and sincerity are in it, that we are talking out of both sides of our mouths and inviting people here and then transporting jobs to their countries. They are needed here first. We know our international responsibilities.

Ms. SOLIS. Mr. Speaker, I just want to encourage the public to know that many of us here in Congress do want to have this very serious debate, but we have been left out. In fact, we have been left out all the time. We are losing jobs. In my district, we are looking at unemployment rates of over 9 percent.

I am going to talk about that later on this evening. But the fact of the matter is that the people we are inspiring here in our country to support us, to stick with us, we are telling them one thing and we are doing another. Our actions are showing them that we do not care about the quality of life for our families here.

We have to make a statement, and I am proud to be here to say that we cannot go home and turn our backs on working families. Working families want to know that we are going to take care not only of the domestic front here but also those relationships that we want to set across the country.

I know that in Tijuana, for example, there is a Hyundai factory along the border there. People tried to organize there, some Mexican workers. They

were told not to worry, they will get their opportunity. Women and men were stuck in a situation there that was very unsafe. There were pools of water, electrical lines running, and no safety protections whatsoever. These people were putting their lives at risk to build automobiles that were going to be shipped all over the world and probably right here in our own home States.

I know if people in my district knew the conditions that other people were being forced to work under, they would think twice. And nobody talks about that.

Mr. BROWN of Ohio. Mr. Speaker, one interesting thing that my friend, the gentlewoman from California (Ms. SOLIS), said, people who are supporting these trade agreements said if we do these trade agreements, it is going to lift up living standards in Mexico and in China, and the Chinese will be freer and democracy will break out, and all of that.

There is no evidence of that in China. In fact, it is every bit as oppressive and repressive a regime as it was 3 or 4 years ago, or 2 years ago when the gentleman from Ohio (Mr. STRICKLAND) and the gentleman from New Jersey (Mr. PASCRELL) and I worked against giving China most favored nation trading privileges.

I want to briefly tell a story in line of what the gentlewoman from California (Ms. SOLIS) told.

About 4 years ago, when Fast Track was defeated in this body, and it has been defeated twice in the last 4 years, and will be again tomorrow, I went down to sort of look at how NAFTA worked. NAFTA had been in effect 4 or 5 years then. I wanted to get a picture of the future, and to put a human face on trade and on NAFTA, and on what we had to look forward to if we passed Fast Track.

I went to a home of a husband and wife, and it was nothing; you could not describe it as anything else but a shack maybe 20 feet by 20 feet, with dirt floors, no running water, no electricity.

The husband worked at General Electric, an American company, and the wife worked at General Electric. They each made 90 cents an hour. There were dirt floors, no running water, no electricity. When it rained, the floor turned to mud. This was just 3 miles from the United States of America. If they had been on our side of the border, they would be making \$15, \$17 an hour, perhaps, with good health care benefits, a retirement package, in all likelihood. But on the Mexican side of the border they were making 90 cents an hour.

They were almost in the shadow of the factory where they worked. When one looks at one of these shacks or neighborhoods in these so-called colonias, we see ditches separating

some of the shacks with some sort of effluent running through them. It could have been industrial waste, human waste, who knows. Children are playing nearby.

The American Medical Association calls the border a pool of infectious diseases. They say it has the worst health conditions probably in the whole western hemisphere.

These workers are working 10 hours a day, 6 days a week and cannot afford to have any kind of a decent lifestyle. They work in these wonderfully modern plants, in many cases; but they do not share in the wealth they create. They create this wealth for General Electric, and they do not share in the wealth they create.

In Ohio, in New Jersey, in California, workers help to create wealth for their employer and share in that wealth. They get something for that. They get a decent living standard. They can send their kids to college, buy a car, or buy a house.

Mr. Speaker, I yield to the gentleman from New Jersey (Mr. PASCRELL).

Mr. PASCRELL. I am listening to my brothers and sisters here, and I have listened to folks on both sides of the aisle. I was just as opposed to this when President Clinton was there, and I am an equal opportunity opposer right now.

I want to make very clear to everybody, and particularly to those who stood on this floor and talked about "Buy America," well, we hope there are items that are manufactured in this country that we can buy. We are losing our wherewithal. People earned their identity when they came to this country and worked with their hands to produce products.

This is a critical vote tomorrow, one that between 10 and 20 of us will decide, in the final analysis.

Every poll, and the gentleman from Ohio I think will support what I am going to say, every poll indicates the American people do not want to transfer the powers in the Constitution from the House of Representatives, from the Senate, to the executive branch.

I can cite four or five different ways in which the power of the Congress has been eroded over the past 20 years. This is not the way to do it. So if Members want to buy American, they have to have something to buy. There needs to be something to produce, to be produced.

Then, there are those who want to try to sway, in the final hours, this vote. They say, What we are going to do is make sure that we have trade adjustment assistance; or, in other words, it may not be all that good, but what we will do is we will have some money over here; and, by the way, it is authorized, not appropriated, not appropriated; but they say, we will have some money over here to help those that are unemployed. It has not

worked in the past, and we know how many jobs have been lost under NAFTA.

There are two things, two things, in the final hours of this great debate, with respect to all sides here, two motivating forces of the opposition, or those supporting giving the President this sole power and leaving us out, regardless of what words they put in there: stimulus and national security, stimulus and national security.

They have sent some of the first-line troops out to talk about national security, that this is important: if the President does not have Fast Track, we cannot defend America.

Mr. STRICKLAND. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. STRICKLAND. We have been talking among ourselves in a bipartisan way about the crisis facing the steel industry in this country. The President himself has said that maintaining a domestic steel industry is a national security issue. I believe it is. How can we produce the military hardware we need if we do not have steel that is produced domestically, without having to rely on foreign steel?

□ 1830

These are serious matters. And the gentleman from New Jersey (Mr. PASCRELL) mentioned transferring our authority, the House and Senate authority, to the executive branch. What really troubles me is then the executive branch transferring that authority to some international body of unelected representatives, so that the American people have no representation, and I think that is what we are facing tomorrow, is the possibility of taking an action which can further erode the sovereignty of this Nation. I think that is a gross mismanagement of the constitutional responsibilities that we took upon ourselves when we stood for an election in this House of Representatives.

Mr. PASCRELL. I might add that there is no real evidence to back up the contention that this is an economic stimulus. In fact, if all of the data are in, whether we are talking about the balance of trade, which is now \$435 billion, no one wants to address that. The relationship between that balance of trade and what goes on in the economy in the United States is profound, is profound.

There is no real evidence that points out what the President's press secretary said on Monday. He said, the President believes that Trade Promotion Authority is the stimulus in and of itself to keep the economy growing.

Well, first of all, Fast Track is necessary for the administration on two fronts, the World Trade Organization and the proposed Free Trade Area of

the Americas, FTAA. They are both long-term goals that are not going to bring any stimulation to this economy over the next 2 or 3 years. We are only kidding ourselves.

In terms of the WTO, the World Trade Organization, disappointed that this body has progressed to where it should be, within this Fast Track bill there is nothing we can do about that either, nothing. The WTO can be a body that advances the ball on such issues as labor and the environment but only if we force the issue, and I might add, over 25 years we have forced the issue on workers rights and environmental protections to no gain, to no gain. It has been talk, it has been cheap, and it has been profuse, but it has not brought a change about in our trade policies whatsoever.

The high American standards that are commonplace worldwide if we push this issue, we know that other countries do not have the labor standards that we have and environmental standards. We understand that. We understand that. We are not minimizing other nations. What we are saying is we cannot be foolish in the face of what we want to negotiate. Let us have reciprocal trade agreements, and we have had reciprocal trade agreements, where we, on a piece of paper, agree that we are going to respect the rights of other nations to decide their own fate.

Why should we keep our rates low while other nations will not allow our goods in? And, in many cases, the people in those countries cannot afford our goods and services, and we are sacrificing, we are sacrificing the brothers' and sisters' jobs in this country.

Mr. BROWN of Ohio. Reclaiming my time, during the NAFTA debate in 1993, we stood in this hall, the gentleman from Ohio (Mr. STRICKLAND) and I, for much of the summer doing discussions like this and into the fall and into November. And when the vote was held, one of the things the other side always said was NAFTA will create jobs. It will be an economic stimulus, if you will. It will right our trade imbalance.

Our trade imbalance in 1994 when NAFTA took effect in January of that year was \$182 billion. That meant that we imported \$182 billion more worth of goods than we exported. The NAFTA promoters and the free traders and the hot-shot Harvard economists and the President and the former secretaries of state and the newspaper editors, CEOs, all said this will get fixed.

Do my colleagues know what the trade deficit that was just announced is? \$439 billion. That is billion with a B, and that is a \$250 billion growth in trade deficit. What that means, according to President Bush, Sr., Papa Bush, he said, every billion dollars of trade, either deficit or surplus, represented between 19,000 and 20,000 jobs. So if you have a billion dollar trade deficit, that means you lost 20,000 jobs to overseas.

If you have a billion dollar trade surplus, then you gained 19, 20,000 jobs. Well, a \$250 billion trade deficit, it went from \$250 billion worse than it was, means 5 million jobs.

Those are generally industrial jobs. They are well-paying jobs. They are jobs that pay benefits. They are jobs where people pay into Social Security, a fund that, because of Republican tax cuts, is now more in jeopardy than ever before. They pay into Medicare, a fund that is in jeopardy because of Republicans bailing out insurance companies. And look where we are when we pass these kinds of trade policies. It is simply not working when we have those kinds of trade deficits to get worse and worse.

Mr. STRICKLAND. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. STRICKLAND. Mr. Speaker, I thank the gentleman from Ohio (Mr. BROWN) for yielding.

The gentleman's discussion of the imbalance in our trade reminds me of a friend that I had some years ago who frequently played the Ohio lottery. He would put 50 or more dollars every week into the Ohio lottery, and, occasionally, he would win \$10 or \$20 or \$50. And, guess what, he was very free in telling everyone, oh, I hit the lottery. He was happy that he got his \$50, but he seemed to have forgotten that week after week after week he had lost 50 or more dollars.

That is the way we talk about the trade situation here. The administration and those who are for Fast Track will say, oh, since NAFTA we send more agricultural products to Mexico. They do not want to talk about the flood of products that are coming in from Mexico and from other countries.

Mr. BROWN of Ohio. As living standards continue to go down in Mexico, I would add.

Mr. STRICKLAND. Absolutely. They want to talk about the modest increase in exports, but they do not want to talk about the multiple thousands of jobs that have been lost as a result of the flooding of imports.

As we go to the shopping malls to buy our holiday gifts, it is very, very difficult, as my friend, the gentleman from New Jersey (Mr. PASCRELL), had said, it is very difficult, impossible to find a television that has been constructed and built in this country. It is very difficult to find many products that are American made, and that is because we are being flooded by cheap imports, built in some cases by slave labor, and in countries that are absolutely opposed to our way of life, to our democratic institutions, and yet we continue to do this.

It is beyond belief that we could be contemplating doing tomorrow what some want to do.

Ms. SOLIS. Mr. Speaker, would the gentleman yield?

Mr. STRICKLAND. I absolutely would yield.

Ms. SOLIS. Mr. Speaker, just to touch briefly and say, on NAFTA and what is happening in Mexico, there is a big discussion about the rain forest and the decimation of the rain forest in Mexico and South America. There is a big issue regarding timber coming into this country and people from the Mexican side that are saying we are also losing our well-being and our livelihood because we are forced by big corporations to cut down the timber and then send it here and into other parts of the world.

We are talking about erosion of our environment. We are talking about degrading the quality of life for Mexicans as well.

So who is winning? The big corporations, the big factories. The folks that run those operations do not live there. They live in the ivory tower, but they are taking and reaping some of the resources, the natural resources that currently exist in that country.

I can tell my colleagues that Mexico still has a long way to go in terms of providing protections for the working class people there that are suffering every single day and not seeing any kind of return on their work.

Mr. BROWN of Ohio. Let me shift for a moment to an issue that we have all talked about before, and I would like the last 10 minutes or so to discuss for a moment and that is the issue of food safety. We see in this country 5,000 people a year die from food-borne illness, not nearly all of them from imported fruits and vegetables, but certainly there is a problem in our food inspection in this country, too, but some significant amount comes from that. We see about 800,000 Americans get sick a year. About 1/10th that many get hospitalized from food-borne illnesses.

Yesterday, Dr. Mohammad Akhter, the top public health official in this country, who is the executive director of the American Public Health Association, was talking about Fast Track. And he said that Trade Promotion Authority on which we will vote tomorrow, he said that we can count on the fact that if we pass Trade Promotion Authority and more trade agreements like this we will see more food come across the border and into this country by truck and plane and train and all, more food come into this country that is not inspected. He said we will see more infectious disease outbreaks. We will see more illness, food-borne illness. We will see more deaths. We will see more hospitalizations.

When we consider that when NAFTA passed, 8 percent of fruits and vegetables in this country that we, 8 percent of the imported fruits and vegetables in this country were inspected. Today, it is 1/10th that number. It is .7 percent, 7/10s of 1 percent. That means for every 140 crates of broccoli that come across

the border into this country, one crate is inspected. For every 140 crates of peaches, one crate is inspected.

I have stood at the border in Laredo, Nuevo Laredo in the Texas-Mexican border; and I have seen the FDA, the way that they examine broccoli when it comes in. They do not have high-tech equipment there. They cannot get immediate reads on antimicrobial contaminants, on pesticide residues, on anything like that. They simply take two bunches of broccoli, slam them down in a steel crate and look for any insects that might come out, dead or alive. If live insects come out they spray the truckload. Other than that, the products move on.

We have not put the kind of equipment at the border to detect antimicrobial contaminants. We have not put at the border facilities and equipment to be able to detect pesticide residues, and we know that there are pesticide residues on there because pesticides that are illegal to use in the United States are still manufactured here and sold to developing countries, put on fields and sent back into the United States.

We are not protecting the American people. We pass Trade Promotion Authority, according to Dr. Akhter, the top public health official in the United States, we are asking for more food-borne illnesses, more deaths and more hospitalizations. And we owe it to this country, to people that go to grocery stores, to all of us that eat at our kitchen table and go to restaurants and eat fresh produce coming in from other countries in the world, we owe it to them to do a much better job on this.

Mr. STRICKLAND. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. STRICKLAND. I believe when an American consumer goes to a supermarket to buy food or fresh produce they have a right to know where that food comes from, and I believe we need labelling of country of origin. I believe American consumers, if they are given a choice, will most of the time choose to buy products that are grown and manufactured in our country. But the fact is they do not have a choice because they are deprived of that necessary information, and one of the things they would like to see done is to require that the country of origin be made available to the consumer. Then the consumer can choose. But without that information the consumer is deprived of the opportunity of making the choice to buy the American-produced food or the American-produced product.

Why should we keep that information from the American consumer? It just does not seem reasonable to me that this House would not take action to provide this information so that the American consumer can be informed.

Mr. BROWN of Ohio. At the same time, we have the ability to raise standards around the world. We have a choice tomorrow when we vote for or against Trade Promotion Authority, so-called Fast Track, we can continue to dismantle our standards, to weaken our truck safety laws, to weaken our food safety laws, to lower our environmental standards, to dismantle our safety in the workplace standards. We can vote that way or we can cast a vote against Trade Promotion Authority and begin to lift up food safety standards for ourselves and for the rest of the world and begin to lift up truck safety standards, to begin to lift up environmental standards.

Whether it is pesticides, whether it is environmental laws, we can do better. Why should we say to an American corporation that goes to the Mexican border on the Mexican side, if you are going to produce cars in that country you are going to follow the same laws. In terms of what you dump into the sewers, what you put into the air, whether you pollute the environment, you are going to follow the same laws that you do in the United States. How about when you go into Mexico and build cars? Then you are going to follow the same worker safety protection laws that you do in this country.

It is outrageous that these American companies go there. They brag about how green they are in the United States and how well they treat their workers. They go to a developing country. They do not treat them well at all.

I yield to the gentleman from New Jersey (Mr. PASCRELL).

Mr. PASCRELL. Mr. Speaker, I am going to bring up a sore subject some of us may not like, but let me bring it up anyway, because this is it. This is the vote tomorrow, and I am very concerned about members of my own party, to be very honest with you, and I respect all persuasions within my own party, regardless of where they fall on the spectrum.

I have an inner laugh when I hear our party needs to be the party of inclusion. We need to reach out to business. Well, let me tell my colleagues who the people are who have been at my door in the last 2 years.

□ 1845

They have been owners of textile mills, they have been owners of machine shops, they have been owners of cable companies. Owners, entrepreneurs who hire the folks that we are all concerned about, but we should be concerned about those who put the capital up to go into business in the first place.

So I want to make sure to tell my brothers and sisters in my own party that we want to be inclusive. Both parties want to try to be inclusive in whatever way they choose. But do not come back to me and say we are never

going to get the support. And I think I have a right to talk about this, talk turkey here tonight. That is how critical this vote is.

We have an erosion of the Constitution of the United States. We have had an erosion of jobs. We have had an erosion of food safety. We do not need a further erosion. We do not wish to deny this. We do not want to stick our heads in the sand and say things will get better. They did not get better with NAFTA, and they are not going to get better with this vehicle if we support it tomorrow.

I want to thank my colleague for getting us together, the gentleman from Ohio, because he has stayed on this case. He has not given it a one-shot deal. The gentleman has worked on it since I have been here, for 5 years, and I commend him.

The American people understand this better than we do; and the American people, in every poll, have indicated they want their jobs protected. They understand we need to trade with other countries. They know that this is a world economy, that we live in a global village. But the folks in my town work in Paterson, New Jersey. They love the world. They have been fighting in wars, and they will defend us. Are we going to defend their jobs?

And if it is textiles and machinery today, what will it be tomorrow? That is the question that every person who is a Member of the House of Representatives must ask themselves tomorrow before they vote. Textiles, cable wire, machinery, leather goods today. What is tomorrow? Or shall it be, whose ox is gored? That is not what America is all about. America is about our being the last hope here on this floor to protect the interests of working families. We are the last vestige of hope.

Mr. BROWN of Ohio. I yield to the gentlewoman from California (Ms. SOLIS).

Ms. SOLIS. The gentleman just hit a real soft spot for me in my heart. My mother, who is now retired, worked for about 25 years for a big toy maker in my district, standing on her feet most of her 20 years there, and now has some very serious problems with her legs. That company employed over 2,000 people in our community. They left. They went to Mexico, then they went to China.

We now import those same toys. Many of those toys place harm upon our children because they do not meet our consumer safety standards. And nobody is crying out saying, wait a minute, what have we done here. We let go of these jobs, we let go of those pensions, those health and welfare benefits that went with those families and jobs. They went somewhere else, yet the people making those same items do not have any protections and maybe get 10 cents a day for producing products that they end up sending back

here that somebody buys for \$20 or \$30. That is wrong.

Mr. PASCRELL. And the answer to the gentlewoman's mother is, well, if your job is extinguished, you will have to go to another job, a service-related job.

I ask the gentleman from Ohio, is that what has happened under NAFTA? Have we seen those service jobs? In fact, what have we seen?

Mr. BROWN of Ohio. In Ohio, we are threatened right now with losing 3,000 jobs at LTV Steel. People say, well, the economy will change. If they lose their jobs, they will find another job. They clearly will not find another job close to what they are making.

Before closing, I thank very much my colleagues, the gentleman from Ohio (Mr. STRICKLAND), the gentleman from New Jersey (Mr. PASCRELL), and the gentlewoman from California (Ms. SOLIS), for joining me, and also earlier the gentlewoman from Texas (Ms. JACKSON-LEE) and the gentleman from Michigan (Mr. BONIOR).

Let me sum up with this: we in this country believe in the free market system. We believe in free enterprise, but we also believe in rules. The rules are that we have environmental protections, we have minimum wage laws, we have worker safety protections. We should believe in the same kinds of rules in free trade. We believe in trade, but we think we should have similar kinds of rules.

We should have environmental standards to govern the rules of trade. We should have worker safety standards and labor standards. It has worked in this country to raise our standard of living so we have a huge middle class. Those same kinds of rules could work internationally, in the global economy, if this body tomorrow defeats trade promotion authority and begins to write trade law that lifts people up all over the world. I thank my colleagues for joining me tonight.

TRADE PROMOTION AUTHORITY

The SPEAKER pro tempore (Mr. FLAKE). Under the Speaker's announced policy of January 3, 2001, the gentleman from Texas (Mr. BRADY) is recognized for 60 minutes as the designee of the majority leader.

Mr. BRADY of Texas. Mr. Speaker, the need for Trade Promotion Authority is clear. Approval of TPA, as it is called, is critical to the economic prosperity of our Nation, of Texas, and regions like mine, for the economic security of America, for the future. The President urgently needs this authority. He has made this one of his very few top priorities before Congress adjourns in the next few weeks. He needs it to level the playing field for U.S. companies by removing barriers abroad to American exports. In other words,

he wants to be a salesman for American companies, for American jobs, for American farmers.

Every President until 1994 has had this authority. But we have been out of that game, we have been out of that playing field, and it has cost us literally tens of thousands of jobs. No successful business survives without a strong sales force. So why do we think America can succeed over the long haul without giving the President the tools he needs to promote American goods and services in the international marketplace.

In the end, Congress, Members of Congress, will have the ultimate decision on whether any proposed agreement is free and fair, in America's interest. I want that authority. I want the responsibility to look at an agreement to open new markets with another country for our American products and goods. I can determine whether it is good for this Nation, for my district, or not.

America is falling terribly behind. There are more than 130 trade and investment agreements in the world today. One hundred thirty. How many is America a party to? Three. That ranks the United States behind those free enterprise bastions of Cuba and Morocco, although I think we edge out Tunisia by one agreement. That is embarrassing.

Congress has forced the United States to sit on the sidelines. By not granting our President the ability to promote trade, our international competitors are forging ahead. They are successfully completing their own trade agreements that puts U.S. companies at a competitive disadvantage. For example, the European Union has trade and customs agreements with 27 countries and another 15 accords in the pipeline to date.

To explain it another way, and I am not much of a gambler or a golfer, but my friends who golf regularly and make a friendly wager will say that oftentimes that wager is won or lost on the first tee as people decide what the rules are going to be and when they give strokes to each of the competitors. Well, America is not on that first tee when it comes to laying out the rules for trade, so our companies are not getting fair rules and we are not getting fair strokes. We are, in fact, put at a terrible disadvantage.

Everyone knows their own region better, but for Houston this is about jobs and our economic future. We have tens of thousands of new jobs at stake with this legislation. And as I have seen it, perhaps no State or region will benefit more or create more jobs from the passage of TPA than ours. Trade is already a large creator for America and a large creator for Texas. We are the second largest exporter in the country and the fastest growing. The Houston region is the largest and fastest grow-

ing export region in Texas, and now nearly two out of every three new jobs that are being created in our region come from international trade. That is good news for employees who have been laid off from Enron, from Continental, from Compaq, and from other very good companies. We need to get them back up on their feet and in new jobs, and trade is the way to do it.

We sell or transfer what the world wants to buy, from agriculture to energy, petrochemicals to computers, construction services to new technologies and insurance. These are our competitive strengths. In fact, these are America's competitive strengths, and with the second largest port in America, great international air routes and airports, and a proximity to growing Latin American markets, Trade Promotion Authority is critical to our economic future. Truly, I do not understand how any Member of Congress who has constituents in the Houston region can justify not opening other countries' markets to America, to Texas, to Houston businesses and farmers, because it is our jobs locally that are at stake.

When we look at what the opponents say about it, this legislation includes some of the strongest environmental and labor language in trade history in America. Each country must not only rigorously enforce its existing laws, environment and labor, but seek ways to further protect the environment and to further raise worker standards. Here is a good example in real life in the environment that I know of and have seen firsthand. Through NAFTA, the borders have been open between Texas and Mexico, America and Mexico. But because of that trade agreement, we now have, along our border, over 18 environmental projects that total more than \$1 billion. That is \$1 billion, new dollars, that are in projects to clean our air, to clean our water, to clean the wastewater and sewer in our area, and generally to create a much better environment in an area that desperately needed it that never would have happened without trade.

When we talk about labor standards and worker raises, we can look at one of our trade agreements that we do have with the Andean countries that includes Bolivia and Colombia and other countries. When we listen to them, they say as a result of America trading with them, not only has America created jobs, but in terms of labor standards, Colombia, for example, in that region, has created more than 100,000 new jobs. They used to be into narco-trafficking, the drug trafficking trade, and now they are in legitimate business.

They have, for example, the cut flower industry that is now a model industry that now has much higher wages for its workers, has child care and training and education for its women

employees. It is helping these people buy homes and improve their homes that they never had a chance to do before. It has raised the worker standards for that region. And Colombia, in fact, has launched a "cleaner Colombia" effort that these businesses are part of to clean up the environment down there. So we are seeing higher labor standards, and we are seeing a greener world because of trade. And they could have more of these model companies if America would just simply let them.

As I see it, and when I listen to them, they have watched the way America has pulled itself up by its bootstraps, and they do not want just aid, they want to trade. They want to compete. They want to try to build themselves as America has built itself, and they are right to do so.

I am convinced when people say trade hurts the environment, common sense tells us they are wrong. For countries who are so poor or their children going hungry, where their families shiver through the night, protecting the rain forest, protecting the Monarch Butterfly is not high on their priority list. The fact of the matter is trade, raising worker standards, giving people a job, helping raise the environment, that is the best way to protect and preserve the environment around the real world. Not what we hear in Washington, but the way it works in the real world.

The truth is, unfortunately, for opponents of Trade Promotion Authority, no language will ever be tough enough. Business has already made tremendous concessions. The reasonable objections of the environmental community and those really looking at labor from a reasonable standpoint have all been met. They have given up a great deal in order to try to work with our Members across the aisle who simply do not want free and fair trade, who are afraid, unfortunately, of competition. But they are simply not going to support this.

We are fortunate that we did have some trade-oriented, fair trade-oriented Democrats who helped craft this bill. It is the best compromise that can be reached, and I think they played a key role in making this the best trade legislation that Congress has ever crafted.

□ 1900

Mr. Speaker, this surprises people. Because we talk about competition, but trade is very good for consumers. By the most recent estimate, American families save nearly \$2,000 a year because of competition that trade brings about. What that means is that. For an average family like ours or yours, we can make one trip to a grocery store a month free due to the savings from international competition. Those are the savings we see because we have better and more affordable cars, clothing, toys and TV sets. What that means this

year is that parents will have one or more gifts under the tree for their children due to savings because of competition.

The bottom line here is there is a principal attached to this legislation. And here it is. If Americans build a better mousetrap, we should be able to sell it without penalty anywhere in the world. If someone builds a better mousetrap, we should be able to buy it without penalty for our families and businesses. This legislation really provides us a very clear choice for voters to see. There is a choice between defeatists who believe that American products are not good enough to compete, or those of us who believe that enhanced trade is America's future.

Mr. Speaker, I am convinced that we should not retreat from fair trade competition. We should insist on it. Competition is America's strength, and it is the key to our high-tech, high-wage future, and truly tens if not hundreds of thousands of jobs are at stake.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. PORTMAN).

Mr. PORTMAN. Mr. Speaker, I thank the gentleman, and I thank him for having this Special Order. I heard most of his remarks, and I want to echo them and add a little to it.

This debate here on the floor tomorrow is really a test of this Congress and this Nation. Is our country going to move forward not just in trade but in liberalizing economies all around the world, or are we going to go back and pull back in a way that hurts not only our own economy but the global economy? That is the test we have tomorrow with Trade Promotion Authority which will be on the floor of the House.

I heard some of the discussion earlier by some of our colleagues on the other side of the aisle, and their position confused me. This should not be a tough vote. All we are saying is that the President has the ability to go out and negotiate trade agreements. It is not a particular trade agreement. This Congress will always have the right to vote yes or no on a particular trade agreement.

Are we sensitive to labor, environmental, and congressional consultation issues? Yes. This legislation is more sensitive to those issues, addresses those issues in a more direct way than any Fast Track legislation or trade promotion legislation before this House.

In 1997 and 1998, we had a number of Members who were supportive of this legislation when it was called Fast Track but expressed some concern about labor and the environment. We have addressed many of those concerns, and this legislation moves in a way that should make it even more attractive to those Members who expressed those concerns before.

I am concerned that some of those Members have now said that they can

somehow cannot support a bill that is more sensitive on these issues, such as labor and the environment and the degree to which Congress plays a role.

The benefits of trade should be obvious to everybody. Economists tell us that 30 percent of the growth that we have seen in our economy, the tremendous growth that we have seen over the last decade, is directly attributable to exports. Thirty percent is because of exports and enhanced trade.

In Ohio, trade is extremely important. Ohio is now the seventh-largest exporting State in the Nation, with nearly \$30 billion in exports last year alone. This is going to help people in my district to get jobs, to retain their jobs, and to be able to allow our area to continue to grow.

Because of jobs created by trade, we are not just increasing our exports, we are also getting better jobs. We know the jobs involved with trade pay, on average, 13, 14, 15, 16 percent higher than jobs not involved with trade. These are not just jobs. These are good jobs.

Since we lost Trade Promotion Authority in the last administration, our Nation has fallen behind. The fact is that we now have 130 free trade agreements around the world. The United States is party to just three out of 130 trade agreements. During this period of time that the United States has not had trade negotiating authority, the ability for a President to negotiate, our competitors have continued to enter into agreements, helping jobs in their countries and taking away markets that should be ours, U.S. exports.

For example, since 1990, our toughest competitor which is the European Union, has completed negotiations on 20 free trade agreements. Twenty. Currently, they are negotiating 15 more free trade agreements. In fact, in the last year they have entered into a free trade agreement with Mexico, which is the second largest market for American exports. While we sit back and talk about how we cannot give the President even the ability to go out and negotiate agreements, our competitors around the world are aggressively pursuing markets that should be ours, and it is hurting the United States' position in the global economy. This means American exporters encounter higher tariffs, if not closed markets altogether, in many countries around the world when other competitors of ours have a more open market to go into and have lower tariffs.

Our lack of free trade means our government is sitting on the sidelines while other countries negotiate international rules in a multilateral way with a lot of countries that come together. They decide on international rules on everything from e-commerce to agriculture. This is hurting us, too. It is hurting our exports and economy.

The question has come up earlier tonight from Members talking on the

other side of the aisle primarily about why cannot we just have the United States enter into these agreements without Trade Promotion Authority. Why do we need Trade Promotion Authority?

I would suggest tonight that the reason is simple. The President cannot go out and negotiate with other countries unless he has the ability to say, this is it. This is the agreement we have agreed on after a lot of tough bargaining and negotiations. We will now take it to our legislature for an up-or-down vote. That is what other countries can do.

Without this trade negotiation authority, a President cannot do that. Congress can still vote yes or no. They just cannot amend it to death. Congress cannot nickel and dime an agreement that comes back to the Congress, and Congress has voted yes and has voted no in the past. We can simply do that.

This kind of procedure where you come to an agreement and bring it back for a vote is common. Think about labor negotiations. If you are a member of a union out there, do you have an ability to amend an agreement that comes to you for ratification? Management and labor sit down. They hammer out an agreement. They come together with a fragile agreement where both parties have put their best offers on the table. The membership then decides yes or no.

Think about a merger. What happens is, you come up with a decision. Once it is negotiated, it goes to the board of directors. The board of directors says yes or no. They do not renegotiate to death. If so, you could never come to an agreement. The other side would never be willing to put their best offer on the table thinking it could be amended to death. It is common sense. There are all kinds of analogies in the real world.

Passing Trade Promotion Authority will help reestablish this Nation's global leadership in the area of the economy and of opening up markets around the world. This is important to our economic security in this country, to more jobs, but I would suggest that it is also important for our national security. In the wake of what happened on September 11, let us not forget that those countries most closed to trade, the economies that are most closed are those economies that are most likely to be breeding grounds for terrorists. That is factual. If Members look around the world, whether it is Afghanistan or other countries where they have a closed society and a closed economy, those are the places where we tend to see the kind of terrorism and the breeding ground for terrorism and the sponsorship of terrorism around the world.

This does relate to the kind of world my kids and grandkids are going to

have, not just in terms of their economic security, the kind of jobs that they will be able to access to achieve their dreams, but the world that they are going to live in in terms of national security.

Our prosperity is not only threatened by terrorists, it is threatened by the worsening economic situation around the globe. So Trade Promotion Authority addresses not only national security but also the global economy that affects us here in the United States. Unless we can begin to improve the economic performance around the world, we are not going to be able to see our economy perform the way we would like it to be.

By negotiating free trade agreements, opening up new markets for U.S. goods and services, we are taking an important step toward helping in that long-term economic picture. I think it is time, past time, for Congress to act. We have not had trade negotiating authority, Trade Promotion Authority, Fast Track authority, whatever one wants to call it, in the United States since 1994. Not since 1994. During that time, again, America has taken a back seat. American has not been in the driver's seat. America has fallen behind in relation to our global competitors.

Now we need to get back in the front seat to drive this home for our economy, for the global economy, for helping to open up other countries around the world, reducing barriers, tariff and nontariff alike, and so we have a world safer for our kids and grandkids.

I hope that Congress will act to stabilize our economy and to make sure that this Congress does not go on record saying that we are going to go back in terms of opening up trade and opening up markets, but rather this Congress is going to give the President the ability to go out and negotiate, be a tough negotiator, but negotiate agreements that are in our interest around the world.

Mr. BRADY of Texas. Mr. Speaker, the gentleman is one of the leaders of the Committee on Ways and Means. The gentleman is familiar with legislation that opens up markets to American farmers and businesses and jobs.

One of the excuses we hear from people that do not support this is that Congress has no say in this legislation. The President negotiates it and usurps our constitutional power, that we have no say in shaping what an agreement will look like. My understanding is that the legislation provides more consultation than ever in history, but what are the gentleman's thoughts?

Mr. PORTMAN. Mr. Speaker, the gentleman is correct.

First, Congress has the ultimate say. Congress can vote no on the agreement as it comes before us.

Second, Congress has the ability to forge an agreement, and the adminis-

tration knows that. In this case our U.S. Trade Representative, Ambassador Zoellick, who is a tough negotiator, is going to be mindful of the fact that what he brings to this Congress has to pass muster here.

In this legislation we have unprecedented congressional consultation and involvement. Farmers, one thing that I think is an improvement in this bill, as compared to what we voted on in 1997 and 1998, the Committee on Agriculture has a specific role and has the ability to be in consultation with the administration to help shape that agreement.

That is extremely important, because it is probably the most competitive industry in America, is the agriculture industry. Our ability to export our agricultural products around the world is not being maximized because there are barriers to our products. So we are going to have more consultation than we have ever had. The administration will be forced to deal with us to help forge the agreement; and, ultimately, we have the ability to say yes or no.

Mr. LINDER. Mr. Speaker, that is precisely the point. Absent Trade Promotion Authority this House sits silent. The President can go to any nation in the world and negotiate a treaty and take it to the Senate, have the Senate debate it, amend it, and take it back to the country with whom we have reached an agreement and ask them to negotiate for a second time. We sit silent with no role.

This is not a trade agreement we are talking about. This is a process to allow the President to negotiate with any country in the world some trade agreement that then we will be in judgment on. It will come back to us, and we can vote yes or no. But this House will have a role. Absent this, we have no role.

There are 130 trade agreements in the world. We are party to three of them. After NAFTA, Mexico has agreements with 28 or 29 different countries. The European Union, 27. We are not a party. We sit silent. I am astonished by my colleagues that do not want to have a role. This President understands that free trade is necessary for freedom. It is a moral value.

□ 1915

He will reach agreements. If he has to go some day by treaty to Chile, Argentina, Brazil, he will go there. He will negotiate with the Senate, and we will sit silent. So if we vote for Trade Promotion Authority tomorrow, which I intend to do, we are saying that the House has a role, there is something we can do. He can bring back an agreement that we can defeat. Whoever does not like the provisions of the agreement that comes back can vote no. We can kill it. But, absent this agreement, we sit silent.

Mr. BRADY of Texas. I know the gentleman from Georgia has long played a

leadership role in trade, and I know you listen very carefully to those who create jobs in Georgia. What do your farmers, your small businesses, your technology companies, your financial groups, those who are creating jobs in Georgia, what do they tell you about this legislation?

Mr. LINDER. We have the lowest tariffs in the world. We have thousands of Georgia companies selling goods and services into a global economy. We want to lower the tariffs of other nations so that we can be competitive. Our ability for the President to negotiate with other nations and lower their tariffs will only improve our sales. It will only help us.

More than half of the Georgia companies that sell goods and services into the global economy are small and medium-sized businesses. That is our growth rate. Twenty-five percent of our economic growth over the last 10 years has been due to export. We simply cannot throw up a wall around us.

Chris Patten said when we were talking about NAFTA in 1993, I believe it was, Chris Patten was the last British Governor of Hong Kong, and he gave a speech in which he said if a space ship had come to the Planet Earth in the 16th century, the 15th and 16th centuries, and landed in the teepee huts of North America, to the typhoid-ridden streets of London and the warring streets of Paris, and wound up in the Ming Dynasty, they would have concluded within a minisecond that China would rule the world for centuries. She had just invented gunpowder and a printing press and had a huge cultural growth rate; the people were happy and well fed and economic growth rates were rapidly climbing. And then he said this: and then she built a wall around herself, and history told a different tale.

The future is for knocking down walls, whether they are tariff or nontariff barriers. My grandchildren deserve the privilege of buying the best product at the lowest rate, and you do that by knocking down the walls to trade.

Mr. BRADY of Texas. I yield to the gentleman from Michigan (Mr. KNOLLENBERG).

Mr. KNOLLENBERG. I thank the gentleman for yielding. I just have a few moments here that I wanted to take, and I appreciate the gentleman from Texas yielding, and I appreciate the gentleman from Georgia here with the gentleman from Texas (Mr. BRADY), obviously, and the gentleman from Ohio (Mr. PORTMAN). Your work on agriculture is one part of it.

I want to talk a little bit about leadership, because I think one of the things lacking here is if the U.S. does not garner some agreements around the world, we are abdicating our role as a leader. We are a national leader, and tomorrow's vote on Trade Promotion

Authority is critical to the future of this country.

It is important for Members and Americans to understand just what is at stake here. So I appreciate the opportunity to come here with you gentlemen and discuss why it is so important that we talk about this and reinforce TPA.

Free trade is about a lot of things. It is about expanding the economy, new jobs, strengthening relations with our allies and lifting the developing world out of poverty. On this, one of the things that the U.S. does best is it leads. But in this arena, it seems to me that they are failing. They are dropping the role that they play in such a huge way and have played over the last several decades.

It is only proven through action, whether you go back to World War II, whether you are talking about the rebuilding of Europe, fighting communism or protecting the environment, growing the economy or fighting terrorism, which we are doing now, that is the real essence of America, and I think we have to express ourselves. We do it best tomorrow by passing TPA; and we, frankly, risk our opportunity, we are abdicating our position of leadership, if we do not in fact promote international trade in a way that gives the President the authority that is so vital to America's well-being.

Let me just give you some numbers in my own home State of Michigan. Last year 372,000 jobs were dependent upon manufactured exports. Last year we sold some \$52 billion of goods to more than 200 foreign markets, which is the fourth most in the country.

We need to begin to aggressively break down the barriers to American exports so that we can create these new jobs.

I would just add a thing or two. This is the thing that bothers me the most. With more than 130 preferential trade agreements in effect in the world today, the U.S. is only a party to three; the NAFTA agreement, and, of course, the agreements with Israel and Jordan. In contrast, and this is the bothersome part, the European Union has 27 agreements in effect, 20 negotiated in the 1990s, and right now is currently negotiating 15 more.

Mr. BRADY of Texas. I would say to the gentleman, Europe is running circles around America and around American jobs.

Mr. KNOLLENBERG. They are indeed. One of the problems with that, and to just give one example, Canada has a free trade agreement, obviously with us; but they also have one with Chile. I think the gentleman mentioned that a moment ago.

Just to give one example, because Canada does have a free trade agreement with Chile, we do not, a farm tractor costs something like \$15,000 more if purchased from the U.S. than

its Canadian counterpart. If we had, obviously, an agreement with Chile, we would be selling tractors to Chile. But you know who they are going to buy them from? The Chileans are not going to buy them from us.

The same thing could be expressed about potatoes. They buy potatoes from, guess who, Canada, because they have an agreement. Burger King is big in Chile, and that is another reason we should look at it.

I might just say this, that I think it is a sorry state for the U.S., which is the most open society in the world, that we begin to close our doors to allowing our products to get into other countries.

I think we have a great opportunity tomorrow, if we do not fumble it and pass this bill. I would just say that we can break down the barriers to U.S. goods and services and that Chilean situation would not occur and we would have a market for our products overseas.

What I like to always say is the jobs stay here, the products go overseas, and the workers earn the money here and keep their job. We have to do more of that if we are going to be the leader and maintain our leadership in the world.

So I particularly enjoy having an opportunity to spend a moment or two this evening on this. I would simply yield back to the gentleman from Texas.

Mr. LINDER. If the gentleman would yield further, all of those numbers are the numbers I have. The 15,000 is the tariff on the Caterpillar tractor. We have the lowest tariffs in the world. We would like to be able to have our President negotiate with every nation in the world to lower their tariffs to our levels. We ought to be in favor of that. Then we ought to be able to look at that agreement when it comes back to the House and vote it up or down.

But this bill we are talking about tomorrow only enables the President to bring us a measure. It only enables him to go out and negotiate a measure and come back to the House and the Senate for an up or down vote. This is a 25-year-old process.

I do not blame the President of Chile if he does not want to negotiate with the United States twice, once when they sign the treaty and another time when the Senate alters it. It is a sensible approach that just brings the House into the game.

For our colleagues that oppose this, I am always surprised at the variety of reasons I hear for the opposition, because my answer is always then, why do you not want to have a say? This is the only way this House will have a voice in any trade agreement in the future.

I, of course, have been actively involved in trying to pass this. I hope it will pass tomorrow. The President de-

serves this. I was in favor of this when President Clinton was in office. I worked hard for it when he wanted it passed. I will work just as hard for it tomorrow.
